It was stated in the last annual report, that it was believed the time had come, when the construction of the Lehigh and Susquehanna Railroad extension below White Haven should be pushed to an early completion, not only above Mauch Chunk, but also between Mauch Chunk and Easton. The Board have since acted upon that conviction, and the work has been driven forward with vigor at all points. The road is now open to the head of the canal above Mauch Chunk, a distance of over twenty-three miles, or about fifty-four from Wilkesbarre (as the locomotive runs,) with a branch over eight miles long, from White Haven to the Nescopec mines; and coal trains have been running regularly between these several points, since the opening of navigation this Spring. It is believed, that unless we meet with unexpected disappointments, the road may be opened through to the Delaware River, before the close of the present year. The grading from Mauch Chunk to Easton is nearly finished, and for nearly half the distance, embracing all the rock cuts, and most of the earth excavations, is for a double track. All the masonry along the road, including bridge abutments and piers, has likewise been constructed for two tracks, and our Chief Engineer states in his report, that the additional cost of grading for a double track throughout will be very trifling.

Believing that it is true economy in the case of a road destined to do so heavy a business as ours, to build it in the most thorough and substantial manner, our Chief Engineer has been instructed to build ours in this style. The superstructure for the iron bridges across the Lehigh and Delaware Rivers at Easton, has been contracted for, with the Keystone Bridge Company of Pittsburg, as likely to do the best work in the State. The masonry for the Delaware bridge is nearly finished, and the contractors are beginning to put up the superstructure. They assure us the work will all be finished in the fall.

The experience of the Lehigh Valley Railroad Company in the use of steel rails, of which they have had several hundred tons on trial for over two years, corroborated as it is by that of the Pennsylvania, Philadelphia, Wilmington and Baltimore, Hudson River, and other leading railroad companies, having satisfied your Board that Bessemer steel rails are much cheaper in the long run than iron rails, although costing nearly twice as much in the first outlay, they directed contracts to be made with the best English manufacturers for a sufficient quantity of these rails, of the weight of 60 lbs. to the yard, to lay the whole road from Mauch Chunk to Easton. The rails are beginning to arrive, and their delivery on board of vessels at Liverpool is to be completed by the month of August.

There has been expended during the past year on the Lehigh and Susquehanna Railroad extension, the sum of $1,473,983 84, of which $902,628 99, above Mauch Chunk, and $571,354 85, below Mauch Chunk. On the Nescopec Branch we spent $205,114 32.

On the completion of the Back Track Railroad between the head and the foot of the inclined planes on the Lehigh and Susquehanna Railroad, we expended $228,027 86. As stated in the last annual report, this improvement was opened to trade in the Spring of 1866.

We completed the relaying the old road from head of planes to White Haven, with new iron rails of 60 lbs. to the yard, at a cost of $105,555 28. For new sidings between the same points, there were spent $44,345 70. For work done towards remodeling the inclined planes, with the view of increasing their capacity to 1,500,000 tons per annum, there were expended $32,098 39. For other improvements between White Haven and Wilkesbarre, $116,149 68. For lands, right of way, &c., between Wilkesbarre and Easton, $118,250 97, which for the present has been charged to lands purchased.

In addition to the sums actually expended for construction, we have charged the Lehigh and Susquehanna Railroad account with the sum of $350,225 78, amount of discount allowed on our sales during the year of the loan of 1884.

Considerable additions were made during the year, to the equipment of the Lehigh and Susquehanna Railroad.

Nine new locomotive engines were bought at a cost of	$173,701 46
714 new coal cars, at a cost of	234,920 00
20 eight-wheel flat cars, cost	9,950 00
And 69 new four-wheel gravel cars	14,100 00
Making a total of	$432,671 46

The equipment of the road consisted on the 31st of December last, of 21 locomotive engines mostly new, 363 eight-wheel and 1,627 four-wheel coal cars, 64 eight-wheel flat cars, 92 four-wheel gravel cars, and 15 other cars of various descriptions, representing a total investment of $1,177,010 46.

Large additions to this equipment are now making for immediate use in running the road from Wilkesbarre to Mauch Chunk, and much larger yet will be required to be in readiness for the opening of the road through to the Delaware River in the latter part of the year.

It was stated in the last annual report, that this company owned about three-fourths of the capital stock of the Nanticoke Railroad Company. That interest has since been increased by the purchase, or exchange on fair terms, for our own stock, of about 2,800 shares more of the Nanticoke stock. On the 31st of December last, we owned 8,793 shares of this stock, out of a total of 9,500 shares, besides $113,000 of the bonds. It is now proposed to merge this company into the Lehigh Coal and Navigation Company. A contract for that purpose is under consideration, and may be submitted at an early day for your approval.

There are now over 25 miles of road laid (besides branches and sidings,) extending from near Pittston to the mines of the Newport Coal Company, in Newport township.

To extend our connection still further eastward through the coal field, we entered into an agreement, on the 7th of November last, with the Union Coal Company, who are building and have

now nearly finished, a railroad running from a point on the line of the Nanticoke Railroad, about five miles eastwardly from Wilkesbarre, to a connection with the railroad of the Delaware and Hudson Canal Company, near Providence, beyond Scranton, a distance of about nineteen miles in an easterly direction. By the terms of this contract, we aid in the construction of the road to the extent of $350,000, and obtain the exclusive right to run, on advantageous terms, all freight and passenger trains over it, and all coal trains going west. The Union Coal Company expect to have their road open before the end of this month, and it is proposed to put on passenger trains immediately thereafter, to run between Mauch Chunk and Scranton.

A contract has been entered into, since the beginning of the present year, with the Lehigh and Lackawanna Railroad Company, who some years ago commenced the construction of a railroad from Bethlehem, up the valley of the Monocacy Creek, to the important slate, agricultural and iron ore regions, lying in that direction, south and east of the Blue Mountains. Considerable work, in the way of grading, getting out railroad sills, &c., was done along the line of this road from Bethlehem to the Wind Gap, a distance of twenty-five miles. For lack of funds, the line had to be discontinued. We have now agreed to complete the first fourteen or fifteen miles, from the connection with our road at Bethlehem to the slate quarries at Chapman, and have secured a lease of the same for ninety-nine years.

Since the last annual meeting, the whole disposable balance of the loan of 1884 has been sold. We are now selling a loan of $2,000,000, payable in 1897, bearing six per cent. interest, payable quarterly, free of United States and States taxes, and secured by a first mortgage on the line of our railroad below Mauch Chunk. For whatever further sum may be required to finish the road, and provide the necessary equipment, we have ample authority, under an act of Assembly, passed at the recent session of the Legislature, and under previous supplements to our charter, to borrow more money, or issue new stock for that purpose.

In conclusion, the Managers congratulate the stockholders, that they are soon to enjoy the fruition of the large outlays made since the flood of 1862, in reconstructing, re-organizing and strengthening their great line of works between the Susquehanna, the Lehigh, and the Delaware Rivers, so located as to draw trade from all the great anthracite coal fields. This year, for the first time since the flood, we have once more an unbroken line from Wilkesbarre to Mauch Chunk. Before the next annual meeting of stockholders, this line will be extended and in operation to the Delaware River.

We shall then have in operation the following roads:

The old Lehigh and Susquehanna railroad, with the inclined planes, from South Wilkesbarre to White Haven	19	miles.
The locomotive road, or "back track," to avoid the inclined planes	13	"
The extension of the Lehigh and Susquehanna Railroad, from White Haven to Phillipsburg, New Jersey	71	"
The extension of the Lehigh and Susquehanna Railroad, eastwardly, from South Wilkesbarre to the new depot at Wilkesbarre, and a connection with the Nanticoke Railroad, beyond Laurel run	3½	"
The Nanticoke Railroad, and its branches, say	30	"
The Nescopec Branch	8½	"
The laterals to our own mines, at least	30	"
Making a total of roads belonging to the company (exclusive of second track, sidings and roads under ground)	175	miles.

Besides which, we shall be working the Union Coal Company's Railroad, 19 miles long, and the Lehigh and Lackawanna Railroad, from Bethlehem to Chapman, 14 miles, making a total of over two hundred miles of railroad; which, together with the company's six thousand acres of coal land, the forty-eight miles of slackwater navigation on the Lehigh, and the sixty miles of canal leased from the Delaware Division Canal Company, will constitute the elements of business for the year 1868.

During the year 1866, the capital stock was increased $45,300; the funded debt was increased $2,767,075 20; and the floating debt (including unpaid interest and dividends) increased $8,782 29. On the 1st of January, 1867, the sum total of the company's liabilities, including capital stock, funded debt, and pecuniary obligations of every kind, was $14,146,767 62. Included in these obligations is the sum of $831,145 85, received up to December 31st, on account of subscriptions to new stock offered at par to the stockholders, by the circular of August 29th, 1866, in the proportion of one share of new stock to every five shares of old, the new stock not to be issued until after June 1, 1867. There were subscribed under the provisions of said circular, 23,738 shares, which, if paid up before November 1, 1867, will increase the capital stock of the company by $1,186,900.

The financial condition of the company, as stated in the General Balance Sheet of Jan. 1, 1866 and 1867, is shown in the following statement:

	1866.	1867.
Capital stock	$6,091,700 00	$6,968,146 85
6 per cent. loan due March 1, 1870	414,157 77	414,157 77
6 per cent. loan due April 1, 1884	2,667,275 92	5,434,351 17
Floating debt	1,256,497 70	1,222,917 10
Interest unpaid	55,619 14	95,902 53
Dividends unpaid	9,213 70	11,293 20
Profit and loss	3,502,854 08	3,391,701 69
Total	$13,997,318 36	$17,538,469 31
Against which are charged the following, viz:		
Canal and river improvements	$4,455,000 00	$4,455,000 00
Lehigh and Susquehanna Railroad	3,127,708 42	5,691,294 05
Fixed property:		
Coal and other lands, wharves at Phila., &c	215,914 74	334,375 15
Mine improvements, railroads from mines to canal, &c.	1,361,499 61	1,416,852 64
Land improvements, (buildings, &c.)	459,679 37	548,526 01
Moveable effects:		
Canal boats	220,550 68	327,081 76
Rolling stock, Lehigh & Susq. R.R.	746,009 00	1,177,010 46
Rolling and other stock connected with mine improvements	214,132 55	275,551 06
Supplies on hand at Mauch Chunk	241,711 06	218,923 87
Coal on hand	28,464 25	88 898 02
Bonds & mortgages	40,295 57	44,119 24
Principal of ground and water rents	179,302 55	179,102 55
Bills receivable	240,274 72	218,249 09
Due from individuals	996,417 00	1,331,524 21
Contingent fund and other securities	680,246 58	1,056,676 08
Cash on hand	790,116 26	175,255 62
Total	$13,997,318 36	$17,538,469 31

In the RAILROAD JOURNAL for 1865, p. 587, and for 1866, p. 565, will be found tables exhibiting the progress of the company since 1844. In the following table we give a financial review of their affairs yearly (as of January 1,) for the past eight years, 1860-67:

Jan.	Capital Stock.	Funded Debt.	Floating Debt.	Profit and Loss.	Total Liabilities.
	Against which the following disbursements are charged:				
	Jan. Canal, &c., 1st. Improvem'ts.	Lehigh & Susq. R.R.	Fixed Property.	Moveable Effects.*	Cost of Investments.	Cash on hand.	
1860	$2,479,950	$3,619,254	$820,094	$3,166,899	$9,592,197
1861	2,479,950	3,416,871	360,408	3,436,703	9,803,982
1862	2,479,950	2,788,182	413,729	3,724,838	9,406,699
1863	2,479,950	2,788,182	789,508	3,176,110	9,233,750
1864	2,476,950	2,786,682	515,038	3,821,840	9,608,510
1865	4,282,950	2,846,882	1,267,852	2,988,236	11,380,920
1866	6,091,700	3,081,434	1,321,831	3,502,854	13,997,318
1867	6,968,146	5,848,609	1,330,113	3,391,702	17,538,469
	Against which the following disbursements are charged:				
	Jan. Canal, &c., 1st. Improvem'ts.	Lehigh & Susq. R.R.	Fixed Property.	Moveable Effects.*	Cost of Investments.	Cash on hand.	
1860	$4,455,000	$1,380,000	$1,453,789	$1,071,490	$1,210,254	$21,663	9,592,197
1861	4,455,000	1,380,000	1,462,364	1,182,462	1,335,038	49,067	9,803,982
1862	4,455,000	1,380,000	1,522,473	1,089,001	913,069	47,155	9,406,699
1863	4,455,000	1,380,000	1,619,366	900,841	795,647	82,896	9,233,750
1864	4,455,000	1,389,988	1,729,862	1,236,526	680,872	112,772	9,608,510

1867	4,455,000	5,691,294	2,299,773	3,860,460	1,054,676	175,266	17,538,469

* Includes rolling stock of Lehigh and Susq. R. R., and mine railroads, &c.

At an election held May 7, 1867, the following named persons were chosen officers of the company for the ensuing year:

President.—JAMES S. COX.

Managers.—John Farnum, Richard Richardson, Jacob P. Jones, Francis C. Yarnall, Samuel E. Stokes, Francis R. Cope, Frederick Graff, Fisher Hazzard, Charles L. Borie, Charles Wheeler, Charles Parish.

The following officers were elected by the Board of Managers.

Vice President.—WILLIAM F. BIDDLE.

Superintendent & Engineer.—JOHN LEISENRING.

Treasurer.—SOLOMON SHEPHERD.

Secretary.—FRANCIS MITCHELL.

Manassas Gap Railroad.

A careful examination of the line of this road from its present terminus at Piedmont, to Harrisonburg, was recently made by the President of the road, and the Superintendent of the Orange and Alexandria Railroad, and an estimate made of the cost of repairs, and construction of bridges, with the probabilities of obtaining cross ties, &c., and the conclusions arrived at were very satisfactory and encouraging to all parties interested, leaving no doubt of an immediate resumption of work, and a speedy reconstruction of the road to Harrisonburg. We understand that reliable parties with means, are ready to undertake the work on the whole line, and the contracts will, it is thought, soon be made, and the work pushed vigorously on.

Old Colony and Newport Railroad.

The earnings of this road for the years ending May 31, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$870,560 88	$822,199 09
" merchandise	400,364 71	469,317 49
" mails	10,750 00	10.750 00
" express	.....	27,954 17
" rents	13,967 57	25,054 02
" dividends	.....	3,430 00
" premium on sh's	.....	2,158 30
	$1,295,643 16	$1,360,863 07

Expenses, viz :

Balance May 1	$204,538 48	$187,687 23

Soon after the last annual meeting of the stockholders, the Directors requested the President to make an examination of the road and its property, with the view of obtaining more full and accurate information in regard to its condition, and as to what was required to make it most effective for transacting the business; and he has embodied his views in a communication addressed by him to the board under date of June 21st last, in which he says:

Soon after my connection with the road, which took place about two months subsequent to the close of the last financial year, I made, at your request, an examination into the condition of the road and its property, and in regard to its requirements, means, and liabilities. I now submit to you some statements showing the condition of the property, and what I deem to be the true policy of the road for the future.

I found the road generally in a tolerably fair working condition, although some of the abutments and bridges needed rebuilding, and, in some places, stone should have been substituted for wood, and solid embankment for pile bridging.

The track on a portion of the Fall River Road was originally laid, and still remains, on a clay and loamy soil, which, in the winter heaves badly, and in the spring is soft and spongy, causing great injury to the rails. It would be economy to substitute gravel for this material.

A portion of the rails on the road have proved to be of very inferior quality, and, together with a considerable number of the sleepers, required renewing. Much of the fence on the line of the road was in very poor condition, and needed rebuilding.

Some of the depots remain as originally constructed. Others, that were re-arranged many years ago, and adapted to the business at that time, have not been much improved since; and, as the business has materially increased, the public now claim enlarged and improved depots.

The rolling stock on hand was insufficient for the business. Some of the passenger-cars were old, and unsuited to the present time; and some of the engines too small, and not adapted to the trains and speed required. A considerable addition to the equipment was necessary in each department.

The shops and facilities for doing the repairs necessary to carry on the operations of the road are very limited in extent, and inconvenient for the work; and this largely increases the cost of operating the road. The company's land at South Boston is well suited for the erection of new repair shops, in connection with the new engine-house; and the interest of the company demands their construction at a very early day.

In taking the account of shop-stock, or materials for repairs, &c., on hand May 31, 1866, sufficient reduction from the cost of the articles was not made to meet the decline in prices during the year. This, to some extent, has increased the expenses of this year; nor was the large amount of old rails, about four hundred and eighteen tons, then due the Washburn Iron Company, deducted from the quantity of old rails on hand, as it should have been. These items, amounting to $39,322 90, should have gone into the expense account prior to May 31, 1866.

The amount of $41,433 85, represented in the last annual report as due from unsettled freight-bills, was found, upon examination, to be to a large extent, unavailable. Only $4,591 78 of the sum has been collected. $16,950 48 is represented by claims against the National Government for transportation, still uncollected; and, of the remainder ($19,891 59), about $7,000 is represented by freight-bills which had been offset by expense-bills paid on account of freight; and the balance is in disputed accounts from which nothing has been received, and the whole, $19,891 59, has now been charged off as worthless.

There have also been paid and charged in the running expense account of this year sundry accounts amounting to $55,095 48, which should have been adjusted and charged in the last or previous year's accounts. Many matters which were in litigation last year have since been settled, and the amounts are included in the above sum. There are but few such cases remaining, and none for any claims that have arisen during the past year. Some of the land-owners on the line of the Dighton and Somerset Railroad, make such excessive claims for damages, that it will be necessary to submit them to the County Commissioners for adjustment.

The Newport extension, the Dighton and Somerset Road, the change of the location of the road in Boston, the construction of the new freight-house and the new engine-house, which improvements were commenced some time before my connection with the road, are now nearly completed. There has been paid on these accounts during the past year, $526,294 44; and it is estimated that $217,318 00 will be necessary for their completion.

The new work commenced the past year is, the depots on the Dighton and Somerset Road; the passenger-depots in Boston, Fall River, and Bristol Ferry; the car-houses in Boston and Newport; sheds at Tiverton and Fall River; road-bridge in Fall River for Linen Mill Co.; shop for repairing rails, &c., at South Braintree, and the car-repair shop at South Boston, which has been rendered necessary by change of location of road.

The Boston passenger-station was found totally insufficient for the business of the road, it being very small and inconvenient, and portions of it fast going to decay. Understanding that the complaints of the patrons of the road, on this account, were almost universal, and it appearing necessary that a thorough remodelling of the whole, and the reconstruction of a large part of the building, should be made, alterations were commenced in November last, with the expectation of the work being completed in July; but it has been much delayed. The cost, including all matters connected with the improvement, was estimated at about $150,000, of which sum $71,863 76 has already been paid.

The passenger-depot at Plymouth, which was constructed when the road was built, is small and inadequate for the present business of that place. Those who use the road think they are entitled to better accommodations than they now have. A new depot should be built there as soon after the Boston depot is completed as the condition of the company will allow. Other depots on the line of the road need to be enlarged and improved, and should receive the attention of the Board so soon as other and more pressing matters are disposed of, and the means of the company will justify it.

The wharf and freight-depot accommodations in Fall River are now held by the company under a lease; but, as it owns land on deep water in that city, it may be for the interest of the company, at some future time, to build a wharf and freight depot on its own land.

The engine-house at Fall River is old, and will soon need large repairs. It is a question whether it would not be for the interest of the company to change its location to land owned by the company near the passenger-station in that city.

The passenger-station at Newport was blown down last year, and a temporary shed built in its place for the accommodation of passengers. This, however, will be sufficient until it is convenient to build a new station.

The construction of a commodious passenger-depot in the central part of Taunton, as contemplated by the company, has been deferred. The depots at Deane Street, Weir Junction, and one at Weir Village, now being erected, will afford sufficient accommodation to the people of that city for the present.

Whenever the business of the road will warrant it, a second track should be laid from Somerset Junction to Fall River, as it will greatly facilitate the movement of trains.

When the road is completed, with all the improvements suggested, the expenditures will have been about $8,264,055 92; and if the value of the real estate remaining for sale, estimated at $300,000, be deducted, $7,964,055 92 will remain as the cost of the road. Of this amount, $4,848,320, is now represented by capital stock, leaving the balance, $3,115,735 92, to be represented by liabilities. The road may then be regarded as being in good order, and fully equipped with rolling stock requisite for the present business, and with machinery suitable for making the repairs.

It is thought that sixty per cent. of the gross receipts, at present rates of fare and freight, will cover the expense of operating the road, exclusive of taxes; and, if the receipts should continue as large as for the past year, there would be a net profit of about $544,345 22 per annum. I see no reason why the income should not equal, for a series of years, that of the present year, unless temporarily diminished somewhat by competition for the New York business.

A considerable amount of the company's bonds having become due since the last annual meeting, have been paid; and a still larger amount, and the notes given to the South Cove Company for land, mature prior to May 31, 1868; the renewal of these obligations, which amount to $591,000, by new bonds, should be provided for by a vote of the corporation. A still further amount of bonds should be authorized in order to provide for the floating debt; and also the necessary expenditures required to complete the road and its equipment, in accordance with the views I now offer, if the company should approve of, and direct them to be carried out.

The estimates made last August, which I submitted to you in detail, showed that $1,649,933 would be necessary, to finish the Dighton and Somerset Road, put in proper order all other parts of the road-bed, tracks, fences, and depots, furnish the necessary additional rolling stock, and settle the unadjusted accounts. Of that sum, there has been expended, during the past year, $10,335; and a further sum of $392,214 should be expended during the coming year, if the company approve. The expenditure of the balance, $447,384, can be deferred, and, from time to time, taken from income, if desirable; but, if so, it will necessarily increase the running expense, and reduce the net earnings.

I have thought it best thus to present to you the condition of the road as I found it, both as relates to its prosperity and it finances, believing that you, and the stockholders generally, would desire to know its real condition, so that you can estimate its true value.

Compared with the previous year, the gross income of the past year shows a decrease of $65,-219 91; with an increase in expenses of $163,480 35. The former is owing to a reduction of about ten per cent. in the charges for both passengers and freight. The latter is accounted for by the over valuation of materials on hand at the close of last year, to the amount of about $39,000, and the payment of bills the past year which had accrued prior to May 1, 1866, amounting to $55,-000, and the greater quantity of new iron put into track this year, at a cost of about $75,000; besides the expense of operating the Dighton and Somerset Road, 33 miles in length, for eight months of the year—thus increasing the miles run about 149,658. Accounts, amounting to about $21,000, were outstanding at the close of the past year. The report says:

The Dighton and Somerset Road was opened the last of September, and had been in use about eight months at the time of making up the present annual accounts, although the road was not not finished, nor many of the depots built, when the road was opened; neither are they yet finished, or arrangements perfected for doing the business anticipated on that portion of our road. When the wharf at Somerset, and all other arrangements, are completed, so as to develop the business of that road, we anticipate a material increase in both passenger and freight receipts.

Our arrangements with the Steamboat Company, and with connecting roads, continue satisfactory.

In August of last year, your directors found it expedient to dispose of the bonds of the company authorized by the vote of the stockholders at the last annual meeting, and of the balance of those previously authorized. Under the first named vote, bonds to the amount of $1,000,000, dated Sept. 1, 1866, and bearing six per cent. interest, and payable in ten years from their date, were disposed of at ninety-five per cent. on the par value; and, under the second, the amount of $397,500 dated April 1, 1865, being all that remained of the former authorization, and also bearing six per cent. interest, and payable ten years from date, were sold at ninety six and one-quarter per cent., which were deemed advantageous sales for the company.

The notes given for the lands and wharf purchased of the South Cove Company, and the bonds which have matured since the last report, and those which will mature by the first of December and first of April next, all of which amount to $591,000, your directors think should be provided for by new issues of bonds; and the existing floating-debt, about $478,500, should also be funded in the same manner. Besides these, certain improvements are required for the more economical management of the company's business; and other improvements are very desirable to be made for the extended operations of the road, as suggested in the letter of the president, which we have already given in this report, and means should be provided to pay for them. To cover all these expenditures, fund the floating debt, and pay the notes and bonds maturing, your directors recommend that the stockholders should authorize them to issue, as the company's wants may require, the amount of fifteen hundred thousand dollars of bonds, to mature within twenty years from their date. As the rates of interest have changed, and the taxes on income are now large, your directors further recommend the issue of these bonds at such rate of interest as will best render them salable, but not exceeding seven per cent. per annum.

In the Treasurer's Trial Balance of last year, $41,433 85 is stated as due from unsettled freight-bills. The change of some of the officers of the road has occasioned a thorough examination of these accounts by those appointed in their places under the direction of the Board; and a large part of these bills ($19,8891 59) have been found worthless. Some errors had been made in the estimate, many bills could not be collected as they had been already paid; to others there were set-offs and defences, and others could not be collected on account of the insolvency of the parties; and the $19,891 59 had been charged off as of no value.

The large claims made by the Boston and Worcester Railroad for damages on account of the change of our location in Boston, and for other damages, and which have been for many years in litigation, have been harmoniously settled, and to the satisfaction of all parties.

In making this settlement, we have received in cash from the sale of our real estate, not wanted for the company's use the sum of $62,500, besides important privileges, enabling us to straighten our track in Boston near the bridge, so that we can not only enter our passenger depot by an easy curve, but also use to better advantage a large portion of our land formerly covered by the old tracks.

We have also sold to the city of Boston a piece of land on Dover street, not wanted for the use of the road, for which we received $18,624 20.

We have disposed of, during the year, in all, about $100 000 worth of our real estate in Boston, and estimate the value of what remains for sale at about $300,000. The company own a large tract of Cove land in Newport, which will, at some future time, become valuable property; but the cost of filling up to grade will be considerable.

Certain claims against Alexander Holmes, Esq., not known at the time of the last annual report, have been adjusted since the closing of the present financial year. An amount has been awarded to the company of $37,078 73. This has been paid by the surrender of a note of the company, held by him, amounting, with interest, to $10,-800; a set-off of sundry sums of unpaid dividends, services, expenditures, &c., amounting to $3,959 89; and the balance, $22,318 84, has been paid in cash. A further sum of $1,449 84 has been paid in cash for outstanding freight bills. The whole will appear in the accounts of the coming year.

The income during the past year equals $9,385 26 per mile of main road and branches; and the expenses, which are large, average $5,993 67 per mile. The cost of working the road must continue to be large while the prices of labor, materials, and taxes, remain as high as at present.

The annual taxes paid the State and United States Government is more than one per cent. of the cost of the road, and more than one-sixth part of the net earnings.

Owing to the fact, that, for many years past, the road has been but little obstructed by snow and ice, the apparatus on hand for removing it from the track was very limited, and insufficient to meet the necessities arising from the great fall of snow last winter; and consequently the trains were much deranged for about three days. The extra expense of clearing the snow from the track was $3,835 01. The great freshet immediately following caused some damage to the old road, and tested very effectually the culverts, bridges, embankments, &c., on the Dighton and Somerset Road. The cost of repairing the damages is estimated at about $4,500.

We recognize the right of the public to as good accommodations, not only in low fares and freights, but in the number of trains and rates of speed, as careful management, and reasonable remuneration to those who have invested their capital in the road, will allow; and, in accordance with this view, on the 1st January last, the rates of fare and freight were reduced, on an average, about ten per cent. That, in the judgment of the directors, was all that could reasonably be expected, so long as the cost of materials and labor continued so high, and the City, State, and Government taxes so excessive.

We desire to provide every accommodation which can reasonably be required of the company; but, in many matters, the diversified and conflicting interests of the patrons of the road are such, that it is impossible to satisfy all.

The arrangement of trains adopted on opening the new line of road, necessarily limiting, to some extent, the accommodations on the old line on account of the material diminution of business over that portion of the road, has caused some complaints from parties on that line; but we hope to be able to furnish reasonable accommodations to all sections of the road, and trust that all will, in the end be satisfied with our efforts to accommodate them.

The public should not expect from the company the best depots, engines, and cars, and frequent and rapid trains, and, at the same time, low rates of fare and freight, as it is impossible to furnish both at the same time, without a very large increase of business, or a great reduction in the cost of labor, materials, and taxes.

The equipment of the road consistl of 34 locomotives, 59 passenger cars, 15 baggage, 166 box, 207 platform, 9 cattle, and 81 coal and gravel cars. 3 locomotives, 6 passenger, 2 baggage, 104 freight and 20 coal cars have been added during the past year.

The number of miles run by locomotives with passenger trains, was 507,603; with freight trains, 185,662; with gravel trains, 67,789—total 761,054, against 611,396 the previous year, an increase of 149,658 miles.

Number of passengers carried, 2,043,388; do., carried one mile, 35,183,292. Tons of merchandize carried, 316,235; do., carried one mile, 12,-518,120. This shows an increase of 1,808,152 in the mileage of passengers, and 1,165,838 in the mileage of freight.

THE GRIMSHAW

PATENT COMPRESSED-AIR HAMMER.

The Hammer and the Stamp under Perfect Control.

For all purposes, such as Blooming, Tilting, Shingling, Plating, Planishing, Punching, Piercing, Stamping, Crushing, Squeezing, etc.

These machines are under perfect control, and will give any kind of blow required, from a *live* sharp *pick-up*, heavy or light, to a mere squeeze or dead pressure blow to crush Ores, &c.

The operating compressed-air is produced in the same, or in a separate machine, and is worked automatically or by hand with varying intensity, according to the nature of the work and the *instant* will of the operator. The exhaust air both blows the scale off the work, and sprays it with water, if required, and during the intervals, when not required for other work, the Air-pump or Compresser is available as a fire-blowing machine, giving a very powerful blast.

Both steam and water power are available as motors, and from one compressed-air or blowing machine any number of Stamp-Hammers or similar machines may be driven to great advantage, without belts, pulleys or shafting, and a machine may be removed from one place to another by merely disconnecting the compressed-air pipe.

There is no danger of knocking out the ends of the cylinder, or bending the piston rod by striking water, as is the case with the Steam Hammer unless there is a continuous blowing through, kept up at great cost, and in continual fear.

Compressed-air machines are always intact, ready to stop or to start at any moment without waste of power, labor or oil to keep shafting, pulleys and belts running when not wanted, neither is there any escape of vapor to tarnish bright work, nor of condensed steam to spoil that which is being planished.

The steam engine and blower combined are of the most simple construction, and well calculated for economical operations, for all the advantages of applying compressed-air, instead of, or with steam, are not yet told or even known. Steam is subject to condensation from compression and expansion alike, but air is not thus affected, and therefore, *unlike steam*, it admits of the full benefit derivable from the principle of expansive working being attained. The compression of air developes heat and additional pressure, which is available in work before it is expanded, to relieve the back pressure, when it leaves the machine quite cool, thus proving, that the heat developed, has been fully utilized in the machine which produced, or rather which used it. And finally, the compressed-air machines may be worked at any distance from the Compresser, as there is no condensation, which is so fatal to the economical use of the Steam Hammer under such circumstances.

THOMAS PROSSER & SON,
15 Gold Street, New York.

American Railroad Journal.

Saturday, August 10, 1867.

Stock Exchange and Money Market.

Money has been in quite active request for speculative purposes, since our last. The supply, however, has been kept up well, by the influx of funds from other points, and by the liberal disbursements of the Treasury Department. Lenders have been quite prompt in accommodating all borrowers in good standing at 3@4 per cent. on temporary advances on the public funds, and 4@5 per cent. on other stock collaterals. An improved demand has prevailed for choice to really good business paper on the basis of 6@7 per cent. per annum, but the very moderate offerings of these grades have operated against an active business. The city banks have been making unusually heavy advances on the National stocks, to the great commission dealers. Hence, they have shown, in their last weekly return, an increase in their loan averages of $3,696,186. Their deposits have been enlarged $544,868, and their legal tender reserve has been augmented $492,922, while their specie hoard has been reduced $2,276,144, and their circulation contracted $37,742. The Government disbursements have been quite extensive, especially through the Sub-Treasury in this city, the balances in which have been again reduced. The aggregate cash reserves in the Treasury vaults on the 1st inst., were, according to the last official exhibit of the public finances, $175,379,470, including $102,905,174 in coin, and $72,474,296 in currency, showing a gain after all disbursements, of $3,954,888 since June 1, the date of the preceding general statement. The cash reserves, this time last year, were only $137,-317,332, including $61,322,126 in coin, and $75,-995,206 in currency. This shows that the Treasury is unusually strong, in its cash balances at the present time; and it is thus strong, without adversely influencing the money market, through the supply or price of money, which features are more than ordinarily favorable, especially at this season of the year to responsible borrowers. The specie reserve of the banks is now $6,461,949, against $9,448,900 same time last year. The city bank deposits are now $201,153,754, against $214,-156,705 week ending Aug. 4, 1866. The legal tender reserve amounts to $75,098,762, against $86,-235,079 same time last year. The circulation now stands at $33,559,117, against $27,311,549 same time last year. The loans are now $254,940,016, against $256,808,717 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $78,003,624 a day, against a daily average of $80,182,871 the preceding week, and $81,971,825 the week ending with July 20. The current week's exchanges average about $87,000,000 a day.

National Bank notes to the amount of $174,-600 were issued last week, making the total issue to 1,671 banks thus far, $303,503,476, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,547,562, leaving, with the existing 1,650 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,955,914. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,649,-500; and for the public deposits, $38,797,950—making a total of $379,447,550. The Treasury Department last week redeemed and destroyed $395,300 of worn and mutilated fractional currency, and issued $515,519 of new.

The U. S. Sub-Treasury receipts, week ending with Aug. 3, were $17,416,869, including $2,447,-422 from customs duties; payments, $18,851,294; balance at the close of the week, $128,761,670, against $130,196,095, at the close of the preceding week, showing a decrease of $1,434,425. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $6,326,880 including $800,399 from customs, and payments, $8,052,778; on Tuesday, receipts, $1,758,433 including $480,000 from customs, payments, $720,482. The balance at the close of business on Tuesday stood at $128,073,-723, against $131,725,798 a week previous.

The Philadelphia Bank movement the past week shows an increase in loans, of $813,362;

a decrease of $31,033 in specie; a decrease in legal tenders of $128,914; an increase of $754,-894 in deposits; and an increase of $2,166 in circulation. The Bank Clearings show an increase of $4,527,827, and the balances, an increase of $631,947.

Government revenues keep up to a very satisfactory average. The excises have been increasingly prolific of late, partly because of the annual tax payments. Customs are augmenting also, as the season of business actively approaches. The excises, last week, yielded about $6,789,305, against $4,000,000 the preceding week; customs at the port of New York $2,447,422, and at the outports, about $800,000 (in coin) more, making the grand total income for the week equal about $11,335,805 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st inst., have been about $31,-000,000.

Gold has been rather active again, this week, but the speculation has been less confident, and the fluctuations in prices have been against the operators for a rise. The extremes of the week have been 139⅞@140⅝. Wednesday's range was from 140@140⅜, and the latest transactions were at 140⅜. The export inquiry has fallen off very notably. The customs demand has been good, and this has been the main strength of the speculation. Government has been represented as having been a seller of coin to a moderate amount from its unusually ample reserves. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,740,267. The customs demand for Gold last week, averaged $407,904 a day; thus far, this week, it has been equal to $390,000 a day, or equal to a weekly aggregate of $2,340,000. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $140,485, and from California, $1,867,312. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $71,260,915, against $81,309,466 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $17,823,182, against $24,283,721 same time last year, showing a decrease this year, of $6,460,539. The exports of specie from this port, last week, were $1,161,805. The total outflow of specie from the port, since Jan. 1, 1867, has been $38,427,856, against $51,-824,771 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $119,500, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $39,157,119, against $28,954,792 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to July 1, reached $20,766,192, against $23,338,988 same time last year, showing a decrease, in 1867, of $2,572,796.

On the 1st inst., the Treasury held coin to the amount of $102,905,174, including $19,457,960 to the credit of private depositors. The private deposits are represented by coin certificates issued by the U. S. Sub-Treasury here. The total amount of gold certificates issued and redeemed by the U. S. Sub-Treasury, together with the outstanding balance on the 8th May, and at subsequent weekly intervals, is thus stated:

	Issued.	Redeemed.	Outstanding
20s ...	$333,900	$206,600	$127,300
100s ...	5,221,000	3,758,400	1,562,600
500s ...	1,164,500	541,000	623,500
1,000s ...	26,065,000	21,859,000	4,206,000
5,000s ...	159,675,000	140,130,000	19,545,000
10,000s ...	5,000,000	5,000,000	.....
Total 18th.	$197,559,400	$171,495,000	$26,064,400
Total 27th.	198,688,260	173,398,000	25,290,260
Total 1st..	200,092,100	174,475,000	25,617,100

Total 3d..	214,104,220	185,466,000	28,638,220

Foreign Exchange has been in more liberal supply and has been much depressed in price. The demand has been less active. Bankers' 60 day bills on London closed steadily on Wednesday at 109¼@109½, and on Paris to 5.15@5.13¾; sight bills on London to 109⅞@110¼; and on Paris to 5.12½@5.11¼. The offerings of produce bills have been less decidedly extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $1,615,117, making the total value of exports since Jan. 1, 1867, $112,534,844, against $122,426,928 same time in the preceding year.

Government securities have been in very brisk demand, largely on speculative account. A few of the leading commission houses have been heavy purchasers, their purchases have been quite comprehensive, but have been most liberal in the line of the Five-Twenties. The floating supply of the bonds and notes has been materially reduced. Quite a respectable foreign call has been noted, chiefly for the Five-Twenties of 1862 and 1865, May and November coupons. The recent London advices have been favorable to a prompt revival of the export demand for these bonds. By the 1st of August debt statement, the details of which we give elsewhere, it appears that $76,-156,800 worth of Five-Twenty bonds, mainly of the 1866 and 1867 series, has been issued by the department since June 1, which is about the amount that the coin-interest part of the public indebtedness has been augmented, in the two months. The Department, in the same period, has redeemed, by conversion or direct purchase, Seven-Thirties to the amount of $60,706,100 and compound-interest notes, to the amount of $21,-690,810. Legal tender notes to the amount of $4,147,757 have been likewise retired. The aggregate debt, less cash in the Treasury, on the 1st inst., was $4,309,510 less than on the 1st of June. The debt statement was very favorably received on Wednesday, the day of publication in this city. U. S. sixes of 1881 closed here on Wednesday at 111¼@111⅜; U. S. Five-twenties of 1862, 113½@113⅝; U. S. Five-twenties of 1864 at 110⅛@110¼; U. S. Five-twenties of 1865 at 110⅝@110¾; U. S. Five-twenties of 1865, consolidated, 108⅝@108¾; U. S. Five-twenties of 1867, 108⅝@108¾; U. S. Ten-forties at 102¾@102⅞, and U. S. Seven-thirties at 107¾@108. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent, on these figures:

August, 1864....119¼	August, 1865....115⅞
October, 1864....118½	September, 1865..115⅜
December, 1864..117⅛	October, 1865....114⅞
May, 1865 .....116⅞	

Railway and miscellaneous stocks were much depressed, and in much less demand through the earlier half of the week. The *bear* operators forced the market down rapidly, by extensive *short* sales. Within the past two days, business has revived again, chiefly through speculative channels, and prices have rallied rather sharply.

An improved demand has been reported for breadstuffs, provision and produce, generally, and speculation has revived vigorously in Corn, influenced in part by the adverse weather, and favorable market reports from Great Britain. Prices closed in favor of sellers as a rule. Cotton has been firmer in price, and moderately active closing with middling grades on Wednesday at 28½@30⅛ cents per lb. as extremes. The stock of cotton now here is estimated at about 65,000 bales. The receipts at the port this week, have averaged about 1,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 634,000 bales, against exports of 463,149 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,847,000 bales, against 1,996,801 bales same time last year; exports, 1,541,000 bales, against 1,494,307 bales same time last year; estimated stock at latest dates, 127,500 bales, against 288,200 bales same time last year. Foreign merchandise has been in better demand and seasonable articles has been more confidently held. The total imports of foreign dry goods, last week, were $1,382,127, and the total amount marketed $1,098,387. The value of foreign merchandise imported last week, was $2,106,247—making the grand total specie value of last week's imports of dry goods and merchandise, $3,488,374, and since Jan. 1, 1867, $149,888,106, against $182,404,662 same time in the preceding fiscal year. The ocean freight market has been active, and rates have been quoted lower with 535 vessels of all classes in port. For Liverpool we quote flour at 1s. 6d. per bbl.; grain at 3d. per bushel; cotton at ⅛@$\frac{3}{16}$d. per lb.; and heavy goods at 10s.@17s. 6d. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 24.	July 31.	Aug. 7.
Consols	94¼	94 $\frac{3}{16}$	94
U.S. 5-20's of 1862....	72⅝	72 $\frac{11}{16}$	73 $\frac{5}{8}$
U.S. 5-20's of 1865....	71	71	71¾
Erie	46¾	49	45½
Ill. Central	76¾	77	76¾

The New York exports, exclusive of specie, for the week ending Aug. 6, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,959,505	$1,615,117
Prev. reported	119,467,423	110,919,727
Since January 1.....	$122,426,928	$112,534,844

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,738,730	$1,382,127
Gen. merchandise.....	2,424,784	3,106,247
Total for the week.....	$5,163,514	$3,488,374
Previously reported....	177,241,148	146,399,732
Since January 1,.....	$182,404,662	$149,888,106

The balance in the Sub-Treasury on Wednesday was $129,680,255 29.

☞ The survey of the dismal Swamp Canal, Virginia, with a view to its enlargement and improvement, has been completed. This canal is in a very dilapidated condition, having been sadly neglected before and since the rebellion, and it is estimated that $600,000 will be required to restore it.

☞ We invite attention to the Advertisement of Messrs. Ilgenfritz & Schall, in another column. These gentlemen are builders of Passenger and Freight Cars. The capacity of the shops is from 75 to 100 freight cars per month. They are located at York, Penna.

☞ An inclined railway is to be built at Bahia, Brazil, to facilitate travel and the transportation of freight from the lower to the upper city, the two cities being separated by a steep bluff some one hundred and eighty feet high, to attain which height passengers and freight have to rely on the backs of negroes.

☞ We give elsewhere the Act of the N. Y. Legislature of April 22, 1867, in relation to the Prevention of Railroad Accidents; also the Amendment to said Act having reference to Uniforms to be worn by railroad officials.

☞ The city of Rockland, Me., has unanimously voted to subscribe for one hundred thousand dollars in stock, and to loan the city's credit for four hundred thousand dollars, in aid of the Knox and Lincoln Railroad.

☞ The citizens of Louisville, Ky., have in contemplation the construction of a railroad from that city, through Taylorsville, Danville, and due east across Southern Virginia, to make a direct seaboard terminus at Norfolk.

☞ The United States Railroad Commissioners have accepted another section of twenty-five miles of the Union Pacific Railroad, Kansas Branch, extending two hundred and thirty-five miles west of the Missouri River.

☞ We understand that engineers are now engaged in running the line for a new railroad from Ridgely, in Caroline county, *via* Centreville, New Castle Co., Del., to Queenstown, in Queen Annie Co., Md.

☞ The Amherst *Gazette* says that Mr. W. Sanford Fleming C. E., is in that district by direction of the General Government, for the purpose of locating the Inter-colonial Line of Railway from the New Brunswick border to Truro.

☞ A railroad is projected from Schoharie to Catskill, N. Y., through the Rensselaerville Valley.

Railroad Earnings.--Weekly.

The earnings of the Marietta and Cincinnati Railroad the 4th week in July, 1867...$37,218 00
Corresponding week previous year.... 31,008 00

Increase $6,210 00

The earnings of the Chicago and Rock Island Railroad for the 4th week in July, 1867, were.... .... $67,300 00
Corresponding week of previous year.. 62,141 00

Increase.... .... $5,159 00

The earnings of the Western Union Railroad for the 4th week in July, 1867. .... ..$18,018 56
Corresponding week previous year.... 22,239 85

Decrease $4,231 29

The earnings of the Detroit and Milwaukee Railroad for the week ending August 1, 1867, were $29,978 00
Corresponding week of 1866.... .... 26,828 00

Increase.... .... $3,150 00

The earnings of the Virginia and Tennessee Railroad for the fourth week of July, were $12,007, an increase of $563 on the same week last year. Total for the fiscal year commencing 1st of July, $57,844, an increase of $12,066 on same time in 1866.

The Loughridge Car Brake Company.

The great success of this company, at the public exhibition and trial of their PATENT STEAM BRAKE on the Central Railroad of New Jersey, on the 1st inst., is well worthy the attention of Railroad Companies. This brake is thus described:

The power used for the application of the brake is steam. A 14 inch cylinder, with 34 inch throw of piston, is hung under the foot board of the engine, with a ¾ inch pipe running to the boiler. Under the cylinder is a "safety valve" with a 1¾ inch seat, which is held in position by means of a spiral spring, which is tightened or relieved at the will of the engineer, by means of a screw that sets upon his foot board. By this device the engineer is enabled to change his power to suit a wet or dry track, or in case of great danger to give power enough to slide all the wheels in the train. For stopping at stations, or other ordinary braking, he keeps only sufficient tension upon the spring of the safety valve to insure the best braking without sliding wheels. At all rates of speed, and at all conditions of steam in the boiler, this valve will prevent the application of too great power upon the brakes. A chain is fulcrated in the cylinder head, passes around a pulley on the end of the piston rod, returns, and passes around the pulley hung to the opposite side of the cylinder head, and from thence, to the tender and cars. By this means, *three* lengths of chain is obtained, to one throw of piston. The chain is again doubled under the tender, one end being fulcrated on the tender brake lever, from thence it passes, by rods and section of chain to the centre of the car, where it runs around four pulleys hung in swinging standards, which are fulcrated at the bearing of the lower pulleys, the upper end (or bearing of upper pulleys) being attached to the rods of the ordinary hand brake. By drawing the continuous rod and chain, at engine, (the chain being again fulcrated at end of rear car) the upper end of standards are drawn together, and the brakes applied.

The examining committee consisted of Mr. Hinckley, Prest., and Messrs. Kenny and Perry, of Phila., Wilm. and B. R. R. Co.; Mr. Wootten, of the Reading R. R. Co.; Mr. L. C. Braston, of the Lehigh and Susq. R. R. Co.; Messrs. Packer, Brown and Kinsey, of the Lehigh Valley; Mr. Spencer, of the N. Y. and N. Haven and Boston R. R. Co.; Mr. Guest, of Cincinnati and Zanesville R. R. Co.; Messrs. Guppy and Smith, of the Erie Railway Co.; Mr. J. O. Stearns, of New Jersey Central R. R. Co.; Mr. Baker, of the New Jersey R. R. and Transp. Co.; Mr. Van Houten of the Penn. R. R. Co.; Mr. Luce, Pres't. of Union Car Wheel Co.; Mr. Dinsmore, of National Car Spring Co., Mr. Haldeman of Union Car Spring Co.; Mr. Thompson of Southern Minnesota R. R. Co., and many others.

After the trial and exhibition had finished, the following resolutions were unanimously adopted:

Resolved, That we hereby tender our thanks to the Loughridge Car Brake Company, for the excellent opportunity they have afforded us of examining the working of their patent steam brake, and we congratulate them on its entire success, as shown in the many and varied tests to which it has been subjected, and which prove it to be simple and practical, and to have accomplished the results aimed at, viz:

That the control of all the brakes is under the sole management of the engineer, giving him at once the power to stop his train at pleasure, without the aid of brakesmen, and when under any rate of speed.

The regulation of power for use of brakes on a wet or dry track, enabling the engineer to graduate the pressure to the degree required, without leaving his post.

The positive prevention of sliding wheels, economy of time in stopping at stations, its reliability and uniformity at all times—simplicity of construction and fitness for adaptation to the ordinary hand brake now in use, without dispensing with the same—its great safeguard for human life, and the saving of property and stock; and the great superiority of the patent steam brake over all other engine or hand brakes now in use.

And that we strongly recommend its adoption to the railway companies of the country, on the score of economy to themselves and safety to the travelling public.

At a former test seven brakesmen exerted their full power at the brake-windlass, and the indicator showed the following difference:

A exerted a power of	....	320
B	"	304
C	"	288
D	"	272
E	"	226
F	"	192
G, a beginner, exerted a power of	....	160

The steam brake showed a power of three thousand five hundred pounds. The same power was exerted at the recent trial, with the same result.

The following will show how quickly a train may be stopped at different velocities:

	Distance run in feet.	Time stopping in seconds.
When running at a speed of 56 miles to the hour, the train was brought to a state of rest from the point where the signal was given in	624	16
2d speed of train 32 miles per hour.	408	16
3d speed of train 32 miles per hour.	412	16
4th speed of train 24 miles per hour.	250	16
5th speed of train 50 miles per hour.	721	21
6th speed of train 50 miles per hour, hand brakes	1817	51

The engineers who have used it express their admiration of it; and the engineer on the Central Road of N. J., says he can stop his train within 2 feet of any point designated, at any rate of speed, and would dislike ever to run an engine without this Brake. We learn that this Brake is adopted and is now in use on the New Jersey Central and Northern Central Railroads, and works to a charm. It is also adopted by the Pennsylvania R. R., and in use; and they are now adding the new improvement of the steam cylinder. It is also adopted and is now in use on several Western Roads.

The Loughridge Car Brake Company of New York City, whose office is No. 33 Wall street, and of which Mr. T. B. Oakley is the General Agent, are now prepared to make arrangements with the different railroad companies for the right to use the same on advantageous terme.

We do not hesitate to recommend this Steam Brake after such a public trial and exhibition, and under such a scientific committee who were present and examined the same; and we congratulate the Railroad Companies in having found at last the long desired power to control the Brakes regularly, surely and safely by the Engineer, which we fully think has proven to be the case in this Patent Steam Brake of the Loughridge Car Brake Company.

The advantages of a Steam Brake over any other Brake is its control at all times by the engineer, and its constant and daily use—and not a brake held in reserve in case of accidents—keeping the hand brakes the same as now, and ready for use at any and all times.

Uniform for Railroad Employees.

We give below the latter clause of Section 1, chap. 483, of the Act passed by the Legislature of this State, April 22, 1867, having reference to a uniform to be worn by the officers, agents, etc., of the railroads of New York, from and after six months from the passage of the act. This act, as we understand it, was inserted as an amendment to the act "to prevent injury and loss of life to persons on railroad cars." Sections 2, 3, 4 and 5 of the act apply only to the first clause of Section 1, and are printed elsewhere in connection with that portion of the act to which they belong:

* * * It shall be the duty of every railroad company operating a railroad in this State by the power of steam, to designate and prescribe such peculiar uniform or external apparel, to be worn by its officers, agents and employees, engaged in or about its passenger offices or stations, or on or about its trains upon its tracks, as shall plainly, to all travellers, distinguish all such persons; and such uniform or apparel shall also plainly indicate or distinguish the position or rank of the wearer in the employment of such company. It shall be the duty of every such person to provide and wear such apparel or uniform when employed as aforesaid. And every such company that shall fail to designate and prescribe such apparel or uniform and to also cause the same to be generally worn by all such persons from and after six months from the passage of this act, shall forfeit to the people of this State and be liable to pay to the Treasurer of this State, on the first day of January next following the expiration of said six months, and on every first day of January thereafter, the sum of ten thousand dollars. It shall be the duty of the Attorney-General of this State, in the name of the people thereof, to sue for and recover said penalties for the benefit of the State. And in case of the refusal or omission of any person aforesaid to wear said uniform or apparel, as contemplated by this act, or to obey any reasonable rule or regulation of any such company rela-

tive to the same, or the wearing thereof, it shall be the right and duty of every such company to deduct and retain the amount of five per cent. of the agreed or accustomed compensation of such delinquent person during the period of any such neglect or refusal. And every person who shall advise or use any persuasion to induce any person being an officer, agent or employee of any such company, to leave the service of such company by reason of any such apparel or uniform being required to be worn, or to refuse to wear the same, or any part thereof, every person who without authority shall wear such uniform or apparel, and every person being an officer or agent in any company aforesaid who shall use any inducement with any person aforesaid to come into the employment of any other such company, by reason of any apparel or uniform so required or designated to be worn, shall severally, by reason thereof, be guilty of a misdemeanor and be liable to be punished for such offence.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States June 1 and August 1, 1867:

	June 1, 1867.	August 1, 1867.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$198,431,350.00	$198,431,350.00
Six per cent. bonds of 1867 and 1868	15,325,641.80	14,932,141.80
Six per cent. bonds of 1881	283,746,350.00	283,746,400.00
Six per cent. Five-twenty bonds	1,092,640,600.00	1,168,796,800 00
Navy pension fund	12,500,000 00	13,000,000.00
Total	$1,602,643,941.80	$1,678,906,691.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$13,722,000.00	$15,402,000.00
Three-year compound interest notes	130,030,240.00	108,329,430.00
Three-year seven-thirty notes	511,939,525.00	451,233,425.00
Total	$655,691,765.00	$574,964,855.00
Matured debt not presented for payment	9,713,020.32	15,636,815.87
DEBT BEARING NO INTEREST.		
United States notes	$373,209,737.00	$369,164 844.00
Fractional currency	28,458,075.46	28,554,729.72
Gold certificates of deposit	17,323,980.00	19,457,960.00
Total	$418,991,792.48	$417,177,533.72
Total debt	$2,687,040,519.58	$2,686,685,896.39
AMOUNT IN THE TREASURY.		
Coin	$98,758,417.61	$102,905,174.00
Currency	72,666,164.98	72,474,296.38
Total	$171,424,582.59	$175,379,470.38
Amount of debt less cash in the Treasury	$2,515,615,936.99	$2,511,306,426.01

By comparing this with the statement of June 1st, it is shown that the debt bearing coin interest has increased $76,262,750; the debt bearing currency interest has decreased $80,726,910; the matured debt not presented for payment has increased $5,923,795.55, and the debt bearing no interest has decreased $1,814,258 74, making the increase to the total debt since June 1, 1867, $354,623 19. The amount of coin in the Treasury during the same period has increased $4,146,756 39, and the amount of currency has decreased $191,-968 60, leaving the amount of debt less cash in the Treasury on August 1st, $3,954,887 79 more than on June 1st.

Michigan Central Railroad.

H. E. SARGENT, Esq., of Chicago, has been appointed General Superintendent of the Michigan Central Railroad, *vice* R. N. Rice, Esq., resigned. The office of the General Superintendent will in future be in Chicago, while the office of the President of the company, Hon. JAMES F. JOY, will continue to be at Detroit, where he resides.

Old Colony and Newport Railroad.

At the annual meeting of the stockholders of this company recently held in Boston, Ex-Gov. Cozzens, of Newport, offered a vote to the effect that the Directors of the company be authorized to make and issue, under the laws of the State, $1,500,000 of the company's bonds, in sums of not less than $100 each, and dispose of them as they may judge expedient, for paying or renewing the company's existing obligations, funding its floating debt, and borrowing money to complete the company's works; the bonds to be payable in not over twenty years from date, and to bear interest not exceeding seven per cent., payable semi-annually. Hon. P. R. Washburn moved to substitute ten for twenty years, but the amendment was rejected. On motion of Mr. Brewster, the stockholders ratified the action of the Directors in disposing of the company's bonds, to the amount of $1,000,000, dated Sept. 1st, 1866, and also bonds to the amount of $397,500, dated April, 1865. The following gentlemen were elected Directors: Onslow Stearns, Boston; Uriel Crocker, Boston; George A. Kettell, Charlestown; Benjamin Finch, Newport; Francis B. Hayes, Boston; Oliver Ames, Easton; Samuel L. Crocker, Taunton; Minot Tirrell, South Weymouth; John S. Brayton, Fall River.

Pocomoke and Wicomico Railroad.

A force of laborers have commenced laying the iron of this road and it will be rapidly pushed forward to completion. This road is to run from Salisbury to Berlin, and will be about 20 miles long. The Wilmington *Commercial* hopes that when the new road is completed to Berlin that it will be continued down to Easton, and having thus reached the centre of the southern end of the Peninsula, that the road will be pushed on down through Accomack and Northampton to Cherrystone, or as much nearer to Cape Charles as it is possible to find a good harbor. From Cape Charles to Norfolk in a direct line it is but about 25 miles, while from Cherrystone to Norfolk it is less than 40 miles.

☞ The Baltimore City Councils have passed an ordinance providing that the sinking fund for the payment of the principal and interest of the second mortgage bonds of the Western Maryland Railroad Company shall be the same as that on the five million loan to the Baltimore and Ohio Railroad Company, viz: 10 per cent. of the proceeds of sales of said bonds, and not 20 per cent., as provided for the first mortgage bonds; and also authorizing the City Register to endorse the second mortgage bonds to the amount specified in the advance, as each mile of the road is built from Union Bridge in the direction of Hagerstown.

☞ We learn that contracts have been entered into for the construction of a road leading from Pekin, on the Illinois River, by way of Blooming ton and Champaign City to Danville, on the Tole do, Wabash and Western railroad. The line extends through one of the richest sections of the State.

☞ Townsend has been fixed upon as the Northern terminus of the Kent County Railroad.

☞ The Virginia Central Railroad was formally opened to Covington on the 31st of July.

Prevention of Accidents.

We are indebted to Hon. H. N. Lockwood for a certified copy of an Act passed by the Legislature of this State on the 22d of April, 1867, "to prevent injury and loss of life to persons on railroad cars, and in relation to a uniform for the employees thereof." We omit that portion relating to the "uniform," and give only that having reference to the prevention of accidents by the use of the means designated in the bill, of which the following is the text:

SECTION 1. It shall be the duty of every railroad company or corporation in this State, and every railroad company or corporation running, or that may hereafter run its passenger cars in this State, to cause the platforms upon the ends of all passenger cars to be so constructed that when said cars shall be coupled together, or made up into trains and in motion, danger of injury to persons or loss of life between the ends of said cars, by falling between the platforms of said cars while passing from one car to another, shall, so far as practicable, be avoided. * * * * *

§ 2. Each and every violation of this act by any railroad company or corporation, shall, on conviction, be punished by a fine of not less than fifty dollars nor more than five hundred dollars, to be sued for and collected in the name of the people of the State of New York by the Attorney-General, and the moneys, when collected, to be paid into the general fund of the State.

§ 3. This act shall not operate or be construed to exempt railroad companies or corporations from liability for damages to persons who may be injured or sustain loss or damage by or through any neglect to comply with the provisions of this act.

§ 4. Time shall be allowed to all railroad companies or coporations to comply with the provisions of this act as follows, to wit: One quarter of all the said cars of each of said companies or corporations shall be made to conform to the requirements of this act within three months from and after the passage of this act, one other quarter thereof within six months, one other quarter thereof within nine months, and the remaining one quarter thereof within one year from and after the passage of this act.

§ 5. This act shall take effect immediately.

Illinois Central Railroad.

The statement of this Company for the month ending July 31, 1867, is as follows:

LAND DEPARTMENT.		
Acres Construction Lands Sold	9,493.10 for	$91,999 72
Acres Int. Fund Lands sold	366.55 for	6,732 18
Acres Free Lands sold	3,315.96 for	40,007 94
Total sales during month of July, 1867	13,175.61 for	$138,739 84
To which add Town Lot Sales		985 00
Total of all	13,175.61 for	$139,724 84
Cash collected in July		$218,987 13
TRAFFIC DEPARTMENT.		
Receipts from Freight		$330,020 00
do. Passengers		127,500 81
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		30,000 00
Total Receipts in July, 1867		$497,879 14
Total Receipts in July, 1866		$467,115 29

☞ The track of the Minnesota Central Railroad, between Cresco and Owatonna, is now being laid at the rate of two miles per day. At the present rate of work, the road will be ready for the cars on the 15th of December, or immediately after the close of the river navigation.

Flour and Grain Trade of Buffalo.

The eastward movement of flour and grain through Buffalo from the West from Jan. 1 to Aug. 1 this year, as compared with last year, shows a decrease of 215,859 barrels of flour and 13,364,770 bushels of grain.

The following will show the imports of flour and grain into Buffalo from the West by lake and Grand Trunk Railway for the month of July, and since Jan. 1, 1867, as compared with previous years:

FOR THE MONTH OF JULY.

	Flour bbls.	Grain bush.	Grain, including Flour bush.
1867.....	70,694	4,945,333	5,298,803
1866.....	132,265	7,854,136	8,517,261
1865.....	183,988	5,300,073	6,220,013
1864.....	242,831	4,911,734	6,125,889
1863.....	226,787	8,380,142	9,514,077
1862.....	294,844	8,612,215	10,076,435
1861.....	197,274	6,025,409	7,911,679

FROM JAN. 1 TO AUG. 1.

	Flour bbls.	Grain bush.	Grain, including Flour bush.
1867	257,208	11,034,269	12,320,309
1866	473,067	24,399,029	26,764,364
1865	813,672	15,795,250	19,863,620
1864	1,054,391	18,785,671	24,067,626
1863	1,155,079	26,064,496	32,339,891
1862	1,254,398	22,591,524	28,863,514
1861	659,856	17,477,113	20,776,393

CANAL EXPORTS.

The following will show the canal exports of flour and grain from the opening of the canal, May 1, to Aug. 1, from 1864 to 1866, inclusive, and from May 6, 1867, to Aug 1.

	1865.	1866.	1867.
Flour, bbls....	94,200	13,825	324
Wheat, bushels.	3,576,701	1,801,365	298,592
Corn, bushels .	5,619,906	11,417,330	5,868,743
Oats, bushels..	4,359,079	4,627,808	1,565,758
Barley, bushels	237,951	73,515	46,850
Rye, bushels..	172,973	367,971	86,320
Tot'l grain, bus.	13,966,610	18,287,989	7,866,263

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to 31st July, inclusive, during the years 1866 and 1867, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1866 ..	108,300	1,372,000	9,999,400	105,300
1867 ..	54,000	286,000	4,812,300	30,100
Dec..	54,300	1,086,000	5,187,100	75,200

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a decrease of 271,500 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of July, in the years indicated:

	1865.	1866.	1867.
Canal opened—	May 1.	May 1.	May 6.
Flour, bbls.....	282,500	108,300	54,000
Wheat, bushels...	2,958,900	1,372,000	286,000

Lard, lbs.....	1,745,500	56,900	176,400
Cheese, lbs.....	824,500	126,600	97,800
Wool, lbs.....	151,900	104,400	47,600

Millville and Glassboro' Railroad.

At a meeting of the stockholders of this company on the 16th ult., the following gentlemen were elected directors for the ensuing year: Thomas H. Whitney, R. D. Wood, George Wood, John McNeal, F. F. Sharp, M. R. Crane, Lewis Mulford, Isaac B. Mulford and W. D. Wilson. At a meeting of the directors on the same day, Thomas H. Whitney was elected President, and William D. Kemble, Secretary and Treasurer. A dividend of six per cent. was declared out of the earnings of the past six months.

☞ The Bethlehem (Pa.) *Times* says that work was to be resumed on the Bath Railroad, on the 29th ult., it having been suspended during the harvest season. From Bethlehem to near Chapman borough, the rails are already down, while the remaining parts are fast being graded. The road will not be completed before the first of November next, and will be about nine miles in length.

PLASTIC SLATE ROOFING

JOINT STOCK COMPANY.

OFFICE 157 (Room 19) BROADWAY,

NEW YORK.

W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21ST, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

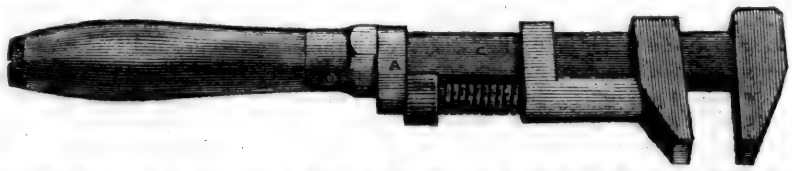
Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

MEAD RUBBER COMPANY,

12 Vesey Street, New York.

MANUFACTURERS OF



INDIA RUBBER CAR SPRINGS AND STEAM PACKING.

Our Works being now under the management of a competent Superintendent, we are prepared to offer Springs of various qualities and prices to suit. Our A No. 1 Spring made of fine Para Rubber, and the Compound used by the Patentee, the late Fowler M. Ray, will be found to be cheaper than others made, from inferior stock and offered at lower prices.

Sample setts forwarded on application. All Springs fully warranted.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

Star Metal Company,

Where Plans and Estimates of Work will be promptly attended to.

Barometrical reconnoissance for Railway lines, Location and Construction of Railroads, and all duties required on Public Works in any State of the Union performed with fidelity.

THE UNION PACIFIC RAIL ROAD CO.

Are now constructing a Railroad from

OMAHA, NEBRASKA,

westward towards the Pacific Ocean, making with its connections an unbroken line

ACROSS THE CONTINENT.

The Company now offer a limited amount of their

FIRST MORTGAGE BONDS

having thirty years to run, and bearing annual interest payable on the first day of January and July, in the City of New York, at the rate of

SIX PER CENT. IN GOLD,

AT

Ninety Cents on the Dollar.

This road was completed from Omaha 305 miles west on the 1st of January, 1867, and is fully equipped, and trains are regularly running over it. The Company has now on hand sufficient iron, ties, etc., to finish the remaining portion to the eastern base of the Rocky Mountains, 212 miles, which is under contract to be done September 1st of this year, and it is expected that the entire road will be in running order from Omaha to its western connection with the Central Pacific, now being rapidly built eastward from Sacramento, Cal., during 1870.

Means of the Company.

Estimating the distance to be built by the Union Pacific to be 1,555 miles, the United States Government issues it Six per cent. Thirty-year Bonds to the Company as the road is finished at the average rate of about $28,250 per mile amounting to $44,308,000.

The Company is also permitted to issue its own First Mortgage Bonds to an equal amount, and at the same time, which BY SPECIAL ACT OF CONGRESS ARE MADE A FIRST MORTGAGE ON THE ENTIRE LINE, the bonds of the United States *being subordinate to them.*

The Government makes a donation of 12,800 acres of land to the mile, amounting to 20,032,000 acres, estimated to be worth $30,000,000, making the total resources, exclusive of the capital, $118,416,000; but the full value of the lands cannot now be realized.

The authorized Capital Stock of the Company is one hundred million dollars, of which five millions have already been paid in, and of which it is not supposed that more than twenty-five millions at most will be required.

The cost of the road is estimated by competent engineers to be about one hundred million dollars, exclusive of equipment.

Prospects for Business.

The railroad connection between Omaha and the East is now complete, and the earnings of the Union Pacific on the sections already finished for the month of May were $361,782. These sectional earnings as the road progresses will much more than pay the interest on the Company's bonds, and the through business over the only line of railroad between the Atlantic and Pacific must be immense.

Value and Security of the Bonds.

The Company respectfully submit, that the above statement of facts fully demonstrates the security of their Bonds, and as additional proof they would suggest that the Bonds now offered are less than ten million dollars on 517 miles of road, on which over twenty million dollars have already been expended;—on 350 miles of this road the cars are now running, and the remaining 167 miles are nearly completed.

At the present rate of premium on gold these bonds pay an annual interest on the present cost of

Nine Per Cent.,

and it is believed that on the completion of the road, like the Government Bonds, they will go above par. The Company intend to sell but a limited amount at the present low rate and retain the right to advance the price at their option.

Subscriptions will be received in New York by the CONTINENTAL NATIONAL BANK, No. 7 Nassau St., CLARK, DODGE & Co., BANKERS, 51 Wall St., JOHN J. CISCO & SON, BANKERS, No. 33 Wall St., and by BANKS AND BANKERS generally throughout the United States, of whom maps and descriptive pamphlets may be obtained. They will also be sent by mail from the Company's Office, No. 20 Nassau Street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

JOHN J. CISCO, *Treasurer,*

NEW YORK.

THE ELNATHAN SAMPSON

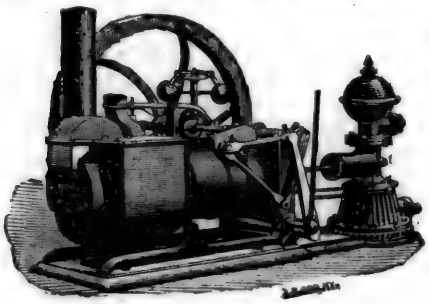
NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.



Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

ERICSSON

Caloric Pumping Engines.

FOR economy, durability, and efficiency unequalled. Have been in use on the Erie, Central, Hudson River, Harlem and other roads for eight years. Recommended by all Superintendents in the highest terms.

American Railroad Journal.

New York, Saturday, August 17, 1867.

Minnesota and Northwestern Railroad.

This road is chartered to run from the Minnesota State line (where it unites with a road from McGregor, Iowa,) through Austin, Geneva, Wilton, Winnebago Agency, Mankato, New Ulm, Redwood, to Big Stone Lake, connecting there with the Northern Pacific Railway, which passes through the gold mining region to the Pacific coast. The country over which it will pass is comparatively level and of easy grade, and is also among the most fertile lands in the State. A St. Louis paper says: "Not a mile of rail will be wasted by circuitous routes, as the points designated are on an air line its entire length. This road will in fact be from Chicago, the commercial heart, the ascending aorta leading to the great cereal regions of the Northwest."

North Missouri Railroad.

The gauge of the North Missouri Railroad has been changed from 5 feet 6 inches to 4 feet 8 inches, and now conforms to the gauge of all the roads in Iown and Illinois, and the Hannibal and St. Joseph road. Trains will run direct from St. Louis to St. Joseph hereafter. The work of changing the gauge, the distance being one hundred and seventy miles, was accomplished in three days.

Chesapeake and Delaware Canal.

The fiscal year of this company closes on the 1st of May. The gross income for the year 1866–'67 then ending was as follows:

Receipts from tolls		$346,195 75
Received from Government U. S. tax 2½ per cent. on gross receipts of tolls paid in July and August 1864.		2,052 00
Interest account—on money loaned out		3,559 87
Sales of old iron and lead	$1,983 13	
Rents of real estate	280 50	
Material to credit of new Summit Bridge	88 50	
		2,351 63
Balance on hand May 31, 1866, (incl. notes $55,000)		124,246 07
Total current resources		$478,405 42

The disbursements chargeable to income during the year were as follows:

General expenses—supplies, labor, &c.		$62,115 75
Water works at Chesapeake City, repairs, &c		13,152 93
Dredging work		7,254 42
Incidentals: salaries, office rent and supplies, &c.		17,401 70
Interest on mortgage		136,064 62
Dividend on capital, 3 per cent. declared 1866		37,554 00
U. S. tax on dividend		1,976 53
U. S. tax of 3@5 per cent. on $75,000 stock dividend issued to stockholders from cancelled loan		3,250 00
Contingent toll account		7,921 44
Dividend Fund—being $54,000 mortgage loan purchased under provision of the mortgage at a cost of		52,368 02
Bal. May 31, 1867, notes	$100,000 00	
" " in hand	39,345 11	
		139,345 11
Total, as above		$478,405 42

This work, though somewhat divested of its importance since the completion of so many railroads in its direction, and with the same objective points, consists of a deep cut or ship canal across the neck of the Chesapeake-Delaware Peninsula, connecting the navigation of the Delaware river with that of Chesapeake Bay and its tributaries, the Potomac, Susquehanna, &c. It cuts off the long stretch of navigation, *via* the Cape Charles and materially shortens the sea way between the cities on the opposite side of the land—Philadelphia, New York, &c., on the one hand, and Baltimore, Alexandria, &c., on the other. It is one of the principal outlets for the coal of the Cumberland region, *via* Alexandria, and of the semi-anthracite region of Central Pennsylvania, toward the East; and in this view has aided largely in the development of these important mining centres. It is also used very extensively by the traders and oystermen of Virginia on the whole Chesapeake border. The work was constructed in 1824–'29 and was one of the first canals in the United States. On account of unexpected difficulties its completion was delayed, and cost much more than the estimate; and for many years its revenues were small. The finances of the company, under these circumstances, became embarrassed; nor was it till some fifteen years from its final completion that it earned interest on its debts. In 1847 the amount in default had reached the sum of $796,592; but by this time the revenues had so increased as to afford a prospect that for the future the earnings would discharge current interest, and the overdue balance (arrears) was converted into twenty year certificates. In 1856 the whole funded debt of the company amounting to $2,800,000 was consolidated and secured by a mortgage, the bonds issued under which will become due July 1, 1886. No default has been made in interest since the settlement of 1867. The stockholders received in 1853 a dividend of 3 per cent.; but nothing further until June 1866, when another three per cent. dividend was declared and a similar dividend was paid in June 1867. Under the mortgage, however, the stockholders have had distributed to them shares equivalent to the amount of bonds purchased from income and cancelled. In January last acts were passed by the legislatures of Delaware and Maryland respectively, amending the charters and the supplementary acts, which restricted the amount of dividends to be paid; and under these acts the company now propose to pay, as their earnings may warrant, two dividends a year.

The near approach of the two great indentations of the coast formed by the Chesapeake and Delaware Bays, naturally suggested their connection by artificial means for commercial pur-

poses, as well as for the maintenance of internal communication in time of war. For these purposes charters were granted, in 1799 by Maryland, and in 1801 by Delaware; and in 1808 a careful survey of the route was made and the feasibility of the work ascertained. Capital was not so redundant at this early period as in the present era of Pacific Railroads; and hence we find that nothing was done towards construction until 1824 when the route was finally located and operations commenced. The canal commences in Delaware City, on the Delaware River, 42 miles below Philadelphia, and extends West to Back Creek, a tributary of Elk River which falls into Chesapeake Bay, a distance of 13½ miles. It has three locks —one having a lift of 16 feet on the Chesapeake side, and two of 8 feet each on the Delaware side. These locks are 220 feet by 24 feet and pass vessels drawing 9 feet of water. There is also a tide lock at either terminus. The canal in many parts is cut through solid rock, and the cuts in several instance are very deep—the most extensive being a cut of 86 feet. Water is supplied to the canal by pumping engines located at Chesapeake City. It has a general depth of 10 feet and a width of 66 feet.

The statement which follows, compiled from the annual reports of the company, exhibits an account of the passages through the canal, the tonnage of the vessels &c., and the amount received from tolls from the commencement of business in 1829 to the close of the fiscal year, May 31, 1867:

Years ending May 31.	Tolls received.	Tonnage.	No. of passages.
1830	$24,658 16	.....	.....
1831	61,223 15	153,400	5,280
1832	63,073 47	154,000	5,633
1833	61,160 38	160,490	6,790
1834	54,091 66	105,479	5,438
1835	47,511 30	91,600	4,889
1836	35,572 26	114,680	2,467
1837	56,481 66	100,000	5,433
1838	67,495 09	131,700	6,568
1839	67,548 11	120,260	6,034
1840	54,112 51	112,430	4,363
1841	69,414 93	125,980	6,384
1842	78,008 02	139,520	7,528
1843	66,018 45	127,200	5,973
1844	98,013 90	188,410	8,413
1845	97,559 40	195,040	8,778
1846	101,208 42	291,380	9,684
1847	167,510 26	341,580	12,054
1848	186,285 82	338,800	12,810
1849	178,029 82	351,550	11,802
1850	198,364 48	361,640	12,912
1851	215,889 28	389,440	13,582
1852	190,141 15	411,340	12,833
1853	246,282 54	477,630	15,065
1854	246,695 02	535,080	14,897
1855	225,224 13	586,970	14,391
1856	225,482 76	568,680	13,554
1857	229,081 33	616,170	14,628
1858	207,005 90	563,510	12,863
1859	202,350 24	496,100	12,134
1860	216,255 54	623,150	12,710
1861	195,946 39	596,294	11,347
1862	231,555 49	501,389	11,713
1863	293,124 18	674,305	14,293
1864	369,112 83	782,670	15,417
1865	424,312 59	916,973	12,811
1866	350,939 94	729,918	11,494
1867	346,195 75	726,666	12,131

The passages of 1866–'67 are accounted for thus:

	Steamers.	Barges.	Sail vessels.	Rafts.	Total.
Going West	936	2,430	1,914	.....	5,280
Going East	999	2,505	2,340	1,007	6,851
Total	1,935	4,935	4,254	1,007	12,131

The following presents a general statement of the leading features of the business of the canal for the last 20 years, covering the whole period during which the earnings have been sufficient to pay current expenses:

Years ending May 31.	Coal Tons.	Lumber Square feet.	Timber Cubic feet.	Grain Bushels.	Flour Bar. els.	Groceries Pounds.	Dry Goods Pounds.	Iron, all kinds Tons.	Oysters Tons.
1848	36,175	49,374,400	1,641,000	1,141,360	115,639	25,518,000	24,499,430	55,392	15,176
1849	39,314	49,549,400	1,944,340	1,667,262	91,910	27,918,910	21,520,932	48,760	11,326
1850	53,693	44,795,300	2,145,000	1,626,476	113,583	32,102,555	23,644,551	30,273	10,344
1851	60,016	46,454,000	2,231,400	1,831,000	133,760	36,450,925	22,342,426	29,594	13,007
1852	59,547	49,294,200	1,528,200	2,044,466	120,321	37,933,551	16,734,541	23,284	10,945
1853	86,985	58,967,800	3,991,900	2,017,900	123,419	40,169,190	17,681,648	31,923	15,751
1854	122,692	56,548,100	3,413,760	2,112,647	110,159	39,129,824	15,243,290	38,670	14,754

1861	194,690	55,079,993	3,194,971	1,277,114	198,226	43,800,534	31,591,694	27,000	6,131
1862	150,385	32,211,495	4,148,053	2,350,006	117,207	69,069,861	31,654,723	23,270	10,277
1863	176,773	59,690,480	4,023,955	2,882,807	180,104	59,834,730	20,155,900	42,060	17,909
1864	217,949	52,740,400	5,309,272	1,340,646	206,005	78,470,500	19,997,700	37,760	29,006
1865	360,791	33,597,000	7,937,060	866,309	167,560	67,419,400	14,671,500	26,000	21,620
1866	268,397	28,665,370	4,722,870	706,585	121,523	61,057,440	17,573,700	34,880	12,737
1867	381,572	42,924,770	4,770,029	1,553,607	113,521	53,637,180	19,743,760	41,636	11,848

Of the coal forwarded in 1866–'67 there were shipped—eastward from the Pennsylvania Canals, 63,798 tons of semi-anthracite; southward from Philadelphia, 92,823 tons anthracite, and eastward from Cumberland, *via* Washington and Baltimore, 221,851 tons bituminous.

The distribution of the business of the canal as indicated by the amounts collected at the several business points is shown for three years in the annexed table:

	1864–'65.	1865–'66.	1866–'67.
Baltimore	$169,765 73	$165,759 49	$176,705 32
Havre de Grace	25,145 95	24,189 28	37,495 53
Port Deposit	82,644 77	57,051 89	61,630 43
Norfolk, &c.	1,577 43	9,807 91	8,476 98
District of Columbia.	85,811 54	44,103 66	23,462 20
Canal Levels	2,492 42	3,110 61	1,576 26
Chesapeake Bay, viz:			
Wood	3,479 44	4,372 76	5,547 42
Oysters	13,075 98	11,123 29	8,553 46
Fish	789 15	1,251 45	1,326 20
Mdze., &c.	33,787 13	25,763 60	17,997 96
Empty vessels	5,743 05	4,406 00	3,424 00
Total	$424,312 59	$350,939 94	$346,195 75

The tolls collected in the District of Columbia in the years named were swelled in amount by Government transportation. In 1860–'61, only $9,667 51 were collected at this point, but in the next three years $34,756 21, $60,014 92, and $80,461 65, respectively. Hay, grain, military stores, &c., were the principal articles of Government transportation.

The general balance sheet showing the financial condition of the company as of June 1, 1867, furnishes the following statement:

Capital stock—including united, old and new, also the stock issued from cancelled loan		$1,818,963 50
Mortgage loan, (1866)		2,254,000 00
Total		$4,072,963 50
The charges against this amount are as follows:		
Cost of canal, including the cost of old feeder ($110,925)		$3,364,975 91
Amounts held by Trustees, viz:		
Stock of the Ches. & Del. Canal Co.	100,000 00	
Mortgage loan of the company	120,511 03	
Stock of the Del. R. R. Company	16,600 00	
Stock of the Delaware & Chesapeake Towboat Company	3,400 00	
Contingent fund, viz:		
City of Philadelphia 6 per cent. bonds	$13,600 00	
Camden and Amboy R.R. Company's bonds	8,000 00	
United States 5-20s	4,000 00	
Schuylkill Navigation Co. Loan	6,200 00	
Lehigh Coal and Navigation Co. loan	10,000 00	
Delaware Division Canal Co.'s stock	10,000 00	
		51,800 09
Dividend fund, viz:		
1,165 shares of stock of the company issued from cancelled loan purchased under the mortgage		233,000 00
Mortgage loan of the company, purchased as above and not yet cancelled		26,600 00
Real estate of the Co. on the line of the canal		16,731 45
Balance on hand		139,345 11
Total, as above		$4,072,963 50

At the general meeting of the stockholders held in the city of Philadelphia, June 3, 1867, the following gentlemen were elected to the Board of Directors to serve during the ensuing year:

President.—ANDREW C. GRAY.

Directors.—Samuel W. Jones, George Cadwalader, Francis R. Cope, Joseph Swift, Joseph Jones, J. F. Fisher, John Bohlen, Wm. Harmar, H. Pratt McKean, J. F. Gilpin, T. A. Biddle, I. V. Wilkinson, Isaac Ford, Charles H. Hutchinson.

Treasurer.—HENRY V. LESLEY.

Lexington and Arlington Railroad.

The annual meeting of this company was held in Boston on the 7th inst. The President, R. D. Blinn of Lexington, submitted the report of the Directors, and the Treasurer, Geo. O. Davis, the financial statement. From these reports, we learn that the receipts of the year from all sources were $37,420 54; expenditures, including extraordinary repairs provided for last year, $35,726 28. Under the present management the road has been placed, year by year, in a better condition. About $10,000 have been expended the past year in extra improvements, and $5,400 paid out as dividends, showing a decided gain in the financial condition of the road. The following gentlemen were elected Directors for the ensuing year: R. D. Blinn and David Wood of Lexington, George F. Fay and Charles P. Crocker of Fitchburg, and W. E. Parmenter of Arlington. The Directors

were authorized to lease or sell the road. Mr. Bliss was re-elected President of the company, and Mr. Davis, Clerk and Treasurer.

Warren and Franklin Railroad.

The cost of this road is represented by: 1st mortgage bonds, $1,300,000; stock, 28,000 shares, $1,400,000—total, $2,700,000, which were issued to contractors; and 2d mortgage bonds, $700,000, the proceeds of which were used in the purchase of rolling stock, and in the construction of sidings and stations—making the total stock and bonds, $3,400,000. According to a statement of the Secretary of the company to the Common Council Committee on merger of the Philadelphia and Erie and Warren and Franklin Railroads, on the 7th inst., the receipts of the road have been as follows:

From August 1, 1866, to December 31, 1866		$168,158 63
January 1, to July 1, 1867		172,984 55
Total		$341,143 18
Expenses August to December 31, 1866	$107,463 46	
January 1, to July 1, 1867	100,848 69	
		208,312 15
Net receipts for 11 months		$132,851 03

Chicago, Ill.—Its Trade and Commerce.

"This little mushroom town is situated on the verge of a level tract of country, for the greater part consisting of open prairie lands, at a point where a small river, whose sources interlock—in the wet season—with those of the Illinois River, enters Lake Michigan. It, however, forms no harbor, and vessels must anchor in the open lake, which spreads to the horizon on the northeast, in a sheet of uniform extent." Thus wrote Latrobe, an intelligent traveller who visited Chicago in 1833.

This "mushroom town" has now become the metropolis of the trade of the northwest, and the largest city of the great interior of the Union. In the short space of the third of a century it has risen from the position of a small trading post to that of the most important grain and provision depot in the world.

The Chicago *Times*, in speaking of the development that has made the city what we find it at the present day, thus apostrophizes—"Its growth may well be styled unprecedented; the work of thirty years has effected what has before been achieved only by the combined labors of generations. Commercial transactions on a much larger scale than ever before have characterized her business; rivers of wealth have poured into her Treasury; improvements of the most substantial and commodious character, and equalled in grandeur and beauty of architecture only by the temples of the ancients, have been made; its population has been increased by men of enterprise and energy, who have been attracted hither to swell the ranks of the professions of commercial and manufacturing pursuits. And while this is true of the city, it is no less a fact, that the country with which she carries on her immense commerce, and which furnishes the basis of her prosperity, has increased in a corresponding ratio. Thus, whether we look at Chicago, as she presents herself to day, or to the country with which her railroads and navigation place her in conjunction, we see on every hand the existence of numerous elements of prosperity and rapid growth, evidences of a future which shall place our city's name, at no distant point, the most famous of the American continent."

In substantiation of this glowing description of the city, we now proceed to measure its advance by statistics, and mark thus its footsteps at yearly intervals from the first dawnings of its infancy to its present magnificent developments. The figure we shall present will demonstrate the revolution which a few years of well applied industry and perseverance have effected in the city itself, as well as in the country tributary to it. The natural outlet of the greater part of the country referred to, is the Mississippi, which traverses the section from which Chicago draws so much wealth from its northern extremity southward throughout, and thence to the Gulf of Mexico. But the trade and commerce of this grand avenue has not kept pace with the development of the country through which it passes, and for which it is the natural channel to the ocean. The artificial highways of trade, canals and railroads, have tapped the great interior and carried its products eastward across the continent, making Chicago one of its great re-shipping places. The live stock, grain and other produce of the regions, on this and the further side of the Mississippi, have thus been almost entirely diverted to the lakes, the Erie Canal, the St. Lawrence River and the great trunk lines of railroad that diverge from the heart of the producing regions to the seaboard at Boston, New York, Philadelphia and Baltimore. The reasons for such a change of route, beyond the vast enterprise which has erected the cheaper and more convenient outlets, are natural and apparent. The disadvantages of the Mississippi route are many. The risk of damage to grain or flour and other commodities, staples of the upper valley, and which are liable to receive injury from heat by passing through the more southern parallels is not the least important drawback, and the uncertainty of river navigation is a great objection; while the advantage of cheaper and speedier transportation by railroads and canals on the eastern routes, with the better markets on the seaboard, are obvious and have aided chiefly in effecting the divergence of the commerce of the interior from the river channels. It is to this change of direction that Chicago owes its progress and present prosperity, the impetus of which is ever gaining by the force of events, and will most certainly continue to advance the great city as we now find Chicago to be, into a commercial emporium of such proportions, such wealth and such importance, that the records of the great cities of the world, as they now exist, will fail to produce a parallel wherewith to measure its growth and circumstances.

In illustration of the growth of Chicago no better test can be applied than the increase of its population from time to time. The following figures taken from actual enumeration prove this phase of the development of the city, and no less the development of the tributary country which could demand such an increasing volume of agencies through which to transact its business and exchanges. The growth of Chicago, indeed, may be said to have been the result of the widening and filling up of its commercial circuit, which already extends west of it fully ten degrees of longitude, and includes the breadth between 36°, 30′ and 49° north latitude. The increase of the city population* has been thus:

1830	70	1849	28,047
1840 U. S. census	4,470	1850 U.S. census	29,963
1843	7,580	1852	38,734
1844	10,864	1853	60,625
1845	12,088	1860 U.S. census	109,260
1846	14,169	1862	138,835
1847	16,859	1865 State cens's	178,539
1848	20,023		

* A local census in 1866 resulted in 200,418.

The County of Cook, in which Chicago is located, had in 1860, 143,947, and in 1865, 217,309 inhabitants, being an increase in five years of 73,362, or more than 50 per cent.; and thus the city and country are filling up at a constantly increasing rate.

The country tributary to Chicago comprises the following States and their population from 1840 to 1865. In 1830, Illinois had a population of 157,445; and Missouri, 140,455:

	1840.	1850.	1860.	1865.
Illinois	476,183	851,470	1,711,951	2,141,510
Wisconsin	30,945	305,391	775,881	868,937
Minnesota	.....	4,077	172,123	210,000*
Iowa	43,112	192,214	674,913	754,732
Nebraska	.....	.....	28,841	40,000*
Missouri	383,702	682,044	1,182,012	1,400,000*
Kansas	.....	.....	107,206	145,000*
Total	933,942	2,037,196	4,652,927	5,560,179

* Estimated.

This exhibit shows a wonderful progress: where stood one inhabitant in 1830, there stood in 1840 *thirty-two*; from 1840 to 1850 the population doubled, and from 1850 to 1860, the two million at the former date increased to more than 4½ millions at the latter date, and thence to the present time another million has been added. Truly there must be an enticing prize in this region to attract so many adventurers.

But much of this progress has been due to the ever increasing facilities of travel and transportation. Before 1850 there were no railroads in all this region. In 1850 there were 111 miles, in 1855 the length had been increased to 1,800 miles, in 1860 to 5,400 miles, and in 1865 to 6,300 miles. It is now about 7,500 miles. These railroads, with very few exceptions make Chicago their ultimate point of concentration, and the depot of their trade. The railroads from Chicago eastward both north and south of the lakes continue this system to the seaboard at Montreal and Quebec, Portland, Boston, New York, &c., giving every facility to personal migration and the transportation of produce and merchandize.

Starting up in 1838 with an export trade of seventy-eight bushels, the grain and flour trade of Chicago has developed with such rapidity, and has already reached proportions so gigantic as to stamp it as one of the chief marvels of modern commerce. To trace its rise and progress would be completing the record of the great city itself, for this trade has been the food on which it has built its growth. At the period noted the whole trade of the city was supplied by two small lake vessels. Now Chicago estimates the tonnage of her fleets by thousands. The grain traffic of the country, beginning at an early period with the meagre productions of the Eastern States, was gradually extended westward, and when navigation east and west was opened, then it was that our inland seas became the highways of a com-

merce which has already attained a magnitude greater than that of most nations of the old world. Then it was that the vast territory which lay west of the lakes, hitherto uncultivated, became the field for the pioneers of industry and civilization, who laid the foundation of what are now flourishing States. And to-day Chicago, occupying the centre of this traffic, takes rank as the leading grain market.

In order that the magnitude of the commercial interests of Chicago may be fully comprehended, we cite the following table, showing the receipts and shipments of the different grains and other products at the port in 1866:

	Received.	Shipped.
Flour, bbls	1,821,494	1,784,833
Wheat, bu	11,874,934	9,711,226
Corn, bu	33,073,323	23,540,406
Oats, bu	10,182,141	9,820,824
Rye, bu	1,735,208	1,463,344
Barley, bu	1,513,830	1,242,245
Seeds, lbs	16,975,096	10,231,190
Broom corn, lbs	8,281,218	5,863,494
Cut meats, lbs	10,542,485	61,874,365
Beef, bbls	6,053	79,691
Pork, bbls	38,239	106,978
Lard, lbs	5,558,431	20,971,597
Tallow, lbs	2,133,574	7,151,376

The table which follows shows the receipts of all grains at Chicago since the opening of the trade in 1838; the flour being reduced to and noted as wheat. This table gives a fair index of the unprecedented growth of the city from year to year:

Year.	Wheat.	Corn.	Oats.	Rye.	Barley.
1838	78	----	----	----	----
1839	3,678	----	----	----	----
1840	10,000	----	----	----	----
1841	40,000	----	----	----	----
1842	586,906	----	----	----	----
1843	688,967	----	----	----	----
1844	923,494	----	----	----	----
1845	1,024,620	----	----	----	----
1846	1,559,619	----	----	----	----
1847	2,136,994	67,135	38,192	----	----
1848	2,286,000	566,460	65,280	----	----
1849	2,192,809	614,848	26,849	31,453	----
1850	1,387,989	262,023	186,054	22,872	----

1858	10,909,243	7,493,212	1,498,134	127,008	7,589
1859	10,759,359	2,217,654	1,174,177	478,162	131,449
1860	16,054,379	13,743,172	1,039,779	129,156	291,211
1861	22,913,830	24,186,382	1,655,384	422,492	185,293
1862	22,902,765	29,452,610	3,112,606	871,796	532,195
1863	17,025,336	24,444,147	7,514,994	835,133	668,735
1864	16,396,689	12,891,785	13,747,887	758,201	261,110
1865	11,569,160	24,277,221	8,773,403	717,709	460,210
1866	20,982,404	33,073,323	10,182,141	1,735,908	1,513,830

The manufacture of flour within the city has become a large interest, and may now be reckoned at nearly 500,000 barrels a year. The returns for the last seven years are thus reported—in 1860, 232,000; in 1861, 291,852; in 1862, 260,980; in 1863, 236,261; in 1664, 255,058; in 1865, 288,809, and in 1866, 444,524 barrels. During the current year the manufacture promises to be largely increased. This result will be the same even if no additional mills be built, by the increased production of the mills built in 1866, which have not been in operation a sufficient length of time to enter largely into the statistics of 1866. The receipts and shipments of flour and grain, for the twelve years 1855–'66, are shown in the following table:

	Flour.		Wheat.	
	Receipts.	Shipped.	Received.	Shipped
1855	320,312	163,419	7,735,097	6,298,155
1856	410,989	216,389	8,767,700	8,364,420

1866	1,735,208	1,463,344	1,513,830	1,242,245

The second most remarkable instance of the wonderful development of Chicago, is the extraordinary proportions which have within a very short period been attained by her packing business. The commencement of this branch of industry in Chicago dates from the year 1835, when 3,000 head composed the total number of cattle, cut and packed in the city. Since that time the packing business has been increased with the growth of the city. The other cities and towns of the interior, which have hitherto been considered prominent packing points, were successively led by Chicago, and in 1861, Cincinnati yielded to the lake city the title of the Porkopolis of the country. And now Chicago furnishes one-third the entire packages in all the States engaged in this business. The same causes which made Chicago the greatest grain market in the country have contributed towards making it the most important packing point. The development of the great interior and the grand network of railroads which extends, and is still extending wider and further over its great bosom, have rendered this the chief collecting point for the immense numbers of cattle and hogs which are raised by the farmers and stock-breeders; and wherever the cattle and hogs are, there will concentrate the capital to purchase, to pack and to ship the product to the Eastern States and Europe.

The tables which follow illustrate the yearly movements of this great arm of the business of Chicago.

The receipts and shipments of live and dressed hogs, and the number of hogs dressed in Chicago during the past twelve years are shown in the following table:

	Number of Hogs.		Hogs packed.
	Received.	Shipp'd.	Number.
1855	302,068	145 580	1855–'56 80,380
1856	293,625	281,540	1856–'57 74,000
1857	251,115	131,216	1857–'58 99,262
1858	540,486	192,016	1858–'59 179,684
1859	271,204	110,243	1859–'60 151,339
1860	392,864	227,166	1860–'61 271,805
1861	675,902	289,094	1861–'62 505,691
1862	1,348,890	491,134	1862–'63 970,264
1863	1,900,519	810,455	1863–'64 904,659
1864	1,582,047	701,853	1864–'65 760,514
1865	876,572	599,044	1865–'66 507,355
1866	1,256,687	548,079	1866–'67 639,332

The following table shows the receipts and shipments of cattle from Chicago during the past twelve years:

Year.	Received.	Shipped.
1855	10,715	6,253
1856	21,950	22,502
1857	48,524	25,502
1858	140,534	42,638
1859	111,694	87,584
1860	177,101	97,474
1861	304,579	124,145
1862	209,655	112,745
1863	300,622	187,068
1864	262,446	479,520
1865	335,761	242,766
1866	386,065	260,448

The number of cattle packed in Chicago during the same series of years is shown in the following table:

	Packed.		Packed.
1854–'55	23,691	1861–'62	53,754
1855–'56	28,972	1862–'63	59,687
1856–'57	14,970	1863–'64	70,086
1857–'58	34,675	1864–'65	92,459
1858–'59	45,503	1865–'66	27,172
1859–'60	57,606	1866–'67	25,998
1860–'61	34,623		

Next in importance the Lumber trade of the city commands attention; and here again Chicago stands foremost, the most considerable lumber trade market in the world. Like the grain trade it has sprung up, at first almost imperceptibly; but soon gaining pace with the meteor like progress of the city, it, too, has developed into the most enormous and startling proportions. From thirty-two millions of feet, which comprised the whole amount of lumber received in 1847, in the next ten years it increased millions on millions, until it had reached four hundred and forty millions of feet. Hitherto a very large portion of the country bordering on the Mississippi was supplied by the upper tributaries of that river; but these sources have been drawn upon until they are well nigh exhausted, and can no longer be worked as before, because the distance which it is necessary to draw the logs before they can be floated, renders it more expensive than it is to bring the lumber from Chicago. And thus has Chicago supplanted the other sources from which lumber has been supplied, until now its trade is almost a monopoly. The lumber regions of Canada, Michigan, and Wisconsin, inexhaustible as it would appear, are all accessible to the lakes, and the lumber is readily transported to Chicago at a trifling expense, so that in purchasing at this port dealers can do almost as well as

if in the very heart of the lumber region many miles distant.

The receipts and shipments of lumber, lath and shingles in the eight years 1859–1866 are shown in the following statement:

RECEIPTS.

Year.	Lumber, ft.	Shingles, No.	Lath, No.
1859	302,845,207	105,927,000	49,102,000
1860	262,494,626	127,894,000	36,691,000
1861	249,308,705	79,356,000	32,637,000
1862	365,674,045	131,255,000	23,880,000
1863	413,301,818	172,361,878	41,768,000
1864	501,592,406	199,169,750	65,953,900
1865	606,645,300	304,412,000	60,840,000
1866	683,406,000	461,933,000	119,824,000

SHIPMENTS.

Year.	Lumber, ft.	Shingles, No.	Lath, No.
1859	226,120,389	195,117,700	28,236,535
1860	225,372,340	168,302,525	32,170,420
1861	189,379,445	94,421,186	33,282,725
1862	189,277,079	55,761,630	16,966,600
1863	221,799,330	102,634,447	33,293,547
1864	269,496,579	138,497,256	36,242,010
1865	385,353,678	258,251,450	61,516,000
1866	487,714,000	282,503,000	67,166,000

The detailed consideration of the other great branches of the city's business, many of them extensive and important, is prevented by the want of sufficient space. Among these, the manufacture and trade in high wines stands prominent. The progress of this interest for the ten years ending with 1866 is shown in the following statement:

Year.	Bbls. received.	Bbls. shipped.	Galls. manuf.
1857	28,185	10,657	3,050,000
1858	28,644	28,007	3,600,000
1859	29,431	24,529	3,180,000
1860	62,426	65,223	3,744,000
1861	89,915	111,240	5,394,000
1862	61,703	130,170	3,702,000
1863	137,947	159,312	4,850,000
1864	102,032	138,644	3,498,000
1865	26,509	45,070	476,000
1866	56,451	75,326	2,162,185

We close this article with the yearly returns of the trade in salt, hides, seeds, wool, coal and cordwood, which together form interests respectively of large value and importance. The following are the receipts at the city for the last eight years:

Year.	Salt, bbls.	Hides, lbs.	Seeds, lbs.	Wool, lbs.	Coal, tons.	Wood, cords.
1859	316,291	12,681,446	5,241,547	918,319	131,204	114,352
1860	255,148	11,233,918	7,071,074	899,248	131,080	83,071
1861	390,499	9,962,723	7,742,614	1,184,208	184,089	76,770
1662	612,003	12,747,123	8,176,432	1,523,571	218,423	101,781
1863	775,364	17,557,728	9,885,208	2,831,194	284,196	110,703
1864	680,346	20,052,235	10,180,781	4,304,388	323,275	149,312
1865	609,844	18,133,515	10,583,636	7,590,687	303,770	129,566
1866	493,407	20,086,098	16,795,046	8,602,834	402,243	143,080

The following extract from the Chicago *Times*, of Jan. 1, 1867, will give some idea of the yearly advance of the city in a variety of ways:

Probably no city in the country has advanced during the past year in population and public improvements more rapidly than Chicago. Notwithstanding the high price of labor and building material, there have been erected during the year not less than 9,000 buildings, ranging in cost from that of the simple cottage to the most costly public and private edifices. The cost of these structures will not fall far short of $9,000,000.

Of these structures a considerable number are church edifices, and it is estimated that the cost of the improvements put upon this class of buildings, including new ones, is about $900,000.

Five public school houses have been erected during the year, at an expense of $91,000, and two fine Catholic school houses have been constructed at a cost of about $65,000.

Many of the structures completed during the year just passed will stand among the most beautiful and costly in the city. Among these may be mentioned the great union depot for the Michigan Southern and Northern Indiana, and the Chicago, Rock Island and Pacific Railroads, and the Oriental and Mercantile buildings on La Salle street, nearly opposite the Board of Trade Hall.

The list of buildings includes a large number of business blocks, costing from $20,000 to $175,000 each. These buildings have been constructed in the most substantial manner of brick and Illinois marble. Many first class private residences have been built during the year, ranging in price from $15,000 to $100,000.

The total assessed valuation of the real estate of Chicago was $66,495,116, divided among the different divisions as follows: South, $37,400,007; West, $29,476,256; North, $8,628,863.

In public improvements there has been an unusual activity during the year. The lake tunnel has been completed, the Washington street tunnel commenced, and a more than average amount of sewerage and wooden block pavement have been constructed. The following facts will give some idea of the work done in the various branches of public improvement: There have been laid eight miles of water pipe, mostly of 4 inches diameter, and the consumption of water has ranged at from six to seven millions of gallons per day. The lake tunnel has been completed, and a new tower, well and engines, capable of affording 18,000,000 gallons of water daily, have been begun and are far on the way towards completion. A bridge has been erected at Clark street at a cost of $16,000, and another across the north branch at Halsted street, at a cost of $7,500.

The Washington street tunnel was commenced on the 2d day of October, and at the present time about 9,000 cubic yards have been excavated, and the work is progressing with a degree of rapidity, that augurs the early completion of the undertaking; the coffer dam has been commenced and piles are being already driven in that work.

Of sewerage there have been built between 8 and 9 miles, distributed as follows. South, 16,411 linear feet; West, 23,180 linear feet; North, 7,680 linear feet. The sewers so constructed range in diameter from 1 to 5 feet. A large number of streets have been opened, extended or widened. A considerable portion of Archer road and Noble street have been cindered. Several have been macadamized. The following have been paved with block pavement: West Randolph and Madison from the river to Halsted; Wabash avenue from the river to Twenty-second street Washington from State street to Michigan avenue; Van Buren street from State street to the river. In the three divisions about 54 miles of sidewalk have been ordered during the year, and 215 lamp posts erected.

☞ The Legislature of New Jersey, at its last session, passed an act authorizing the construction of a railroad from Atsion, on the Raritan and Delaware Bay Railroad, to the Delaware River. The road will pass through Hammonton, Winslow, and Vineland, and within a few miles of the cities of Millville, Bridgeton, and Salem. A company to prosecute the work has been organized by the election of a board of directors, of which Chas. K. Landis Esq., of Vineland, is President.

Commerce of New York.

The foreign imports at New York for the month of July are officially stated as follows:

	1866.	1867.
Entered for consumpt'n.	$14,304,403	$11,036,960
Do. for warehousing	11,301,274	11,226,514
Free goods	899,549	766,786

Withdrawn fr. wareh'use	9,084,242	7,560,396

We also present our usual statement of the comparative totals since the beginning of the year:

The foreign imports at New York for the seven months from January 1st, were:

	1866.	1867.
Entered for consumpt'n.	$103,064,165	$76,009,575
Do. for warehousing	77,727,741	75,297,805
Free goods	7,936,165	6,742,477
Specie and bullion	1,526,147	1,613,302
Total entered at port	$190,254,218	$159,663,159
Withdrawn fr. wareh'se	59,078,096	67,048,287

The relative imports of dry goods, specie and general merchandise at New York for the first seven months of the last sixteen years, was:

Seven mos. of	Imports of Dry Goods.	Imports of Gen. mdse	Imports of Specie	Total Imports.
1851	$42,240,217	$43,174,714	$1,480,476	$86,895,407
1852	34,994,294	37,215,342	2,028,248	74,237,884
1853	57,421,919	59,393,895	1,099,516	117,915,020
1854	55,308,993	58,126,642	1,606,090	115,041,725
1855	34,724,393	49,008,832	523,151	84,256,376
1856	60,296,946	72,757,795	963,500	134,081,241
1857	66,716,293	84,156,030	5,857,310	156,729,633
1858	30,169,358	48,305,765	1,815,258	80,290,381
1859	71,782,984	83,366,928	1,301,082	156,450,994
1860	63,362,687	78,465,850	751,188	142,599,725
1861	31 515,606	54,375,955	32,906,166	118,797,727
1862	30,183,764	74,488,315	731,556	105,403,635
1863	35,112,935	70,860,800	1,036,013	107,009,748
1864	53,122,729	106,064,043	1,555,066	160,741,838
1865	31,850,399	68,018,028	1,305,463	101,173,890
1866	80,442,325	108,285,746	1,526,147	190,254,218
1867	53,451,860	104,617,997	1,613,302	159,663,159

The following statement will show the revenue from Customs at New York for the month of July, the previous six months, and for the seven months ending July 31st:

	1866.	1867.
In July	$11,507,186 60	$9,505,432 94
Previous 6 months	67,548,189 78	59,354,688 90
Total since Jan. 1	$79,055,376 38	$68,860,121 84

The exports from New York to foreign ports in the month of July, were:

	1866.	1867.
Domestic produce	$13,057,476	$13,666,098
Foreign free goods	27,269	20,168
Do. dutiable	401,724	382,595
Specie and bullion	5,821,459	13,519,894
Total exports	$19,307,928	$27,588,755
Do. exclusive of specie	13,486,469	14,068,861

The exports from New York to foreign ports for six months from January 1, were:

	1866.	1867.
Domestic produce	$117,311,612	$104,813,956
Foreign free goods	486,063	307,406
Do. dutiable	3,427,711	4,594,128
Specie and bullion	51,603,889	28,115,556
Total exports	$172,829,275	$147,831,057
Do. exclusive of specie	121,225,386	109,715,501

☞ The Nashville and Northwestern Railroad has been completed to Paducah, and trains will commence running to Memphis on the 22d instant. This new connection saves five hours between Nashville and Memphis.

Tonnage of New York.

The number of vessels arriving and departing from the port of New York, together with the tonnage and seamen employed during the second quarter of the year 1867, is officially stated as follows:

Entered at New York from foreign ports for the three months ending June 30, 1867:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels ...	631	319,818	9,900
Foreign vessels	948	548,454	20,670
Total.....	1,579	868,272	30,570
Same time in 1866..	1,619	862,768	29,432
" 1865..	1,316	595,654	21,107
" 1864..	1,564	722,273	35,777
" 1863..	1,405	685,587	22,462
" 1862..	1,297	545,047	17,754
" 1861..	1,435	725,677	22,499
" 1860..	1,330	605,729	19,827

Entered at New York from foreign ports for six months ending June 30, 1867:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels...	941	504,042	15,808
Foreign vessels.....	1,455	906,062	33,522
Total.....	2,396	1,410,104	49,330
Same time in 1866..	2,546	1,458,313	49,943
" 1865..	2,197	1,011,509	35,629
" 1864..	2,491	1,205,529	53,391
" 1863..	2,468	1,207,704	39,717
" 1862..	2,543	1,205,790	38,122
" 1861..	2,400	1,184,480	37,846
" 1860..	2,138	1,024,727	35,558

The following is a comparative statement of arrivals of American and Foreign vessels at this port under our own and all other flags during the first six months in each of the last seven years:

First half of	American. No. of Vessels.	Tons.	Foreign. No. of Vessels.	Tons.
1861.....	1,676	810,619	724	373,860
1862.....	1,386	724,546	1,157	481,144
1863.....	1,065	591,405	1,400	616,298
1864.....	720	421,604	1,771	783,925
1865.....	650	349,569	1,547	661,940
1866.....	837	519,974	1,709	938,337
1867.....	941	509,042	1,455	906,062

Cleared at New York for foreign ports during the three months ending June 30, 1867:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels...	383	244,765	7,668
Foreign vessels.....	866	553,382	19,331
Total.....	1,249	798,147	26,999
Same time in 1866..	1,334	776,539	26,474
" 1865..	1,220	567,577	19,531
" 1864..	1,215	607,237	19,795
" 1863..	1,134	578,821	18,560
" 1862..	1,169	576,046	17,898
" 1861..	1,127	607,580	19,020
" 1860..	1,085	515,851	17,525

Cleared at New York for foreign ports during the six months ending June 30, 1867:

	Vessels.	Tonnage.	Seamen.
American vessels...	715	446,713	14,091
Foreign vessels	1,421	909,183	31,847

Steam on Canals.

A new invention to propel boats on canals was recently tried in this city, the novelty of which consists in applying the piston stroke directly to the paddles, without a change of motion, as is the case in both side wheel and screw tugs, where the vertical or horizontal motion is changed to a rotary one, thereby losing at least 50 per cent. of power.

American Railroad Journal.

Saturday, August 17, 1867.

Stock Exchange and Money Market.

The Money Market is remarkably easy for all responsible borrowers. Capital is unusually abundant. Call loans are available in very full measure at 3@4 per cent. on the pledge of national and railway stocks. Some of the Government houses have had time advances made to them, in round sums, at the inside rate; and temporary deposits placed at their disposal at the exceptional figures of 2½ per cent. At these prices, the supply is in excess of the requirements of street borrowers, particularly in view of the reduced volume of business at the Stock Boards. With the approach of the season of activity in commercial circles, the supply of business paper is increasing. The banks, as well as private parties, are discounting promptly all that grades up to prime to good at 6@7 per cent. per annum. Some very choice names are rated as favorably as 5½ per cent. per annum; but this, too, is an exceptional quotation. The Government continues its disbursements with liberality; but its sources of revenue are so prolific, that it is enabled to do so without materially disturbing its cash reserves. The Department is paying off the matured and maturing compound interest notes, promptly on presentation. It is also exchanging new Five Twenty bonds for the August series of Seven Thirties, which matured on Wednesday, and of which only about ten millions remain to be funded. The time for funding this small outstanding balance of a three hundred million loan has been officially extended by Secretary McCulloch to Sept. 15, or a month after the full maturity of the series. The city banks made a respectable exhibit on Monday, showing for the past week, an increase of $948,669 in the legal tender reserve, with a decrease of $1,745,049 in the deposits, $1,512,776 in the loan averages, and $1,149,972 in the specie hoard. The specie reserve of the banks is now $5,311,997, against $8,424,209 same time last year. The city bank deposits are now $199,408,705, against $214,232,363 week ending Aug. 4, 1866. The legal tender reserve amounts to $76,047,431, against $86,861,834 same time last year. The circulation now stands at $33,565,278, against $27,528,522 same time last year. The loans are now $253,427,240, against $258,263,063 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $83,311,344 a day, against a daily average of $78,003,624 the preceding week; and $80,182,871 the week ending with July 27. The current week's exchanges average about $75,000,000 a day.

National Bank notes to the amount of $68,020 were issued last week, making the total issue to 1,671 banks thus far, $303,571,496, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,595,862, leaving, with the existing 1,650 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,975,634. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,649,500; and for the public deposits, $38,787,950—making a total of $379,437,550. The Treasury Department last week redeemed and destroyed $232,300 of worn and mutilated fractional currency, and issued $49,563 of new.

The U. S. Sub-Treasury receipts, week ending with Aug. 10, were $18,505,725, including $2,685,076 from customs duties; payments, $18,180,193; balance at the close of the week, $129,087,202, against $128,761,670, at the close of the preceding week, showing an increase of $325,235. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $10,317,129 including $381,179 from customs, and payments, $10,386,720; on Tuesday, receipts, $2,631,398 including $387,676 from customs, payments, $1,007,125. The balance at the close of business on Tuesday stood at $130,641,884, against $128,073,723 a week previous.

The Philadelphia Bank movement the past week shows an increase in loans, of $129,729; an increase of $2,924 in specie; a decrease in legal tenders of $824,008; a decrease of $1,233,-

066 in deposits; and a decrease of $8,164 in circulation. The Bank Clearings show a decrease of $1,074,801, and the balances, a decrease of $802,029.

Government revenues keep up to a very satisfactory average. The customs are quite full, though the excises are lighter in their yield. The excises, last week, yielded $3,744,460, against $6,789,305 the preceding week; customs at the port of New York $2,685,076, and at the outports, about $800,000 (in coin) more, making the grand total income for the week equal about $8,693,566 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st inst., have been about $34,000,000.

Gold has been dexterously manipulated by the operators for a rise, so that slightly higher figures have been made on speculation, despite the abundant supply available. The range, during the week, was from 137⅞@141, and the closing figures on Wednesday were 140½@140⅝. On Tuesday, some little excitement was occasioned in the street by the circulation of a broad sheet of defamation, specially designed to lessen the public confidence in the present conservative administration of the Treasury Department, by the publication of cunningly-devised reports of over-issues of bonds and notes, official corruption in the Department, etc. This sheet, which was issued under the title of the *Globe*, was read, talked of, and almost uniformly denounced in the street. Every word of its allegations is false, absolutely and unqualifiedly false; but this makes little difference to the parties in whose interest, and under whose auspices, the disreputable sheet was published. The export demand for coin is very light. The customs call is moderate, this current week. By the steamers of Wednesday, only $162,000 were sent to Europe. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,892,396. The customs demand for Gold last week, averaged $447,512 a day; thus far, this week, it has been equal to $384,500 a day, or equal to a weekly aggregate of $2,307,000. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $148,836, and from California, $1,171,944. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $73,965,915, against $83,983,466 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $18,995,126, against $24,283,721 same time last year, showing a decrease this year, of $5,288,595. The exports of specie from this port, last week, were $412,351. The total outflow of specie from the port, since Jan. 1, 1867, has been $39,674,712, against $51,977,146 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $174,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $39,331,199, against $29,016,712 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to July 13, reached $23,281,424, against $25,051,327 same time last year, showing a decrease, in 1867, of $1,769,903.

The total amount of gold certificates issued and redeemed by the U. S. Sub-Treasury, together with the outstanding balance on the 8th May, and at subsequent intervals:

	Issued.	Redeemed.	Outstanding.
20s ...	$333,900	$206,600	$127,300
100s ...	5,221,000	3,758,400	1,562,600

Total 10th.	214,473,220	186,518,000	27,955,220

Rather more activity has been reported in the foreign exchange line, on a fairly supplied and yet buoyant market. Commercial drafts are rather plentier. Bankers' 60 day bills on London closed steadily on Wednesday at 109⅝@109⅞, and on Paris to 5.16¼@5.15; sight bills on London to 109⅞@110¼; and on Paris to 5.13¾@5.12½. The offerings of produce bills have been more extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,928,544, making the total value of exports since Jan. 1, 1867, $116,463,388, against $125,019,079 same time in the preceding year.

Government securities have met with a ready sale, during most of the week, despite the base assaults made, privately and in printed form, on the integrity of the Treasury officials, whose uprightness has not been questioned by any responsible party. The attacks on the department were designed less to damage the individual heads of the Treasury Bureaus, than to injure the public credit, so as to help on the process of inflation in the Gold Board. The good sense of the business community proved a formidable, indeed, an insurmountable obstacle in the way of the success of these nefarious schemes of speculators in Wall street, and adventurers in journalism. Prices of the public funds were well maintained throughout the week. The foreign and investment call runs mainly on the Five-Twenties of the several issues. U. S. sixes of 1881 closed here on Wednesday at 111¾; U. S. Five-twenties of 1862, 113¾@113⅞; U. S. Five-twenties of 1864 at 110 @110⅛; U. S. Five-twenties of 1865 at 110¾@110⅞; U. S. Five-twenties of 1865, consolidated, 108½@108¾; U. S. Five-twenties of 1867, 108⅝@108¾; U. S. Ten-forties at 102⅝@102¾, and U. S. Seven-thirties at 107½@107⅞. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

August, 1864....119¼	August, 1865....115⅞
October, 1864....118½	September, 1865..115⅜
December, 1864..117½	October, 1865....114⅞
May, 1865 .....116⅞	

Secretary McCulloch has issued the following notice, of interest to all holders of the matured August Seven-thirties:

TREASURY DEPARTMENT, WASHINGTON, August 13, 1867.

The privilege of converting Seven-thirty Notes falling due on the 15th instant into Five-Twenty bonds, bearing date the 1st day of July, 1867, will be extended to the 15th day of September next. All notes of this issue, which shall not have been presented for conversion by the day last named will be paid on presentation at the Treasury of the United States, and at the offices of the Assistant Treasurers, at Boston, New York, and Philadelphia, in currency.

HUGH MCCULLOCH.

The conversions of this series, through the Sub-Treasury office in this city, thus far, this week, have averaged over $1,500,000 a day. The street brokers were exchanging on Wednesday new Five-twenties for all three series of the Seven-thirties on the following conditions: For August notes they give new 5-20 bonds, and pay $26 58 difference; June notes the same, and charge 50 difference; July notes the same, and charge $6.50 difference on each $1,000 conversion.

Railway and miscellaneous share property has been less freely dealt in through the past week. Neither interest has manifested courage enough for decisive action one way or another. The fluctuations in prices have not been important, as a rule. The closing transactions on Wednesday were light, but indicative of buoyancy in prices.

General business is gradually reviving, chiefly in the produce lines. Breadstuffs have been freely dealt in, but at variable prices. Cotton has improved, on a better inquiry, closing with middling grades on Wednesday at 29@30½ cents per lb. as extremes. The stock of cotton now here is estimated at about 58,000 bales. The receipts at the port this week, have averaged about 1,200 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 638,500 bales, against exports of 466,120 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,853,000 bales, against 2,008,000 bales same time last year; exports, 1,550,000 bales, against 1,513,000 bales same time last year; estimated stock at latest dates, 120,000 bales, against 265,000 bales same time last year. In the Live Stock line, beeves have been more active and firmer this week, ranging from 10@16½c. per lb.; receipts, 5,997. Sheeps and lambs in less demand at 4½@6½c. for the former, and 7@9½c. for the latter per lb.; receipts, 27,664. Swine freely sought after at $7.35@$7.90 per 100 lbs., live weight; receipts, 15,269. Foreign merchandise has been in fair demand. Groceries have been less buoyant. Metals have been about steady. Dry goods, of seasonable make, have been held with greater confidence. The total imports of foreign dry goods, last week, were $2,933,148, and the total amount marketed $2,310,362. The value of foreign merchandise imported last week, was $3,044,506—making the grand total specie value of last week's imports of dry goods and merchandise, $5,977,654, and since Jan. 1, 1867, $155,865,760, against $186,962,801 same time in the preceding fiscal year. The ocean freight market has been quiet; rates have been quoted steady with 500 vessels of all classes in port. For Liverpool we quote flour at 1s. 4½d.@1s. 6d. per bbl.; grain at 3@3½d. per bushel; cotton at ⅛d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 31.	Aug. 7.	Aug. 14.
Consols	94 3/16	94	94 13/16
U.S. 5-20's of 1862	72 13/16	73 5/16	74
U.S. 5-20's of 1865	71	71 3/4	72 1/2
Erie	49	45 1/2	46
Ill. Central	77	76 3/4	78

The New York exports, exclusive of specie, for the week ending Aug. 13, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,592,151	$3,928,544
Prev. reported	122,426,928	112,534,844
Since January 1	$125,019,079	$116,463,388

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,267,108	$2,933,148
Gen. merchandise	2,291,031	3,044,506
Total for the week	$4,558,139	$5,977,653
Previously reported	182,404,662	149,888,106
Since January 1	$186,962,801	$155,865,760

The balance in the Sub-Treasury on Wednesday was $131,009,551 15.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Pittsburg, Ft. Wayne & Chicago Railway.

The earnings and expenses of this road for the months of July, 1866 and 1867, have been as follows:

	1866.	1867.
Earnings	$552,377 01	$534,732 75
Expenses	407,933 34	375,035 19
Net earnings	$144,444 67	$159,697 56

This shows a decrease in earnings of $17,645 26; with a decrease in expenses of $32,898 15—making the increase in net earnings $15,252 89.

The earnings and expenses from January 1 to July 31, 1866 and 1867, were:

	1866.	1867.
Earnings	$4,171,492 90	$3,915,097 49
Expenses	3,065,153 18	2,840,935 17
Net earnings	$1,106,339 72	$1,074,162 32

This shows a decrease in gross earnings, during the seven months, of $256,395 41; in expenses, of $224,218 01; and in net earnings, of $32,177 40.

Macon and Warrenton R. R.

The Milledgeville *Recorder* says that the track laying has commenced, and is progressing at a very satisfactory rate at that end of the road. Hopes are entertained that the road will be opened to Milledgeville early in the fall—in time to move this year's cotton crop.

☞ An Omaha dispatch says the United States railroad commissioners arrived there en route west to examine another section of the Union Pacific Railroad, extending forty miles west of Julesburg.

☞ The work on the Vineland, N. J., Railroad is to be commenced in a short time, the necessary amount of stock having been subscribed and paid in.

☞ The Philadelphia and Darby Railway, has recently been sold to Messrs. S. G. Fry and Charles Thompson. The price paid was $150,000.

Railroad Earnings.—Weekly.

The earnings of the Chicago and Rock Island Railroad for the 1st week in Aug., 1867, were $70,000 00
Corresponding week of previous year.. 64,562 00

Increase $5,438 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Aug. 1867, were $82,810 00
Corresponding week of 1866 ..... 68,012 00

Increase $14,798 00

The earnings of the Michigan Central Railroad for the 1st week in Aug., 1867, were. $75,025 09
Corresponding week of previous year.. 66,647 08

Increase $8,378 01

The earnings of the Chicago and Alton Railroad for the first week in Aug., 1867, were $84,726 00
Corresponding period previous year.. 77,781 00

Increase $6,945 00

The earnings of the Detroit and Milwaukee Railroad for the week ending August 8, 1867, were $32,400 00
Corresponding week of 1866..... 28,640 00

Increase $3,760 00

The earnings of the Western Union Railroad for the 1st week in Aug, 1867..... $11,671 92
Corresponding week previous year.... 11,655 79

Increase $16 13

The earnings of the Marietta and Cincinnati Railroad the 1st week in Aug., 1867... $24,775 00
Corresponding week previous year.... 23,165 00

Increase $1,610 00

The earnings of the Virginia and Tennessee Railroad for the first week of Aug., were $16,167, an increase of $2,969 on the same week last year. Total for the fiscal year commencing 1st of July, $74,002, an increase of $16,035 on same time in 1866.

Peninsular Railroad.

On the 1st inst., a number of gentlemen representing the interests of Port Huron and Lake Michigan, the Peninsular Railway, Peninsular Extension and Peninsular Railway of Indiana, met in convention at Battle Creek, Mich., for the purpose of consulting upon measures tending to facilitate the completion of their respective lines. They found, upon examination, that the filling of the track through the pond was nearly done, the bridge over the race completed, the bridge over the Kalamazoo River ready to put up, in fact, the road bed nearly ready for the ties through the city, and all parties expressed their satisfaction at the progress of the work. After a general interchange of sentiment in regard to the prospects of prosecuting the work west of Battle Creek, an adjournment was made until the following morning. Upon the re-assembling of the convention, Hon. W. L. Bancroft, of the Port Huron and Lake Michigan road stated that he had secured the iron for the road to Lapeer, a distance of 20 miles from Flint, that contracts for the road from Flint to Lansing would be let at once, and gave assurances for securing the iron all the way through upon the completion of the road bed. The Battle Creek *Journal*, from which we have obtained the above, says: "With a full confidence in the energy, determination and business capacity of those who have this great chain of railroads in charge, we hail this meeting as another event pointing to the ultimate success and completion of each and all the roads to which we have here referred."

Hanover Branch Railroad.

This road is 12.2 miles in length, extending from Hanover, York Co., Pa., to Hanover Junction, a point on the Northern Central Railway, 39 miles from Harrisburg. The gauge of road is 4 ft. 8½ inches. Weight of rail per yard, 50 lbs. Roads worked or leased by the company 2, viz: Gettysburg Railroad, and Littlestown Railroad, the former 17, and the latter 7¼ miles in length. Number of engine houses and shops, 3. The company have 4 locomotives, 3 first-class passenger cars, 1 baggage, mail and express, and 10 freight cars. Number of wooden bridges, 11. Number of stations on main road 5. Number of road and water stations, 2. The track is laid on part earth and part stone ballast. Number of through passengers on main road, 24,956. Number passengers, all classes, carried in cars, 30,226. Total amount of tonnage for the year 43,982. Weight of engines 19 to 25 tons.

The receipts from operations of this road for the fiscal years ending October 31, 1865 and 1866, have been as follows:

	1865.	1866.
From passengers	$24,262 56	$16,152 56

The amount of capital stock authorized by law is $500,000, in shares of $50 each. Dividend, October 26, 1866, 5 per cent. on $116,850.

Pres't & Sup't.—A. W. Eichelberger, Hanover, Pa.

Directors.—Joseph Dellone, Joseph Althoff, Reuben S. Young, Henry Wirt, David M. Wortz, and John L. Jenkins.

Treasurer.—R. A. Eichelberger.

☞ We learn that the tunnel at the Point of Rocks on the Baltimore and Ohio Railroad, has been so far completed as to be ready to receive the track. The tunnel at Williams' Point, a mile and a half beyond, is being vigorously worked, in order, it is said, to have the double track completed by the 17th of September.

Lehigh Valley Railroad.

This road is 71 miles in length, extending from Phillipsburg, N. J., to White Haven, Penn. Length of double track, 68 miles. Length of sidings, 62 miles. Gauge of road, 4 feet 8½ inches. Weight of rail per yard, 57 lbs. Branch roads owned by the company and their length, viz: Penn Haven to Audenried, 17½ miles; Black Creek to Mount Carmel, 22½ miles. Number of engine houses and shops, 21. The company have 86 locomotives, 19 first class passenger cars, 8 baggage, mail and express, 246 freight, and 3,221 coal cars. Number of iron bridges, 15. Number of wooden bridges, 49. Number of stone bridges, 17. Number of stations on main road, 28. Number of wood and water stations, 29. The track is laid on oak and chestnut cross ties, stone and gravel ballast. Number of passengers all classes carried in cars, 552,804. Gross amount of tonnage for the year, 3,050,624. Weight of first class passenger engines, 52,000 lbs.; do., freight engines, 73,000 lbs.

The receipts from operations of this road for the fiscal years ending October 31, 1865 and 1866, have been as follows:

Petroleum as a Steam Generator.

The following facts and suggestions are extracted from an interesting article in a recent number of the Titusville *Herald*, published in the centre of the oil regions. The article is important as furnishing new data and material aid in the way of statistics to those now engaged in experimenting upon the introduction of petroleum as fuel for generating steam and other purposes. The *Herald* says:

"With regard to the abundant supply, there can be no question, as it is now generally conceded that the amount of oil produced altogether depends upon the number of wells sunk. The average product, both in good and doubtful territory, and of producing and unproducing wells, is one thousand four hundred and sixty-seven barrels for each well sunk or in other words, for every 1,000 wells put down a product of 1,467,700 barrels would be the result; in fact, this is as certain as any other law of average, either of life, accident or fire, and capital may realize, by following this law, with as great precision and certainty as it does in any of the first-class insurance companies of the day.

"This much being settled, we come to the cost of such production. Wells can now be sunk, tubed and tested for an average of $3,500 each; there are hundreds of men who would gladly contract at that figure. This would be a total cost for each barrel of $2.31. Allowing an ample margin for profit, $3 per barrel would be the outside figure for which the article can be produced, and that in any quantity desired."

"Therefore," continues the *Herald*, "let a demand spring up for the article as fuel, and in a few months we can pour a flood of it on the country sufficient to meet all demands."

The article then proceeds to call the attention of Government to the further point of the "enormous freight charges made by the railroad companies for carrying oil to the seaboard; it is a matter over which producers have no control whatsoever, and one with which the Government alone can cope."

Then follows a comparative statement, extracted from a foreign scientific journal, of the amount of heat relatively produced by the combusition of petroleum and coal or wood, which is greatly in favor of the first; and finally, the various machines used for burning crude petroleum thus classfied and commented upon:

"They may be divided into two classes, those which use power to produce perfect combustion, such as a jet of steam or air, and those which use heat to produce the same result, such as any contrivance for converting the petroleum into vapor or gas before being burned. A third class may be added which fail to produce perfect combustion, by either not consuming the whole smoke or leaving a residuum of tar or coke."

The "Foote" machine, in use by the Government, is a combination of all three of these principles, "but," says the *Herald*, "there are various others which are less objectionable. For instance, there is A. J. Work's machine, which, although it has the iron turnings and decomposition of steam, does away with the retort, and also with the red hot pipes and power requisite to force the air through them. There is Spence's, which does away with the iron turnings and substitutes an iron plate to be kept red hot at a loss; it does away with red hot pipes and the power requisite to force the air, but still uses steam, and claims to produce perfect combustion at the sacrifice of the steam and heat required to decompose it. And there is Suhr's, which still uses the steam at a sacrifice, or perchance an artificial draft to produce the same effect. There are other contrivances which either produce combustion partially or totally at a less sacrifice than was the case on the Palos. There was an experiment of this sort made in Buffalo the other day, with a new machine, belonging to Titusville parties, where the most perfect combustion was produced by the peculiar construction of the machine, and arrangement of the air and flame alone, without resort to the loss of either heat or power. No steam was used, and the natural draft alone produced the result. A heat sufficiently intense to melt iron without a blast was one result of his experiment."

Many other experiments have been made by private persons throughout the country, and some are still in progress, but the results have not yet been made public.

☞ A company has been organized at New Orleans called the "Electrical Brake Co. of America." It is claimed that a railway train running forty-four miles an hour can be stopped by electricity between fifty and one hundred yards.

Portland and Ogdensburg Railroad.

The adjourned meeting of the corporators and associates of this road was held at Portland, on the 10th inst. John F. Anderson and Charles J. Noyes, Civil Engineers, were appointed to survey the route between Portland and Conway. They are to commence their labors at once; and in company with Mr. Lindsay, the Engineer of the Vermont and New Hampshire portion, go over the line to Vermont. A meeting of the corporators and associates of the New Hampshire part of the road will be held at Littleton, N. H., in a few days. A meeting of all the corporators and persons interested will also be held at St. Albans or Oswego at an early day, for general consideration of the whole route from the West to Portland.

After the route is surveyed, which will take some twenty days, the committee will make a report and the subscription books will be opened. A public meeting will also be called to present the subject more fully to the citizens.

Narrow Gauge Railways.

Mr. Carl Pihl, engineer of the Norwegian Government railways, has attained very successful results with lines of a gauge of but 3 feet 6 inches, on which the weight of the loaded wagons is 2 tons only per wheel. He is about ordering additional locomotives having four coupled wheels and a two-wheel Bissel bogie, the weight on the coupled wheels being 8 tons only, and the total weight about 11 tons. The weight of the rails is 40 lb. per yard. Mr. Pihl believes that still lighter railways, of the same gauge, are likely to be yet constructed in Norway, the weight of the rails being possibly 30 lb., or even 24 lb. only per yard.

Portsmouth and Dover R. R.

At a meeting of the grantees of this road a Portsmouth N. H. on the 12th inst., the following named gentlemen were elected directors: Albert L. Jones, George L. Treadwell, John H. Bailey Daniel Marcy of Portsmouth; and Ames N. Purrinton, Wm. F. Estes, Joshua G. Hall of Dover.

At a subsequent meeting of the Directors, Albert L. Jones was elected President, George Wallace Tucker, Treasurer, and John S. H. Frink, Clerk. The road is soon to be built.

☞ Steps are being taken preparatory to the construction of a branch road from No. 9, on the Central (Ga.) Railroad to Swainsboro', in Emanuel county. The length of this contemplated line will be about seventeen miles—three of which including a fine bridge over the Ogeechee river and swamp, have already been constructed, leaving only fourteen miles to be provided for. The route of the proposed line is over a level, open pine region, free from swamps and large streams, and can be built very cheaply. The Macon *Telegraph* says that the Central Road will furnish the iron and rolling stock, if the road is graded and prepared for the iron by the new company about to be organized.

☞ C. F. Miller, Esq., Chief Engineer of the Peninsular Railroad, commenced on the 6th inst., the survey of the route from Battle Creek southwesterly to the Indiana State line.

☞ The San Paulo (Brazilian) Railway was opened on 16th of February, 1867. It is 86½ miles in length. The traffic for the month of May was about $64,000.

European and North American Railway.

We are glad to learn that all the hindrances and obstacles in the way of the International Railway, have been overcome, and that the work is now going forward with every assurance of success, not only in Maine but in the Provinces.

The carrying out of this work has been a matter of no small difficulty, owing to the conflicts of parties and changes of administration in the different Provinces; and the interference, direct and indirect, of the British Government with its plans. For more than seventeen years there has been a constant struggle between two projects, one known as the Intercolonial and the other as the International Railway. The British Government at one time pledged aid to both projects, but this was afterwards withdrawn—the Provinces refusing to give up the Commercial line for the sake of the Intercolonial alone.

Without going over too much ground, we may say, that New Brunswick and Nova Scotia, unwilling to accept of the Confederation and the Intercolonial railway, as sufficient for their prosperity, adhered to the plan of the Portland Convention. Nova Scotia built a line from Halifax to Truro, 61 miles toward St. John, and New Brunswick built 108 miles in the direction of Halifax, leaving only 100 miles unfinished between the two cities, which have of late been put under contract.

In 1863, the people of St. John moved for western extension in concurrence with the people of Maine, and a union of interests has been effected, so that the line from Bangor to St. John is being built by one company—the Government of New Brunswick, in 1865, donating $10,000 per mile as a gift to that portion of the road lying in New Brunswick.

The Maine corporation in 1863 and 1864, having purchased the rights of the Penobscot Railroad Company and of the Oldtown and Lincoln Railroad Company on its route, on which $400,000 had been expended—issued stock to the amount $100,000 and bonds to the amount of $98,500 in payment for these purchases. It then obtained the grant from Maine and Massachusetts of their claims against the United States Government accruing prior to 1860, and a conditional grant of the public lands of Maine amounting to over 800,000 acres, and then contracted with Messrs. Pierce and Blaisdell for building the entire line. The work commenced in New Brunswick in the fall of 1865, and in Maine one year later.

The work in New Brunswick proving very expensive the Provincial Government at its late session increased its subsidy or gift, from $10,000 to $13,500 per mile, made more favorable terms as to payment for work, and took off the Government lien, enabling the New Brunswick Company to issue $2,000,000 of first mortgage bonds as the *first* and only lien upon the road. Work is now in progress on about 50 miles of the line from St. John to the Maine boundary.

The city of Bangor loaned its credit for $1,000,000, and the citizens of Bangor subscribed $300,000, payable as soon as $150,000 are paid in and expended by the contractors toward the Bangor end—the contractors undertaking to build the line from Bangor to Winn, a distance of 57½ miles, having the benefit of the Bangor loan, less the outstanding bonds of the company which are by agreement to be exchanged for city bonds at *par*. Several wealthy and influential railroad men here became associated with Messrs. Pierce and Blaisdell in the contract, and have paid $150,000 into the hands of the Treasurer, and of this amount $64,875 had been expended to the 1st day of July last, and the balance of the $150,000 is in process of expenditure, so that the Bangor subscription of $300,000 is already, or about due.

The work of laying the rails was delayed by a change of the draw across the Kenduskeag at Bangor—the authorities at Bangor insisting upon a draw upon each side of the stream, which had to be changed at their request and their expense, requiring a pivot draw and a heavy pier in the centre of the stream as first proposed by the company.

This work is now well advanced, so that the laying of rails may commence the present month, and proceed as far as Lincoln the present year. The bridges at Orono and Oldtown are being replaced with new structures, and the grading is in a condition for receiving the rails.

The funds not already provided, for completing the line to the New Brunswick border, are to be supplied by a sale of bonds secured on the line of the road and the public lands of Maine, beyond what money may be obtained from the claims of Maine and Massachusetts against the United States Government.

The opening of Front street in Bangor, 90 feet in width from the depot of the Maine Central Railroad across the Kenduskeag, is a work not unlike the opening of Commercial street in Portland, with even more promise of good results to the commercial business of that city.—*Portland Press, Aug.* 3.

☞ The track of the Minnesota Central Railroad between Cresco and Owatonna is now going down at the rate of two miles per day. At the present rate of work, the road will be ready for the cars on the 15th of December.

PLASTIC SLATE ROOFING

JOINT STOCK COMPANY.

OFFICE 157 (Room 19) BROADWAY,

NEW YORK.

W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21ST, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

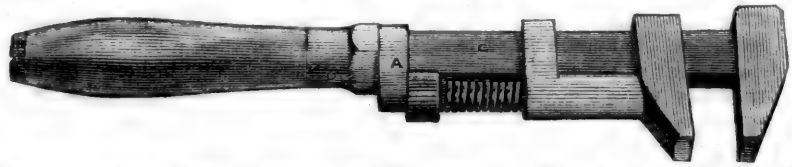
Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

MEAD RUBBER COMPANY,

12 Vesey Street, New York.

MANUFACTURERS OF



INDIA RUBBER CAR SPRINGS AND STEAM PACKING.

Our Works being now under the management of a competent Superintendent, we are prepared to offer Springs of various qualities and prices to suit. Our A No. 1 Spring made of fine Para Rubber, and the Compound used by the Patentee, the late Fowler M. Ray, will be found to be cheaper than others made, from inferior stock and offered at lower prices.

Sample setts forwarded on application. All Springs fully warranted.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted *as the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

Barometrical reconnoissance for Railway lines, Location and Construction of Railroads, and all duties required on Public Works in any State of the Union performed with fidelity.

THE UNION PACIFIC RAIL ROAD CO.

THEIR FIRST MORTGAGE BONDS

As an Investment.

THE rapid progress of the Union Pacific Railroad, now building west from Omaha, Nebraska, and forming, with its western connections, an unbroken line across the continent, attracts attention to the value of the First Mortgage Bonds which the Company now offer to the public. The first question asked by prudent investors is, "Are these bonds secure?" Next, "Are they a profitable investment?" To reply in brief:

1st. The early completion of the whole great line to the Pacific is as certain as any future business event can be. The Government grant of over twenty million acres of land and fifty million dollars in its own bonds practically guarantees it. One fourth of the work is already done, and the track continues to be laid at the rate of two miles a day.

2d. The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of railroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and being without competition, it can maintain remunerative rates.

3d. 425 miles of this road are finished, and fully equipped with depots, locomotives, cars, &c., and two trains are daily running each way. The materials for the remaining 92 miles to the eastern base of the Rocky Mountains are on hand, and it is under contract to be done in September.

4th. The net earnings of the sections already finished are *several times greater* than the gold interest upon the First Mortgage Bonds upon such sections, and if not another mile of the road were built, the part already completed would not only pay interest and expenses, but be profitable to the Company.

5th. The Union Pacific Railroad bonds can be issued only as the road progresses, and therefore can never be in the market unless they represent a *bona fide* property.

6th. Their amount is strictly limited by law to a sum equal to what is granted by the U. S. Government, and for which it takes a *second* lien as its security. This amount upon the first 517 miles west from Omaha is only $16,000 per mile.

7th. The fact that the U. S. Government considers a second lien upon the road a good investment, and that some of the shrewdest railroad builders of the country have already paid in five million dollars upon the stock (which is to them a third lien), may well inspire confidence in a first lien.

8th. Although it is not claimed that there can be any better securities than Governments, there are parties who consider a first mortgage upon such a property as this the very best security in the world, and who sell their Governments to re-invest in these bonds—thus securing a greater interest.

9th. As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accrued interest, they are the cheapest security in the market, being more than 15 per cent. less than U. S. Stocks.

10th. At the current rate of premium on gold, they pay

Over Nine per Cent. Interest.

The daily subscriptions are already large, and they will continue to be received in New York by the

and by BANKS AND BANKERS generally throughout the United States, of whom maps and descriptive pamphlets may be obtained. They will also be sent by mail from the Company's Office, No. 20 Nassau Street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

JOHN J. CISCO, *Treasurer*,

NEW YORK.

THE ELNATHAN SAMPSON

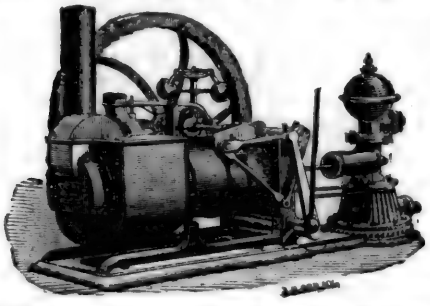
NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.



Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

New York, Saturday, August 24, 1867.

Congressional Land Grants for Railroads.

On the 20th September 1850, an Act of Congress granting to the States of Illinois, Mississippi, and Alabama public lands within said States, in aid of the construction of a railroad from Chicago, Ill., to Mobile, Ala., received the President's approval. So early as 1827 grants of land had been made by Congress to certain States for canal purposes, but this was the first occasion on which any grant had been conferred for the purpose above alluded to. It was the experiment, the successful issue of which determined the establishment of a system of grants which already cover more than one-tenth the whole area of what have been specifically termed the land States, and which is destined to an indefinite extension as the territory yet in wilderness condition is demanded for settlement.

The terms of this grant are fully set forth in this act, and are in substance as follows:—The right of way not exceeding 100 feet on each side of the length thereof, through the public lands, is granted to the State of Illinois for the construction of a railroad from the southern terminus of the Illinois and Michigan Canal, to a point at or near the junction of the Ohio and Mississippi Rivers, with a branch of the same to Chicago on Lake Michigan, and another *via* the town of Galena, in said State, to Dubuque, in the State of Iowa, with the right also to take materials necessary for its construction from adjoining lands.

To aid in making the railroad and branches, every alternate section of land, designated by even numbers, for six sections in width on each side of said road and branches, is granted to the State; or where any lands within the specified zone have been sold or pre-empted, then their equivalent within a breadth of not more than fifteen miles from the line; and these lands shall be disposed of only as the work progresses and be applied only to its construction. Construction shall be commenced at both ends simultaneously and continued from each of said points until completed, and then the branches shall be constructed according to their survey and location. If not completed within ten years the title to the lands granted to reinvest in the United States, and where any lands have been sold, the State of Illinois to refund the purchase money.

The grants to Mississippi and Alabama were made on the same terms and conditions as the grant to Illinois.

In this act, however, the United States did not lose sight of its own interests. The act provided that the remaining sections within the breadth of the grant should not be sold for less than double the minimum price of the public land. It also provided that the road and branches should be a public highway, free from toll or other charge upon the transportation of any property or troops of the United States, and that the mail should at all times be transported on said railroad at such price as Congress might direct.

The provisions of this act have been given more at large than might otherwise be warranted, for the reason that they are essentially those of all subsequent land-grant acts, and the summary presented will render unnecessary cumulative repetitions in recording the progress of legislation on the specific topic.

It will be seen from what has already been stated that the grantee is the State, and the State alone is made answerable to Congress for the proper disposal of the grant. It was not, however, supposed that the State itself would undertake the construction of the works in aid of which the grant was made, and hence we find that the State legislature on receipt of the granted lands reconveyed them to companies under the same terms and restrictions generally as imposed by Congress. Illinois, furthermore, made a bargain with the company to which its portion of the grant was transferred securing to the public treasury seven per cent. of the gross earnings from operating the road when completed; and the result is that the amounts now collected annually from this source are so considerable as to make up a large portion of the total public revenue. At the same time the peopling of those portions of the State along the 708 miles of road constructed under the grant has added vastly to the taxable capacity of lands, which without such access as the railroad has provided would have still continued unclaimed and unproductive. In order to show exclusively what benefits Illinois has received from the construction of the Central and other railroads, reference is made to the following statement from the census of the United States which exhibits the condition of the State as regards population and wealth in 1850 and 1860:

	Population.	Valuation.
1850	851,470	$156,265,006
1860	1,711,951	871,860,282

By 1865 the population had increased notwithstanding the war-drain to 2,141,510 and is probably at the present time not less than two millions and a half, while the estimated wealth or value of all the property therein cannot be less than $1,250,000,000. These are figures and estimates which without the facilities afforded by works of internal improvement could not have been obtained in half a century or perhaps a much longer period of time. They are pertinent in this, that they fully warrant the policy of land grants in whatever section they have been or may be hereafter made. Population and wealth will always inure to that State or section which is opened up by easy means of travel and transportation. Illinois is the type of such a State. In

1850 but 110½ miles of isolated railroad were all that were in operation; in 1860 2,868 miles, and in 1866, 3,250 miles gave access to almost every section of the State, which in the meanwhile had developed into the richest grain and feeding State in the Union, and built up Chicago, its commercial metropolis into a city of 200,000 inhabitants.

Missouri was the next recipient of congressional favor in this direction. By the act of June 10, 1852, a railroad from Hannibal to St. Joseph, and a similar line from St. Louis to the western boundary of the State were provided for, the lands being granted on precisely the same terms as to Illinois.

The next grant was made under an act passed February 9, 1853. This was made to Missouri and Arkansas to aid in the construction of a railroad from a point on the Mississippi opposite the mouth of the Ohio River, *via* Little Rock, to the Texas boundary, near Fulton, Ark., with branches to Fort Smith and the Mississippi River.

In 1856 several land grant acts were passed. That of May 15 grants lands to Iowa; that of May 17 to Florida and Alabama; the joint acts of June 3 to Alabama, Louisiana, Wisconsin and Michigan respectively, and that of August 11 to Mississippi.

The act of March 3, 1857 granted lands to Minnesota and also additional lands to Alabama. A separate act of the same date authorizing the alteration of the direction of one of the Alabama lines named in the act of June 3, 1856.

In 1862 grants were made for the Union Pacific Railroad, and also for the Peninsular Railroad of Upper Michigan; in 1864 for the Central Pacific and the Northern Pacific; and various railroads in Wisconsin, Minnesota, &c. The laws relating to railroad grants passed in 1865 and 1866, were chiefly amendments to former acts, authorizing extensions of time and additional lands.

To extend this list of acts in detail, however, would take up more space than the limits of a single article would permit. We therefore throw the whole subject of land grants for railroad purposes into tabular form; and in the following will be found all the information requisite for a knowledge of their extent to the several States:

Date of Laws.	For what Railroad granted.	Estimate of Acres granted.	Acres certified to June 30,'66
ILLINOIS.			
1850	Illinois Central	2,595,053	2,595,053
MISSISSIPPI.			
1850	Mobile and Ohio	1,004,640	737,180
1856	Southern	404,800	171,550

RECAPITULATION.

Showing the estimated number of acres granted to each State for railroad purposes, and the number of acres certified by the Land Office up to June 30, 1866:

States.	Estimated Acres.	Certified Acres.
Illinois	2,595,053	2,595,053
Mississippi	2,062,240	908,680
Alabama	3,729,120	2,288,139
Florida	2,360,114	1,760,468
Louisiana	1,578,720	1,072,405
Arkansas	3,940,272	1,793,167
Missouri	3,745,160	1,815,435
Iowa	6,751,208	2,770,702
Michigan	5,327,031	2,718,414
Wisconsin	5,378,360	1,379,545
Minnesota	7,783,403	1,580,609
Kansas	6,550,000	.....
California	3,400,000	.....
Total	55,291,581	20,683,617

The grants made by Congress in aid of the Pacific Railroads differ from all the other railroad grants both in their direction and extent. The grants are direct to the several companies proposing to construct them, and not to States as intermediary beneficiaries, and the amount of land granted is 6,400, 12,800 and 25,600 acres per mile of road, being every alternate section for 10, 20 and 40 miles on each side of the line. The Government also grants a money subsidy in bonds to the companies, ranging from $16,000 to $32,000 and $48,000 per mile, the amount varying with the nature of the surface traversed by the railroads, and the companies respectively are authorized to issue their own bonds to like amounts, said bonds to take precedence of the Government loans. The laws establishing these arrangements are as follows:

Date of Laws.	Companies.	Acres granted.	Acres certified.
1862	Union Pacific & Br.	35,000,000	45,510
1864	Central Pacific of Cal.		
1864	Northern Pacific	47,000,000	.....
1866	Do. (extend'g time)		
1866	Atlantic & Pac. (Springfield, Mo., West)	17,000,000	.....
	Total estimated acreage to Pacific R. R.'s	99,000,000	.....

Including this amount of lands, the total land grants made in aid of railroad construction to the present date is 154,200,000 acres, which is a fraction over one-tenth of the total superficies of the new States and territories—said superficies being estimated at 2,289,795 square miles, or 1,465,468,800 acres. This grand National grant is equivalent in dimensions to the original northwest territory, now the five great States of Ohio, Michigan, Indiana, Wisconsin and Illinois.

Besides these railroad grants the Government has at various times made land grants for canals and wagon roads—for the first to the amount of 4,405,986 acres, and for the latter to the amount of 3,274,213 acres.

☞ The Rutland Railroad Company is prepared to issue Guaranteed Preferred Stocks in accordance with its charter, in exchange for principal and interest to first of August, 1867, of the First Mortgage Bonds of the Rutland and Burlington Railroad Company. All such stock issued before the 1st day of October next will be entitled to the dividend payable on the first of February, 1868.

☞ Bids for the construction of the bridge across the Missouri at Council Bluffs are being received in the branch office of the company in Chicago. The work will commence in the fall, and the estimated cost is $3,000,000.

Land States and Territories.

Statement exhibiting the extent of the several States and Territories in which the United States have possessed or do now possess lands for public sales, and the condition of the surveys therein on the 1st July, 1866. (Made up from the Land Office Report for 1866.)

States and Territories.	Superficial Area. Sq. miles.	Acres.	Surveyed up to June 30, 1866.	Unsurveyed June 30,'66.

Railroads West of the Mississippi River and their Influence on the Western Plains.

A few years since, two facts (at least supposed facts) would have been stated by almost every one; first, that the great body of land on the Western plains (beyond the first row of States on the Mississippi was mostly a barren waste; and secondly, that it must be another generation before we should find railroads there. Both these supposed facts are now disproved. The largest part of the lands on the great Western plains are as fertile as ordinary lands in other parts of the country; and the railroad lines are now penetrating the country beyond the Mississippi with extraordinary speed. In looking over the last number of Appleton, and also some new maps of the Western plains, we thought it might be interesting to show the number of railroads beyond the Mississippi and their probable effect. Except two roads in Missouri, the whole have been made in the last half dozen years. Taking them by States, the following tables give a view of the number of miles and locality of these roads:

Missouri.	Miles.	
Cairo and Fulton	37	
North Missouri	305	to St. Joseph.
Hannibal and St. Joseph	70	
St. Louis and Iron Mountain	87	to Pilot Knob.
Missouri Valley	45	to Leavenworth.
Savannah Branch	15	to Savannah.
Pacific of Missouri	309	St. Louis to Leavenworth.
Southwestern	76	to Rolla.
Total Missouri roads	944	miles.
Iowa.		
McGregor Western	66	from McGregor.
Northwestern	356	Clinton to Omaha.
Dubuque and Sioux City	143	to Iowa Falls.
Branch to Cedar Rapids	56	to Cedar Rapids.
Des Moines Valley	162	Keokuk to Des Moines.
Keokuk and Muscatine	70	to Columbus.
Council Bluffs and St. Joseph	26	from Council Bluffs.
Burlington and Missouri	100	Burlington to Albia.
Rock Island and Pacific	133	Rock Island to Kellogg.
Washington Branch	50	to Washington.
Total Iowa roads	1,162	miles.
Minnesota.		
Southern Minnesota	60	from Rushford.
St. Paul and Pacific	75	St. Paul to St. Cloud.
Minnesota Valley	47	St. Paul to Belle Plain.
Minnesota Central	71	Minneapolis & Owatonna.
Winona and St. Peter's	161	Winona to St. Paul.
Total Minnesota roads	414	miles.
Kansas.		
Atchison and Pike's Peak	25	from Atchison.
Union Pacific, East Division	200	from Kansas City.
Total Kansas roads	225	miles.
Nebraska.—Union Pacific	400	miles on Great Platte.
Total, west of the Mississippi (north of Arkansas)	3,145	miles.

In the States above mentioned, there are two millions eight hundred thousand inhabitants—giving about one mile of railroad to a thousand inhabitants. This shows an important fact, that the railroads advance equally with the population westward. The extreme rapidity with which both divisions of the Pacific road are constructed makes it evident that hereafter railroads will advance even more rapidly than the population. On the other hand, the population will advance more rapidly as the roads are made, so that we may expect hereafter to see even a greater flow of population than we have heretofore.

The censuses show the population, *west* of the Mississippi and north of Arkansas to have progressed as follows, viz:

	1840.	1850.	1860.
Missouri	383,702	682,044	1,182,612
Iowa	43,112	192,214	674,913
Minnesota	.....	6,077	172,123
Kansas	.....	.....	107,206
Nebraska	.....	.....	28,841
Dacotah	.....	.....	2,576
Colorado	.....	.....	34,277
7 States and Territories	426,814	880,335	2,202,548

The ratio of increase from 1850 to 1860 is much greater than in the previous ten years; and as all things are now very encouraging to emigration West, and as the great Pacific Railroads are going rapidly on, we believe the ratio of increase, west of the Mississippi, is likely to go on quite as rapidly for many years. At any rate, the population is likely to be doubled the next ten years. But, as we have seen that railroad construction goes on in a parallel ratio with population, and even more, we expect to see at least 4,000 miles of railroad constructed between the Mississippi and the Rocky Mountains in the next ten years. It will probably be distributed in something like these proportions, viz:

Missouri	800	Nebraska	500
Iowa	800	Kansas	600
Minnesota	800	Colorado	500

We make this statement to show what a wide field for enterprise in railroads as well as general business, is opened to young men in the great—great West. Previous to the war there had been a financial dullness, which impeded the progress of railroads especially, as most of the railroads were very much embarrassed with debt. Then came the war, when all other things were almost disregarded. Now everything is different. Money is very abundant; most of the railroads are prosperous, and the return of peace has left hundreds of thousands of men ready to engage in new enterprises. The tide of immigration from Europe is again rising; and probably our estimate above, both in regard to population and railroad construction is much below the mark. At any rate, the great Western plains will now fill up with great rapidity, and probably the whole valley of the Platte will soon be filled with towns and people.—*Cincinnati Railroad Record.*

Philadelphia and Erie Railroad.

The following statement, showing the cost of this road, and the financial condition of the company July 1, 1867, was presented by the Treasurer at the meeting of the Committee of the Philadelphia Common Council having in charge the question of merger of the Warren and Franklin and Erie Railroads:

The cost of the road, after deducting the earnings of each year, agreeably to the act of Assembly, Feb. 10, 1862, was		$17,869,732 84
This amount has been increased to date by amount expended for sidings, depots, shops, &c	106,099 84	
Estimated interest on funded debt.	325,000 00	
		$18,300,832 68
Less earnings to July 1, 1867	1,315,937 86	
Total		$17,984,894 82

By the contract with the Pennsylvania Railroad Co., the Philadelphia and Erie Railroad Co. receives 30 per cent. of the gross earnings of the road, which receipts and their expenditures were submitted as follows:

Receipts:	
In 1862	$137,429 58
In 1863	218,300 96
In 1864	335,708 95
In 1865	613,908 31
In 1866	732,738 80
Total	$2,038,086 60
Expended:	
1862, Interest on funded debt, &c	$188,203 97
1863 " "	257,630 02
1864 " "	313,659 92
1865 " "	425,286 66
1866 " "	578,640 00
Balance unsettled	274,666 03
Total, as above	$2,038,086 60

The financial condition of the company, July 1, 1867, was as follows:

Capital stock issued to that date		$5,091,400 00
Seven per cent. bonds, due 1877		1,000,000 00
Six per cent. bonds, due 1881		5,000,000 00
Seven per cent. bonds, due 1885		3,000,000 00
Six per cent. bonds, due 1901		4,000,000 00
Preferred debt outstanding		600 00
Due the Pennsylvania R. R. Co. for advances on construction account		260,643 59
		$18,352,643 59
Less assets on hand:		
Earnings account with lessees	$200,702 02	
Agents, hands, unsettled	105,252 09	
In Treasurer's hands	1,004 66	
		367,748 77
Total, as above		$17,984,894 82

Ohio Falls Ship Canal.—Progress of Gen'l Weitzel's Survey.

The survey ordered by Congress for a ship canal around the falls of the Ohio is now in progress, a full corps of engineers being constantly in the field under the immediate charge of Geo. R. Eichbaum, First Assistant Engineer. A base line, giving the boundaries of the proposed survey, has just been completed from the mouth of Falling Run to a point a short distance above Jeffersonville. The whole length of this line is about seventeen miles. The furthest point from the river on this line is in the neighborhood of Very's Mill, about four miles distant, the line crossing Silver Creek a few hundred yards below the mill. The leveling of this line has been constantly made with reference to the lowest part of the present canal. The highest point was a short distance before reaching Silver Creek, the altitude being 106 feet. The whole ground between this base line and the river will be a network of section lines and offsets, parallel lines being run at a distance of 800 feet from each other, from this line to the river. The engineers commenced the work of running the cross lines yesterday, and it was expected that they would reach the streets in the lower end of the city before night. During the week the surveying party will be engaged in running these section lines through the streets of the city. The topography of the ground, that is its entire physical description, will be commenced to-day, and will be made in the most thorough manner. After this is done, which will require several months, the location of the canal will be made over the most eligible portion. This survey will undoubtedly be the most thorough and accurate survey of the vicinity of the falls ever made. All the gentlemen connected with the survey are accomplished engineers, and the results of their operations will settle forever the question of the feasibility of constructing a canal around the falls on the Indiana shore.—*New Albany (Ind.) Com., Aug.* 13.

Cleveland and Toledo Railroad.

The earnings and expenses of this road for the years ending April 30, 1866 and 1867, have been as follows:

Earnings:	1866.	1867.
From passengers	$1,140,986 81	$937,129 15
" freight	1,139,781 84	1,415,444 97

Rents, interest, taxes, and charges to profit and loss	377,457 80	
		1,762,295 35
Leaving for the stock a net of		$729,919 54

—or 14.6 per cent. on the capital.

The balance to credit of income account May 1, 1866 was	$666,942 98
Add income for the year ending April 30, 1867, after payment of interest	729,919 54
	$1,396,862 52
Deduct dividends Oct. and April, 14 per cent.	728,918 40
Leaving balance of income account, May 1, 1867 as shown in General Account	$667,944 12

The gross earnings show an increase over those of the preceding year of $103,346 87, with an increase in running expenses of $248,082 01; from which deduct decrease in general expenses, (including interest on bonds) $11,573 43—making the total increase in expenses, $236,508 50; and the decrease in net earnings, $133,161 71.

The running expenses were 55.56 per cent. of the earnings, and the total expenses, 70.71 per cent. In 1865–'66 they were 46.76 and 63.87 respectively.

The decrease in net earnings is largely attributable to the falling off in passenger receipts, with no corresponding reduction in train service; while the gain in freight receipts has been made at a much reduced rate for transportation, than was received the preceding year, and no compensating gain in net receipts has been realized from this source.

The sinking fund as shown by the report of the Commissioners, now amounts to $420,508 31. Of the Junction 1st mortgage 1st division bonds, due April 1st, 1867, $186,000 have been retired, leaving $27,000 still outstanding. The report says:

The road-bed and bridges have been materially improved in condition by ballasting done and masonry and bridge superstructure built during the year.

Very rapid wear of rails was caused by the heavy freight traffic during last winter, and although the renewals of rails were large during the year, they have not exceeded the depreciation.

Considerable additions have been made to your equipment, all of which has been fully employed.

Both engines and cars have been maintained in good condition.

Your new road between Elyria and Oberlin was opened for use on the 10th of September last; the track between Oberlin and Grafton has been taken up and the use of the C. C. & C. Railroad discontinued by your trains between Berea and Grafton. To provide your own track into, and the requisite facitities at Cleveland for your increasing traffic, the board have authorized the restoration of the track of the Northern Division of your road between Berea and Cleveland, and the construction of a drawbridge over the Cuyahoga river, near its mouth, to connect your track with those of the roads running East from Cleveland.

Authority for the construction of this bridge has been obtained from the proper authorities, and it is now in course of erection.

Most of the grading necessary to place the line between Cleveland and Berea in order for the track, has been done. The board have opened negotiations with the Cleveland and Pittsburgh Railroad Company for leasing to that company the right to use the Cuyahoga bridge, for approaching their proposed new freight docks.

The Union Passenger Depot has been completed, and a number of other buildings have been erected at different points; 1.7 miles of new sidings have been laid during the year, all of which have been charged to the construction account.

Of the falling off in passenger receipts, $50,403 98 is in military tickets, the balance being about proportionally divided between local and through travel. The large increase in freight tonnage,

amounting the past year to 38 per cent. over the preceding year, and to 76 per cent. in tons carried one mile over the year 1864–5, indicates the important position of the thoroughfare of which your road forms a part, and is gratifying to the board. The growing crops along the line of your road indicate that a large increase in receipts over the past two years will be realized this season from your local traffic.

The board have made your road a party to a fast freight line, reaching the seaboard, *via* the Erie Railway, since the last report, which with that *via* the New York Central Railroad, are proving of value in securing your proportion of through freights.

The following is a comparative statement of the capital stock and bonded debt of the company as given in their reports for the past and preceding year. The date of maturity of these bonds, and the time when and place where the interest is payable, is given in full on page 806 of this week's issue:

Bonds:	1866.	1867.
C. & T. dividend certificates	$280 00	$185 00
Junction 1st mort. 1st division	213,000 00	27,000 00
C. & T. income	6,000 00	6,000 00
Junction 1st mort. 2d division	146,000 00	126,000 00
C. & T. mort. bonds.	300,000 00	692,000 00
Sinking fund bonds.	2,081,000 00	2,021,000 00
Total bonded debt	$2,746,280 00	$2,872,185 00
Capital stock	4,841,600 00	5,000,000 00
Total stock & bonds.	$7,587,880 00	$7,872,185 00

Capital stock has increased during the year $158,400; the increase in the bonded debt is $125,905—making the total increase in bonds and stock, $284,305, which is represented by amounts expended on new improvements and increased inventories.

RESOURCES.

Net earnings	$729,919 54
Cash on hand June 1, 1866	178,612 27

Secretary and Treasurer.—WM. F. STAUNTON.

Master of Transportation.—T. S. LINDSEY.

Peninsular Railway.

A large and well attended meeting was held at the office of the Peninsular Railway Company in this city, on Thursday and Friday, August 1st and 2d, in reference to the general and business interests of the projected line of railway from Port Huron *via* Lansing, Battle Creek, South Bend, and other places in Indiana, to Chicago, or by way of Joliet and Mendota, to connect with the Union Pacific Railway, at some point on or near the Mississippi River. There were present, representing the Port Huron and Lake Michigan Railroad Company, Hon. W. L. Bancroft, of Port Huron; representing the Peninsular Railroad of Indiana, Hon. Thos. S. Stanfield, of South Bend, the President of the Company, and Samuel J. Anthony, Deforest L. Skinner, and Ruel Starr, of Valparaiso, and R. Montgomery, of Mishawaka; and representing the Peninsular Railway and Peninsular Railway Extension Companies of Michigan, L. D. Dibble, the President of those Companies, and Hon. Joseph Musgrave, the Treasurer, and Hon. M. S. Brackett, the Secretary, C. Cummings, R. Fitzgerald, J. M. Ward, W. Wallace, and E. W. Pendill, Esq., Directors of the Peninsular Railway Co.; and also S. T. Read, Hon. W. G. Beckwith, President of the Michigan State Agricultural Society, S. D. Wright, Asa Kingsbury, Stephen Eldred, and Thos. B. Eldred, representing the Peninsular Railway Extension Company, and also many of the principal citizens of this city.

The executive officers of those four companies, constituting the entire line from Port Huron to the State line, between Indiana and Illinois, entered into an agreement in writing, consolidating their several companies, for all business and practical purposes, into one, simply reserving the local business and management of their respective companies to themselves. Through that arrangement, those companies will constitute a corporation as important as a through channel of communication and traffic, as either the Michigan Central, or Michigan Southern. By that, a new line of travel and trade will be opened between the East and West, as a resolution was unanimously adopted, that the entire line should be put in readiness for the iron on or before the first day of September, 1868. The gentlemen in whose charge the management of those roads has been, during the last twelve or fifteen months, will not permit the public to be disappointed. The project is one of the people along its line—they need the road, and they have the ability to construct it, and have decreed that it shall be done.

From Port Huron to Lansing, nearly two-thirds of the road bed is now ready for the iron, and nearly all the means necessary for that purpose have been raised to complete it for the iron to Lansing. The arrangements for the iron for the same have been made, and the company will commence laying it this fall. From Lansing to Battle Creek sufficient means have been already raised to complete the road between those places, and fully one half of the work is done, and nearly all the timber, lumber and ties are delivered along its line, and most of the bridges are erected. The whole road can be put in readiness for the iron in three months.

From Battle Creek to the Indiana State line, the company is organized, and nearly all the money necessary to make and tie the road has already been raised. The Engineers will commence the location of the same this week, and while that is being done, the right of way and the balance of the means will be obtained. The Directors have determined to commence the grading this Fall, so as to get out the ties and timber during the winter, and to lay the iron early next summer. The road passes through the wealthiest and best part of Southern Michigan.

The company through Indiana has been organized since last Fall, nearly one-half of the line has been located, and all the means necessary for the completion of the road within that State has been raised and pledged, as soon as the work commences west of Battle Creek in Michigan: it will also commence in Indiana, and will proceed *pari passu*.

This great work has now proceeded so far that it cannot be a failure. Its early completion only depends on the energy and liberality of its friends; it must be built by their money, and the sooner that is subscribed and paid in, on those parts of the line where they are yet in arrears, the sooner will they enjoy its great advantages.

The East and the West are looking with interest and anxiety to the success of this great enterprise; an enterprise equal in a commercial point of view to any existing road, or to any in contemplation; superior to any other, because it is not projected by foreign capitalists, but by the people along its line, who seek its conveniences, and will secure its profits.—*Battle Creek (Mich.) Journal, August 8.*

Western Union Railroad.

The Rock Island *Union* says that Geo. A. Thomson, Esq., President of the Western Union Railroad, which is completed from Racine, Wis., to Port Byron, Illinois, has just returned from Scotland where he has been successful in obtaining a loan of $5,000,000, to push the road through to Warsaw on the Mississippi River. This will be good news to the people living near the south end of the road.

American Railroad Journal.

Saturday, August 24, 1867.

Stock Exchange and Money Market.

The Money Market has been rather more active in the loan and discount lines, since our last. There has been an increased call for currency from the West, to be used in moving the crops to market; and some of the local banks have been remitting freely in response to the call. The local speculative inquiry has been fair, and the mercantile demand has been more animated. The increased applications for aid have enabled lenders, in several instances, to exact rather higher prices for money. Call loans closed at 3@4 per cent. on the public funds, and 4@5 per cent. on other stock collaterals. The inside rates are now exceptional. At the higher figures, however, the available supply is ample, indeed in excess of the wants of the market, in a temporary form. The discount rates are 6@7 per cent. on the best short date commercial paper, of which a heavier offering is noted at bank and through private channels. The Sub-Treasury has been redeeming August (1864) Compound Interest Notes promptly on presentation; and been converting the first series of Seven-thirties into new Five-twenties with considerable energy. The office has increased its cash balances, largely, during the week. Washington advices report the aggregate cash balances of the Treasury Department at $109,000,000 in coin (including $20,000,000 representing outstanding gold certificates,) and $87,000,000 in currency, making the total $196,000.000, of which the Sub-Treasury here holds over $135,000,000. The city banks, in their return for last week, show a decrease of $194,829 in loans and discounts, $6,573,638 in legal tenders, $5,362,114 in net deposits, and an increase of $608,560 in specie. and $104,479 in circulation. The specie reserve of the banks is now $5,920,557, against $7,545,513 same time last year. The city bank deposits are now $194,046,591, against $241,310.576 week ending Aug. 11, 1866. The legal tender reserve amounts to $69,473,793, against $84,800,071 same time last year. The circulation now stands at $33,669,757, against $27,796,904 same time last year. The loans are now $253.232,411, against $261,951,924 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $69,048,253 a day, against a daily average of $83,311,344 the preceding week, and $78,003,624 the week ending with Aug. 3. The current week's exchanges average about $78,000,000 a day.

National Bank notes to the amount of $82,380 were issued last week, making the total issue to 1,671 banks thus far, $303,653,876, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,655,015, leaving, with the existing 1,650 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,988,861. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,649,500; and for the public deposits, $38,787,950—making a total of $379,437,550. The Treasury Department last week redeemed and destroyed $255,958 of worn and mutilated fractional currency, and issued $448,189 of new.

The Philadelphia Bank movement the past week shows a decrease in loans, of $8,122; an increase of $12,419 in specie; a decrease in legal tenders of $141,949; a decrease of $496,642 in deposits; and an increase of $849 in circulation. The Bank Clearings show a decrease of $1,485,837, and the balances, a decrease of $229,977.

Government revenues were quite liberal in the Customs, and moderate in the excise lines, last week. The excises, last week, yielded $3,264,910, against $3,744,460 the preceding week; customs at the port of New York $2,978,496, and at the outports, about $950,000 (in coin) more, making the grand total income for the week equal about $8,779,510 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $35,000,000.

The U. S. Sub-Treasury receipts, week ending with Aug. 17, were $23,690,104, including $2,978,496 from customs duties; payments, $17,493,144; balance at the close of the week, $135,284,162, against $129,087,202 at the close of the preceding week, showing an increase of $6,196,960. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $12 805,549 including $436,138 from customs, and payments, $12,851,068; on Tuesday, receipts, $4 598,025 including $594,033 from customs, payments, $2,919,529. The balance at the close of business on Tuesday stood at $136,917,139, against $130,641,884 a week previous.

Gold has been less active, especially since Monday, and under the official denial of the sinister reports of frauds in the Treasury Department, the premium has receded. The extremes of the week have been 140⅜@141⅞, and the closing prices on Wednesday were 141@141⅛. The speculative and export inquiry has been comparatiively light. The Wednesday steamer took out no specie. The customs demand, however, has been quite animated, having been over half a million a day for more than a week. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,305,827. The customs demand for Gold last week, averaged $496,416 a day; thus far, this week, it has been equal to $515,085 a day, or equal to a weekly aggregate of $3,090,510. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $116,724, and from California, $944,394. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $77,035,915, against $86,436,966 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $19,939,520, against $24,283,721 same time last year, showing a decrease this year, of $4,344,201. The exports of specie from this port, last week, were $601,888. The total outflow of specie from the port, since Jan. 1, 1867, has been $40,463,742, against $52,374,438 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $152,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $39,483,199, against $29,066,492 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to July 13, reached $23,281,424, against $25,051,327 same time last year, showing a decrease, in 1867, of $1,769,903.

Foreign Exchange has been in better supply and very moderate request at somewhat easier prices, the market closing heavily. Bankers' 60 day bills on London closed steadily on Wednesday at 109⅛@109¾, and on Paris to 5.18¾@5.15; sight bills on London to 109¾@110¼; and on Paris to 5.15@5.13⅛. The offerings of produce bills have been fair this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,962,501, making the total value of exports since Jan. 1, 1867, $119,425,889, against $127,501,500 same time in the preceding year.

Government securities have been more freely offered, chiefly on account of interior banks and bankers, and prices have declined, under the accumulating supplies in the open market, the investment demand, though good for the season, having failed to buoy up values. At the close quite an active trade was in progress on the basis of the reduced quotations. The August 1864 compounds have matured and are being paid off. They are no longer quoted. U. S. sixes of 1881 closed here on Wednesday at 111⅛@111¼; U. S. Five-twenties of 1862, 113⅛@113¼; U. S. Five-twenties of 1864 at 109¼@109¾; U. S. Five-twenties of 1865 at 110¼@110⅜; U. S. Five-twenties of 1865, consolidated, 107⅞@108; U. S. Five-twenties of 1867, 108@108¼; U. S. Ten-forties at 102½@102⅝, and U. S. Seven-thirties at 107@107⅛. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

October, 1864	118¾	August, 1865	116
December, 1864	117¾	September, 1865	115½
May, 1865	117	October, 1865	115

Railway and miscellaneous share property has been less freely sought after, and as there have been some rather sweeping realizations, prices have been depressed, closing heavily. The sellers outnumber purchasers at present, and seem eager to lighten their burdens, even on a yielding market.

General business has been moderately active, especially in the produce lines. Desirable lots of Breadstuffs and Provisions have been held more confidently. Cotton has been quiet and heavy, closing with middling grades on Wednesday at 28@29½ cents per lb. as extremes. The stock of cotton now here is estimated at about 53,000 bales. The receipts at the port this week, have averaged about 2,100 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 643,779 bales, against exports of 467,046 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,857,000 bales, against 2 017,150 bales same time last year; exports, 1,559,000 bales, against 1,520,320 bales same time last year; estimated stock at latest dates, 115,000 bales, against 257,100 bales same time last year. Beeves have been in better request this week, at a range of from 10@17c. as extremes, per lb.; receipts, 5,784. Sheep and lambs have been more abundant and quoted heavy—the former, at 5¼@6½c.. and the latter at 6½@8c. per lb.; on a moderate trade; receipts, 29,026. Swine have been plenty and depressed at 6@7¼c. per lb., live weight; receipts, 28,442. Foreign merchandise has been attracting more attention. Dry Goods and Groceries have been quoted strong, in the way of seasonable article. The total imports of foreign dry goods, last week, were $1,831,803, and the total amount marketed $2,286,908. The value of foreign merchandise imported last week, was $2,841,311—making the grand total specie value of last week's imports of dry goods and merchandise, $5,673,114, and since Jan. 1, 1867, $168,677,224, against $201,077,199 same time in the preceding fiscal year. The ocean freight market has been quiet; but rates have been quoted steady with 500 vessels of all classes in port. For Liverpool we quote flour at 1s. 4½d.@1s. 6d. per bbl., grain at 3@3½d. per bushel; cotton at ⅛d. per lb.; and heavy goods at 12s. 6d.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

Erie	45½	46	45
Ill. Central	76¾	78	77¾

The New York exports, exclusive of specie, for the week ending Aug. 20, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,482,421	$2,962 501
Prev. reported	125,019,079	116,463,388
Since January 1	$127,501,500	$119,425,889

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$3,867,157	$1,831,803
Gen. merchandise	3,480,415	2,841,311
Total for the week	$7,347,572	$4,673,114
Previously reported	186,962,801	155,865,760
Since January 1	$194,310,373	$160,538,874

The balance in the Sub-Treasury on Wednesday was $138,478,130 83.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Connecticut 6s, 101; N. Y. American Central Railway.

We have been favored with a copy of a pamphlet recently issued in London by Messrs. Bellot des Minieres Brothers, in which the subject of American Railroads is treated of in general terms, while more particular reference is had to the advantages to be possessed by the American Central Railway, as affording a more direct outlet eastward of the Union Pacific, than either of the lines aspiring to a connection with it at Omaha. The work contains a variety of valuable statistical information, and a map showing the line of the road, and its connection at Omaha with the Union Pacific, and at Fort Wayne, Ind., with the Pittsburg, Fort Wayne and Chicago Railway. The line will be 585 miles in length, and by its directness, will shorten the route now traversed between Omaha and New York by 136 miles. It will be constructed upon nearly the same parallel of latitude, and in its course will cross the States of Iowa, Illinois, Indiana and Ohio—the richest, most productive, most populous and industrious part of the United States. Running in an air line direction, the Union Pacific and the American Central Railways will be but an extension of each other—the traffic of the one has the line of the other for outlet. It will traverse inexhaustible beds of coal in Illinois and Iowa, and in its whole course eastward meets but one river, and that of inconsiderable width. The absence of bridges and culverts, added to its freedom from cuts and embankments will certainly be great advantages both in the construction and operation of the road, while by the avoidance of curves, the oscillation and vibrations of the machinery and cars will also be avoided, thus materially lessening the cost for repairs of way and the renewal of equipment.

It would be needless to speak of the traffic which would pour over the line of a road so favorably situated. The products of the States named, which now contribute so largely to swell the earnings and dividends of our Western roads would find an equally sure avenue to market through this; while the contributions from more than a dozen roads which would connect with and be tributary to it would greatly increase its traffic. The local business alone of these four States would suffice to support it handsomely, to say nothing of the contributions from California, Utah, Colorado, Oregon, Nevada, Idaho, Montana, Washington, Nebraska, etc., together with the precious metals and products of China, Japan, India, Australia, etc., the United States, European, North and South America, trans-Atlantic and trans-Pacific mails, troops, provisions and military stores. In short, the traffic of the American Central Railway will be limited only by its capacity to carry it. It is doubtful whether investments can be more securely made than in the construction of such a work. It will form one of the main connections of what will shortly be one of the greatest highways in the world—the Union Pacific Railway.

☞ Messrs. Sanderson Brothers & Co., of Sheffield, England, have concluded a contract with C. L. Reuterskiold, of Stockholm, the proprietor of the genuine Dannemora G. L. Iron, for the whole annual production of that celebrated Swedish brand, and in future it will be stamped

GL SANDERSON BROTHERS & CO.

This mark has for more than 50 years invariably ranked highest in Sheffield, as a melting steel iron, and is best adapted for extra quality axe steel, and all the finest kinds of the best cast steel.

The exclusive possession of this iron, combined with long experience as steel makers, enable this firm to guarantee an article of unsurpassed excellence. Office and warehouse, 16 Cliff street, New York.

Chesapeake and Ohio Canal.

The Maryland State Constitutional Convention at Annapolis, has finally settled the Chesapeake and Ohio Canal question, over which the struggle has been protracted and bitter. The trustees appointed by the mortgage of 1844, and their successors, succeeded in obtaining from the Committee on Public Works a report giving them the control of the canal until 1883, or until the debt shall have been paid. The convention struck the article out, and refused to adopt the compromises offered by the trustee interest, giving the latter a partial control. On the 16th inst., the matter was settled by the entire success of the opposing interest. The canal is to remain, as at present, under the control of the Board of Public Works of the State. By the Constitution of 1864 the Legislature is allowed to control this Board, but the convention have refused to allow that body any authority in the matter, and the power of the Board is thus made absolute, with the single exception that, at present they have the power to regulate the canal tolls, which power is, after the Constitution goes into effect, to be transferred to the President and Directors of the canal. The act of the Legislature, adopted at its last session, requiring the Board of Public Works to vote for a President and four Directors of the canal, to be nominated to them by a majority of the preferred bondholders, was declared null and void.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Alton Railroad for the second week in Aug., 1867, were $105,652 00
Corresponding period previous year.. 96,282 00

Increase..... $9,370 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in Aug., 1867... $25,055 00
Corresponding week previous year.... 23,334 00

Increase $1,721 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in Aug., 1867, were..... $78,000 00
Corresponding week of previous year.. 64,692 00

Increase..... $13,308 00

The earnings of the Michigan Central Railroad for the 2d week in Aug., 1867, were. $76,638 00
Corresponding week of previous year.. 67,091 00

Increase $9,547 00

The earnings of the Detroit and Milwaukee Railroad for the week ending August 15, 1867, were $35,764 00
Corresponding week of 1866..... 30,736 00

Increase..... $5,028 00

The earnings of the Western Union Railroad for the 2d week in Aug, 1867..... $11,580 53
Corresponding week previous year.... 10,814 72

Increase..... $765 81

The earnings of the Chicago and Northwestern Railroad for 2d week in Aug., 1867 .. $194,628 00
Corresponding week previous year .. 152,334 00

Increase $42,294 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Aug 1867, were..... $90,872 00
Corresponding week of 1866 ..... 78,725 00

Increase $12,147 00

The earnings of the Virginia and Tennessee Railroad for the second week of Aug., were $18,817, an increase of $5,629 on the same week last year. Total for the fiscal year commencing 1st of July, $92,820, an increase of $20,665 on same time in 1866.

Railways in India.

The annual report lately issued on Indian railways discloses the important fact, that by a decision of Lord Cranborne, as Secretary of State for India, an addition has been made to the list of guaranteed lines. The districts of Oude and Rohilcund are populous and highly productive, and have obtained the name of the garden of India. There would be no engineering difficulties in constructing railways in these districts, and very few works of great magnitude would be required, except bridges over the Ganges. There was thus every prospect that the proposed lines, if properly constructed and well managed, would soon pay; but all these apparent advantages failed to attract capital to the undertaking. At present the guarantee by Government of a certain return upon the capital subscribed is requisite to induce the public to subscribe any considerable amount for works of this kind in India. It became necessary, therefore, to consider whether the scheme should be abandoned or whether it should be carried out under the guarantee system. One of the last acts of Lord Cranborne before leaving office was to offer the guarantee of Government to the Indian Branch Railway Company, upon terms slightly modified from those of the contracts existing with other companies. In the contracts under which the existing guaranteed lines have been constructed, the guarantee is given for ninety-nine years, and at the end of that period the railway lapses to Government; but this provision is practically annulled by the power which the company has of surrendering the railway to the Government at any time before the expiration of the ninety-nine years, and receiving from the Government the capital expended. In the new form of contract there is no period fixed for the termination of the guarantee or of the interest of the company in the undertaking; but the Government have the power of taking possession of the line after the first twenty years of the agreement, or at the expiration of any ten years thereafter. In the event of their exercising this power within 100 years, they will have to pay to the company a sum equivalent to the average value of the stock during the three preceding years. If they do not exercise the power until after 100 years, they have only to pay back the capital expended. In both the old and new contracts the companies have the power of surrendering the railway to the Government at any time after it has been opened for six months; and in the event of this being done the Government will pay back the capital. Whenever, under the new contract, the Government has to pay back capital, this may be done by transferring an equivalent amount of five per cent. Government of India stock. In the old contracts this payment may be made by annuity.

It is important that the English public should understand this system of guarantees, because railways and other works for the development of the resources of India can only be carried forward by the help of English capital; and, on the other hand, the system when properly understood, will appear attractive to investors who are naturally disturbed by recent investigations of the financial management of English railways. This system admits, however, only of gradual and cautious application. The Indian revenue is not so elastic as to bear an unlimited amount of guarantee, nor will the English public subscribe an unlimited amount of capital. Several projects which, on political and military, as well as commercial grounds, deserve to be immediately put in hand, will have to be deferred. The Indus Valley Line from Hyderabad to Mooltan would connect the existing Scinde Railway with the existing Punjab Railway, and thus there would be complete communication by railway from Kurrachee to Calcutta. In order that full benefit may be derived from this communication, improvement of the harbor of Kurrachee is desirable, and, as is hoped, practicable. Another proposed line which would have great military and political importance would begin at Lahore, which is a station on the Punjab Railway, and be carried to Peshawur. Another line, beginning at Baroda, which is now connected by railway with Bombay, would pass through Neemuch to Delhi. These three proposals are certain to be brought forward when the lines now in hand approach completion. The outlay upon the guaranteed lines, including the Indian Branch Railway, will be nearly £90,000,000, and about £18,00,000 more would be required for the three lines above described. An important point in constructing railways in India will be reached next year when Bombay will be connected with Calcutta, and thus the English mail will be transmitted from the former to the latter town within two days. Communication by railway between Bombay and Madras will be completed the year after next.

The year 1866 will be memorable as that in which the receipts of some of the Indian railways for the first time exceeded the 5 per cent. guaranteed interest. In the half-year ending 30th June, 1866, the East Indian Railway and the Great Indian Peninsular Railway both attained this desirable result. In accordance with the terms of the contract, half of the amount of surplus income was retained by the Government in repayment of former advances for interest, and the other half was remitted to this country and augmented the half-yearly dividend of the shareholders by a quarter per cent. It is a satisfactory observation that the guaranteed interest, which was thus exceeded by the receipts, was paid on an amount of capital greater than that which produced those receipts, because a large portion of capital had been expended upon unfinished works or lines not open for traffic, and consequently unprofitable. But, notwithstanding the financial triumph of these two lines, the traffic generally of India during the year has been effected by adverse circumstances, and even the two lines did not maintain in the second half of the year the prosperity which they attained in the first. Drought in some of the districts and floods in others have produced results equally unfavorable. The floods indeed have not only reduced profits by checking trade, but they have consumed capital in the cost of repair of damage. This cost has "under the exceptional circumstance of the case," been allowed as a charge against capital; but probably the case is not so exceptional as the report assumes. Floods occur in India of the violence of which we have no idea in England, and a liability to damage from this cause must be reckoned among the drawbacks to the value of railway property in India. But English railway property, as we all knew, has suffered during the year 1866 from worse evils than floods. The railways in the west and south of India are supplied with coal from England at the cost of 60s. per ton. In Bengal native coal is available, and thus, while the cost of coal per train mile on the East Indian Railway was 3¼d., on the Great Indian Peninsular Railway it was 1s. 6¼d. If economy is to be secured in those extensive districts which do not produce coal, wood must be employed, and it will be necessary to plant extensively in order to produce adequate supplies. The prosperity of the railways depends much upon the construction of roads as feeders of traffic to them, and the funds at the disposal of the Government are not sufficient for executing such works as promptly as could be desired. Nevertheless, progress in this direction is certain although slow. The net amount paid by the Government for guaranteed interest, after deducting the earnings of the lines, was, in 1865, £1,450,000. Last year it was £800,000, and for this year it is estimated at £600,000. But it is certain that some new lines will be guaranteed, and thus a fresh charge will be imposed upon the Government. In the meantime, however, it is to be expected that the completed lines under favorable circumstances will yield profits exceeding the guaranteed interest. The receipts of all the lines are paid weekly to the Government, which thus acts as banker to the railways, allowing 5 per cent. interest on the amounts received. This interest is reckoned as part of the profits made by the railways in the year.

Reviewing the proceedings of the year, and making allowance for the adverse circumstances against which the railways have had to contend, the result must be regarded as encouraging, whether we look to the interest of the people of India, who use the railways, or of the people of England, who have advanced the money for their construction. The politician, the philanthropist, and the man of business ought to be equally satisfied with this report. Mercantile embarrassment, originating in Europe, has combined with failure of native crops to disappoint for a time reasonable calculations, but as soon as circumstances become favorable those calculations will be more than justified. "In spite," says the report, "of commercial depression and monetary disasters, of drought and famine, of unprecedented floods and destructive inundations, the works under construction have steadily progressed, and the traffic has increased." We may then confidently anticipate that in future years the Indian railways will produce grand results on the material progress of the country, the comfort and convenience of the people, and their social improvement. Whatever may be thought of railway management at home, the railways of India are likely to become an enduring monument of English sagacity and perseverance.—*London Railway News.*

New Orleans and Ohio Railroad.

A Grand Railroad Meeting will be held on the 28th inst., at Paducah, Ky., for the purpose of considering important Railroad interests. The meeting is called by a committee of invitation on the part of the city of Paducah, of which the Mayor is chairman, and on behalf of the railroad company, headed by L. M. Flournoy, Esq., its President.

At a called meeting of the president and directors of this company, held in Paducah on the 31st of July, a letter was presented from the secretary of the Mississippi Central Railroad Company, in which it was stated that at a meeting of the directors of that company at Water Valley, Miss., on the 17th of July, a committee was appointed to examine into the details of certain propositions which had been laid before the board looking to a co-operation with the New Orleans and Ohio Railroad Company, in the construction of a railroad from Mayfield, Ky., to Jackson, Tenn., by which a short and advantageous route will be opened *via* Paducah, Ky., to the eastern and northern markets and lines of travel, with a view to completing such arrangements and carrying out the enterprize, with instructions to confer with a committee to be appointed by the latter company.

A letter from the president of the New Orleans, Jackson and Great Northern Railroad Company was also presented, endorsing the project; and another from the president of the Mobile and Ohio Railroad Company signifying his approval, for the reason that it would clearly make a direct communication with the Gulf, both at New Orleans and Mobile. And that as Paducah will at no distant day have a road to Vincennes, Ind., thus putting them in connection with the great routes eastward, it would make the proposed New Orleans and Ohio Railroad a part of the shortest and most direct route between the great cities of the east and those of the Gulf; and with the construction of a short road from Paducah to some point on the Illinois Central Railroad, will make this road a portion of the shortest and most direct route from the east and the north and west to the cities of the Gulf, as well as one of great earning power.

It is expected that delegates from the principal southern and western roads will be present, and the hospitalities of the city of Paducah have been extended to them during their stay in that place.

United States and State Debts.

In confutation of some of the statements which have been published as to the amount of the aggregate debt of the United States, Federal, State and Municipal, the London *Economist* publishes a letter from Mr. George Walker, of Massachusetts showing that the aggregate of the State debts only increased $96,854,551 during the six years ending with 1866, and that in the States of Ohio, Indiana and Illinois, the indebtedness was actually reduced during that period by $6,000,090, while in Pennsylvania it was reduced $2,000,000. Mr. Walker adds, moreover, that while hardly any of the States of the West, and few of the States of the East, approached New York in the extent of their outlay in bounties, yet, if the debts of the rest of the North, both State and local, were on the same scale as that of New York, they would not exceed $850,000,000. His conclusion is that the entire debt, State and local, of the whole Union, including the Southern States, cannot exceed $650,000,000, which, added to the Federal debt, as it appears by the June statement, would make the total public debt of the American people $3,165,000,000—a sum which it was at one time confidently anticipated the Federal debt alone would reach by the close of the war. Some of the writers on this subject have represented the total debt as $4,000,000,000, and even $5,000,000,000, while the local debts have been represented as reaching $1,500,000,000.

Mineral Point Railroad.

The Grant Co., Wis., *Witness* says that the amount subscribed toward the completion of the railroad from Platteville, in Grant Co., to Calamine, in Lafayette Co., now stands at $300,000, of which Mr. Beecher, of the Mineral Point Railroad took $150,000, the town of Platteville $60,000, and the citizens of Platteville $90,000. This amount, if it was all in ready cash, the *Witness* says "would be nearly enough to complete the road—$320,000 being the amount estimated as necessary. But as a considerable portion of the individual, and all of the town stock is second and third class, the company will only be able to realize about 66⅔ cents in cash on each dollar of stock subscribed. This will make it necessary to raise $120,000 more stock, and it is proposed to raise it in the following towns: Belmont, $30,000; Elk Grove, $30,000; Kendall, $20,000; by towns this side of the line, $40,000."

The amount already subscribed is sufficient to construct five miles of road; and if the remainder should be taken, the eight miles can be completed and a depot built by the 1st of January next.

The Overland Telegraph.

From Chicago, the initial point, there are two independent lines running through Iowa to Omaha, besides a third *via* St. Joseph; from Omaha there are two lines, one *via* Fort Laramie; and the other *via* Denver to Salt Lake City; from Salt Lake two wires to Virginia City, Nevada, and from this latter place five wires (by three routes) to Sacramento and San Francisco. Salt Lake has telegraphic communication with Montana, besides Brigham Young's wires to the more important Mormon settlements north and south. Virginia City, Nevada, has a wire to the Humboldt mining district. The extension of the Western Union line toward Behring's Straits runs from Sacramento by way of Portland, Oregon, to New Westminster, British Columbia. The old California State Telegraph (now consolidated in the Western Union) takes in all the important California towns, from Yreka in the north to Los Angeles in the south, from whence a new wire is to be extended by way of Arizona and Texas to New Orleans.

The New Mail Route to Texas.

The post office contract for mail transportation from Brashear, Louisiana, by Sabine Pass, Texas, Beaumont, and Liberty to Houston and back six times a week by steamboat and railroad, opens a new route. Trains now make only two trips a week over that road. At present no steamer runs between Brashear and Sabine Pass, though there is an outline line from New Orleans, by way of Mississippi River, to that point.

The distance from Sabine Pass to Beaumont is some fifty or sixty miles by water, and only light draft steamers run on that route. The distance by land is only about half as great. The New Orleans road is constructed to Orange, some twenty-five miles below Beaumont, but trains run only as far as the latter place. From Beaumont to Houston, by the New Orleans Railroad, which extends through Liberty, the distance is about eighty miles.

This new route will greatly facilitate the transportation of mails between New Orleans, Houston, and interior Texas, and direct attention to the superior advantages of an all rail route connecting New Orleans with Texas.—*N. O. Republican.*

Union Pacific Railroad.

The ninth section of 24 miles of the road and telegraph line of the Union Pacific Railroad Company, eastern division, having been finished, bonds therefor to the amount of $384,000 have been issued. This road is now completed, as required by law, for 234 miles west from the eastern line of the State of Kansas, and has in use 25 locomotives, 16 passenger coaches, 8 baggage, mail and express cars, 118 box, 222 flat, 31 cattle, 46 hand and 7 boarding cars.

Pennsylvania Canal.

This company has recently made a survey of the canal and river from Harrisburg and Huntingdon, with the view of adapting the Juniata to slackwater navigation. The Lewistown *Gazette* thinks there is nothing in the way to prevent this from being carried out. Such a change would soon create steam navigation, at least for light-draught boats. At a comparatively small expense, a channel from fifty to one hundred feet wide and from two to three feet in depth, could be made by removing a few rocks and stones.

☞ The Waterloo, Iowa, *Courier* says that the "engineers are now on the line of the Valley road near Vinton, and are preparing the line for subletting as rapidly as possible. In one year from this date the cars will run through from Cedar Rapids to Waterloo. They are now laying the track on the Minnesota Central Railroad south of Owatonna, at the rate of a mile per day. In sixty days the iron horse will make his advent into Austin, fifteen miles north of the State line. Another year or two and the cars will leave Waterloo for St. Paul."

☞ We learn that 47 miles of the extension of the Iron Mountain road are under contract, from Belmont, Mo., to a point on the Cairo and Fulton Railroad, west of Charleston, and from that point in the direction of Pilot Knob, the present southern terminus of the road. The contractors are at work, expecting to have the road bed ready for the rails before January. We learn also that contractors for 130,000 to 140,000 ties, to be delivered on the line, are at work, and that the track laying is intended to commence next month and go on at the rate of half a mile a day.

☞ It is stated that a contract has been let for the immediate construction of the Grand Rapids and Indiana Railroad, from Fort Wayne, Indiana, north to Grand Rapids, Michigan. The work has been commenced on the northern end of the line, near Grand Rapids, and it will be pushed forward as rapidly as possible southward to Fort Wayne. It is the intention to extend the road to Mackinac, to tap the Lake Superior trade. The new road will cross the Michigan Central at Kalamazoo, and the Michigan Southern at Sturges.

☞ The Memphis and Ohio Railroad having failed to meet its obligations to the State of Tennessee, Governor Brownlow has taken possession of it, and appointed F. W. Spurling as receiver.

East Indian Railways.

From the Annual Report on Railways in India, just presented by Mr. JULAND DANVERS, we learn that the traffic for the year 1866 was affected by commercial troubles, as well as by droughts in some parts of the country, and unparalleled floods in other parts. Still, the two great companies, the East Indian and the Great Indian Peninsular, realised profits during the earlier half which enabled them for the first time to divide more than the 5 per cent. interest guaranteed. To prevent any check to the progress of construction of the various lines from the difficulty of raising capital, the Government have at times made advances of more than a million sterling. At the beginning of the year there were 3,331 miles open, 205 were finished during the twelve months, and 101 miles since, thus raising the total to 3,637. The completion of the Great Indian Peninsular to Nagpore places India in a greatly improved position for providing this country with cotton. As regards the works in course of construction, it was expected that the East Indian line to Jubbulpore would have been opened to the public on the 1st of June, and that the Great Indian Peninsular will, by October or November, 1868, effect a junction at that place which will establish a through communication between Bombay and Calcutta. The total length of railways remaining to be constructed, and for which a Government guarantee has been granted, is 2,005½ miles. In addition, proposals have been considered for three lines—namely, of 570 miles from Baroda to Delhi, one of 500 miles to unite the Scinde and Punjaub, and one of 250 miles from Lahore to Peshawur. The first would cost £6,840,000, the second £6,000,000, and the third £5,000,000, making a total of nearly £18,000,000. It has been determined not to authorise the Lahore and Peshawur, and no decision has yet been come to with respect to the others, but surveys are being carried on. There are also projects, which are evidently regarded with favor by the Government, for a chord line for the Great Indian Peninsular Railway, an extension of the Madras railway to the sea-coast, and an extension of the East Indian across the Hooghly into Calcutta.

Out of 43,398 shareholders and debenture-holders, the native proportion, which was in the previous year only a little over 1 per cent., is now actually below that amount. The total capital thus far raised for Indian lines is £67,254,802, and the further lines already authorised will raise this to £88,000,000. The receipts of the year ended the 30th June, 1866, were £4,537,235, while the expenses of working and maintenance were £2,225,495, showing a net profit of £2,304,534—a result which contrasts favorably with the working expenditure of the largest English companies, notwithstanding the adverse influence of dear fuel. At the existing rate of freights, coal and coke, before they are landed in India, cost 50s. per ton, and the extra charges, so far as the Western and Southern districts are concerned, raise the cost to about 60s. The East Indian Company have exceptional advantages from the coal fields near Calcutta, and the cost to them of coal per train mile is 3¼d., while on the Great Indian Peninsular it is 1s. 6¼d. Coal from Australia and Labuan is being tried, but wood is looked to as the resource that must in many cases be relied upon, and with that view planting on an extensive scale should take place, it is considered, annually for several years to come.

☞ The contract for building the Winona Eastern Connection has been let to Messrs. Wells & French, and the grading is to be done at once.

Gamblers on the Cars.

Observing travelers on many of our longer routes have seen with displeasure that professional gamblers have grown quite into the habit of taking advantage of the facilities furnished by railway companies for a social game at cards, and they have also wondered that the railway managers have taken no steps to prevent these fellows from plucking the unsuspicious or unsophisticated at a game of euchre ingeniously developed and perverted into a game of poker or even three-card monte, and from pursuing, *en route*, the avocation which constabular "descents" have made more hazardous and less profitable than it once was in our cities. And, in the absence of any official efforts to suppress this nuisance, we think this public commendation is merited by Conductor Wheeler, of the Bristol Steamboat Line, who has taken the matter into his own efficient hands, and has not only suppressed several attempts at gambling upon the train, but has, in at least one instance, as we positively know, compelled the peripatetic plunderers to restore the money of which they had cheated a fellow-passenger. We hope Mr. Wheeler's spirit and determination will not only meet the approval of his superiors, but will incite all our railway superintendents to issue such orders as will insure either the abolition of gambling on their trains or the arrest and punishment of the gamblers.—*Boston Advertiser, July* 18.

Manassas Gap Railroad.

The Alexandria *Gazette* says that the contract for rebuilding the Manassas Gap Railroad to Mount Jackson has been awarded by the Orange Company to Messrs. Placide & Clarke, of Baltimore, and that the work will be begun at once and vigorously prosecuted. The contract is for rebuilding the road from the present terminus of the track, at Piedmont, in Fauquier county, twenty-seven miles from the junction with the Orange and Alexandria Railroad, to Mount Jackson, a distance of about fifty-one miles. It is understood that the contract is favorable to all parties, the contractors taking in part payment a large amount of the new bonds of the consolidated company. According to a report made by Mr. Vandegrift, the general superintendent, to the meeting of the stockholders of the Orange and Alexandria Railroad Company, in April, last, the cost of reconstructing the road from Piedmont to Mount Jackson will be about $400,000. There have, as yet, been no proposals solicited for continuing the road to Harrisonburg.

☞ The Dubuque *Times* says that the $1,200,000 stock for the proposed bridge across the Mississippi at that point has all been taken in New York, and the work will be commenced as soon as the plans are adopted.

PLASTIC SLATE ROOFING

JOINT STOCK COMPANY.

OFFICE 157 (Room 19) BROADWAY,

NEW YORK.

W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21st, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

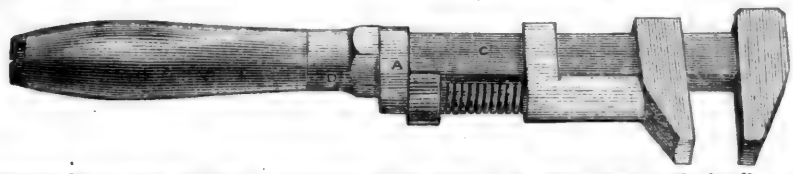
Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

MEAD RUBBER COMPANY,

12 Vesey Street, New York.

MANUFACTURERS OF



INDIA RUBBER CAR SPRINGS AND STEAM PACKING.

Our Works being now under the management of a competent Superintendent, we are prepared to offer Springs of various qualities and prices to suit. Our A No. 1 Spring made of fine Para Rubber, and the Compound used by the Patentee, the late Fowler M. Ray, will be found to be cheaper than others made, from inferior stock and offered at lower prices.

Sample setts forwarded on application. All Springs fully warranted.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

THE UNION PACIFIC RAIL ROAD CO.

THEIR FIRST MORTGAGE BONDS

As an Investment.

THE rapid progress of the Union Pacific Railroad, now building west from Omaha, Nebraska, and forming, with its western connections, an unbroken line across the continent, attracts attention to the value of the First Mortgage Bonds which the Company now offer to the public. The first question asked by prudent investors is, "Are these bonds secure?" Next, "Are they a profitable investment?" To reply in brief:

1st. The early completion of the whole great line to the Pacific is as certain as any future business event can be. The Government grant of over twenty million acres of land and fifty million dollars in its own bonds practically guarantees it. One fourth of the work is already done, and the track continues to be laid at the rate of two miles a day.

2d. The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of railroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and being without competition, it can maintain remunerative rates.

3d. 425 miles of this road are finished, and fully equipped with depots, locomotives, cars, &c., and two trains are daily running each way. The materials for the remaining 93 miles to the eastern base of the Rocky Mountains are on hand, and it is under contract to be done in September.

4th. The net earnings of the sections already finished are *several times greater* than the gold interest upon the First Mortgage Bonds upon such sections, and if not another mile of the road were built, the part already completed would not only pay interest and expenses, but be profitable to the Company.

5th. The Union Pacific Railroad bonds can be issued only as the road progresses, and therefore can never be in the market unless they represent a *bona fide* property.

6th. Their amount is strictly limited by law to a sum equal to what is granted by the U. S. Government, and for which it takes a *second* lien as its security. This amount upon the first 517 miles west from Omaha is only $16,000 per mile.

7th. The fact that the U. S. Government considers a second lien upon the road a good investment, and that some of the shrewdest railroad builders of the country have already paid in five million dollars upon the stock (which is to them a third lien), may well inspire confidence in a first lien.

8th. Although it is not claimed that there can be any better securities than Governments, there are parties who consider a first mortgage upon such a property as this the very best security in the world, and who sell their Governments to re-invest in these bonds—thus securing a greater interest.

9th. As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accrued interest, they are the cheapest security in the market, being more than 15 per cent. less than U. S. Stocks.

10th. At the current rate of premium on gold, they pay

Over Nine per Cent. Interest.

The daily subscriptions are already large, and they will continue to be received in New York by the

THE ELNATHAN SAMPSON

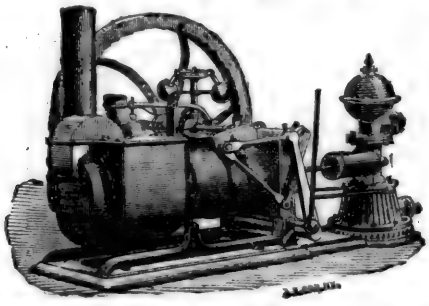
NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.



Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

New York, Saturday, August 31, 1867.

Illinois and St. Louis Bridge Co.

On the 21st of February, 1867, the Legislature of Illinois incorporated the Illinois and St. Louis Bridge Co., for the purpose of constructing and maintaining a bridge across the Mississippi River, opposite the city of St. Louis. The gentleman named in the act of incorporation, duly organized on the first of March last, by the acceptance of the act, by subscriptions to the stock, and by the election of the following Board of Directors: L. B. Boomer, R. P. Tansey, George Judd, Wm. R. Morrison and C. Beckwith.

At an election held on the same day by the Board of Directors, L. B. Boomer was chosen President, and R. P. Tansey, Secretary.

Simultaneously with the above proceedings, an organization was effected in Missouri, in accordance with the requirements of the law of that State governing the formation of private corporations for bridge-building purposes, under the corporate name of the Illinois and St. Louis Bridge Co., for the purpose of constructing a bridge across the Mississippi River at the most eligible and practicable point opposite St. Clair County in Illinois, within the limits of St. Louis County. The same persons named above as directors of the company organized under the Illinois charter, were appointed as Directors under the Missouri incorporation. The two corporations are, therefore, for all practical purposes, one, their object being the same, to build a bridge across the Mississippi at St. Louis.

With a view to the early commencement of work upon this bridge, the directors, accompanied by several of the most prominent civil engineers in the country, met in convention at the Southern Hotel, St. Louis, on the 21st inst., to consult upon the plans to be adopted, and various other matters pertaining to the general subject. Among those present were: Messrs. W. J. and C. L. McAlpine, G. A. Parker, L. Jee Fleming, E. S. Chesboro, R. B. Mason, T. B. Blackstone, L. H. Clark, E. H. Johnson, O. Chanute, A. Anderson, S. S. Post, J. B. Moulton, T. McKissock, H. C. Moore, and J. H Morley. Wm. J. McAlpine was elected President, and T. McKissock, Secretary.

After an address by the President, the following committees were appointed:

1. On the Regimen of the River and the character of the Bottom—Messrs. Moulton & Moore.
2. On Foundations and Piers—Messrs. Chesboro, Smith, Parker, Fleming, C. L. McAlpine, and A. Anderson.
3. On the Superstructure and Approaches—Messrs. Post, Shoemaker, Fleming, Chanute and Blackstone.
4. On the River Commerce and its Navigation—Messrs. Moore and Churchill.
5. On the Commerce Crossing the Bridge—Messrs. Blackstone, Anderson, McKissock, D. A. January and Chas. A. Tucker.

On motion it was resolved that the President be specially added to the Committees on Foundation and Superstruction, and *ex-officio* to all the other committees.

The bridge will be nearly 2,000 feet in length, and will cross the river in spans, the two principal ones being 368 feet wide, at an elevation of 50 feet above the high water of 1844; or 85 feet above low water mark. It will enter the city either between Wash and Carr, or Carr and Biddle streets, crossing the levee at a height of about fifty feet, and Main street at an elevation of about twenty-five. The bridge at each end on reaching the shore line will have a desending grade until it strikes a level of about sixteen feet elevation between Main and Second streets, when it will curve northward and terminate at Cass avenue, about Seventh street.

After the preparation of the reports by the several committees, they will be submitted by the chairmen to the President of the Convention, to be by him consolidated into a general report, and transmitted to the Board of Directors of the Illinois and St. Louis Bridge Company. It is the intention of the company to commence work upon the Bridge as soon as the Reports of the committees are received.

Bridge over the Missouri River.

The laying of the corner stone of the Cameron and Kansas Railroad Bridge across the Missouri River, at Kansas City, took place on the 1st inst. O. CHANUTE, Esq., is Chief Engineer. The bridge, which is to be completed within the coming year, is to be of iron 1,400 feet long, with a draw in the channel of 362 feet. There will be six stone piers with spans of 250 feet. It will have a carriage way as well as a railroad track. This bridge with the one now building across the Mississippi River at Quincy, will give through connection, without breaking bulk, between Kansas City and the east.

☞ The amount of capital required ($1,200,000) for the construction of the Railroad Bridge across the Mississippi River, between Dunleith and Dubuque, having been subscribed, the work is to be commenced immediately. The bridge will be of iron, 50 feet above high water mark, if of continuous spans; or 40 feet, if constructed with a draw. This bridge will connect the Illinois Central and the Dubuque and Sioux City Railroads.

☞ A bridge is being constructed across the Mississippi River at Quincy, Ills., which will cost $2,000,000. It will connect the Hannibal and St. Joseph with the Chicago, Burlington and Quincy, and the Toledo, Wabash and Western Railroads.

☞ The earnings of the St. Louis and Iron Mountain Railroad Company for the month of July 1866, were $49,950 31.

Boston and Maine Railroad.

The earnings and expenses of this road for the years ending May 31, 1866 and 1867, have been as follows:

Earnings:	1866.	1867.
From passengers.....	$943,222 30	$976,683 97
" freight	519,005 70	581,996 28
" rents.....	18,729 94	23,290 18
" mails.....	11,104 46	10,889 78
" interest and div.	19,096 85	17,866 45
" P., S. & P. R. R.	10,000 00	10,000 00
	$1,521,159 25	$1,620,676 66
Expenses, viz:		
Repairs of road.....	$136,655 54	$145,212 25
" bridges ...	27,870 52	39,384 54
" stations,etc.	27,338 19	88,348 82
" fences.....	5,103 07	5,691 51
" locomotives	63,745 25	79,627 06
" cars	71,730 85	67,106 95
Switchmen, gatemen, etc.....	38,123 43	40,442 77
Passenger expenses..	112,023 25	117,421 26
Freight expenses....	92,751 22	114,061 73
Wood.....	75,812 65	75,779 76

Deduct tax on dividend and surplus.		27,293 50
Net profits.....		$507,704 76
From which deduct two dividends of five per cent. each.....		415,570 00
Leaving an undivided balance of..		$92,134 76
To which add balance from previous year.....		882,958 95
Total, as in General Balance Sheet..		$975,093 71

Compared with 1866, the gross earnings of 1867, show an increase of $99,517 41, with an increase in expenses of $68,458 97—making an increase in net earnings of $31,058 44. The report says:

The length of road constructed by this corporation is about eighty-three miles. This includes the Medford, and Methuen and the Great Falls Branches.

The Methuen Branch has always been operated in connection with the Manchester and Lawrence Railroad, and is, in fact, a part and parcel thereof.

The whole length of road now actually operated by us, including the Danvers, the Newburyport, and the Dover and Winnipisseogee Railroads, is about one hundred and forty-five miles. There is a double track from Boston to North Andover, a distance of about twenty eight miles. The remainder, with the exception of the usual turnouts and sidings, has a single track only. The exigencies of the road require that the double track should be extended to Haverhill at no distant day.

During the past year we have been engaged in building more than usual. The station arrangements at Haverhill have been completed by the erection of substantial and commodious Passenger and Freight Depots. The buildings there, including the car and engine houses, are of the first class, and well adapted to the wants and conveniences of that enterprising and flourishing town.

We are also constructing new station buildings, both passenger and freight, at Exeter. These have been long needed, but have been delayed hitherto by causes over which we had no control. When completed, they will probably give satisfaction to the patrons of the road in that town. They will be built of brick, with slated roofs, and sufficiently capacious to meet the wants of the public for many years to come.

The wooden bridge, near Durham station, has been replaced by a permanent structure of stone and gravel. The arch is apparently very substantial. Although more expensive than wood, we trust it will, by its greater safety and durability, prove to be true economy.

The enlargement of the roadway of Charles street, Dover, and the consequent construction of one new abutment for the bridge spanning that street, are nearly completed. The superstructure of wood is now being erected by contract. It is understood that the plan, now nearly completed, will give perfect satisfaction to the city authorities and the public generally.

We have also built the abutements and a bridge over the new canal in South Lawrence.

A new passenger depot of wood, at Highland station, in Melrose, is under contract and will be finished during the summer. It is an important station, connecting there with the Stoneham Street Railroad. Our present depot has long been inadequate to accommodate the many passengers which daily go to and from that section.

By an outlay of several thousand dollars at Boston and Reading, there has been provided shelter for passenger cars, which otherwise would be exposed to the scorching heat of the sun in summer, and the severe storms of inclement winter.

Since we came into possession of the Dover and Winnipisseogee Railroad, Dover has become more of a centre than formerly. Consequently, arrangements have been made to have the rails repaired and other mechanical work done at that Junction, which was formerly done at the Rollinsford Junction and other places.

The outlay in the purchase of real estate at South Berwick Junction, Dover, Haverhill, Lawrence and other places, for the convenience of the road, has been considerable, but will, we doubt not, prove in the end to have been judiciously made.

We have suffered largely from fire during the past year. In consequence of the extreme dryness, during the last two years, considerable amount of property has been destroyed by fires originating from sparks from the engines. During the early part of that period we were protected by insurance. But we could not continue that insurance, nor obtain new insurance for spark-risks in reliable institutions. We therefore had to pay several thousand dollars during the last year for damages from such fires.

But the greatest calamity, which has befallen the road for many years, occurred at Lawrence, on Sunday, August 12, 1866, near the middle of the day.

The car and paint shops, wood and lumber sheds, were totally destroyed by fire. Other buildings were injured, and much material, valuable machinery, &c., were consumed or rendered comparatively worthless. We had insurance, applicable to that risk, of $33,000. Some of the offices have paid in full, others, which are in liquidation, pay only in part. We have re-built only partially, and for a temporary purpose, not being fully satisfied what would be the most judicious course to be adopted.

Every branch of the rolling stock has been largely increased during the past year. One hundred freight cars, six elegant passenger cars, and five locomotives have already been purchased at an expense of more than $190,000, and placed upon the road. Two old passenger cars and one old locomotive have been disposed of. More passenger cars are contracted for, and we shall need more freight cars and engines, in order to transact with promptness and efficiency the constantly enlarging business of the road.

From the extension of manufactures, the increase of mechanical operations, and the general growth and prosperity of the country, along the line of our road and its connnections, we have abundant reason to anticipate increased prosperity in the future.

By comparing the tables of this year with those of former years, the increased amount of business can be readily ascertained, and the sources from which it is derived, and the future prosperity of the road be thus established. Take our local business, for instance, for the past four years and the result is as follows:

The amount of earnings from local passengers and local freight for the years ending May 31, was:

	Local passengers.	Local freight.
1864.....	$524,068 04	$274,454 86
1865.....	649,174 91	302,760 11
1866.....	759,902 54	424,827 08
1867.....	795,115 59	462,158 02

Take also the business from connecting roads. The amount of earnings, from such business, on our road for the same time, is as follows:

	Passengers. —	Freight.
1864.....	$161,957 66	$96,950 49
1865.....	175,526 06	91,278 42
1866.....	183,819 76	94,178 62
1867.....	181,568 38	119,838 26

In the above statement is included the amount of the earnings on the main road and on all other roads and branches operated by us.

The above table is very suggestive and needs no comment.

The amount received from the sale of shares, and which constitutes the whole amount of capital paid in, is $4,076,974 52; and the amount used in constructing and equipping the road, as represented upon the books, is $4,609,254 16. The excess of $532,279 64 has been paid from the current revenue. In addition to this, in the early days of this corporation, loans to the amount of $150,000 were obtained on the credit of the State and paid at maturity, from the earnings of the road. Since which time the actual capital has been represented by the amount above named, which is all that was obtained from the sale 41,557 shares of stock, and it is all that has ever been received for the construction and equipment of the road, which has not been repaid by its earnings.

There have been from time to time large outlays, which might properly have been, but which were not, charged to the accounts of construction—such as the enlargement of the bridge over Charles River at an expense of $40,000; the purchase of real estate at Haverhill and other places many years ago; the erection of new and enlarged depots, car and engine houses, turn-table, sidetracks, the increase of the rolling stock, &c.

It cannot but have been observed, that, for some years past, the amount of net profits has been smaller, comparatively, than formerly. This arises from the high price of labor, iron, fuel and all other materials used in the manufacture of engines and cars and in keeping the road and equipment in repair.

Another item of expense which has lately become of great importance is the amount of taxes. Formerly it was comparatively small. The amount in 1862, as estimated, was $13,878 57; in 1867, $114,866 77—an increase in five years of $100,988 20.

Our relations with the Portland, Saco and Portsmouth Railroad continue as heretofore under the contract of 1847. We have received from that road the sum of ten thousand dollars as surplus during the past year.

This by no means represents the actual amount due us as surplus earned, since the sum placed to the credit of this corporation on the books of the P., S. & P. Road has been increased during the year, from $108,734 56 to $155,729 35. A large amount of this has been, or is to be, expended in the purchase of land, in the building of a new engine house and machine shop, and in other improvements. All these expenditures are intended to be represented in a special improvement account.

There is a discrepancy between our accounts in

respect to the haulage of freight between Boston and Portland, but we trust it will be adjusted on equitable principles. A suit has been commenced by that road against this corporation on account of the offer of compromise, in regard to coin dividends, made by the directors of this road by their vote passed Dec. 17, 1864, which vote is printed in full in their Annual Report of 1865.

A contract between the Eastern Railroad Co., and the Boston and Maine Railroad was made and executed May 3, 1867. It is founded on principles of justice, and we see no reason why it may not be permanent and insure peace and harmony between these neighboring railroads. The principle recognized in this contract is, that priority of occupation gives a right to establish the tariff of tolls, to which the other road agrees to conform.

An important reduction in passenger fares was made in March last. The regular fare is now established upon a basis of three cents per mile, which is a reduction of one-half cent per mile from the former tariff.

The usual repairs have been made upon the road and rolling stock, and both are believed to be in good working order.

The examination of the accounts, made under the direction of a committee appointed to that duty, shows a satisfactory result.

The number of miles run by passenger trains was 532,590; by freight trains 251,793; by gravel trains, 14,906; by extra trains, 12,229—total miles run, 811,518. Number of passengers carried, 3,070,724; do., carried one mile, 43,056,491; do., carried to and from other roads, 296,082; do., carried one mile do., 10,108,817. Tons of merchandise carried, 319,905; do., carried one mile, 12,396,761; number of tons of merchandise carried to and from other roads, 68,918; do., carried one mile do., 4,175,392. Tons of freight carried for use of the road, 145.

CONDENSED BALANCE SHEET.

	1866.	1867.

	$5,386,291 35	$5,422,326 07

President.—F. COGSWELL.

Directors.—Francis Cogswell, Peter T. Homer, Nathaniel G. White, E. J. M. Hale, George C. Lord, Amos Paul and John E. Bickford.

Treasurer.—A. BLANCHARD, JR.

Superintendent.—WILLIAM MERRITT.

Pacific Railroad Companies.

The companies embraced in the Pacific Railroad Act, and entitled to participate in the grants of Government aid for the construction of the National Trunk Line and branches, are enumerated by the Secretary of the Treasury in a tabular exhibit of the names of the different roads, the distances to be built under Government patronage, and the amount of bonds per mile to be issued to each as follows:

	Distance in Miles.	Am't per Mile.
Central Pacific Railroad—From Sacramento to the western base of the Sierra Nevada	7.180	$16,000
Thence, 150 miles across the Sierra Nevada	150.000	48,000
Thence, to the probable junction with the Union Pacific, or to a point 78.295 miles east of Salt Lake City	544.115	32,000
Total	701.295	.....
Union Pacific Railroad—From Omaha to eastern base of Rocky Mountains	516.000	$16,000
Thence, 150 miles across the Rocky Mountains	150.000	48,000
Thence, to the probable junction with the Central Pacific, or to a point 78.295 miles east of Salt Lake City	289.705	32.000
Total	955.705	.....
Union Pacific Railway, Eastern Division—For a length equal to the distance from the mouth of Kansas River, *via* the Kansas and Republican Rivers, to 100th meridian—(is allowed to connect east of the Rocky Mountains, about 700 miles,) entitled to bonds for	381.000	16,000
Atchison and Pike's Peak Railroad—now called Central Br. of Union Pacific—100 miles next to the Missouri River	100.000	16,000
Sioux City and Pacific Railroad —From Sioux City to its junction with the Union Pacific Railroad at Fremont	100.000	16,000
Western Pacific Railroad—From San Jose to Sacramento	120.000	16,000

The total amount of bonds to be issued to these companies by the U. S. Government is as follows:

	Miles.	Bonds.
Central Pacific	701 295	$24,726,560
Union Pacific	955.705	24,726,560
Union Pacific—Eastern Div.	381.000	6,096,000
Union Pacific—Central Br.	100.000	1,600,000
Sioux City and Pacific	100.000	1,600,000
Western Pacific	120.000	1,920,000
Total	2,358.000	$60,669,120

The charter of the last named company contemplated a line from Sacramento toward San Francisco, making the circuit of the bay of that name. Their franchise has recently been assigned to parties in the interest of the Central Pacific Railroad Company; and it is probable that this line will be incorporated with the Central Pacific Railroad, and the road extended from Sacramento to San Francisco by the shortest, most direct and practicable route, so soon as the overland connection is completed.

The Government bonds issued to these companies bear six per cent. interest in currency; in addition to which each company is authorized to issue an equal amount of its own bonds, having priority over the Government issues. The interest on these bonds is payable in gold. At this date, the Union Pacific has 416 miles completed; the Eastern Division, 234 miles; and the Central, 105.

Memphis and Savannah Railroad.

The country is greatly indebted to Col. Harkie, and his corps, for the valuable services which they have rendered in prosecuting this work under the most unfavorable and discouraging circumstances.

There is not in the whole South a richer field for the safe and profitable investment of capital than that afforded by the mineral deposits in the vicinity of Elyton. In addition to unparalleled veins of the purest and most malleable iron ore which extends the whole length of Red Mountain, inexhaustible coal beds are scattered throughout this part of the State, extending over the great part of Tuscaloosa, Shelby, Jefferson, Blount, Walker and adjoining counties. The most extensive of these coal deposits known as the Warrior Coalfields, cover an area of over five thousand square miles (according to the report of the late Prof. Toumy,) and lies almost within a stone's throw of Red Mountain—the great iron deposit of Alabama—a fact to be appreciated has only to be made known to iron-mongers. The Memphis and Savannah Railroad, the survey of which is now progressing, runs, we understand, directly through the centre of this coalfield, and will, when completed, afford transportation for thousands upon thousands of tons to be used in our Southern cities for manufacturing and maritime purposes. In connection with our mineral resources, the fact should not be overlooked that this section of country is as finely watered and timbered as any portion of the South.—*Elyton Herald.*

La Crosse and Winona Railroad.

A gentleman of this city who came through from Milwaukee on the La Crosse road on Thursday, informs us that the grading on the Winona Eastern Connection is already done from the point of junction as far as the view is unobstructed, and that there is a large force at work along the line of the road for several miles. Our informant states that he had an interview with one of the contractors, Mr. Wells, on the 15th, and learned from him that the iron for the track has been purchased, and a portion of it is now on the way westward from New York. The contractors were fortunate enough to close a contract for 50,000 ties, now lying within accessible distance of the track, and ready for use when required. Contracts have also been closed with mills on the Black river for the heavy timbers for the bridges, across the Mississippi at this city. The timbers can easily be floated down the Black river to the point where the road crosses that stream. We are further informed that the western end of the line opposite this city will be definitely located within a few weeks, and that active operations on the Mississippi bridge will be commenced sometime during the coming winter.—*Winona Republican, Aug.* 17.

☞ The Grand Trunk Railway Company of Canada are in want of 140,000 railroad ties, to be delivered at the following places:

Between Montreal and Sherbrooke	40,000
" Sherbrooke and Boundary Line	15,000
" Richmond and Point Levi	20,000
" Gorham and Portland	35,000
" Gorham and Boundary Line	20,000
" Three Rivers District	10,000

☞ A despatch from Olympia, W. T., says: The party which is making a survey of the Northern Pacific Railroad has found a route over the Cowlitz Pass to the forks of Cowlitz, which they report to be extremely favorable for the road. The survey over the mountains will be finished in thirty days.

Spanish Railways.

According to a statement of the Minister of Agriculture and Commerce, the amount of capital realized and subventions received by the different railway and canal companies in Spain on the 31st of December, 1865, was as follows:

	Railways. £	Canals. £
Nominal capital assigned by statutes	39,519,311	5,520,000
Capital represented by shares issued	27,936,074	1,800,000
Subvention assigned by laws of concessions	17,364,646	200,000
Capital in hand from shares	24,397,610	1,444,728
Subventions received	11,448,319	200,000
Nominal value of the shares issued	61,692,597	520,000
Nominal value of the shares taken up	54,777,354	520,000
Net value received	27,791,977	465,670
Total amount of shares and subventions	62,750,833	2,110,402
Net produce of traffic for 1865	2,927,450	476,606
Estimated amount necessary for the completion of all the lines	31,764,217	118,561

At the end of 1865 the number of kilometres in work was, as regards railways, 4,712; the number in course of construction was 806; and the number projected was 1,035. Of canals, the kilometres in work were 665.

☞ Arrangements have been effected whereby the early completion of the Kansas City and Fort Scott Railroad is anticipated.

Richmond and Danville Railroad.

The earnings from all sources for the fiscal years ending September 30, 1866, (first full year since the close of the war,) were as follows:

From passenger traffic		$204,983 27
" freight traffic		380,378 36
" express traffic		60,233 50
" United States mail		12,840 72
" telegraph line		2,636 88
" other sources		670 58
		$661,743 31
From U. S. transportation—passengers	$9,576 49	
From U. S. transportation—freight	1,394 20	
		10,970 69
Total gross earnings		$672,714 00

The ordinary expenses of the year were as follows:

For maintenance of road, bridges and buildings		$87,155 97
For maintenance of machinery		52,360 42
For conducting transportation, &c.		185,014 91
For salaries $12,172 63, and insurance $5,481 27		17,653 90
Operating expenses		$341,185 20
For internal revenue tax	$16,739 11	
On account of lease of Piedmont Railroad	30,000 00	
		46,739 11
Total ordinary expenses (57.67 p. c.)		$387,924 31
Excess of earnings over ordinary exp. —being 42.33 per centum of gross earnings.		$284,789 69
The total extraordinary expenses amounted to		$818,995 67
Add to balance Auditor's statement, interest account		110,703 44
Total (chiefly renewals and purchases of stock)		$929,699 11

The length of the Richmond and Danville Railroad between Richmond and Danville is 140.5 miles. Branch to coal yards at Rockett's 1.52 miles. Sidings and turnouts laid 11.25 miles. Total equivalent single track 153.27 miles. The Coalfield branch to the Midlothian mines 1.14 miles operated in 1860 was not in use in 1866. The length of the Piedmont Railroad (leased) from Danville, Va., to Greensboro', N. C., is 48.5 miles, or including sidings and turnouts (1.98 miles) 50.48 miles. Total length of main and branch line operated by company 190.52 miles.

The rolling stock owned by the company at the close of the year consisted of—locomotive engines 25, (increase one year 5); passenger cars—1st class 11, and 2d class 5, total 16 (increase 4); baggage and mail 5, (increase 2); freight cars—box 145, (increase 56,) and platform 49, (increase 9½,) total 194, (increase 65½); iron coal cars (6-wheel) 49, (increase 3); sand and gravel cars (4-wheel) 12, (increase 5); conductors' and service cars (8-wheel) 10, (increase 2.) The increase thus shown is probably more in number than in working power.

The earnings and expense accounts for the years ending September 30, 1860 and 1866, compare as follows:

	Miles of road operat'd.	Gross Earnings.	Operating Expenses.	Earnings less expens.
1860.	143.19	$560,904 43	$278,575 96	$282,328 47
1866.	190.52	672,714 00	341,185 20	331,528 80
Inc..	47.33	$111,809 57	$62,609 24	$149,200 33

The mileage of trains for the same years compare as follows:

	Passenger.	Freight.	Coal.	Other.	Total.
1860.	94,724	119,261	10,065	33,779	257,329
1866.	114,066	78,399	6,194	41,292	239,951
Inc..	19,342	.....	....	7,513	.....
Dec..	.....	40,862	3,871	.....	17,878

Passenger traffic compares as follows:

	Passengers carried— West.	East.	Total.	Passengers carried 1 m.
1860.	41,165	40,165	81,330	4,043,677
1866.	31,039	31,547	62,686	3,653,617
Dec..	10,026	8,618	18,644	390,060

Tonnage traffic compares as follows:

	Freight.	Coal.	Stone.	Belle Isle.	Expr.	Total.
1860.	86,919	32,346	7,389	9,889	150	136,693
1866.	32,917	25,918	....	6,927	2,359	68,121
Dec..	54,002	6,428	7,389	2,962	gain.	68,572

The number of tons carried one mile in 1860, was 7,130,742, and in 1866, 4,169,028.

These tables exhibit a large falling off in the business of the road as measured by number and quantity; but at the same time a very material increase in the fiscal results, indicating that the rates both of earnings and expenses has been largely increased, owing to general causes well understood. The receipts and expenses per mile run by all trains in the two years comparatively, show the changes in rates which have been effected, and are as follows:

Fiscal Years.	Receipts. per mile.	Expenses per mile.	Net earnings. per mile.
1860	$2.18	$1.08	$1.10
1866	2.80	1.42	1.38
Inc. 1866.	$0.62 (28.44 p.c.)	$0.34 (31.88 p.c.)	$0.28 (25.45 p.c.)

The financial condition of the company in 1860 and 1866, as exhibited on the balance sheets at the close of those years is exhibited comparatively in the following statement:

	1860.	1866.
Capital stock	$1,981,197	$2,000,000
State loan (34 years from April 8, 1853, to Sept. 30, 1854)	600,000	600,000
Guaranteed (Va.) bonds, due 1875 and 1876	200,000	200,000
Bonds extended (due 1863)	400,000	30,500
4th mort. b'ds reg., due '73		504,000
" " coup., due '75		322,000
Bonds for funding interest, due in 1869 to 1876	.....	61,000
Balance income account	538,849	2,149,438
Sundry accounts	38,430	54,084
Bills payable, &c., floating debt	73,608	729,308
Dividends unpaid	.....	7,984
Interest due on bonds	.....	79,547
Annuity due on State loan.	.....	84,000
Total capital and liabilities.	$3,845,084	$6,821,861
Against which are charged as follows, viz:		
Cost of property	$3,726,038	$4,917,500
Redemption fund on $600,000	38,909	74,909
Delinquent subscriptions	.....	18,703
Stock in Piedmont Railroad	.....	1,488,500
Balance due by ditto	.....	202,576
Sundry accounts	22,460	67,666
Cash in banks	57,677	52,007
Total property and assets.	$3,845,084	$6,821,861

This presents a very favorable condition, and a great improvement over the showing of 1860. After deducting stocks and bonds the total liabilities including $2,149,438 surplus of income, amount to $3,104,861

The assets after deducting $4,917,500 cost of road amount to 2,904,361

Leaving beyond this the value of Piedmont R. R. stock, &c., $1,691,076 to credit of the account $200,500

The immediate liabilities of the company amount to $954,923, (four last items in above account,) and the available assets, comprising the cash on hand and sundry accounts, amounting together to $119,673, leaving to be provided for, $835,250. To meet this debt the company are authorized to issue $500,000 in 10 years bonds, but hitherto have not been able to negotiate the same. The earnings, however, are increasing and much is hoped for from this source, and will probably be realized, so far as to relieve the company from their most pressing creditors. Most of this debt has been contracted for the purposes of reconstruction in Virginia and North Carolina.

Though considered as a leased road, the Piedmont Railroad is actually the property of the Danville Company, the latter owning 99-100th of the stock thereof, which in the aggregate is $1,500,000. It has but recently come into their possession. In April, 1865, it was seized by the U.S. Treasury authorities as Confederate property, and therefore confiscable; and was held and used for Government purposes until October 18, when after a full investigation it was ordered to be given over to the proprietors, and was finally restored on the 9th of December. On the 15th December, 1865, the Legislature of Virginia passed an act authorizing a change of gauge, and on the 1st February, 1866, the Legislature of North Carolina passed an act to the same effect. This change was made in four days, and on the 14th February, trains passed from Richmond through to Greensboro' without hindrance or detention. On the 15th February, 1866, the Legislature of Virginia passed an act authorizing the lease of the

Piedmont Railroad by the Richmond and Danville Company, and on the same day such lease at a fixed rent of $75,000 per annum was entered into by agreement between the respective boards of the two companies. At Greensboro', where the Piedmont Railroad connects with the North Carolina Railroad, a convenient joint depot has been erected.

A full history of the Richmond and Danville Railroad will be found in the JOURNAL for 1861, (issue of August 10,) p. 570. From this we abstract the following figures showing the progress of the company since the close of 1850, when the first section of the road was completed.

Sept. 30th.	Stock paid in.	Funded Debt.	Float'g Debt.	Total Capital.	Cost of Property.	Miles of road.
1851	$1,195,861	$140,000	$88,593	$1,424,454	$1,404,538	29.7
1852	1,372,325	200,000	246,795	1,819,120	1,806,966	67.7
1853	1,735,539	400,000	92,646	2,228,185	2,197,813	75.7
1854	1,883,579	812,500	112,943	2,809,021	2,858,711	92.7
1855	1,969,429	1,150,300	124,481	3,244,210	3,259,597	129.7
1856	1,975,000	1,200,000	78,263	3,253,263	3,449,467	143.2
1857	1,977,399	1,200,000	29,908	3,207,307	3,487,685	143.2
1858	1,980,997	1,200,000	25,154	3,206,151	3,588,653	143.2
1859	1,980,997	1,200,000	40,058	3,221,055	3,656,668	143.2
1860	1,981,197	1,200,000	73,608	3,254,805	3,726,037	143.2
	(Accounts in Confederate currency.)					
1866	2,000,000	1,717,500	729,308	757,292	4,917,500	142.0

The earnings account for the same years showed the following results:

Fiscal Years.	Gross Earnings.	Operating Expenses.	Net Profits.
1851	$19,954	$14,685	$5,269
1852	81,325	48,488	32,837
1853	164,965	96,416	68,549
1854	225,294	156,649	68,645
1855	316,309	170,282	146,027
1656	421,763	206,951	215,012
1857	461,918	206,382	255,536
1858	491,674	224,481	267,193
1859	554,203	261,215	292,988
1860	560,204	278,576	282,328
	(Accounts in Confederate currency.)		
1866	672,714	341,185	331,529

The following are the officers for the year 1866–'67:

President.—A. S. BUFORD.

W. T. SUTHERLIN, A. Y. STOKES and A. F. HARVEY, Directors appointed by Board of Public Works.

WOOD BOULDIN and J. R. EDMUNDS, Directors elected by the stockholders.

Superintendent.—THOMAS DODAMEAD.

Auditor.—JOHN D. BLAIR.

Treasurer.—E. A. BARBER.

East Indian Railway.

The annual meeting of this company was held in London on the 2d of July. The Report of the Directors states that they addressed a strong remonstrance respecting the delay in the construction of the works on the Chord line to the contractors, who had assured them that nothing should be wanting on their part to prevent any further complaint as to the progress of the works. The doubling of the line between Khanoo Junction and Seeterampore, and between Luckieserai and Allahabad, had been commenced. A considerable portion of the permanent way materials for the Chord line and for the doubling was in course of shipment. The Jubbulpore line was completed so far as to admit of arrangements for its being opened for traffic on the 1st of June. The board thought that some time must elapse before the line on the Bombay side could be brought into connection with Jubbulpore. The Great Indian Peninsula Railway connected Bombay with Nagpore, between which and Jubbulpore there was a good public road, and if sufficient means of communication by dak or coach should be found practicable by the company's agents there was no reason why passengers should not book through to Calcutta or Delhi, or any station between those two cities and *vice versa, via* Bombay. The locomotives and rolling stock were in good order. The permanent way and works had been thoroughly well maintained, partly by contract and partly by the company's own officers, at a cost of 8.11d. per train mile. The working expenses for the half year ended the 31st January last, were 47.85 per cent., against 47.01 per cent. in the corresponding half year. The working expenses for the year 1866, were 44.34 per cent., against 44.65 per cent. in the year 1865. The total number of passengers carried during the year 1866, was 4,078,081, against 4,249,618 in 1865. The tonnage in goods and minerals for the year 1866, was 802,043 tons, against 752,041 tons in 1865. The gross earnings for the year 1866, were £2,011,090, against £1,678,944 for the year 1865, showing an increase of £332,146. The gross earnings for the half year ended the 31st of December last, were £945,766, against £855,135 in the corresponding half of 1865, showing an increase of £90,631. The net earnings for the half year, were £493,097, against £454,667 in the same half of 1865, showing an increase of £38,430. The net earnings since the opening of the line had been as follows: from the 15th of August, 1854, to the 31st of December, 1862, £1,122,426; for the year 1863, £439,964; for the year 1864, £625,895; for the year 1865, £928,751; and for the year 1866, £1,119,315—total, £4,236,351. The result of the year's working was satisfactory, as, notwithstanding a considerable falling off in passenger traffic arising from the general distress, the net earnings were £190,564 in excess of those of the previous year, over the same mileage. The passenger traffic during the current half year had recovered itself, and at the date of last advices showed an excess over the same period last year. The traffic receipts for the first 23 weeks of the current half year ended the 30th of May, including interest on balances, amounted to £1,094,785, against £979,148 for the corresponding period of 1866, showing an increase of £115,637. The board had entered into contracts to make up the rolling stock to a traffic equal to £60 per mile per week, which would require an expenditure of about £300,000. The board had issued since the last meeting £1,000,000 of share capital, and at an early date they intended to raise a further sum of £1,000,000 either in shares or debentures. They considered that this sum, with other amounts yet to be called up on the L shares, would render it unnecessary to issue more capital until next year. The capital account showed that £26,001,342 had been expended. The interest account showed that a total of £9,092,917 had been received from the Government, and that £4,186,818 of it had been repaid from revenue.

Finances of New Jersey.

New Jersey at length has a debt of sufficient magnitude and importance to command notice in the columns of financial newspapers. Still she is far behind, according to wealth and population, that of almost any other State in the Union. As compared with New York, which is the largest State in the Union, and considered the wealthiest, New Jersey compares most favorably. The latter State, by the census of 1865, had 773,000 inhabitants; and New York, whose census was taken the same year, had 3,831,777. That is to say, New York had nearly five times more people than New Jersey. But New York has about sixteen times as great a State debt as New Jersey—owing over $50,000,000, and New Jersey only $3,395,200. Thus, though small, our little neighbor can, with some right, retort the sneers sometimes indulged by her big neighbors. The present debt commenced in 1861, when $1,789,900 was raised under an act authorizing a loan at 6 per cent. of not exceeding $2,000,000, for war purposes, redeemable at about $100,000 annually up to 1884. By a supplementary act, passed in 1863, a loan of $100,000 more was authorized for the same purpose, at the same rate of interest, payable about one hundred thousand dollars annually, beginning in 1886, up to 1896. Under this act certificates in the amount of 1,002,900 were issued. By a further supplement in 1864, a sum, including $4,000,000 was authorized for the same purpose, at a rate of interest not exceeding 6 per cent. A preamble to this act stated that $4,000,000 had been heretofore appropriated for paying the expenses incident to the suppression of the rebellion; but that not more than $3,000,000 had been borrowed, leaving authority to borrow $1,000,000 more; and since the State was indebted more than $600,000 for expenses incident to said suppression, this act provided that the Governor and Treasurer might borrow the sum of $1,000,000. The outstanding issues under these two laws, at the close of the fiscal year, amounted to $593,400, payable with six per cent., semi-annually, $199,400 January 1, 1867; $200,000 January, 1888; $123,000 January, 1889, and $79,000 in 1902. Thus of the $4,000,000 authorized only $3,395,200 have been issued. The first law passed upon this subject (that of 1861) provided that no more than $100,000 thereof of principal money should be made payable in any one year. The same provision was found in the supplementary act of 1863, except that in the latter it is enacted that no part of the principal should be paid before 1886, and the further supplement of 1864 declares that not more than $200,000 of the principal authorized by its provisions should be made payable in any one year, and no part thereof before 1897. It follows, therefore, that these bonds, which compose the evidences of the State debt, are payable in instalments, and at different times between the year 1865 and the year 1902. The three first instalments of the principal (those of Jan. 1, 1865–'66–'67,) have been already paid from the sinking fund, the chief resource of which is the proceeds of a general tax of $280,000 a year on the property within the State. Beside this amount of debt created directly by State authority to prosecute the war, there was raised by the several counties for the payment of bounties and indebtedness in connection therewith, $23,448,988, being a *per capita* charge on a population of 772,700 of $30 31. This total represents the moneys absolutely contributed by the several towns, counties, &c., for the purposes of war, which added to the funded State debt of $3,395,200, shows the entire contributions of New Jersey for the purposes mentioned. This is $34 70 *per capita*, or reckoning five persons to a family as the average, would make $173 50 to each head of a family. The interest on this amount, at 6 per cent., is $1,610 591 28-100 a year, or $2 08 *per capita*. The total valuation of the State is $467,918,324. The State debt, in relation to this valuation, is as 72c. to every $100, and the local debt as $5.01 to every $100, or together, $5.73 for every $100. Previous to the war New Jersey had no funded debt, and a greater part of the time levied no State tax, the necessary amount for State purposes being realized from the State's interest in the public improvements, and in consideration of privileges granted to the Joint Companies. These privileges continue to 1869, when, if not extended, the taxpayers of the State will first appreciate the burden of its present volume of debt.—*Phila. Ledger.*

☞ The Canal and Claiborne Streets Railroad Company, New Orleans, have elected a Board of Directors with C. A. Labuzan, Esq., as President. The present capital stock of the company has been fixed at $600,000, with power to increase it to $1,000,000.

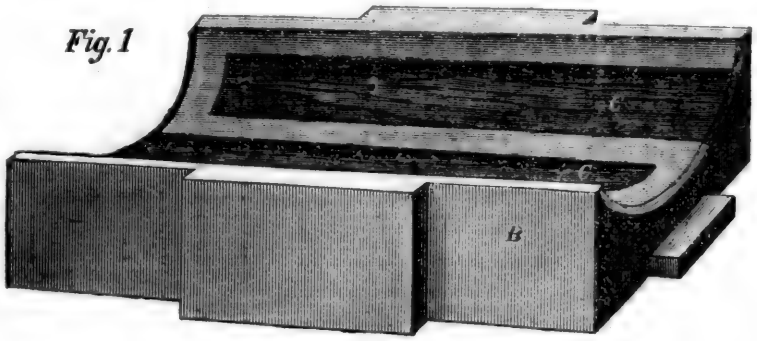
Devlan's Patent Boxes for Axles and Journals.

An economical and efficient journal-box is of some importance, not only to the railroad interest but to the manufacturer, the machinist, and even in the mowing and other machines as used in the agricultural portion of the community. In Fig. 1 we represent the bearing-piece of a railroad axle-box, illustrating a new mode of forming bearings, which is also applicable to journal-boxes. B is a brass shell, having its interior formed with longitudinal dovetailed grooves, which extend nearly the entire length of the bearing, but opening at the ends in reverse order. These recesses are filled with strips of wood saturated with oil, kerosene, or some similar lubricating substance. These strips are shown at C, C, in the cut. They are inserted in the dovetailed recesses by driving them into the open

Fig. 1



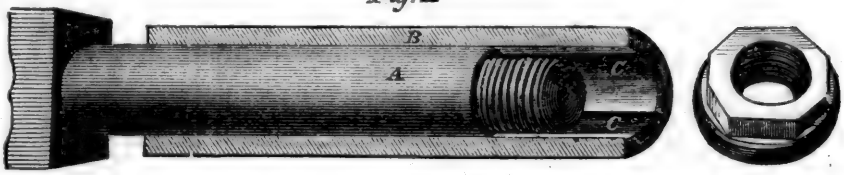


Fig. 2

ends thereof, and their other ends are left slightly projecting so that the shoulders of the shaft will find an intermittent wooden bearing similar to that of the journal when subject to an end thrust.

In Fig. 2 is shown a wagon axle-box constructed in the same manner as the bearing shown in Fig. 1, except that the wooden strips extend the whole length. A is the axle, and B the axle-box, the nut being removed from the end of the axle, which is partly withdrawn from the box, showing the wooden strips, C, C, which serve the same purpose as in the railroad axle-box as described. It will be observed that these strips alternate with the metal in the box, and the projecting ends serve to lubricate the nut and shoulder of the axle.

As the end presentation of the wooden strips, or lining, alternate in their bearings against the shoulder of the journal or axle, a firm end support or resistance is met by the wood being firmly pressed against the closed end of the recess in which it is inserted, and no force or end thrust of the axle-shoulder can drive them from their position.

The form of the Box, and the application or combination of Wood with Metal for Journal Boxes, was patented by P. S. Devlan, of Jersey City, July 9th, 1867, and has been purchased by the American Journal and Axle Box Company of New York, they have been introduced and thoroughly tested on many of the best Railroads in this country, and are found to wear as one to three of the best Brass or Composition Boxes used, and saves at least one-half the oil, and entirely does away with that great annoyance to Railroad Companies, the heating of Journals.

The Box can be seen at the Company's office, 23 Liberty Street, New York.

Patent Coupling for Railroad Cars.

Mr. D. S. Wood, proprietor of the Mallable Iron Works in Westerlo street, Albany, has invented a new coupling for railroad cars, which, as the inventor claims, must, when once introduced, commend itself to all interested in railroad management. The principle involved consists chiefly in the simple and natural manner in which the coupling is effected, and that the connection once made it is impossible to break it while the cars remain on the track. He has associated Messrs. John A. Goewey, F. N. Sill and D. W. Herrick with him in the manufacture and sale of the article.

Distances between San Francisco and New York.

We give below a table of distances, and elevation of points, on the Central Pacific and Union Pacific Railroads and other railroads connecting therewith, between San Francisco and New York. It will be seen that the distance, by way of Chicago, is three thousand three hundred miles. If a train should run at the rate of twenty miles per hour, including stoppages—which is, perhaps, the average rate on railroads in this country—it would require a little less than seven days to accomplish the distance. As for grades, the traveler will ascend from the level of tide-water at New York or San Francisco, to a height of eight thousand two hundred and forty-two feet, or over a mile and a half, at Evans's Pass.

American Railroad Journal.

Saturday, August 31, 1867.

Stock Exchange and Money Market.

Money has been quite plenty on call, all through the week, despite the adverse changes in the bank averages. Rates to the street borrowers have worked smoothly at 3@4 per cent. on the public funds, and 4@5 per cent. on other prime stock collaterals. At these rates, the demand has not been equal to the absorption of the available supply, especially in private channels. The remittances of currency to the West, which were rather liberal last week, have been light thus far this week. Discounts have been more active, in the line of prime jobbing and commission paper, which has been quite freely taken at 6@7 per cent. per annum. There has been only a moderate amount of produce paper offered, thus far. All of it that was up to the acceptable grades found a prompt market at the ruling figures. The Government office has been doing a heavy business, in the way of redeeming matured compound interest notes, and converting matured Seven-Thirties. The city banks, last week, lost $4,513,763 legal tenders, and $5,302,490 of deposits. They reduced their loans, $2,584,734. Their specie reserve was augmented $107,978; and their circulation, $66,492. The specie reserve of the banks is now $6,028,535, against $6,884,077 same time last year. The city bank deposits are now $188,744,101, against $218,119,450 week ending Aug. 28, 1866. The legal tender reserve amounts to $64,960,030, against $86,283,483 same time last year. The circulation now stands at $33,736,249, against $27,958,464 same time last year. The loans are now $250,697,679, against $265,901,065 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $70,249,439 a day, against a daily average of $69,048,253 the preceding week, and $83,311,344 the week ending with Aug. 10. The current week's exchanges average about $70,274,000 a day.

National Bank notes to the amount of $75,000 were issued last week, making the total issue to 1,671 banks thus far, $302,726,476, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,683,115, leaving, with the existing 1,650 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $299,043,361. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,664,500; and for the public deposits, $38,537,950—making a total of $379,202,450. The Treasury Department last week redeemed and destroyed $392,100 of worn and mutilated fractional currency, and issued $554,491 of new.

The U. S. Sub-Treasury receipts, week ending with Aug. 24, were $27,640,500, including $2,992,123 from customs duties; payments, $28,475,461; balance at the close of the week, $134,449,201, against $135,284,162, at the close of the preceding week, showing a decrease of $834,961. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $5,667,874 including $426,749 from customs, and payments, $6,147,818; on Tuesday, receipts, $2,366,286 including $601,783 from customs, payments, $5,995,548. The balance at the close of business on Tuesday stood at $130,338,000, against $136,917,139 a week previous.

The Philadelphia Bank movement the past week shows a decrease in loans, of $150,359; a decrease of $3,156 in specie; an increase in legal tenders of $1,115,670; an increase of $94,544 in deposits; and a decrease of $286 in circulation. The Bank Clearings show a decrease of $1,416,551, and the balances, an increase of $571,990.

The Government revenues, last week were liberal in the Customs, but light in the excise lines. The excises, last week, yielded $2,878,739, against $3,264,910 the preceding week; customs at the port of New York $2,992,123, and at the outports, about $900,000 (in coin) more, making the grand total income for the week equal about $8,521,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,858,-

195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $40,000,000.

Gold has been decidedly more active, since our last, under the Washington advices, relative to Cabinet arrangements, and military affairs. The speculative demand has been more animated, while the Customs inquiry has been full. There has been very little call for coin for shipment. The extremes of the week have been 140⅝@142⅜, and the closing price on Wednesday was 142. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,324,490. The customs demand for Gold last week, averaged $498,687 a day; thus far, this week, it has been equal to $525,000 a day, or equal to a weekly aggregate of $3,150,000. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $18,663, and from California, none. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $80,062,915, against $89,603,966 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $19,939,520, against $27,375,321 same time last year, showing a decrease this year, of $7,435,801. The exports of specie from this port, last week, were $595,533. The total outflow of specie from the port, since Jan. 1, 1867, has been $40,872,171, against $52,-882,448 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $134,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $39,617,199, against $29,136,479 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to July 13, reached $23,281,424, against $25,051,327 same time last year, showing a decrease, in 1867, of $1,769,903.

Foreign exchange has been less active, owing to the firmer prices claimed for the best sterling drafts. The market closed tamely and heavily on Wednesday. Bankers' 60 day bills on London closed at 109½@109⅞, and on Paris to 5.18¾@5.15; sight bills on London to 109⅞@110⅜; and on Paris to 5.15@5.13⅛. The offerings of produce bills have been up to the average this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,994,242, making the total value of exports since Jan. 1, 1867, $122,-420,131, against $130,230,213 same time in the preceding year.

Government securities have been in moderate demand, for home and foreign investment purposes; but the available supplies, though not very heavy, have been in excess of the requirements of the market, and prices have again yielded a little. U. S. sixes of 1881 closed here on Wednesday at 110⅞@111; U. S. Five-twenties of 1862, 113⅛@113¼; U. S. Five-twenties of 1864 at 109¼@109⅜; U. S. Five-twenties of 1865 at 110⅜@110½; U. S. Five-twenties of 1865, consolidated, 107⅞@108; U. S. Five-twenties of 1867, 107⅞@108⅛; U. S. Ten-forties at 102⅜@102½, and U. S. Seven-thirties at 107@107¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

October, 1864	118⅞	August, 1865	116
December, 1864	117⅞	September, 1865	115½
May, 1865	117⅛	October, 1865	115

Railway and miscellaneous stocks have been in less request, on speculative account, and have been depressed, though variable in price. At the close, the market seemed steadier, under a partial revival of the speculative call, stimulated by the undiminished ease in money.

Business in the produce and merchandise lines has been on the increase. Breadstuffs and provisions have been quoted lower. Cotton has been dull and heavy, closing with middling grades on Wednesday at 26½@28 cents per lb. as extremes. The stock of cotton now here is estimated at about 60,000 bales. The receipts at the port this week, have averaged about 1,300 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 655,000 bales, against exports of 469,555 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,861,000 bales, against 2,057,685 bales same time last year; exports, 1,568,000 bales, against 1,531,175 bales same time last year; estimated stock at latest dates, 105,000 bales, against 382,031 bales same time last year. Beeves have been plenty and in less demand this week, at from 11@16c. per lb.; receipts, 6,994. Sheep at 4½@6½c., and lambs at 6@8c. per lb.; receipts, 30,362. Swine at 6@7¾c. per lb., all live weight; receipts, 26,648. At the auction sale of Scranton coal, on Wednesday, 75,000 tons were disposed of at from $3.75@$4.45 per ton of 2,240 lbs., delivered at Elizabethport, N. J. Foreign goods have been more called for, and desirable articles have been more stiffly held. The total imports of foreign dry goods, last week, were $2,-318,692, and the total amount marketed $3,745,-971. The value of foreign merchandise imported last week, was $1,957,902—making the grand total specie value of last week's imports of dry goods and merchandise, $4,276,594, and since Jan. 1, 1867, $164,815,468, against $198,574,837 same time in the preceding fiscal year. The ocean freight market has been more active; but rates have been unsettled with 526 vessels of all classes in port. For Liverpool we quote flour at 1s. 4½d.@1s. 6d. per bbl.; grain at 2¾@3¼d. per bushel; cotton at ⅛d. per lb.; and heavy goods at 12s. 6d.@20s. per ton, all by sailing vessel.

The New York exports, exclusive of specie, for the week ending Aug. 27, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,728,813	$2,994,242
Prev. reported	127,501,500	119,425,889
Since January 1	$130,230,213	$122,420,131

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,071,161	$2,318,692
Gen. merchandise	2,193,303	1,957,902
Total for the week	$4,264,464	$4,276,594
Previously reported	194,310,373	160,538,874
Since January 1	$193,574,837	$164,815,468

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 14.	Aug. 21.	Aug. 28.
Consols	94 13/16	94 9/16	94¾
U. S. 5-20's of 1862	74	73½	73⅜
U. S. 5-20's of 1865	72½	72	71⅞
Erie	46	45	45½
Ill. Central	78	77¾	77¼

The balance in the Sub-Treasury on Wednesday was $127,684,120.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

A Texas Pacific Railroad.

Judge Paschall, of Texas, has addressed a communication to the Galveston *News* upon the subject of a railroad enterprise in which not only Texas but the whole country is interested. The project to which he alludes is that of a railroad from a point on the Rio Grande between El Paso and El Presido, to Guyamas, a port on the lower end of the eastern coast of the Gulf of California. East of the Rio Grande there are likely to be several feeders for this route. One is the Southwest Pacific Railroad in Missouri, which is to be built in a southwesterly direction through Arkansas. Either in Arkansas or Texas its line will cross that of the "Memphis, El Paso and Guyamas" road, which is to run through Little Rock, in Arkansas, and Monroe, in the northwest corner of Louisiana, to Jefferson, in Texas, which is reached by river navigation from New Orleans. It is expected that a line from the latter place will meet this road at Jefferson, or further west.

These three lines will thus converge and unite through the greater part of Texas. One route may diverge to San Diego, in California, and another to Guyamas. In addition to the great "feeders" we have mentioned, it is likely that before many years the projected road from Lawrence, Kansas, to Galveston, will be built. Whether Guyamas or San Diego, or both, be selected as the western terminus of the Southwestern Pacific Railway, the route is one which has many and manifest advantages.

It is the opinion of many of those who are acquainted with the proposed line across Mexico, and with that to San Diego, that the former is decidedly the better of the two. We are told, on good authority, that the route across Mexico presents few engineering difficulties, and passes through a region abounding in wood and water, while the inhabitants are friendly and peaceable. Guyamas is one of the best ports on the western coast, spacious, and with water enough to float the largest ships.

☞ The grading of the section of the Albany and Susquehanna Railroad within the limits of the city of Binghamton, was commenced by the contractors on the 20th inst., and is now being pushed with vigor.

☞ The total net profit of the Philadelphia and Reading Railroad Company for the six months ending May 31, 1867, were $990,125, against $1,696,911 in the corresponding period of 1866—a decrease of $706,786.

☞ The Jackson County *Banner* says that work will soon be commenced on the Tomah and St. Croix Railroad at Black River Falls, and the work pushed toward Tomah.

☞ The Pennsylvania Railroad Company have purchased an interest in the Farmers' Railroad, running from Oil City, of which Edward F. Gay, Esq., has been chosen President.

La Crosse, Viroqua & Mineral Point R. R.

At the regular stockholder's meeting in La Crosse on the 7th inst., the following gentlemen were elected directors of the above named company: T. B. Stoddard, C. G. Wykoff, C. K. Lord, D. B. Priest, Wm. H. Officer, J. M. Levy, L. C. McKenney, Harvey T. Rumsey, Geo. W. Cobb, L. Beecher, C. Michel, J. W. Losey, H. E. Hubbard.

It is expected that meetings of the La Crosse and Prairie du Chien Railroad Company, and of the La Crosse, Viroqua, and Richland Center Railroad Company will take place within a short time, and that some joint action among the three companies will be had. The object is to secure the formation of a company which will go to work, and, with the aid which may be voted along the line of the route, push forward the building of the road.

We are waiting patiently for the engineer's report of the survey recently made through the county, but have as yet seen nothing of it. We shall lay the report before our readers as soon as we get it.—*Vernon County Censor.*

Whitehall and Plattsburgh Railroad.

The Plattsburgh *Republican* says that at a recent meeting of the Directors of this company, the road was located from Plattsburgh south—and from Plattsburgh, *via* Peru Village, Coxsackie, to New Sweden at Green's Crossing.

The Board also authorized the respective local Directors in Essex and Clinton Counties to put the road under contract at once.

The determination is to build the road from Plattsburgh south as soon as possible, and we may expect to see the work from Plattsburgh to the Ausable River under contract in a few days.

In Essex County the work is to be pushed forward between Ticonderoga and Fort Henry.

Cameron and Kansas Railroad.

This road, now under construction, will be about 46 miles in length. It will connect with the Hannibal and St. Joseph Railroad at Cameron, 35 miles east of St. Joseph, and through that road with the Chicago, Burlington and Quincy, and the Toledo, Wabash and Western roads. Track laying is now going on at a rate which will insure its completion by the 20th of November next.

☞ Applications are to be made to the next Vermont Legislature for a road from St. Johnsbury or West Danville down the Lamoille Valley, to connect with the Vermont Central; for another, commencing at the eastern line of the State at Bennington or Shaftsbury, and running easterly through those towns to the west line of Woodford: and for still another, from Lake Champlain in the town of Shoreham or Orwell to some point in West Haven or Fall Haven, by way of Benson.

☞ The Elizabethtown and Paducah R.R. Co. has been organized by the election of a President and Board of Directors. This road will be about 140 miles in length, extending from Paducah, Ky., to Elizabethtown, a point on the Louisville and Nashville Railroad, 42 miles from Louisville. Geo. McLeod, Esq., Chief Engineer of the Louisville and Nashville Railroad, has been placed in charge of the surveys.

☞ The Branch Railroad which is to connect the Philadelphia and Reading Railroad, near Port Clinton, with the East Pennsylvania Railroad, near Topton, has been commenced, and the whole line is now under contract.

Railroad Earnings.—Weekly.

The earnings of the Chicago and Northwestern Railroad for 3d week in Aug., 1867 .. $226,275 00
Corresponding week previous year .. 171,095 00

Increase $55,180 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Aug. 1867, were $97,730 00
Corresponding week of 1866 .... 84,043 00

Increase $13,687 00

The earnings of the Detroit and Milwaukee Railroad for the week ending August 22, 1867, were $37,520 00
Corresponding week of 1866.... .... 32,955 00

Increase.... $4,565 00

The earnings of the Western Union Railroad for the 3d week in Aug, 1867.... $17,177 49
Corresponding week previous year.... 11,395 95

Increase.... $5,781 54

The earnings of the Marietta and Cincinnati Railroad the 3d week in Aug., 1867... $24,990 00
Corresponding week previous year.... 24,187 00

Increase $803 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in Aug., 1867, were $125,200 00
Corresponding week of previous year.. 102,951 00

Increase.... $22,249 00

The earnings of the Atlantic and Great Western Railroad for the third week in Aug., 1867, were $119,016 00
Corresponding week previous year... 131,088 00

Decrease.... $12,072 00

The earnings of the Michigan Central Railroad for the 3d week in Aug., 1867, were. $94,630 19
Corresponding week of previous year.. 78,741 98

Increase $15,888 21

Alabama and Florida Railroad.

This company has sought a solution of its difficulties, in consequence of which it seems impossible to complete or rebuild the connection between Pensacola and Pollard, on the Alabama line, by filing a petition alleging their Bankruptcy, and asking the appointment of an assignee to receive the assets and make disposition to them by sale. The city of Pensacola, which owns a majority of the stock, is represented by J. Dennis Wolf, Esq. As we understand the matter, the stockholders, on the 14th of June, ordered the institution of proceedings in Bankruptcy, it being evident that no solution could in any other way be reached. The first mortgage bondholders, seeing the crisis, through the then President, Mr. Bushnell, appeared before the Board and publicly promised that if proceedings in Bankruptcy were delayed, that proceedings in chancery for foreclosure should at once be instituted, and that a decree and order for immediate sale would be made at the June term of the Circuit Court then near its sitting.

The Court passed and the pledge was not redeemed, the bondholders refusing to take the decree as agreed upon by Bushnell, who was appointed receiver, and as such took charge of the road.

The then Board of Directors refused to carry forward the proceedings in bankruptcy. A meeting of Stockholders was called, the President and Directors adverse to the policy of bankruptcy either resigned or were removed, and the necessary steps were at once taken to file the petition in bankruptcy, and force a solution of the complication arising from the contest between the First and Second Mortgage Bondholders.

Mr. Wolf is now here representing the corporation and for the purpose of securing the necessary warrants and orders for a meeting of the creditors, the appointment of an assignee, and the speedy sale of the road and the perishable property. Parties stand ready to purchase. The purchaser under the Bankrupt act takes a perfect title and can become the owner of the entire franchise. The proceeds of the sale are paid into the registry of the court, subject to the showing that may be made by the First and Second Mortgage Bondholders as to their respective interests in the fund.

This is simple, just and straightforward, and if successful, will relieve that section of the State of a burden that has become insupportable, and will end in again uniting it with the outside world from which rival interests have too long separated it.—*Tallahassee Floridian.*

Portland, Saco and Portsmouth Railroad.

The earnings and expenses of this road for the fiscal year ending May 31, 1866 and 1867, have been as follows:

Earnings:	1866.	1867.
From passengers	$306,437 94	$320,888 11
" freight	169,513 74	189,184 38

Sundry accounts		17,935 25
Estimated increase of surplus May, 1867		5,911 57
Total, as above		$317,370 27

The repairs for the past year consist mainly in having laid down twenty thousand new sleepers, and about three hundred thousand tons of new or re-rolled iron, by which the track has been kept in complete order.

About twelve thousand sleepers and four hundred tons of iron, contracts for which have been made and a portion delivered, are estimated as the requirements for the coming year, to keep up the track. The report says:

The requisite amount of filling upon the flats at the depot grounds in Portland, near the harbor commissioner's line, was finished the past season, enabling us to build a new turn-table, with a substantial wooden building to cover it; and to put up three additional temporary sheds for the engines, by which they have all been housed the past winter.

An addition to the pile wharf of 18,034 square feet, with a new drop, has been made the present Spring—and the old wall, which was built some years ago, has been carried out to the immediate rear of the new wharf, giving one of the best, if not the best, water front in the city, and when the filling of the remainder of the flats is completed, the ground then made will afford every facility for first class depot accommodations, with yard room sufficient for the large freight business, for which we now have no adequate conveniences.

In our last report, we spoke of the contemplated erection of an engine house, machine and carpenters' shops with other necessary buildings, on the land owned by the company, near the westerly end of the Portland bridge. During the last summer considerable filling of flats was done at that point, and a substantial sea wall, necessary for protection of the same, was commenced upon a line established by the harbor Commissioners, which when completed will give us a very valuable lot in close proximity to the city property.

The great and terrible fire of July last, however, coming at a time when we were just preparing to commence these buildings, had such an effect on the price of materials and labor, and the demands for the same for purposes of shelter for an almost homeless and houseless city, were so much more pressing than our own, as to determine us at once, to defer work upon these buildings until another year, and by using the sheds before spoken of, we have gone through the winter with as little inconvenience as the circumstances admitted.

Our own direct loss by the fire was comparatively small, consisting of patterns at the foundry of the Messrs. Staples, amounting to between four and five thousand dollars.

We believe our business on the whole has not been injuriously affected. For a time, large numbers of people, from near and distant points, visited the scene of desolation, taxing the capacity of our trains to provide for them; and the business of re-building has, since the conflagration, been so active in the city, as to keep our rolling stock in great demand in transporting materials, &c.

Desiring to do all in our power to aid in every practicable way, and the calls for laborers being pressing, we put a train upon the road soon after the fire, from Biddeford and Saco, expressly to accommodate mechanics and laborers, giving them convenient hours to a day's work in the city, and return to their homes at night. This train has carried a large number of workmen during the time, very much to their convenience, and we have thereby materially assisted in building up the waste places.

Work upon the sea wall and filling has been recommenced, and arrangements are in progress to proceed with the buildings at once. The work of filling, in the city and at the point last spoken of, took the service of a gravel train nearly the whole season, and but little gravelling was done to the road bed.

Considerable additions to side tracks have been made at Kennebunk, Wells and at North Berwick.

No marked improvements have been made at any of the depots on the line, and they have been maintained in about the same condition as reported last year.

Work was commenced at the Mousam River arches, at as early a day last season as the state of the water would permit, and continued until the cold weather rendered laying of stone in cement impracticable. By it, the structure has

been preserved and made safe, and operations are now being resumed there; and it is our design to complete one end at least, the present year. The new work is of substantial and excellent quality.

One new engine, called the "Mousam," from the Portland company's works, and thirteen new box freight cars, have been added to the rolling stock, which has all been kept in a state of efficiency.

More than usual repairs have been made upon the engines. Three have been entirely rebuilt, making them in all essential respects equal to new. And the remainder have had repairs from time to time as they were needed.

The operations of the road have been kept up uninterruptedly the past year, with peculiar freedom from accidents or delays. The great snow storms of January last being the only exception. No accidents occurred in getting our trains through even then, but as on most of the New England roads, some trips were necessarily omitted.

Number of miles run, 227,894; expenses per mile, $1.27. Average receipts per mile, $1.93. Per cent. of expenses, 54½. Number of passengers carried, 372,836.

Union Pacific Railroad.

A letter to the Baltimore *Sun*, dated Fort Sedgwick, C. T., Aug. 18, 1867, says: By the 1st of November the road will be completed as far as Cheyenne City, Dakota Territory, distant about one hundred and twenty-five miles from this place, at the eastern base of the Rocky Mountains. The company are offering for sale lots in the town, which are being rapidly bought up for from $200 to $600 each, on speculation, as this town will be one of the most important depots on the line of the road. The company will erect here extensive machine shops, round houses, &c., and it will be the changing point for the running department, as at this point the road commences to ascend the mountains. It is also the point of intersection of the Denver Branch Railroad, (from which place it is distant one hundred and twelve miles,) the distributing point for Colorado mines, and the general depot for all posts on the Fort Laramie, Fort Reno and Montana roads; also the distributing point for all military posts north, west and south.

At the recent election in Denver City the vote in regard to the branch railroad bonds was most overwhelmingly in favor of their issue—1,091 "for," and 54 "against." The opinion of Denver on the railroad question is settled beyond all dispute.

Mont Cenis Tunnel & Mont Cenis Railway.

The French Imperial and the Italian Royal Commissioners had an official inspection of the works of the tunnel through Mont Cenis on the 24th and 25 of July. Of the total length of the 12,220 metres, equal to seven English miles and a half and 235 yards, there were excavated on the 31st of December last, 3,900 metres on the Italian or Bardeneche side of the mountain, and 2,435 metres on the Modane, or French side; total, 6,335 metres. Between the 1st of January and the 30th of June of the present year 774 metres were excavated, being the largest number by nearly 200 metres excavated in any one half year since the commencement of the works in 1857. Of the 774 metres, 415 are on the Italian and 318 on the French side, making the total excavated at that date 7,109 metres.

Ever since the commencement, the progress made on the French side has been slower than on the Italian—thus, while on the 30th of June last the latter had only to execute 1,754 metres, or about an English mile and a tenth to accomplish its half, on the French side there remained to be excavated 3,357 metres, or nearly two miles and a tenth. If three metres a day could be excavated on the French side, the perforation of the tunnel would be accomplished in three years and three weeks; but as in all probability it will not be proceeded with more rapidly than two metres a day, it will require four years and thirty-one weeks to complete it. The tunnel will be lined in its entire length with stone quarried in the immediate vicinity of the two entrances.

At the present time the excavations, or headings, are about 1,500 metres in advance of the amount lined. Each metre excavated and lined has hitherto cost, on an average, 11,000f., and various circumstances will tend to increase this expenditure as the works proceed further inwards. The approach on the French side, to connect its entrance at Modane with St. Michel (the present termination of the railway system of France in the direction of Mont Cenis,) will be twelve miles long, through an extremely difficult and mountainous country.

On the Italian side the amount of railway to be constructed from Bardeneche to connect it, in the neighborhood of Susa, with the railway system of Italy will be 22½ miles. The whole of these works will be of a very heavy and expensive character. They are now about to be let, and the time to be allowed by the contract for their completion is to be four years and a-half.

The length of the railway, *via* the tunnel from St. Michel to Susa, will be 42 miles, or 6½ miles shorter than that now nearly finished on the outside of Mont Cenis Pass, and known as the "Fell Railway," from its being constructed in accordance with the patent of the gentleman of that name. The only delay to the opening of this railway for traffic is the non-delivery of its rolling stock, but this difficulty will, it is expected, be overcome by the middle of September.

As regards transit through the tunnel, in consequence of the average gradient on the French half being one in 45½, and the steepest gradient on the line being one in 28, it will not be possible for a train to go through from the north to the south in less than from 38 to 40 minutes. Coming from the south to the north the ascent is much more gradual, but even in this the transit will occupy from 30 to 32 minutes as a *minimum*. It has yet to be seen whether passengers would not prefer the outside line instead of being shut up in a tunnel so long as we have stated. It is for this, among other reasons, that many persons expect the Fell Railway, which only possesses a concession for working until the tunnel line is opened for traffic, will have its privileges extended so as to make it practically a permanent concession.

California and Oregon Railroad.

The San Francisco *Bulletin* says that California capitalists are taking much interest in a proposed railroad from Marysville, in their State, to Portland, Oregon. The land grant given by Congress, of twelve thousand eight hundred acres a mile, is extremely liberal, while the route is feasible, not difficult, and through a rich agricultural country. The California corporators have begun a survey of their end of the line, which runs for its entire distance through the Sacramento Valley, over an unbroken plain. The valley is one of the most fertile regions of the State, the first forty-two miles being an almost unbroken succession of harvest fields.

It is estimated that the cost of the first eighty miles will be only twelve thousand dollars a mile. The *Bulletin* thinks that with good management this section of the road could be made one of the best railroad investments in the United States. The serious difficulties would be found further north.

Columbus and Indiana Railway.

The Columbus *Journal* says that a consolidation of the Columbus and Indianapolis Central with the Union and Logansport, and Toledo, Logansport and Burlington Railroad Companies, has been effected; the new company to be known as the "Columbus and Indiana Railway Company." The track from Columbus to Indianapolis continues as heretofore, and connects with the Southern and Western roads centering in Indianapolis. At a point, ten miles west of Piqua, a track diverges to the northwest, passing through Union City and Logansport, Ind., to the Illinois State line, and there connects with roads running west to Peoria and the Mississippi River. The whole length of the consolidated road will be 360½ miles, viz: Columbus and Indianapolis Central, 188 miles; Branch to Union City, Ind., 19½ miles; Union and Logansport, 92 miles; Toledo, Logansport and Burlington, 61 miles.

☞ Work upon the Camden (N. J.) Horse Railroad is to be commenced as soon as the organization is complete by the election of officers. The proposed route takes in the whole length of the corporate limits north and south, and places it within easy reaching distance east and west.

☞ A contract for the grading and masonry of 15 miles of the Portland and Rochester Railroad, extending from Rochester, N. H., to Alfred, Me., has been let, and surveys for the continuation of the route westward are in progress.

Inter-colonial Railway Act.

The following is a copy of the English act of the 12th of April, 1867, for authorizing a guarantee of interest on a loan to be raised by Canada towards the construction of a railway connecting Quebec and Halifax:

Whereas the construction of a railway connecting the port of Riviere du Loup, in the province of Quebec, with the line of railway leading from the city of Halifax, in the province of Nova Scotia, at or near the town of Truro, in a line, and on conditions approved by one of her Majesty's Principal Secretaries of State, would conduce to the welfare of Canada and promote the interest of the British empire:

And whereas it would greatly facilitate the construction of that railway (in this act referred to as the railway) if payment of interest on part of the money required to be raised for the same were guaranteed under the authority of Parliament:

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—Subject to the provisions of this act, the Commissioners of her Majesty's Treasury may guarantee, in such manner and form as they think fit, payment of interest at a rate not exceeding four per centum per annum on any principal money not exceeding the sum of three million pounds sterling, to be raised by way of loan by the government of Canada for the purpose of the construction of the railway; and the Commissioners of her Majesty's Treasury may from time to time cause to be issued out of the consolidated fund of the United Kingdom, or the growing produce thereof, any money required for giving effect to such guarantee.

The Commissioners of her Majesty's Treasury shall not give any guarantee under this act unless and until an act of the Parliament of Canada has been passed providing to the satisfaction of the Commissioners of her Majesty's Treasury as follows:

1. For the raising, appropriation and expenditure for the purpose of the construction of the railway of a loan not exceeding £3,000,000 sterling, bearing interest at a rate not exceeding four per centum per annum.

2. For charging the Consolidated Revenue Fund of Canada with the principal and interest of the loan immediately after the charges specifically made thereon by sections one hundred and three, one hundred and four and one hundred and five of the British North America act, 1867.

3. For the payment by the government of Canada by way of sinking fund of an annual sum at the rate of one per centum per annum on the entire amount of principal money whereon interest is guaranteed, to be remitted the Commissioners of her Majesty's Treasury by equal half-yearly payments in such manner as they from time to time direct, and to be invested and accumulated under their direction in the name of four trustees, nominated from time to time, two by the Commissioners of her Majesty's Treasury and two by the government of Canada, such sinking fund and its accumulations to be invested in securities of the provinces of Canada, Nova Scotia and New Brunswick, issued before the Union of Canada, or, at the option of the government of Canada, in such other securities as may be proposed by that government and approved by the Commissioners of her Majesty's Treasury, and to be applied under the direction of the Commissioners of her Majesty's Treasury in discharge of principal money whereon interest is guaranteed.

4. For charging the consolidated revenue fund of Canada with the amount of the sinking fund immediately after the principal and interest of the loan.

5. For charging the consolidated revenue fund of Canada with any sum issued out of the consolidated fund of the United Kingdom under this act with the interest thereon at the rate of five per cent. per annum, immediately after the sinking fund.

6. For continuance of the sinking fund until all principal and interest of the loan, and all sums issued out of the consolidated fund of the United Kingdom under this act, and all interest thereon, are fully discharged, or until the sinking fund and its accumulations are adequate to discharge so much thereof as remains undischarged.

7. For the raising by the government of Canada (without guarantee by the Commissioners of her Majesty's Treasury) of all such money (if any) beyond the sum of £3,000,000 sterling as, in the opinion of one of her Majesty's Principal Secretaries of State, will be requisite for the construction of the railway, and for charging the consolidated revenue fund of Canada with the money so raised and interest immediately after the charges made thereon in pursuance of the foregoing provisions of this section.

There shall be laid before both houses of Parliament, within fourteen days next after the beginning of every session, a statement and account showing what has been done from time to time in execution or pursuance of this act by us under the direction of the Commissioners of her Majesty's Treasury and one of her Majesty's Principal Secretaries of State and the Parliament and government of Canada.

This act may be cited as the Canada Railway Loan act, 1867.

Fonda, Johnstown & Gloversville Railroad.

We learn from the Gloversville *Standard* that this road is rapidly being pushed forward to completion. Aside from the convenience and profit to the locality through which the road will for the immediate future run, it is claimed that it ought to be the opening wedge to a line of communication to Lake Ontario and the St. Lawrence river. The *Standard* claims that this is the natural outlet for all that vast region lying north of it, which is now so little peopled, but which is so affluent in mineral resources, in water power and lumber.

—o—

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21st, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

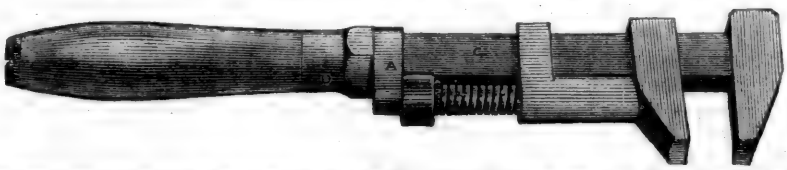
Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

MEAD RUBBER COMPANY,

12 Vesey Street, New York.

MANUFACTURERS OF



INDIA RUBBER CAR SPRINGS AND STEAM PACKING.

Our Works being now under the management of a competent Superintendent, we are prepared to offer Springs of various qualities and prices to suit. Our A No. 1 Spring made of fine Para Rubber, and the Compound used by the Patentee, the late Fowler M. Ray, will be found to be cheaper than others made, from inferior stock and offered at lower prices.

Sample setts forwarded on application. All Springs fully warranted.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

Star Metal Company,

SOLE MANUFACTURERS OF THE

"STAR METAL" Railway Journal Bearing.

OFFICE,

55 Liberty Street,

NEW YORK.

FOUNDRIES,

Plymouth St., Brooklyn,

31 South Canal St., Chicago,

Point St. Charles, Montreal.

FOR SALE

3 LOCOMOTIVES, 4-81-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

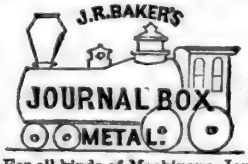
Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,



62 Broadway, New York

JAMES CLAYTON'S Patent Steam Pump and Steam Engine Combined. These Pumps contain every desirable quality in a Steam Pump, they are made of the best materials and in the best manner, and are the most reliable and cheapest Steam Pumps in the market and are especially suitable for railroad stations, &c. Please send for Circular.

JAMES CLAYTON,

RICHARD B. OSBORNE,

CIVIL ENGINEER,

No. 319 South 4th St., Philadelphia,

Where Plans and Estimates of Work will be promptly attended to

Barometrical reconnoissance for Railway lines, Location and Construction of Railroads, and all duties required on Public Works in any State of the Union performed with fidelity.

THE UNION PACIFIC RAILROAD CO.

THEIR FIRST MORTGAGE BONDS

As an Investment.

THE rapid progress of the Union Pacific Railroad, now building west from Omaha, Nebraska, and forming, with its western connections, an unbroken line across the continent, attracts attention to the value of the First Mortgage Bonds which the Company now offer to the public. The first question asked by prudent investors is, "Are these bonds secure?" Next, "Are they a profitable investment?" To reply in brief:

1st. The early completion of the whole great line to the Pacific is as certain as any future business event can be. The Government grant of over twenty million acres of land and fifty million dollars in its own bonds practically guarantees it. One fourth of the work is already done, and the track continues to be laid at the rate of two miles a day.

2d. The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of railroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and being without competition, it can maintain remunerative rates.

3d. 425 miles of this road are finished, and fully equipped with depots, locomotives, cars, &c., and two trains are daily running each way. The materials for the remaining 92 miles to the eastern base of the Rocky Mountains are on hand, and it is under contract to be done in September.

4th. The net earnings of the sections already finished are *several times greater* than the gold interest upon the First Mortgage Bonds upon such sections, and if not another mile of the road were built, the part already completed would not only pay interest and expenses, but be profitable to the Company.

5th. The Union Pacific Railroad bonds can be issued only as the road progresses, and therefore can never be in the market unless they represent a *bona fide* property.

6th. Their amount is strictly limited by law to a sum equal to what is granted by the U. S. Government, and for which it takes a *second* lien as its security. This amount upon the first 517 miles west from Omaha is only $16,000 per mile.

7th. The fact that the U. S. Government considers a second lien upon the road a good investment, and that some of the shrewdest railroad builders of the country have already paid in five million dollars upon the stock (which is to them a third lien), may well inspire confidence in a first lien.

8th. Although it is not claimed that there can be any better securities than Governments, there are parties who consider a first mortgage upon such a property as this the very best security in the world, and who sell their Governments to re-invest in these bonds—thus securing a greater interest.

9th. As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accrued interest, they are the cheapest security in the market, being more than 15 per cent. less than U. S. Stocks.

10th. At the current rate of premium on gold, they pay

Over Nine per Cent. Interest.

The daily subscriptions are already large, and they will continue to be received in New York by the

CONTINENTAL NATIONAL BANK, No. 7 Nassau St.,
CLARK, DODGE & Co., BANKERS, No. 51 Wall St.,
JOHN J. CISCO & SON, BANKERS, No. 33 Wall St.,
HENRY CLEWS & Co., BANKERS, No. 32 Wall St.,
HEDDEN, WINCHESTER & Co., BANKERS, No. 69 B'y,

and by BANKS AND BANKERS generally throughout the United States, of whom maps and descriptive pamphlets may be obtained. They will also be sent by mail from the Company's Office, No. 20 Nassau Street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

JOHN J. CISCO, *Treasurer*,

NEW YORK.

THE ELNATHAN SAMPSON

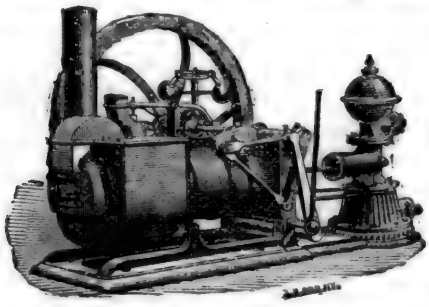
NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.



Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

ERICSSON

Caloric Pumping Engines.

FOR economy, durability, and efficiency unequalled. Have been in use on the Erie, Central, Hudson River, Harlem and other roads for eight years. Recommended by all Superintendents in the highest terms.

JAMES A. ROBINSON,
164 Duane St., cor. Hudson, New York.

JOHN WILEY & SON,

NOTICE TO THE CONSUMERS OF THE
GENUINE SWEDISH DANNEMORA IRON. (L)

I beg to announce that I have this day entered into a Contract with Messrs. W. JESSOP & SONS, of Sheffield, for the whole Annual Make of the above Iron, which, in future, will be stamped

(L) LEUFSTA W. JESSOP & SONS.

And to which I request the special attention of the Trade.
Leufsta, in Sweden, 29th April, 1867.
CARL EMANUEL DE GEER, Proprietor.

WM. JESSOP & SONS, in referring to the above notice, beg to inform dealers in, and consumers of, Iron and Steel, that they are prepared to receive orders for this IRON, and for BLISTER and EXTRA CAST STEEL, made from the Iron, at their Establishments, Nos. 91 and 93 JOHN ST., NEW YORK, and Nos. 133 and 135 FEDERAL ST., BOSTON.

"Sprague's" Russia Iron,

A SUBSTITUTE FOR

Imported Russia Iron,

Made by a new process, and superior to any polished Iron ever manufactured in America.

Sheets, from 6 lbs. to 14 lbs.

PRICE .....14 CENTS CURRENCY,
packed in cases of about 200 lbs. each.

Address
JOHN S. DICKERSON & CO.,
Importers and Dealers in Tin Plates and Metals generally.
COR. CLIFF AND FULTON STREETS,
NEW YORK.

M. T. DAVIDSON & CO.,

Manufacturers and Dealers in

Engineers' and Machinists' Tools and Supplies

Principal Agents for the sale of the Fox Lathes Chucks, Slide Rests, finished Shafting, Pullies and Hangers with self-oiling boxes, American Steam Gage Company's Steam and Vacuum Gages, Clocks, Revolution Counters, etc., Richard's Indicators, Morse's Patent Twist Drills. A full assortment of the above constantly on hand at Manufacturers' rates.

3m25 **84 John Street, New York.**

THE HARDAWAY BOLT, SPIKE & RIVET Manufacturing Co.

Manufacturers of every variety of

Railroad and Ship Spikes,

BOLTS AND RIVETS.

This Company are exclusive owners of the **HARDAWAY PATENTS,** and the Bolts Spikes and Rivets made by their machines are pronounced **Superior** to those of any other manufacture.

Orders solicited and promptly executed at the lowest rates. **Samples** and **price-lists** sent to Railroad Companies, Manufacturers and Dealers, when desired.

American Railroad Journal.

New York, Saturday, September 7, 1867.

American Institute.

The Annual Exhibition of the American Institute will be opened to the public on the 12th inst., at noon. In the evening, the opening address will be delivered by the President of the Institute, and a poem, prepared for the occasion, will be read. Those who have applied for space in the Exhibition, are notified that the Armory in 14th street, near Sixth Avenue, where the Exhibition is to be held, is now open for the reception of goods. Only those articles produced in the United States will be allowed to be entered for competition—though other articles will be received for exhibition. The Exhibition will be held from the 12th of September to the 26th of October, inclusive, from 9 a. m. to 10 p. m. On the evening of the 26th of October, the closing address will be delivered, and the names of the successful competitors announced. In future, the most prominent feature of the award is to be a testimonial or statement of the advantages or good qualities of the prize articles, given in such terms that it may be used by the successful competitor as evidence of its value.

Union Pacific Railroad.

The earnings and expenses of this road, on 325 miles, for the quarter ending August 31, 1867, are officially stated as follows:

Earnings:		
Passengers		$160,526 92
Freight		549 672 39
Telegraph		1,416 23
Mails		12,140 00
Transportat'n, contractor's materials		468,205 44
Transportation, contractor's men		26,077 97
Total		$1,203,038 95
Expenses:		
Agents and clerks	$17,156 22	
Miscellaneous, office expenses, exchange, &c.	10,560 00	
Station expenses	6,154 52	
Station labor, watchmen, &c.	21,036 06	
Conductors, baggagemen, &c	16,038 41	
Engineers and firemen	17,256 32	
Fuel account	131,089 58	
Oil, tallow, waste	10,298 98	
Loss & damage of goods	1,665 92	
Contingent account	3,522 02	
Repairs of engines and tenders	17,436 51	
Repairs of cars	21,655 42	
" roadway & track	109,767 64	
" bridges	9,075 78	
" buildings	2,189 38	
" telegraph	627 36	
		395,530 92
Net earnings		$807,508 03

The company add that, from the relative high charges, the operating expenses of the road are but 32¼ths per cent. of the earnings, and the ratio would be much less if the contractor's business were not done at half rates. Throwing out charges to contractors for transportation of materials and men, ($479,283 41,) and deducting from the aggregate of all operating expenses ($395,530 92) 32¼ths per cent. ($157,564 42) as the proportion chargeable on work done for contractors, which was less than actual cost, because of the half price charged for it, and we have the net operating expenses on the commercial business for the quarter, $237,966 50. The account for the commercial business of the quarter was:

Earnings	$728,755 54
Expenses	237 966 50
Net profit of operating 325 miles of road three months	$485,789 04

The amount of bonds the company can issue on 325 miles, at $16,000 per mile, is $5,200,000. Interest in gold, three months at 6 per cent., on this sum, is $78,000: add 40 per cent. premium for currency $109,200—showing that the net earnings for this quarter were more than four times the interest on the first mortgage bonds on this length of road.

Selma and Montgomery Railroad.

We learn from the Selma *Messenger* that Mr. C. T. Pollard, President of the Montgomery and West Point Railroad Company, has made arrangements for the purchase of 3,600 tons of iron for the extension of that road from Montgomery to Selma, at which point it will connect with the Selma and Meridian Railroad, and through that road with the Southern (Miss.) Railroad. It will be about 50 miles in length, and is the only link wanting to complete a through connection between the Mississippi at Vicksburg, and Charleston and Savannah on the Atlantic. A through line will also be established via the Atlanta and La Grange, Western and Atlantic, and the Tennessee and Virginia Railroads, to all points north and east of Montgomery.

Western Maryland Railroad.

The work on this road, we understand, is progressing finely. The heavy rock work on the sixth section is nearly graded; the heavy fill over the Big Pipe Creek bottom on the same section is so far completed that no more can be done until the abutments of the bridge are raised to receive the filling. The building of the bridge over Big Pipe Creek has been let by the McCaffreys to E. Traine and James Crowther, bridge contractors. The bridge will be thirty feet above low water. The bridge over the Monocacy on section eight is under way. Both bridges will be pushed forward as rapidly as possible.

The Suez Canal.

The amount of capital expended last year on this enterprise was £2,520,000. The expenditure still required to be made is estimated at £5,920,000.

Chicago and North Western Railway.

The earnings of this road for the years ending May 31, 1866 and 1867, have been as follows:

	1865–'66.	1866–'67.
From passengers	$2,510,727 52	$2,945,016 19

Balance to credit of income account May 31	483,988 22	468,224 46
Total, as above.	$3,395,686 61	$3,541,730 47

The gross earnings of the road for the year ending May 31, 1865, were $6,820,749 75; and the operating expenses, $4,295,372 86—excess of earnings $2,525,276 89. From which deduct State, County, Town and Government taxes, amounting to $325,888 98—leaving a balance of $2,199,387 91. The payments to sinking funds in that year were $750,470; dividend on preferred stock, $372,872 15; and rents of leased roads, $397,115 98—leaving to be carried to credit of income account, the sum of $678,929 78. The operating expenses were 62.98 per cent. of the gross earnings; and, including taxes, 67.75 per cent. In 1866, the operating expenses were 61.54 per cent.; including taxes, they were 67.04 per cent. In 1867, the percentage of expenses was 66.17 and 69.91 respectively.

The total expenditures in 1865, including operating expenses, taxes, contribntions to sinking funds, interest, rent of leased roads, dividends on preferred stock, interest on bonds, and dividends on stock of the M. and B. R. R. Co., amounted to $6,141,819 97; against $7,501,656 45 in 1866; and $10,059,668 16 in 1867.

The amount charged to old construction during the past two years for exchanges of stock and settlements, in accordance with plan of re-organization of 1859, and with terms of consolidation with Galena Company in 1864, has been $401,882 41. During the same time the sum of $3,726,875 10 has been expended for new equipment, and $940,847 30 for new construction.

During the past three years, the sum of $1,054,-956 44, being for discount on securities sold, and which is properly chargeable to construction, has been carried to income account, thus reducing the surplus, which otherwise would have amounted to $1,523,180 90, to $468,224 46, as shown in general account.

During the past year, the company have issued $2,200,000 of short equipment bonds, drawing interest at 10 per cent. per annum, secured by a lien on $2,750,000 of new equipment purchased and built during the year, $550,000 of the cost price of such equipment having been paid by the company, and the whole left as security for the $2,200,000 of bonds. These bonds are payable in semi-annual instalments of $270,000 each, commencing May 1, 1868, and ending November 1, 1871.

The amount paid for interest on bonds during the last fiscal year, includes six months' interest on these bonds; and the amount paid for rent of leased roads includes rent paid on new portions of the road opened for business during the progress of construction through the State of Iowa.

The income account for the year ending May 31, 1866, shows the gross earnings of all the lines of road operated by this company, including the leased roads in Iowa, and 23 days' earnings of the Chicago and Milwaukee Railroad, which was leased by this company on the 8th of May, 1866. In the earnings for 1866–'67, are included those of the Chicago and Milwaukee for the whole year. These earnings amounted to $1,063,164 21, showing that on the basis of earnings as well as for the purpose of securing more perfect combinations and preventing undue competition, the purchase of this road was a desirable transaction to the company.

A dividend on the preferred stock of 1¾ per cent. was paid in June, 1864, and another, of 3½ per cent. in December, making 5¼ per cent. for that year. In June, 1865, a third dividend, of 3½ per cent., was paid; and in December, 1866, a fourth, of 7 per cent., payable in preferred stock, at par.

The length of Main Line and Branches owned and leased by this company, are: Main Line from Chicago to Clinton, Iowa, 138.1 miles; Clinton to Council Bluffs, (opposite Omaha,) 352.9 miles—total Main Line, 491.0 miles; Branches, viz: Junction to Freeport, 91.0 miles; Elgin to Richmond, 33.0 miles; Belvidere to Madison, 67.6 miles; Rockford to Kenosha, 72.4 miles; Chicago to Milwaukee, 83.5 miles; Chicago to Fort Howard, 242.4 miles; Escanaba to Negannee, with branches and extensions to mines, 71.5 miles—total number of miles, 1,152.4. The road from Clinton to Council Bluffs is perpetually leased by this company. All the other lines are owned by the company, except the Chicago and Milwaukee, whose stock is mostly owned by this company.

The company own 248 locomotives, 112 first class and 21 second class passenger cars, 101 baggage, mail and express, 117 caboose, 4 boarding, 3,554 box, 901 platform, 307 cattle, 53 coal, and 519 iron ore cars.

The total number of passengers carried in 1865, was 1,096,697; in 1866, 1,511,992; and in 1867, 1,533,028. Tons of freight transported in 1865, 956,484; in 1866, 1,370,515; and in 1867, 1,726,-920.

The following is a comparative statement of the capital stock and bonded debt of the company, as stated in their reports for the past and preceding year:

	1866.	1867.
Flagg trust bonds	$245,000	$200,000
Preferred sinking fund b'ds	1,250,000	1,250,000
Appleton extension bonds.	184,000	184,000
Green Bay extension bonds	300,000	300,000
Funded coupon bonds	756,000	756,000
General first mort. bonds	3,600,000	3,600,000
7 per cent. eqnipment b'ds	320,000	165,000
10 per ct. equipment bonds	.....	2,200,000
First mortgage bonds G. & C. U. R. R. Co	1,948,000	1,919,000
Second mortgage bonds of do	1,232,000	1,173,000
Elgin and State Line R. R. bonds	189,000	189,000
Mississippi River Bridge bonds	200,000	200,000
First mortgage bonds Peninsular Railroad of Michigan	1,200,000	1,075,000
Consolidated sinking fund bonds	2,627,100	3,040,000
Total bonds	$14,051,000	$16,251,000
Common stock	13,174,901	13,232,496
Preferred stock	13,019,056	14,789,125
Total stock and bonds	$40,244,957	$44,272,621

The amount of common stock, per report of 1865, was $13,160,921; preferred stock, $12,994,-720; bonds, $12,020,483—total stock and bonds, $38,176,124. This shows an increase since 1866, of $4,027,664; and since 1865, of $6,096,497. Common stock was increased during the past year, $57,594; preferred stock, $1,770,070; bonds, $2,200,000; unfunded debt, $846,326—total increase of indebtedness, $4,873,990. The unfunded debt in 1865, was $825,398, and in 1866, $277,-151.

A full and comprehensive statement of the

bonds of this company, giving the amounts of each class, date of maturity, rate of interest, and when and where payable, may be found on pages 854, 855, and 856, of our present issue.

The Flagg Trust bonds are secured by a mortgage on depot grounds at Chicago, 8 per cent. interest, payable semi-annually. The preferred sinking fund bonds are secured by a first mortgage on road and equipment, from Chicago to Oshkosh, 193 miles. The funded coupon bonds, issued for first six coupons from general first mortgage bonds, secured by mortgage lien, next to the preferred sinking fund bonds, on road and equipment from Chicago to Oshkosh, 193 miles. General first mortgage bonds, are a mortgage lien, next to preferred sinking fund and funded coupon bonds, on road and equipment from Chicago to Oshkosh. The Appleton extension bonds, are a first mortgage lien, interest 7 per cent., payable semi-annually, and secured on road from Oshkosh to a point 23 miles north of Oshkosh, and on 76,000 acres of land received from U. S. Government. The Green Bay extension bonds are a first mortgage lien on road from north end of Appleton extension to Fort Howard, on Green Bay, about 26 miles, and on 76,000 acres of land received from Government. The seven per cent. equipment are a first mortgage lien on locomotives and cars purchased with said bonds.

The first mortgage bonds of the Galena and Chicago Union Railroad Company, are secured by a first mortgage on road and equipment from Chicago to Mississippi River, near Fulton, 138 miles; from Junction to Freeport, 91 miles; and from Belvidere to Wisconsin State Line, at Beloit, 20 miles—in all 249 miles. The second mortgage on same road and equipment as above described. The Mississippi River Bridge bonds are secured by lien on the net earnings of the Galena Division, after payment of interest and sinking funds on the first and second mortgage bonds. The bonds issued for the purchase of the Elgin and State Line Railroad are secured upon the net earnings of the Galena Division after the payment of interest and sinking funds on the first and second mortgage, and Mississippi River Bridge bonds.

The first mortgage bonds of the Peninsula Railroad Company of Michigan are a first mortgage lien on Peninsula Division from Escanaba to Negaunee and extensions to iron mines, about 71 miles, and on the lands received from the United States and the State of Michigan in aid of building said road. The mortgage provides for an issue of $1,200,000.

The consolidated sinking fund bonds are secured by a mortgage lien on all the different lines of road and equipment of the company in the States of Illinois, Wisconsin and Michigan, subject to prior liens. The mortgage provides that the company may at any time make further issues of this class of bonds for the purpose of exchanging them for any of the prior bonds of the company, (but not the $2,200,000 of ten per cent. equipment bonds,) dollar for dollar. The $3,040,000 of these bonds, now issued, are convertible into the preferred stock of this company, at par, at the option of the holder, at any time before the first day of May, 1870. The ten per cent. equipment bonds are secured by a first mortgage lien on locomotive and cars, payable semi-annually, commencing May 1, 1868, and ending November 1, 1871.

The number of passengers carried in 1864, was 312 771; in 1865, 272.548; in 1866, 278,197

Number of tons of merchandise carried in 1864 was 92,548; in 1865, 99,623; in 1866, 133.875

The report says:

The business of our road for the past year has been, on the whole, as successful as we anticipated. Our trains have run during the year 309,481 miles, divided between the different trains as follows:—Passenger service, 120 613 miles; freight, 139,493 miles; gravel, 49 375 miles, at a cost of $383,392 70, being $1 23.881 per mile. Our gross earnings have been $576,404 59, of which $251,485 73 have been for transportation of passengers, $295,796 10 for freight and $29,122 76 from other sources. This shows an increase of $41,896 24 over the earnings of the preceding year, and a diminution of expense of $160 24, notwithstanding the miles run the last year were 35,071 more than the year preceding. The passenger traffic shows a diminution of receipts as compared with the preceding year of $33,805 42, although the number of passengers transported was 5,649 greater in the year 1866 than in 1865 This falling off in receipts is accounted for from the fact that a portion of the passengers, (those going by boats) travelled shorter distances on the road than the general average, but principally to reduction of fare rendered necessary from the advance charged us by the Boston roads.

Our freight shows an increase of 34,252 tons, and an increase of receipts of $75.979 97.

The exhibit of expense does not show precisely the cost of operating the road, with ordinary repairs; no inconsiderable portion of the amount thus charged to expense account, having really been incurred for improvements.

Thus we have filled a large space of dock at Bath, and constructed an engine-house and turntable at this place, have put in a track scale at Brunswick, have raised 22 miles of track with gravel, constructed over 30 miles of new fence, laid over 525 tons of new rails and 300 tons of repaired rails, laid 49,141 new sleepers, filled permanently, the space bridged at Shingleman's creek, Lang's Mills, and the deep ravine near Skowhegan, constructed water tanks at Freeport, near Bowdoinham, and Augusta, and supplied them, and also the one at Dresden with water by aqueduct of more than two miles in length, thus furnishing an abundant supply of water which *flows* into the tanks instead of being raised by steam or hand power. We have extended bank walls near Danforth street in Portland and constructed wood sheds at Portland, Brunswick, Bowdoinham, Richmond Winslow, Skowhegan and Bath, in all, more than fourteen hundred feet in length, rebuilt one over Head bridge near Bath, a railroad bridge at Abigadasset, and thoroughly repaired the long trestle bridge at Gardiner, built at our shop in Augusta 25 new freight cars and 8 hand cars, and rebuilt wholly, except wheels and axles. 22 freight cars besides ordinary repairs on 236 more.

We have also built a new passenger depot at Gardiner, filling and preparing the grounds therefor, and also fitted up the old depot at Gardiner for a freight house and made large additional improvements for the accommodation of freight at that station. At Augusta we have built a new and commodious brick passenger depot and fitted it up with commodious offices with fire proof vaults, for the accommodation of the company. This building is constructed in the most permanent manner, has in it all the modern improvements, and is an ornament to the place in which it is located. The preparation of the site for this building, subjected us to much labor and expense, requiring the excavation and removal of between 3,000 and 4,000 yards of material, mostly of ledge, of very different character. The land on which these improvements in Augusta have been made was principally obtained by exchange with the city, in which both parties have been much benefitted and the public accommodated. At our machine shop we have, in addition to other large repairs, rebuilt one old and unserviceable engine making her substantially a new machine. She is now nearly ready to go upon the track. We have also put in seven new turn-outs and extended three others.

Many of these additions fall more appropriately under the head of construction, than repairs They have all, however, with the exception of the depots at Gardiner and Augusta been included in our expense account.

In addition we have contracted for 2 new first-class freight engines, (now on the road and models in finish and style,) and also for the re-building of an old engine which had become unserviceable. This will also soon be completed and on the road; also for 33 freight cars, 28 of which have already been delivered and are now in service.

When these additions shall have all been completed, which will be within a few days, we shall have added four first-class engines to our effective motive power, and 80 freight cars to our rolling stock within the last thirteen months.

With these additions to our rolling stock, and the additions which come from the ordinary operations of our own shops, we hope to be able to meet promptly the demands upon our road for the transportation of freight and passengers.

The general condition of the road is good, much better than ever before, and its equipment sound and efficient.

It is not, however, intended to affirm that further additions and improvements will not be required. Far from it. The construction of a railroad in a new and growing country can never be said to be complete. New sources of business are continually being opened, which require additional railroad facilities, and with a road like ours, which was originally imperfectly constructed and insufficiently equipped, this is emphatically true.

Thus, at this time we require at Bath a new passenger house and additional freight accommodations; better freight and passenger accommodations at Yarmouth Junction, to be constructed in connection with the Grand Trunk; also freight and passenger house at Waterville, and a new freight house, &c., at Augusta, besides improvements in our accommodations at Brunswick, Skowhegan, and perhaps other points on our line. These required improvements and additions are not in the nature of repairs but construction, and should, in the opinion of your directors, be provided for by increase of capital, and not taken from the ordinary income of the road to the further postponement of dividends upon our stock, which may be actually earned.

While the want of these contemplated improvements do not interfere with the safe and efficient operation of the road, their existence would be matter of great convenience and tend directly to the increase of our business.

Our trains have run during the year with great regularity and safety. No passenger has sustained injury, or suffered detention; our connections have been made with almost unerring certainty.

We have suffered somewhat from fire during the year. A spacious wood-shed in Portland containing 700 cords of wood took fire and was totally consumed. The fire occurred during a tempest of wind, and, though in the day time, it was found impossible to save it. The loss was something more than six thousand dollars, about one half of which was covered by insurance. We have also had three cars loaded with hay or loosely baled rags, wholly or partially consumed. These, however, so far as the loss fell upon us, were to a considerable extent protected by insurance. Two severe accidents occurred on the Boston and Maine road, in which 14 of our freight cars were badly injured or wholly demolished. The disabled cars were returned to our shop and repaired, for which the road on which the injury occurred will undoubtedly make us reparation.

With the railroads west of Portland over which we do a large connecting business, our relations have not been wholly satisfactory. They arbitrarily doom us at their pleasure, changing their rates for the transportation of our freight and passengers without previous notice or consultation with us, charging us more per mile for the transportation of our passengers, who are delivered to them in large numbers and without trouble or cost to them, and who as a general thing, pass over the whole line of their roads, than they receive, on an average, for their local passenger business. This is wholly wrong, and not only

prejudicial to us, but to them also. It was an efficient cause for the establishment of a daily line of boats from the Kennebec river to Boston, and if persisted in will make permanent that water competition for through business, which under a more enlightened and just policy would undoubtedly be temporary only.

With all other railroads doing business with us, our relations have been entirely harmonious and satisfactory.

We are happy to perceive indications that the railroad system of the State is to be extended. The work of construction, as we learn, has already commenced on the European and North American Road, under circumstances that show not only an ability but a determination to effect its early completion. It is an enterprise that will confer unmeasured benefits upon the eastern portion of our State, and is of great importance to the whole State, and though not directly connected with our road, will indirectly, if not directly contribute to our business and prosperity.

The prospect is also now highly encouraging that we are soon to have a road from the Kennebec to the Penobscot Bay at Rockland. This road when constructed will connect with ours, and will open a very large field for railroad traffic. It is the best unoccupied territory for a railroad in New England, and cannot fail, in addition to accommodating a very large local travel, to attract over its line, and the line of connecting roads, an immense business extending to the eastern extremity of our State and the adjoining Provinces. The precise point where this road will intersect our line has not been determined. That question must be settled by those on its line who are more directly interested in its construction; but where ever it may intersect our line we must extend to it a hearty welcome and render it all the aid in our power.

Railroads have become the great highway of the nations. Like the highways erected by nature, they should be free from obtructions. Our legislation should be so conceived as to connect and extend these channels, so that freight and passengers may pass the longest distance without change or interruption. Nothing is more annoying to the traveller than to be harrassed with frequent transfers from car to car, and be subjected to the necessity of providing himself with a multiplicity of tickets to be scrutinized by the employees of the different corporations; while to the shippers of freight the multiplicity of short lines under the control of different, and frequently disagreeing companies, is not only an annoyance, but often operates as a fatal obstruction to successful business. The interests of the people, no less than the roads, require that every reasonable effort should be made to bring all our short lines into harmonious action, and constitute them open and extended highways.

In conducting the business of the road during the past year, there has been a laudable desire manifested on the part of those in our employment for its success; in fact, with hardly an exception, they have come to look upon the road as an institution with which their own interests are identified and interwoven.

President.—RICHARD D. RICE, Augusta.

Directors.—Richard D. Rice, H. N. Jose, John B. Brown, Geo. F. Shepley, Geo. F. Patten, William D. Sewall, N. M. Whitmore, Darius Alden and Philander Coburn.

Superintendent.—WALTER HATCH.

Treasurer.—JOHN S. CUSHING.

☞ The iron mines at Marmora, in Canada, which were recently opened, are yielding large quantities of ore. It is only three weeks since shipment commenced, and already six thousand tons of ore have been shipped from Coburg to Cleveland or Erie—mostly to the latter port. The company are now shipping over three hundred tons per day. The ore is of excellent quality, and the demand for it is active.

American Central Railway.

We learn from authentic source that this important enterprise for the nation, and particularly for the States of Indiana, Illinois and Iowa, as well as its various important connections, not only East and West, but to the North and South, has assumed a substantial shape. We called the attention of our readers to the "American Central Railroad" in one of our issues last year. We are now pleased to be able to congratulate its managers upon getting its affairs in a satisfactory shape, so that the work can be pushed forward with vigor to completion. This road starts at the city of Fort Wayne, in the East; runs a due sectional course through the States of Indiana and Illinois to New Boston on the Mississippi; from thence through the heart of the young but great and growing State of Iowa, to a connection with the great Union Pacific Railroad at Omaha, a total distance of 585 miles. We venture the assertion, there is no one continuous line of railroad on this continent, from its extreme points, even approximating it in distance, that passes through a richer or more fertile section of country than this American Central. It traverses that portion of Illinois and Iowa where they have inexhaustible beds of coal, as well as the advantage of all the present constructed lines in distance between the great East and the great West.

For comparison, we will give the distances of the several leading routes:

	Miles.
From Omaha to Fort Wayne is	585
Fort Wayne to Pittsburg	320
Pittsburg to New York, *via* Allentown route	431
Total from Omaha to New York	1,336
Omaha to Chicago	500
Chicago to Dunkirk, *via* Michigan Southern & Lake Shore lines	498
Dunkirk to New York, *via* Erie Railroad	460
Total	1,458

Making the great saving in distance between New York and Omaha, by the above comparison, of 122 miles.

	Miles.
Omaha to Chicago	500
Chicago to Buffalo, *via* Michigan Southern and Lake lines	538
Buffalo to New York, *via* New York Central	442
	1,480
Omaha to New York, *via* American Central and her connections	1,336
Difference in favor of American Central	144

MICHIGAN CENTRAL ROUTE.

Omaha to Chicago	500
Chicago to Buffalo, *via* Michigan Central	522
Buffalo to New York, *via* New York Central	442
	1,564
Omaha to New York, *via* American Central and connections	1,336
Difference in favor of American Central	228

It will open up and develop a country that will furnish a local traffic of immense magnitude, and make the "American Central" self-sustaining, independent of its large prospective through business. It is destined to be an avenue for the shipment of live stock to an unlimited amount. To give some idea of the stock trade from this section of the West, which is yet in its infancy, we will state, there was shipped from Fort Wayne the past three months, *via* Pittsburg, Fort Wayne and Chicago Railway, eastward, about one thousand car loads of live stock, and all originating there and from her connections, with the present roads at that point.

This is one of the roads demanded by the laws of trade, traffic and commerce, not only from its favorable location, shortening and straightening distances, but the enterprising tillers of the soil, stock growers, and every department of industry, along its entire length, demand additional avenues and facilities for transporting of their rich abundance. After we have seen it demonstrated, as in the case of the Union Pacific, that a road can be constructed at the rate of one and a half to two miles per day, it is no great stretch of the imagination to say that this line can be opened up even in less time. Now, in view of all these increasing avenues opening up to us, through the great and growing West, does it not behoove us to move with more earnestness and more determination in opening up and completing increased avenues to the eastward of this naturally great Railroad Centre?—*Pittsburg Commercial.*

Italian Railways.

It appears from the report of Mr. Herries, her Majesty's Secretary of Legation at Florence, that at the beginning of 1864 the length of the railways open in the kingdom of Italy was 3,100 kilometres, besides 209 kilometres in the Roman States, and 536 in Venetia, Istria, and the Italian Tyrol. Of the lines conceded there remained to be completed 3,870 kilometres, and it is assumed that within ten years from that time the total length of railways throughout the Italian peninsula will reach 8,500 kilometres. Supposing that on the estimated future length of 8,500 kilometres there may be 3,500 kilometres of double lines, the actual length of railway will be 12,000 kilometres, representing in rails, turn-tables, chairs, &c., 1,075,680,000 kilogrammes of iron and steel, amounting to the value of 296,527 francs. The rolling stock is set down at 1,700 locomotives and tenders, and 38,000 carriages and tenders of all sorts, and the total quantity iron used under all these heads is computed at 1,247,331,000 kilogrammes, valued at 376,240,850 francs. The annual consumption by wear and tear would not be less than 62,774,200 kilogrammes, costing 20,519,011 francs. Rails are not made in Italy. Attempts were made to supply them at the establishment of Pietrassa, near Naples, in 1856, but it was found that they could not be delivered at less than double the price of those imported from England or Belgium. Neither can chairs, turntables, &c., be manufactured cheaply enough to compete with similar articles of foreign production. Native industry may be expected, however, to furnish the iron of superior quality required for axletrees, cranks, plates, locomotive boilers, wheel tires, &c., as well as steel for switches, springs for carriages, and sundry portions of locomotives and tenders. There are several establishments for the construction and repairing of rolling stock in Italy. At those of Sampierdarena at Genoa, and Pietrassa at Naples, locomotives and tenders are turned out which cost little more than those coming from abroad. Large workshops for repairs of locomotives, &c., exist also at Turin, Milan, Verona. Savighiano, Florence, Lucca (where tubular beams for bridges are also made,) Siena, and Civita Vecchia. In connection with railways, telegraph wires are mentioned. Their total length, which at the beginning of 1863, was 26,268 kilometres, may, it is supposed, extend in a few years to 60,000 kilometres, representing a weight of 4,000,000 kilogrammes, on which the annual loss by wear and tear would amount to 160,000 kilogrammes. The wire used comes principally from Birmingham, where it is manufactured at a price too low to admit of Italian competition.

☞ The Winona and St. Peter Railroad has been completed to the new town of Waseca, ten miles west of Owatonna, and 105 miles from Winona. Twenty-eight miles further west is Mankato, which will probably be reached next season.

American Railroad Journal.

Saturday, September 7, 1867.

Stock Exchange and Money Market.

The Money Market has been without special activity, since our last, though some increase of discount applications has been reported by the banks and private houses, and remittances of currency to the interior have been continued on a comparatively liberal scale. The very extensive liquidation of the Treasury office, during the week, prevented any disturbance in the ease of the market, which, in view of the extraordinary abundance of capital available here, especially on call, is now well assured for some time to come. The Treasury disbursements enabled the city banks to make a much more encouraging exhibit on Monday last, when, it appeared, that they had gained, during the week, $2,972,541 in their legal tender reserve, $2,148,214 in their deposits, and $1,243,060 in their specie hoard; while from the comparatively light demand for accommodation, they reported a falling off of $2,820,017 in their loan averages, and $21,121 in their circulation. The closing call loan rates are 3@4 per cent. on Government securities, and miscellaneous stock collaterals; and the best discounts are quoted at from 5@6 per cent. per annum. The public debt statement for Sept. 1, just made up, shows a further reduction of nearly six millions in the net aggregates since Aug. 1, and of over ten millions since June 1, 1867. The coin reserve of the department is now $101,263,020, against $102,905,174 a month since. The currency reserve is down to $47,073,074, against $72,474,296 on Aug 1. The statement, on the whole, is a very strong one, and is favorably regarded in the street, though the reduction of precisely four millions, in the outstanding volume of plain legal tender notes, during the month, has been used to some extent to lessen public confidence in an easy Money Market. The specie reserve of the banks is now $7,271,595, against $6,381,600 same time last year. The city bank deposits are now $190,744,101, against $225,191,282 week ending Sept. 1, 1866. The legal tender reserve amounts to $67,932,571, against $92,622,808 same time last year. The circulation now stands at $33,715,428, against $27,807,834 same time last year. The loans are now $247,877,662, against $265,399,607 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $64,265,258 a day, against a daily average of $70,249,439 the preceding week, and $69,048,253 the week ending with Aug. 17. The current week's exchanges average about $72,330,000 a day.

National Bank notes to the amount of $59,680 were issued last week, making the total issue to 1,671 banks thus far, $303,789,156, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,745,373, leaving, with the existing 1,650 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $299,043,841. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $240 581,300; and for the public deposits, $38,498,950—making a total of $379,080,250. The Treasury Department last week redeemed and destroyed $270,000 of worn and mutilated fractional currency, and issued $485,986 of new.

The U. S. Sub-Treasury receipts, week ending with Aug 31, were $21,445,375, including $2,480,567 from customs duties; payments, $43,123,557; balance at the close of the week, $112 766,019, against $134,449,201, at the close of the preceding week, showing a decrease of $21,683,181. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,872,044 including $526,791 from customs, and payments. $4,943,638; on Tuesday, receipts, $917,732 including $496,457 from customs, and payments, $2,097,803. The balance at the close of business on Tuesday stood at $110,514,354, against $130,338,000 a week previous. The total receipts of the office in August, were $96,941,941 for the past month; and the total payments were $110,490,990. The office last week paid out about $3,500,000 in liquidation of matured Compound Interest Notes, and about

$11,750,000 in payment of matured or maturing Seven-thirties, bought in on account of the department.

The Philadelphia Bank movement the past week shows an increase in loans, of $150,359; a decrease of $6,284 in specie; a decrease in legal tenders of $164,907; a decrease of $136,024 in deposits; and a decrease of $2,950 in circulation. The Bank Clearings show a decrease of $1,831,208, and the balances, an increase of $740,478.

Government revenues were on a moderate scale last week, but are increasing again, this week, especially in the line of excises. The excises, last week, yielded $3,675,353, against $2,878,739 the preceding week; customs at the port of New York $2,480,567, and at the outports, about $825,000 (in coin) more, making the grand total income for the week equal about $8,385,790 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $46,000,000.

A more active speculation has been reported in Gold, the price of which has risen from 141 the lowest of the week, to 142⅛, closing as 142. The main inquiry has been from speculative sources, though the customs demand has been good. There has not been much call from shippers. The *Scotia* on Wednesday carried off only $114,500 in specie. The public debt exhibit of Sept. 1, shows that, while the aggregate coin reserve in the Treasury has fallen off $1,642,154, the portion absolutely owned by the Department has increased over two and a half millions. The outstanding coin certificates were reduced nearly four millions during the past month. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $1,438,246. The customs demand for Gold last week, averaged $413,428 a day; thus far, this week, it has been equal to $510,000 a day, or equal to a weekly aggregate of $3,060,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $113,756, and from California, $1,103,332. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $83,054,655, against $92,827,569 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $21,042,852, against $28,718,154 same time last year, showing a decrease this year, of $7,675,302. The exports of specie from this port, last week, were $103,792. The total outflow of specie from the port, since Jan. 1, 1867, has been $41,163,067, against $53,495,552 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $196,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $40,558,765, against $29,417,057 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to July 31, reached $25,775,917, against $27,784,558 same time last year, showing a decrease, in 1867, of $2,008,631.

A pretty fair business has been transacted in foreign exchange, since our last, at rather firmer rate. Bankers' 60 day bills on London closed at 109⅝@109⅞, and on Paris to 5.16¼@5.15; sight bills on London to 110@110⅜; and on Paris to 5.13¾@5.12½. The offerings of produce bills have been moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,558,807, making the total value of exports since Jan. 1, 1867, $124,978,938, against $134,125,806 same time in the preceding year.

Government securities have been decidedly more active. The speculative and investment demand has been quite brisk. There has likewise been a good export inquiry for the older six per cent. bonds. Prices have advanced materially. At the close, the business, which is up to a fair average, is mainly on investment account, at steady rates. U. S. sixes of 1881 closed here on Wednesday at 111⅞@112; U. S. Five-twenties of 1862, 114⅛@114¼; U. S. Five-twenties of 1864 at 109⅞@110; U. S. Five-twenties of 1865 at 111¼@111⅜; U. S. Five-twenties of 1865, consolidated, 108½@108⅝; U. S. Five-twenties of 1867, 108½@108⅝; U. S. Ten-forties at (ex-September coupon) 99⅝@99¾, and U. S. Seven-thirties at 107½@107⅝. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

October, 1864....118⅞	August, 1865....116
December, 1864..117⅞	September, 1865..115½
May, 1865 .....117⅛	October, 1865....115

Railway and miscellaneous share property has been in light request all through the week, and prices have been variable though not remarkably altered from the closing figures of last week. Wednesday was the busiest day of the week, and the best rates were made on the speculative favorites the market closing rather buoyantly.

General business shows more animation. The breadstuff and provision interests report more activity, the former at lower, and the latter at firmer prices, as a rule. The cotton trade has been light, as usual at this season of the year, and the market closes dull and heavy, with middling grades on Wednesday at 26½@28 cents per lb. as extremes. The stock of cotton now here is estimated at about 42,000 bales. The receipts at the port this week, have averaged about 1,250 bales a day. The receipts during the cotton year, ending Sept. 1, 1867 were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from September 1, to Aug. 31, 1867 were 1,850,014 bales, against 2,066,786 bales the preceding cotton year; exports, 1,553,000 bales, against 1,550,437 bales last year; estimated stock at latest dates, 70,000 bales, against 255,166 bales same time last year. Beeves have been less plenty and in more request during the week, at from 10@17c. per lb.; receipts, 6,353. Calves have been in demand at from 7½@12c. per lb.; receipts, 1,223. Sheep have been abundant and depressed at from 4@6c., lambs at from 6@8c. per lb.; receipts, 30,494. Swine have been moderately dealt in at from 7@7⅞c. per lb., all live weight; receipts, 21,705. Foreign merchandise has been in better request, and there has been decidedly more firmness in foreign dry goods. The total imports of foreign dry goods, last week, were $3,311,311, and the total amount marketed $3,526,049. The value of foreign merchandise imported last week, was $3,051,279—making the grand total specie value of last week's imports of dry goods and merchandise, $6,362,590, and since Jan. 1, 1867, $171,178,058, against $204,332,005 same time in the preceding fiscal year. The ocean freight market has been quite dull, since our last, rates have been depressed with 640 vessels of all classes in port. For Liverpool we quote flour at 1s. @1s. 3d. per bbl.; grain at 2d.@2¼d. per bushel; cotton at ⅛d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 21.	Aug. 28.	Sept. 4.
Consols	94 9/16	94¾	94 13/16
U. S. 5-20's of 1862	73½	73⅜	73¾
U. S. 5-20's of 1865	72	71⅞	72¼
Erie	45	45½	45¼
Ill. Central	77¾	77¼	77¼

The New York exports, exclusive of specie, for the week ending Sept. 3, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$3,895,593	$2,558,807
Prev. reported	130,230,213	122,420,131
Since January 1	$134,125,806	$124,978,938

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$3,528,193	$3,311,311
Gen. merchandise	2,228,975	3,051,279
Total for the week	$5,757,168	$6,362,590
Previously reported	198,574,837	164,815,468
Since January 1	$204,332,005	$171,178,058

The balance in the Sub-Treasury on Wednesday was $111,893,919 85.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—N. Y. State 7s, 1870, 104½; do., 7s, Bounty Loan, 106½; Georgia 7s, 84½; Boston Water Power Co., 20; Long Dock bonds, 98⅛; N. J. Central R. R., 122; Second Avenue R. Tunnel Through a Volcano.

In order to connect the Canterbury Settlement with the port of Lyttleton, in New Zealand, English engineers have nearly completed a railway tunnel through a volcanic range of mountains which separated the two places. The tunnel is to be 2,838 yards (upward of a mile and a half) long, was begun in 1861 and to be completed in five years at a cost of £195,000. This tunnel affords, it is believed, the first instance where a complete section of an extinct volcano has been opened out. The rock in it is a series of lava streams and beds of tufa, intersected by vertical dykes of phonolite. The lava streams generally consist of scoria, overlying a coarse pink trachyte, which passes gradually through shades of gray, purple and blue into a black finely-grained dolorite, intensely hard and tough, the lightest and softest rock being at the top, and the densest and blackest at the bottom. Regarded from an engineering point of view, the work is considered eminently successful.

Selma and Montgomery Railroad.

The Mongomery *Sentinel* gives a cheering account of the prospects of an early completion of the fifty miles of road which is to connect Montgomery and Selma. There are now near five hundred laborers engaged in grading, bridging, culverting and otherwise preparing the road-bed for the rails. Large quantities of cross-ties have been secured, and, within the next six weeks, it is anticipated, the bed and ties will be ready for the iron to Big Swamp Creek, a distance of thirty-five miles from Montgomery. The *Sentinel* thinks the trains will be running through by the 1st of January.

☞ The Memphis and Ohio railroad has paid the interest due the State of Tennessee, and has been released by the State authorities.

☞ The first train of cars passed over the Mont Cenis Railway on the 28th ult.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States Aug. 1 and Sept. 1, 1867:

	August 1, 1867.	Sept. 1, 1867.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$196,431,350.00	$196,431,350.00
Six per cent. bonds of 1867 and 1868	14,932,141.80	14,869,791.80
Six per cent. bonds of 1881	283,746,400.00	283,676,100.00
Six per cent. Five-twenty bonds	1,168,796,800 00	1,205,710,500.00
Navy pension fund	13,000,000 00	13,000,000.00
Total	$1,678,906,691.80	$1,715,687,741.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$15,402,000.00	$16,346,000.00
Three-year compound interest notes	108,329,430.00	91,512,330.00
Three-year seven-thirty notes	451,233,425.00	400,786,025.00
Total	$574,964,855.00	$508,644,355.00
Matured debt not presented for payment	15,636,815.87	19,440,375.87
DEBT BEARING NO INTEREST.		
United States notes	$369,164 844.00	$365,164,844.00
Fractional currency	28,554,729.72	29,392,172.97
Gold certificates of deposit	19,457,960.00	15,462,700.00
Total	$417,177,533.72	$410,019,716 97
Total debt	$2,686,685,896.39	$2 653,792,189.64
AMOUNT IN THE TREASURY.		
Coin	$102.905,174.00	$101,263,620.00
Currency	72,474,296.38	47,073,074.59
Total	$175,379,470.38	$148,336,094.59
Amount of debt less cash in the Treasury	$2,511,306,426.01	$2,505,456,095.00

The matured debt not presented for payment, consists of—

Compound interest notes matured June 10th, July 15th and August 15, 1867	$12,672,730 00
Bonds of Texas indemnity	263,000 00
Treasury notes, acts July 17, 1867, and prior thereto	165,311 64
Bonds, April 15, 1842	64,768 68
Treasury notes, March 3, 1863	959,380 00
Temporary loan	5,279,185 55
Certificates of indebtedness	36,000 00
Total, as above	$19,440,375 87

By comparing this with the statement of August 1, it is shown that the debt bearing coin interest has increased $36,781,050; the debt bearing currency interest has decreased $66,320,500; the matured debt not presented for payment has increased $3,803,560, and the debt bearing no interest has decreased $7,157,816 75—making the decrease in the total debt since Aug. 1, 1867, $32,893,706 75. The amount of coin in the Treasury during the same period has decreased $1,641,554, and the amount of currency has decreased $25,401,221 79—leaving the amount of debt less cash in the Treasury on September 1, $5,850,331 01 less than on August 1st.

☞ The extension of the Cincinnati and Martinsville Railroad, from Indianapolis to Vincennes, has been decided upon. A portion of the line between Indianapolis and Gosport has already been surveyed, and a contract entered into to complete the road to the last named town by the 1st of January next.

☞ Holders of the $21 coupons of the Central Ohio Railroad Company, given for past due interest on the 2d mortgage bonds, are notified to present those due March 1st, 1868, on or after 1st September, at the Western National Bank of Baltimore, when they will be paid, interest being deducted for advance of payment.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Rock Island Railroad for the 4th week in Aug., 1867, were $131,400 00
Corresponding week of previous year.. 108,451 00

Increase $22,949 00

The earnings of the Michigan Southern and Northern Indiana Road for the 4th week in Aug. 1867, were $157,352 00
Corresponding week of 1866 ..... 147,671 00

Increase $9,681 00

The earnings of the Detroit and Milwaukee Railroad for the week ending August 29, 1867, were $38,887 00
Corresponding week of 1866..... 37,540 00

Increase..... $1,347 00

The earnings of the Chicago and Northwestern Railroad for 4th week in Aug., 1867.. $427,749 00
Corresponding week previous year .. 304,409 00

Increase $123,340 00

The earnings of the Virginia and Tennessee Railroad for the third week of Aug., were $20,955, an increase of $7,767 on the same week last year. Total for the fiscal year commencing 1st of July, $113,775, an increase of $28,431 on same time in 1866.

Journal of Railroad Law.

DUTY OF COMPANY TO KEEP GATES IN REPAIR.

The case of Staats *vs.* Hudson River Railroad Company was an action brought to recover the value of a horse owned by the plaintiffs' testator, which was run over by a train of cars on defendants' railroad and killed. The defendants' road runs through lands that were owned by the testator, and at the time of the accident fences were erected on each side of the road. On the evening before the injury the horse was in a pasture adjoining the road, and during the night he escaped therefrom through a gateway (the gate being out of repair,) upon the railroad track, where he was run over and killed. It was admitted on the trial that no part of the fence was out of repair except the gate, and that there was no negligence in the management of the train. The cause was tried in the Rensselaer Circuit in February, 1864, before a justice of the Supreme Court, without a jury. The justice decided the defendants were under no obligations to keep the gate in repair, and therefore the action could not be maintained. On appeal the judgment was reversed with opinion by

JAMES C. SMITH, J.—The only question is, whether it was the duty of the defendants to keep the gate in repair. The plaintiffs claim that the duty was imposed upon the defendants by the statute of 1850, known as the general railroad act, and if not thereby, by the eighth section of chapter 282, of the laws of 1864, amending the act of 1850. The 44th section of the act of 1850, expressly imposes upon all railroad corporations to which it applies, the duty of erecting and maintaining fences on the sides of their road with openings or gates, or bars therein, for the use of the proprietors of the adjoining lands. But it is a question whether that section is applicable to the defendants, who were an existing corporation at the time of the passage of the act of 1850, they having been chartered by a special act in 1846. The 49th section of the act of 1850, subjects all railroad corporations within this State, existing at the time of the passage of said act to all the duties, liabilities and provisions contained in certain specified sections of said act, including the 44th section, not inconsistent with the provisions of their charter. The duty created by the 44th section of the act of 1850, therefore attaches to the defendants, unless it is inconsistent with some provisions of their charter. The defendants claim that it is inconsistent with the provisions of the 24th section of their charter, which is in these words. The said corporation before running any cars upon the said railroad, shall erect, and thereafter maintain upon the sides thereof, except where the road shall intersect some public highway, a fence of such height and strength as is by law required as a division fence between the owners of adjoining lands, and shall make and keep in repair wherever the same may be necessary upon the line of the said railroad suitable guards to prevent cattle from running upon the same, but this section shall not prevent persons owning or occupying lands adjoining the said road from erecting at proper and convenient places, where they may have occasion for crossing the said road for farming and other necessary purposes, suitable gates in the line of said fence to facilitate such crossing, and to be kept in repair by the person using the same.

The eighth section of the act of 1854 is in these words, every railroad corporation whose line of road is open for use, shall within three months after the passage of this act, and every railroad company formed or to be formed, but whose lines are not now open for use, shall before the lines of such railroad are opened, erect and thereafter maintain fences on the sides of their roads of the heighth and strength of a division fence as required by law with openings or gates, or bars therein, at the farm crossings of such railroad for the use of the proprietors of the lands adjoining such railroads, and shall also construct where the same has not already been done, and hereafter maintain cattle guards at all railroad crossings suitable and sufficient to prevent cattle, horses, sheep and hogs from getting on such railroad. And so long as such fences and cattle guards shall not be made, and when not in good repair, such railroad corporation and its agents shall be liable for damages which shall be done by the agents or engines of any such corporation to any cattle, horses, sheep or hogs thereon, and when such fences and guards shall have been duly made, and shall be kept in good repair, such railroad corporation shall not be liable for any such damages, unless negligently or wilfully done. A sufficient post and line fence of requisite heighth shall be deemed a lawful fence, within the provisions of this section, but no railroad corporation shall be required to fence the sides of its roads, except where such fence is necessary to prevent horses, cattle, sheep and hogs from getting on to the track of the railroad from the lands adjoining the same. The defendants are undoubtedly within the operation of this section, unless as is claimed by them, it applies only to cases where fences and gates had not been constructed at the time that act was adopted, that claim is not warranted by the language of the section, and in my judgment does not accord with its meaning. In describing the corporation to which the section relates, its framers used the comprehensive words, "every railroad corporation."

And they specified as well those corporations whose lines were then open for use. In the case of Corwin *vs.* The New York and Erie Railroad Company, (13 N. Y., 53,) Denio, J., speaking of section 44 of the act of 1850, expressed the opinion that "it is not to be regarded as merely a regulation respecting division fences between the land of the railroad corporations and those of adjoining property, but that it is rather to be considered as providing a safeguard for the protection of the lives of persons traveling by railroad, and of the property in animals which citizens in the vicinity of those roads may own." This remark of the learned Judge is justly applicable also to the section we are called upon to construe, and the fact that the section was intended in a great measure as a police regulation for the safety of the traveling public, strengthens the conclusions that was designed to have the general scope indicated by its language, and to prescribe a uniform rule for every railroad company in the State. It provides for two distinct acts, the *erecting* of fences and gates, and the *maintaining* them; and although the former provision was unnecessary in cases where suitable fences and gates had already been built, yet the latter provision was useful in those cases as well as where the fences and gates were hereafter to be constructed. Each provision is to be taken distributively and to be applied to the cases in which it can have effect, *reddendo singula singulis.* Several other sections of the same act clearly apply to all the railroad corporations in the State, whether then existing or hereafter to be formed, and whether created by special charter, or organized under the general law (§§ 7, 10, 14, 17.)

No question can arise as to the power of the Legislature thus to amend the defendants' charter, as it contains an express reservation of the legislative power to alter or repeal it, and besides the 22d section of the charter subjects the corporation to the general restrictions and liabilities prescribed by the third title of the eighteenth chapter of the first part of the Revised Statutes, the eighth section of which provides that the charter of every corporation that shall hereafter be granted by the Legislature, shall be subject to alteration, suspension and repeal in the discretion of the Legislature. I am of opinion, that these defendants were charged with the duty of keeping the gate in repair, and therefore that the judgment appealed from should be revised, and a new trial ordered.

A German Railway Congress.

A Congress of managers of German Railways has just been held at Mayence. In all, 64 German railway administrations were represented at the Congress, at which there also assisted delegates from two Dutch Railways, the Northern of France Railway, the Eastern of France, the Swiss Union, the Great Russian, &c. The union of German railways represented by the Congress embraces altogether about 14,375 miles of line in Prussia, Austria and North and South Germany. The next Congress will be held at Vienna in 1869. The object of the Congress is to consider the general questions associated with the working of railways, the best means of securing unity of management, &c.

Imperial Mexican Railway.

The report of the directors states that the railway from Mexico to Apixaco was opened for goods traffic on the 21st of January, but the unsettled state of affairs had prevented this portion of the line from being worked to advantage. It was satisfactory to know that a very large traffic already existed in the district, of which the company would probably carry the greater portion when the business of the country was resumed. The opened lines were reported to have been continuously worked, under the charge of the contractor, down to the beginning of March last. From the 1st of November, 1866, to the end of February last, the gross receipts for the four months on the Vera Cruz and Paso del Macho section amounted to £41,993; on the Mexico and Guadalupe section to £2,321, and on the Mexico and Tacubaya section to £3,180. The receipts on the Totolcingo section from August to the 31st of December, 1866, amounted to £1,154; and on the Apixaco section the receipts from the 21st of January to the 28th of February, amounted to £1,601. The accounts of the working of the several parts of the line from the time when they came respectively into the hands of the company down to the 31st December, 1866, had been officially audited and settled to a point in Mexico with the contractor in person. They showed the following results: On the Vera Cruz to Paso del Macho section, from the 23d of March, 1865, to December, 1866, the gross earnings amounted to £162,094, the working expenses to £118,817, and the net profits to £43,277. About £1,316 part of the above earnings, remained to be recovered from the Medellin Railway Company. On the Mexico to Guadalupe section, from the 23d of March, 1865, to the 31st of December 1866, the gross earnings amounted to £12,937, the working expenses to £6,491, and the net profit to £6,446, &c. The total net profits amounted to £52,171 for division between the company and the contractors—namely, £13,979 to the contractors, and £38,192 to the company. The sums received from the Mexican Government to September had been, on account of the 15 per cent. customs' duties, £144,099, the bond debt obligation £126,542, leaving an estimated sum of £215,476 due to the company on the former, and an actual sum of £41,548 on the latter account. Of the sums due in respect of unpaid calls £5,300 had been recovered in this country, and £280 had been paid in Mexico, which had not yet been received at the office. All matters at issue had been satisfactorily arranged, and, generally, the way had been cleared for the efficient working of the opened lines, and for resumption of the construction of the unfinished portions whenever the circumstances of the country and the credit of the company would enable the board to provide the necessary funds. The balance sheet showed that the total expenditure amounted to £2,904,668.

Greenville and Columbia Railroad.

The financial condition of this company on the 1st January, 1867, was as follows:

First mortgage bonds outstanding	$326,000
Bonds guaranteed by the State	624,000
	$950,000
Coupons due on the above	313,950
Secured by first mortgage	$1,263,950
Bonds not secured	600,000
Coupons due	170,345
Whole amount bond debt and interest	$2,034,295

Besides this, there is a floating debt of some magnitude from $150,000 to $200,000 to be met by the company. Certain bondholders under the mortgage have already commenced proceedings, in equity, to foreclose the mortgage, which will most certainly result in the sale of the property of the company, unless their debt can be paid, or otherwise arranged. Other creditors are also threatening, and there seems to be nothing before the company but a general bankruptcy. The property of the company cost more than three millions of dollars, and, with the State subscription, the people of the State have invested nearly two millions in the stock of the company. It is considered that, if the road is sold under a foreclosure of mortgage, the running of trains may be continued as at present; but that the new company may find it necessary to abandon the present line or divert its course.—*Anderson Intelligencer.*

Bombay, Baroda, & Central India Railway.

The report states that the total receipts on capital stock, shares, and debentures amounted to £6,180,982, of which the sum of £532,748 was received in the last half-year. The total expenditure (including stores and materials) amounted to £6,526,664, of which £3,789,606 had been spent in India and £2,737,058 in England. Further expenditure in India, to a considerable extent, had been incurred, but has not yet been finally brought to account, as it is waiting the audit of the Bombay Government. Under arrangements recently made in India, it is believed that these arrears of audit will shortly be entirely disposed of. As regards the capital receipts and the provision of funds, the proprietors are aware that with the sanction and under the guarantee of the Secretary of State for India in Council, the sum of £500,000 has been raised by the issue of 5 per cent. debentures having five years to run, and with the option of renewal for another five years, and of conversion into shares or stock of the company. To meet the amount due to the Government, and provide for the immediate wants of the company in carrying out their works, a further issue of guaranteed share capital to the extent of £750,000 was also sanctioned, and has been allotted among the proprietors. A considerable portion of this capital would have been issued last year but for the severe financial crisis which occurred in the early part of that period. Reference is made to the unprecedented floods in Western India during the last monsoon, which inflicted considerable damage to the line, but measures are now being taken to secure the portions of line passing through the swamp districts, as far as possible, from the recurrence of any similar disaster. The cost of the immediate repair has been charged in the half-year's revenue account, but the larger expense of the preventive measures just referred to has been sanctioned by the Secretary of State as an addition to the capital cost of the line. To ensure greater safety and economy in working the traffic, short lengths of double line have been laid at different points for the crossing of trains. The sanction of the Government has been obtained to the extension of the line, with guaranteed capital, across the Saburmuttee River at Amedabad, which will now be bridged by an iron viaduct purchased from the Scinde Railway Company for that purpose. An arrangement has been made with the Government for insuring the early completion of the necessary reclamation across Back Bay for the approach of the railway to its destined Colaba terminus at Bombay harbor, and the work is now being vigorously carried on. The gross receipts for the half-year amount to Rs. 18,44,280 as compared with Rs. 20,87,655 for the corresponding half-year of 1865, showing a diminution of Rs. 2,43,875. The working expenses for the half-year amount to Rs. 16,70,833, as compared with Rs. 12,39,564 in 1865, showing an increase of Rs, 4,31,269, and absorbing 90.6 per cent. of the receipts as compared with 59.37 per cent. in 1865. The receipts per railway mile amount to Rs. 5,746 as compared with Rs. 7,511 in 1865, being an average of Rs. 218 per mile per week, as compared with Rs. 285 per mile per week in 1865. The receipts per train mile amount to Rs. 5 9-11, as compared with Rs. 5-15-6 in 1866. The working expenses per train mile amount to Rs. 5-1-6, as compared with Rs. 3 8-3 in 1865.

South Side (L. I.) Railroad.

This road will be completed by the close of this week from Jamaica to Rockville Centre, but as the running stock is not yet prepared, a delay of a few weeks will occur before trains run upon it. By that time, probably, the rails will be laid entirely to Islip, a distance of forty miles from New York, and twenty-eight from Jamaica. At this latter point passengers will take the cars of the Long Island Railroad, or Brooklyn and Jamaica Railroad, and proceed either to Hunter's Point or South Brooklyn, as they may prefer.

An arrangement was made by the company with the Flushing Railroad to strike that road two miles from Hunter's Point, and find an outlet by the Flushing depot there, but recently the Long Island Railroad Company bought the Flushing Railroad, and, it is said, may probably throw obstacles in the way of their doing so. Notwithstanding this, the South Side Company continue building their road from Jamaica to the Flushing road. In case of their discomfiture, the only disadvantage to passengers will be a change of cars at Jamaica.

The Long Island Railroad depends for its profits chiefly upon the summer travel to Fire Island, Moriches, Babylon, and the numerous localities upon the south side, where visitors enjoy bathing, fishing and shooting. It drops passengers at the nearest points along its line, and gives them the benefit of an expensive and tedious stage ride of several miles to their destination. The South Side road runs immediately past all those places of resort, and promises to draw travel immensely from the former. A natural hostility has therefore existed on the part of the Long Island road towards its rival. The Long Island road has many beautiful places of resort within a few miles of its line, on both the north and south side of the Island, but its immediate vicinity is unattractive to visitors or settlers, from its flatness and the total lack of water scenery. Notwithstanding these objections, the soil produces large crops, and the air is especially bracing and pure, and if the railroad company had followed the example of others running out of this city, and tried to attract settlers, it would ere this have enjoyed an immense travel. The rivalry it will now experience from parallel roads, both on the north and south side, will perhaps stimulate it to enterprise in that respect, and also to building a series of spurs from its main line to well-frequented localities on each side. Such a course would enable it strongly to compete with its rivals, and be the means of settling regions now lying waste.—*Evening Post, Aug.* 28.

Iron Bridges.

The Tredegar Iron Works of Richmond, Va., have just completed a bridge of superior construction for the road now building between Columbia, S. C., and Augusta, Ga. It will cross the Congaree River, and consists of three spans 160 feet long and seven spans eighty feet in length. The aggregate weight of this bridge will be within a fraction of 500,000 pounds. C. Shaler Smith, Esq., of Baltimore, is the engineer.

☞ The air of the underground railway in London is so foul as to have recently hastened the death of a woman. Prudent people avoid locomotion by it as much as possible.

European and North American Railway.

We hear that contracts for the whole eighty-eight miles, from St. John to the Maine boundary, have been made as follows: Messrs. Stacey, Glasier, Burpee and Yorston, the forty miles near St. John; Mr. Morrow, eight miles adjoining; Messrs. Thompson and Rannie, the next fifteen miles; Messrs. Brooks and Robinson, the twenty-five miles next the boundary. The contractors are all reliable men.

☞ The completion of the St. Paul and Pacific road to Wyzata, on Lake Minnetonka, was made the occasion of an opening excursion by the officers of the road, on the 24th.

GRAND Industrial Exhibition,

BY THE

AMERICAN INSTITUTE.

Those who have applied for space in the 37th Annual Exhibition, are hereby notified that the Armory in 14th Street, near 6th Avenue, is now open for the reception of goods

The Managers announce that the Exhibition will positively be opened to the Public on Thursday, the 12th of September, at 12 M. At 8 o'clock P. M., the Opening Address will be delivered by the Hon. HORACE GREELEY, President of the Institute; after which, "Miles O'Reilly," Gen. CHARLES G. HALPINE, will read a Poem composed for the occasion.

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21ST, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

Is a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

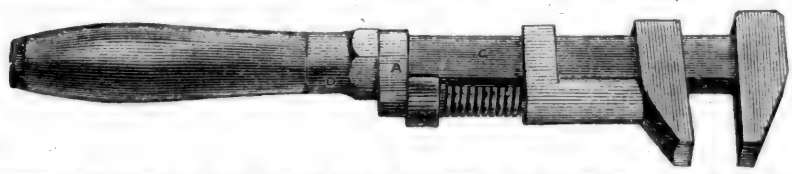
Perfectly Fire-Proof.

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

MEAD RUBBER COMPANY,

12 Vesey Street, New York.

MANUFACTURERS OF



INDIA RUBBER CAR SPRINGS AND STEAM PACKING.

Our Works being now under the management of a competent Superintendent, we are prepared to offer Springs of various qualities and prices to suit. Our A No. 1 Spring made of fine Para Rubber, and the Compound used by the Patentee, the late Fowler M. Ray, will be found to be cheaper than others made, from inferior stock and offered at lower prices.

Sample setts forwarded on application. All Springs fully warranted.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

Barometrical reconnoissance for Railway lines, Location and Construction of Railroads, and all duties required on Public Works in any State of the Union performed with fidelity.

THE UNION PACIFIC RAILROAD CO.

THEIR FIRST MORTGAGE BONDS

As an Investment.

THE rapid progress of the Union Pacific Railroad, now building west from Omaha, Nebraska, and forming, with its western connections, an unbroken line across the continent, attracts attention to the value of the First Mortgage Bonds which the Company now offer to the public. The first question asked by prudent investors is, "Are these bonds secure?" Next, "Are they a profitable investment?" To reply in brief:

1st. The early completion of the whole great line to the Pacific is as certain as any future business event can be. The Government grant of over twenty million acres of land and fifty million dollars in its own bonds practically guarantees it. One fourth of the work is already done, and the track continues to be laid at the rate of two miles a day.

2d. The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of railroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and being without competition, it can maintain remunerative rates.

3d. 435 miles of this road are finished, and fully equipped with depots, locomotives, cars, &c., and two trains are daily running each way. The materials for the remaining 92 miles to the eastern base of the Rocky Mountains are on hand, and it is under contract to be done in September.

4th. The net earnings of the sections already finished are *several times greater* than the gold interest upon the First Mortgage Bonds upon such sections, and if not another mile of the road were built, the part already completed would not only pay interest and expenses, but be profitable to the Company.

5th. The Union Pacific Railroad bonds can be issued only as the road progresses, and therefore can never be in the market unless they represent a *bona fide* property.

6th. Their amount is strictly limited by law to a sum equal to what is granted by the U. S. Government, and for which it takes a *second* lien as its security. This amount upon the first 517 miles west from Omaha is only $16,000 per mile.

7th. The fact that the U. S. Government considers a second lien upon the road a good investment, and that some of the shrewdest railroad builders of the country have already paid in five million dollars upon the stock (which is to them a third lien), may well inspire confidence in a first lien.

8th. Although it is not claimed that there can be any better securities than Governments, there are parties who consider a first mortgage upon such a property as this the very best security in the world, and who sell their Governments to re-invest in these bonds—thus securing a greater interest.

9th. As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accrued interest, they are the cheapest security in the market, being more than 15 per cent. less than U. S. Stocks.

10th. At the current rate of premium on gold, they pay

Over Nine per Cent. Interest.

The daily subscriptions are already large, and they will continue to be received in New York by the

CONTINENTAL NATIONAL BANK, No. 7 Nassau St.,
CLARK, DODGE & CO., BANKERS, No. 51 Wall St.,

and by BANKS AND BANKERS generally throughout the United States, of whom maps and descriptive pamphlets may be obtained. They will also be sent by mail from the Company's Office, No. 20 Nassau Street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

JOHN J. CISCO, *Treasurer,*

NEW YORK.

THE ELNATHAN SAMPSON

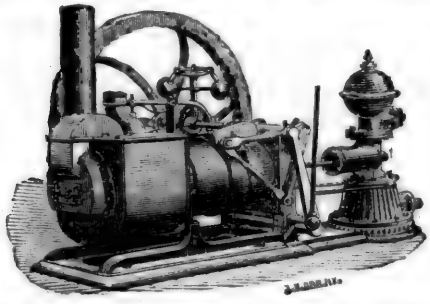
NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.



Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

Louisville, Frankfort and Lexington Railroads 889

American Railroad Journal.

New York, Saturday, September 14, 1867.

Louisville, Cincinnati and Lexington R. R.

We have before us the first annual report of these roads, being the 19th annual report of the Louisville and Frankfort and Lexington and Frankfort Railroad Companies.

These companies, though distinct corporations of the State of Kentucky, are now, under the corporate name of "The Louisville, Cincinnati and Lexington Railroads," partners in operating the road from Louisville to Lexington; and joint owners of the branch road which is being built from Cincinnati to La Grange, a village on the Lexington line, twenty-six miles from Louisville.

The accounts of the Louisville and Lexington line stands as follows:

Cost of road and equipment	$2,186,910 36
Represented by—	
Aggregate capital stock of the two companies	$1,624,240 82
Funded debts secured by liens	283,000 00
Debts not secured (perpetual loan from State of Kentucky at 6 p.c.)	74,519 50
Surplus undivided	205,150 04
Total, as above	$2,186,910 36

The average annual profit arising from the operation of the road during the past ten years has been $160,720 61.

The Cincinnati branch, eighty miles in length, is being built with the proceeds of the sales of the joint bonds of the two companies. Of these bonds, three millions only can be issued. Their payment is secured by a mortgage of the entire property and franchises of the two companies, including as well their present roads as the Cincinnati branch. On the Lexington line this mortgage is subject to a prior lien of $283,000 only, while on the branch it will constitute the first and only lien.

The ultimate cost of the branch, fully stocked and equipped for the very large business which must be thrown upon it, was originally estimated at four millions and forty-two thousand dollars. Of this sum, however, about half a million would not be required until the road should have been for some time in operation. Since the work has been opened throughout its whole extent, the Chief Engineer expresses the utmost confidence that he will be able to complete it at a cost materially within his original estimate. The distance from Cincinnati to Louisville will be 106 miles, or thirty-two miles less than *via* Seymour, and thirty-eight miles less than by the river. The time occupied in the transit will be four hours, as against nine hours *via* Seymour, or twelve by the river. The Louisville and Nashville Railroad Company feel the deepest interest in the enterprise, and have subscribed for half a million of the companies' bonds. A direct connection will be formed between the roads in the city of Louisville, so that passengers and freight will be transported from Cincinnati to Nashville and Memphis without delay or reshipment.

The population of Louisville now exceeds one hundred thousand, that of Cincinnati is more than double the number. We learn from these reports that 300,000 passengers and 500,000 tons of freight are now annually transported between the two cities. The intervening country is already populous and productive. The Superintendent, Col. Gill, (whose experience of twelve years in his present position has amply qualified him for forming such an estimate,) is of opinion that immediately upon opening the line, its annual receipts will be found to exceed the following:

From 220,000 through pass. at	$3.00	$660,000
" 150,000 way "	80	120,000
" 100,000 tons through frgt.	2.50	250,000
" 50,000 tons way "	3.00	150,000
" Express and mails		70,000
Total		$1,250,000
From which deduct operating expenses		700,400
Leaves a profit of		$549,600

The estimate will not seem large when it is understood that it is for only $12,000 of gross receipts per mile of road, while the receipts of the Louisville and Nashville road are already at the rate of $15,550, and those of the Cincinnati, Hamilton and Dayton, or the Cincinnati and Columbus, over $22,000 per mile. Between these lines the Louisville and Cincinnati will form the shortest possible connecting link, besides having over either of them, the advantage of connecting closely, two of our most important commercial and manufacturing cities.

One million and a half of dollars have been already subscribed to the bonds of the companies by citizens of Kentucky alone. The bonds bear 7 per cent. interest, payable semi-annually, and have thirty years to run. The price at which they were subscribed for was 85 cents to the dollar. The sum subscribed is sufficient to complete the grading and masonry. No further subscriptions have been asked, as it was not desired to borrow so far in advance of the wants of the companies; and it was thought that the completion of the grading with the means already on hand, would tend to enhance the value of the securities remaining to be sold. The profits arising from the operation of the Lexington line will also be applied to construction—compensation being made to the stockholders by the declaration of dividends payable in the preferred joint stock of the companies bearing 9 per cent. interest, payable semi-annually. The dividend declared in July last, was paid in this stock, which commands a ready sale in Louisville and Lexington, at par.

About fifteen hundred men are now at work upon the Cincinnati branch, and it is expected to

be opened for business early in the spring of 1869.

The principal officers of the companies are the following:

W. A. DUDLEY, Chairman Executive Committee.
SAM'L GILL, Sup't and Consulting Engineer.
I. M. ST. JOHN, Chief Engineer Cincinnati Br.

Lehigh Valley Railroad.

The constituents of this road at the close of the fiscal year (Nov. 30,) 1866, are summed up as follows:

	Miles.
Phillipsburg, N. J., to White Haven, Pa...	71.00
Penn Haven to Honey Brook & Audenried.	16.61
Black Creek Junction to Mount Carmel...	40.00
Total length of road.....	127.61
Second track 73.61, and sidings and short branches 60.27.....	133.88
Total equivalent single track	261.49

The original road of this company, was that division of the present road extending from Easton to Mauch Chunk, a distance of 46 miles. This was completed in October, 1855. The Beaver Meadow Railroad extending from Mauch Chunk to Honey Brook and Audenried 24.61 miles, (including 2d track, sidings, &c., an equivalent length of 54.63 miles,) became a part of the Lehigh Valley Railroad in July, 1864. In the same year the company completed and opened (June 14th,) their extension from Penn Haven (on the Beaver Meadow Railroad 7 miles above Mauch Chunk,) to White Haven about 17 miles. These additions, and the extension of the railroad to Phillipsburg, N. J., by the construction of the Delaware Bridge in 1866, gave the company a direct route between Phillipsburg and White Haven of 71 miles, and a branch line of 16.61 miles to Honey Brook and Audenried. On the 1st July, 1866, the company came into possession of the Lehigh and Mahanoy Railroad, which by a merger and exchange of stock, then became a part of the Lehigh Valley Railroad. The length of this line from Black Creek (6 miles west of Penn Haven on the Honey Brook Branch,) to Mount Carmel is 40 miles, and including second track, sidings and short branches, has an equivalent single track of 60.75 miles.

The Lehigh Valley Railroad is one of the three great coal railroads of Pennsylvania, the Reading and Lehigh Coal and Navigation Railroads being the other two. The connections of the Lehigh Valley R. R. are numerous and important. At Phillipsburg it connects with the N. J. Central and the Morris and Essex Railroads running toward New York and the Belvidere Delaware Railroad, which follows the course of the Delaware north to the Water Gap and south to Trenton; also with the Morris Canal. At Bethlehem 12 miles west of Phillipsburg, the Bethlehem Railroad (building) will join it; and in the same town it connects with the North Pennsylvania Railroad to Philadelphia 55 miles; at Allentown it gives off the East Pennsylvania, and at Catasauqua it receives the Catasauqua and Foglesville Railroad; while at and above Mauch Chunk it receives several mine railroads. At its present northern terminus (White Haven,) the main line connects with the Lehigh and Susquehanna Railroad, the latter owned by the Lehigh Coal and Navigation Company.

The extension of the road into Wyoming Valley, and a connection with the railroads (existing and projected,) of western New York has long been a prominent feature in the policy of the Lehigh Valley Company. To this end they are now constructing a railroad from White Haven northward. The extension to Sugar Notch 27 miles, was put under contract in November, 1865, and since March, 1866, the work has been carried on steadily and vigorously. In September, 1866, a further extension of the line to Mill Creek (6½ miles,) two and a half miles above Wilkesbarre was let, and immediately commenced. The connection with Wilkesbarre was to be completed this summer, and probably will be. The Plymouth Railroad and Coal Company have completed their bridge across the Susquehanna about a mile below Wilkesbarre, and are building their railroad thence to a connection with the Lehigh Valley Railroad at South Wilkesbarre. This will give access to the coal operations of Plymouth and Kingston, and form a connection between the Lehigh Valley Railroad and that of the Lackawanna and Bloomsburg Company.

By an act of the Legislature passed March, 1865, the North Branch Canal Company whose works extend from Wilkesbarre to the New York State Line 105 miles, were authorized to change their title to that of The Pennsylvania and New York Canal and Railroad Company; also to construct a single or double track along and upon or near the towing path or berme bank of their canal. In the stock of this company the Lehigh Valley Railroad Company has acquired a preponderating interest. The company having accepted the rights thus granted, commenced in January last, the work of construction between the eastern terminus of the Barclay Railroad at Towanda and the State line. The line follows the canal to Athens, a distance of 16 miles. At Athens the Chemung River will be crossed upon a bridge 550 feet in length, and thence the line runs between the Chemung and Susquehanna Rivers, a distance of 4 miles to the Erie Railway near Waverly. It is expected that this division of the road will be opened during the current year. But little has been done south of Towanda, but preparations have been commenced, and during the coming winter the work will be prosecuted at such points as cannot be done in the summer without interruption to navigation. At Towanda the Pennsylvania and New York Canal and Railroad will connect with the Barclay Railroad 16 miles in length, extending into the bituminous coal-field of Bradford County. The Erie and Sullivan Railroad Company have located their road from Monroeton on the Barclay Railroad, into the anthracite field of Sullivan County, distant about 35 miles from Towanda, and the work of construction has been commenced.

In the meanwhile the railroad plans to connect the Pennsylvania coal lines with the western New York lines, and Lake Ontario are being developed. The Southern Central Railroad Company have concluded arrangements with the Erie Company for a third rail from Waverly to Owego, from whence the former company will construct an independent line to Fair Haven on the Lake. This line will connect with the New York Central at Auburn, and the Erie Canal at Weedsport.

Mr. Sayre, the Engineer of the Lehigh Valley Company, expresses his opinion "that this line of roads can put either anthracite or bituminous coal on the Erie, the New York Central, the canal, or the lake, cheaper than by any other route now built. The gradients either way are most favorable. Add to this heavy coal tonnage anticipated and sure to come, the products of the farm, of the forest, and of the factories, the merchandize and the travel of the rich and populous district of country through which it passes, and you may readily imagine how long after its completion stockholders will have to wait for dividends."

The equipment owned by the company at the close of 1865–'66, comprises the following:

Engines.....	86	Platform cars	244
Passenger cars.....	19	House cars.....	2
Baggage cars.....	7	Gravel cars.....	40
Express cars	1	Wrecking cars.....	2

—all 8-wheel and coal cars 6,441, reduced to 4-wheel cars. Ten of the engines are old and not relied on for general service. The elongation of the line into the Wyoming Valley will necessitate additional motive power.

The coal business of the railroad has from the first been the main reliance of the company for revenue. The sources of the coal carried on the road in the two last past fiscal years were as follows:

	1864–'65.	1865–'66.
Hazleton Region.....	774,536	864,821
Beaver Meadow.....	441,936	522,231
Mahanoy.....	218,378	322,230
Wyoming.....	251,769	315,443
Miscellaneous	843	12,989
Total in tons.....	1,687,462	2,037,714
—which was delivered as follows:		
At Penn Haven Jctn for canal	87,233	126,475
At Mauch Chunk Canal.....	197,952	179,518
On line, above Mauch Chunk.		336
" at " "		947
" below " "	434,280	635,785
To East Pennsylvania R. R...	8,845	10,050
To North Pennsylvania R.R..	129,695	141,841
To Morris Canal.....	73,965	111,552
To Belvidere Delaware R. R..	218,611	195,016
To Central R. R. of N. Jersey.	536,383	582,774
To Morris and Essex R.R....	498	53,420
Total by canal.....	285,185	305,992
Total by railroad....	1,402,277	1,731,722
Aggregate.....	1,687,462	2,037,714
Tons carried one mile.....	55,190,262	105,058,354

The coal tonnage for the eleven years since the commencement of operations is shown in the following table:

Fiscal years.	Miles Av.	Tons Carried.	Increase Absolute.	Increase per ct.
1855–'56.	46	165,740 00	....	.....
1856–'57.	46	418,235 03	252,495 03	152.34
1857–'58.	46	471,029 10	52,794 07	12.62
1858–'59.	46	577,651 10	106,622 00	22.64
1859–'60.	46	730,641 17	152,990 17	26.48
1860–'61.	46	743,671 18	13,030 01	1.78
1861–'62.	46	882,573 14	138,901 16	18.68
1862–'63.	46	1,195,154 18	312,581 04	35.42
1863–'64.	64	1,295,419 02	100,264 04	8.39
1864–'65.	88	1,402,276 16	106,857 14	20.75
1865–'66.	105	1,731,721 19	329,445 03	23.56

Miscellaneous freight made up principally of iron, iron ore, lumber, oil and merchandize transported in 1865–'66, amounted to 854,394 tons, equal to 11,836,100 tons carried one mile, and being an increase over the previous year of 317,114 tons.

During the same year there were transported, without injury to any, 560,922 passengers, equal to 9,508,967 carried one mile; being an increase over the previous year of 61,226 passengers, equal to 1,161,032 carried one mile.

The progress of the freight and passenger business of the road is seen in the following statement:

Fiscal Years.	Freight Tons.	—Passengers carried— Number.	Mileage.
1855–'56...	48,767	98,697	1,816,034
1856–'57...	.....	128,158	1,960,842
1857–'58...	125,645	117,745	1,698,550
1858–'59...	186,774	121,672	1,931,126
1859–'60...	250,000	158,120½	2,215,682
1860–'61...	275,000	181,086	2,629,410
1861–'62...	420,000	193,246	2,812,980
1862–'63...	447,848	266,235½	3,596,418
1863–'64...	575,232	424,676½	6,490,457
1864–'65...	537,280	499,696	8,347,935
1865–'66...	854,894	560,922½	9,508,967

The financial results from operating the road since its first opening are stated in the following tables:

The following shows the gross earnings—

Years.	Coal.	Freight.	Pass.	Total.
1855–'56.	$154,286	$20,931	$67,295	$242,513
1856–'57.	340,357	29,281	71,549	441,187
1857–'58.	338,799	42,178	61,067	442,044
1858–'59.	391,766	65,938	68,162	525,866
1859–'60.	514,530	86,840	78,538	679,908
1860–'61.	521,308	97,495	82,119	700,922
1861–'62.	597,498	135,059	89,470	822,927
1862–'63.	1,075,545	176,081	118,449	1,370,085
1863–'64.	1,898,118	284,366	213,925	2,396,409
1864–'65.	2,513,701	411,453	304,384	3,229,538
1865–'66.	2,780,263	586,605	344,706	3,711,574

The total gross earnings, the operating expenses and net profits, with the rate of dividends paid on stock are shown in the following:

Years.	Gross Earnings.	Expenses.	Profits.	Divi-d'ds.
1855–'56..	$242,513	$153,815	$88,698	6
1856–'57..	441,187	172,462	268,725	6
1857–'58..	442,044	194,673	247,371	6
1858–'59..	525,866	211,971	313,895	6
1859–'60..	679,908	337,869	342,039	12
1860–'61..	700,922	351,018	349,904	6
1861–'62..	822,927	362,411	460,516	8
1862–'63..	1,370,085	589,099	780,976	10
1863–'64..	2,396,469	1,005,135	1,391,274	20
1864–'65..	3,229,538	1,364,456	1,865,082	10
1865–'66..	3,711,574	1,748,569	1,963,005	20

The company have been very remiss in stating their financial condition. It is very seldom indeed that a balance sheet has been published, and hence the meagreness of the following table, which gives so far as we have been able to collect the progress of the capital account from year to year:

	Share Capital.	Funded Debt.	Total Capital.	Cost of Road.	Miles Open.	Cost p. m.
1856	$---- ----	$---- ----	$---- ----	$3,000,000	46	$65,217
1857	1,794,500	1,278,000	3,072,500	3,200,000	46	69,564
1858	---- ----	---- ----	---- ----	3,400,000	46	73,932
1859	1,966,350	1,417,000	3,383,350	3,596,724	46	78,208
1860	2,107,900	1,465,000	3,572,900	3,687,533	46	80,168
1861	2,263,350	1,465,000	3,728,350	3,738,601	46	81,274
1862	2,297,250	1,465,000	3,762,250	3,927,385	46	85,378
1863	2,652,395	1,465,000	4,117,395	4,491,230	46	97,635
1864	6,634,650	1,477,000	8,111,650	9,173,116	88	104,239
1865	6,634,650	1,477,000	8,111,650	9,841,594	88	111,836
1866	10,731,400	1,477,000	12,208,400	12,994,222	128	101,517

A portion of the above table is taken from the annual report to the State Auditor, and applies to the 31st October, instead of the 30th November. The following is a statement of the capital account as it stood on the 30th November, 1866:

212,455	shares common stock at $50	$10,622,750
2,173	" preferred " "	108,650
214,628	shares common and preferred.	$10,731,400
Mortgage bonds, due May, 1873.....		1,477,000
Total capital (stock and bonds)..		$12,208,400

Of the above named stock 26,462 shares, or $1,323,100 were issued for the roads now being constructed north of White Haven into the Wyoming Valley. This addition was equal to 20 per cent. on the stock standing on the books at the close of the previous year. In the same year there was also issued a 10 per cent. stock dividend on the common shares, which increase the capital by $663,465.

The bonds of the company bear date May 1, 1853, and are payable May 1, 1873; interest payable May 1, and November 1. The mortgage provided for an issue of $1,500,000.

The officers of the company for 1867, elected January 14 of the same year, are as follows:

President.—WILLIAM W. LONGSTRETH.

Directors.—Asa Packer, John Taylor Johnston, William H. Gatzmer, J. Gillingham Fell, Elisha A. Packer, Ashbel Welch, John N. Hutchinson, Edward H. Trotter, David Thomas, Josiah O. Stearns, Joseph H. Dulles and Charles Hartshorne.

Secretary and Treasurer.—L. CHAMBERLAIN.

Engineer and Sup't.—R. H. SAYRE.

Huron and Ontario Ship Canal.

We learn from the *Canadian News* that Mr. F. C. Capreol, whose name is so well known in connection with this enteprise, and for his unwearied endeavors to secure its being undertaken, has arrived in England to submit a scheme to certain English capitalists, and, if possible, to induce them to subscribe the balance of the stock required to be taken up. It has already been announced that American capitalists—chiefly men of Pennsylvania, of wealth and standing—have guaranteed to take twenty millions of dollars or one-half of the capital stock of the company, on condition that the other twenty millions should be taken up in England or elsewhere, and this is the object of Mr. Capreol's mission.

We will proceed to give in brief the plan for building a ship canal to join the waters of Lake Huron and Lake Ontario. It is proposed to construct the canal from Nottawasaga Bay, where the river of the same name falls into the Georgian Bay, following the course of the river (which, when cleared of obstructions, will it is said, be of sufficient depth) for some distance; thence by a cutting to Lake Simcoe, which is to be the feeder of the canal, and in which, with a little dredging, there is clear navigation for 24 miles; thence through the Holland Marsh, to and along the valley of the Humber, to a point a few miles distant from Toronto. The total distance from lake to lake is 100 miles; height to be overcome 600 feet—being 130 feet rise from Huron to Simcoe, and 470 feet fall from Simcoe to Ontario. The number of locks is to be 42, of a uniform capacity of 250 feet in length and 36 feet in width, with 13 feet of water on the sills at the lowest stage. The engineering difficulties are very great, but, according to Mr. Capreol, not insurmountable. One of the most formidable is a cutting of nine miles through the "Ridge" at the summit level of an average depth of 80 feet and of 198 feet at the highest point; and in the estimates large sums are appropriated to overcome the obstacle. The estimated expense of the undertaking is $35,989,800, the balance of the $40,000,000 being set aside for the payment of interest while the works are being carried on.

☞ The work of rebuilding the Manassas Gap Railroad is progressing rapidly, about 300 hands are employed. The rails are being laid between Piedmont and Markham, and the track graded and readjusted to the summit of the Blue Ridge.

Memphis and Savannah Railroad.

Col. C. B. Harkie, with his efficient corps of Engineers, is just in from a survey of the line of this road. They began the survey at a point on the Tennessee River near Tuscumbia, at the foot of the Muscle Shoals, and ran the line through the mountainous district of North Alabama and Childersburg, on the Alabama and Tennessee River Railroad. From Childersburg to Opelika the survey had been made, and the line of the road established before the war. So the report of Col. Harkie, to be submitted to the meeting of stockholders, in this place on the third Monday in August, will be highly interesting, as showing the length of the line when established, the necessary cost of the construction—the character and value of the country penetrated—its value for agriculture and manufacturing purposes. Col. Harkie assures us that the grades and curvatures of the road will compare favorably with those of any line of road passing through the same mountain range, and that the Memphis and Savannah, from its relations to commerce, and from its advantageous grades, bids fair to be the great thoroughfare of North Western and South Eastern trade.—*Opelika Recorder.*

Eastern Shore Railroads.

It is stated in the Wilmington *Commercial* that Gen. Tilghman, President of the Maryland and Delaware Railroad, has contracted for sufficient iron to finish laying the track of this road from Greensboro', the present terminus, to Easton. He expects that the track will be laid to Easton by Christmas. Easton is twenty miles from Greensboro', and 44 miles from Clayton, the present terminus of the road. The Kent County Railroad is now being located, and in anticipation of its speedy completion the Delaware Railroad Company are putting up a large, new locomotive turntable at Townsend, Del., which has been finally fixed upon as the northern terminus of the road. The Maryland part of the Dorchester and Delaware Railroad, from Cambridge to the Delaware State line, has been located. The Delaware part of the road is to be built by the Delaware Railroad Company. The engineers will commence at Seaford this week.

Canal around the Des Moines Rapids.

The contract for the construction of the National Canal around the Des Moines Rapids, on the Mississippi River, at Davenport, Iowa, has been let to Messrs. Hamighan & Son, of Mt. Vernon, Ohio, for $711,000. This is considerably less than the Government estimates. The contractors will commence immediately the removal of the rock from the Rock Island Rapids, as the water has now sufficiently subsided to enable them to begin operations. They will use a ponderous chisel weighing 8,000 pounds which will be let drop from a height of thirty feet. The work of excavating the canal will be commenced forthwith, and be pushed to completion with energy and celerity. This improvement will be of immense benefit to the navigation of the Mississippi River.

Western Railroad.

At a meeting of the directors of the Western Railroad corporation in Boston, on the 4th inst., it was

Voted, That the Treasurer be authorized to continue the transfer of stock until the organization of the Boston and Albany R.R. Co., in all cases in which the seller shall add to the usual form of transfer a clause conveying to the purchaser all rights to which he may be entitled under the act passed May 24, 1867, including the right to any moneys that may be awarded by commissioners to equalize the stock.

The Alexandria Aqueduct to be Rebuilt.

The Aqueduct at Georgetown over the Potomac River connecting the Chesapeake and Ohio Canal with the Alexandria Canal became so dilapidated during the war, when it was used by the Government as a roadway, that all the repairs which were put on it last winter by the lessees, Messrs. Wells, Dungan and Quigley, were not sufficient to keep it in running order during this season. In consequence of this the lessees determined to build a new aqueduct of sufficient strength and durability to insure against accident. In order to do so they have, with the consent of the President and Directors of the Alexandria Canal Company, associated with them in the lease by which they hold the use and possession of the canal property the following persons, viz: Messrs. James Skyes, Henry A. Chadwick, Henry S. McComb, Leon E. Higby and others. The lessees were also authorized to borrow $60,000 to be used in part payment for constructing the new aqueduct. Sixty bonds of $1,000 each will be issued for the amount, and a contract has been entered into with Messrs. A. B. Burton & Co., of Philadelphia, for the construction of the work, which is to be placed on the present piers. The work is to be commenced at once and pushed forward with all possible speed, in order to have it ready for use upon the opening of the spring trade. The contract requires the completion of the work by the 10th of March, but it is confidently expected that it will be ready by the middle of February.

Louisville, Cincinnati and Lexington Railroads.

The Louisville and Frankfort Railroad, extending from Louisville to Frankfort, 65 miles, and the Lexington and Frankfort Railroad, extending from Frankfort to Lexington, 29 miles—together, 94 miles—are now, and have been for a number of years, operated as one road under the control of an executive committee composed of six persons, of whom four were chosen by the Louisville and two by the Lexington Company, and the earnings and expenses divided between them in the proportions of 65 parts to the former and 29 parts to the latter company. These roads, in their united capacity, are now known as the "*Louisville, Cincinnati and Lexington Railroads.*"

The receipts from the joint operations of these roads for the years ending June 30, 1866 and 1867, have been as follows:

	1865–'66.	1866–'67.
From passengers	$354,422 21	$282,401 87
" Governm't troops	20,069 95	1,410 77
" freight	151,191 41	201,565 50
" Governm't stores,	14,116 21	572 42
" express	11,338 88	12,881 65
" telegraph	1,036 45	1,249 74
" mails	9,400 00	9,400 00
" miscellaneous	1,226 53	837 07
	$562,801 69	$510,319 02
Expenses, viz:		
Conducting transp.	$66,349 38	$83,222 14
Motive power	104,618 38	98,585 62
Maintenance of way	157,169 47	122,901 88
" cars	52,584 76	41,415 68
General expenses	22,974 15	10,976 58
	$403,696 14	$357,101 90
Earnings less expenses.	$159,105 55	$153,217 12

Compared with the previous year, the gross earnings of 1866–'67, show a decrease of $52,482 67, with a decrease in expenses of $46,594 24—making the decrease in net earnings $5,888 43.

The receipts and expenses of the Louisville, Cincinnati and Lexington Railroads, from all sources, for the year ending June 30, 1867, have been as follows:

Receipts.

Supplies on hand, July 1, 1866	$114,640 88
Transportation receipts, as above	510,319 02
Receipts from sales of 833 1st mortgage bonds	833,000 00

The following statement will show the receipts and expenditures of these roads for the last ten years:

	Gross Receipts.	Current Expenses.	Net Earnings.
1857–'58	$374,211 25	$204,752 06	$169,459 19
1858–'59	388,233 40	210,142 14	178,091 26
1859–'60	390,377 17	211,234 13	179,143 04
1860–'61	354,855 27	212,907 70	141,947 57
1861–'62	258,237 25	169,022 20	89,215 05
1862–'63	322,228 93	188,271 90	133,957 13
1863–'64	439,340 47	234,608 89	204,731 58
1864–'65	609,525 33	411,186 56	198,338 77
1865–'66	562,801 69	403,696 14	159,105 55
1866–'67	510,319 02	357,101 90	153,217 12
Average	$421,012 97	$260,292 36	$160,720 61

It will be observed that the gross receipts for the year 1859–'60, were the largest in the history of the companies previous to the war. During the first years of the war the decrease was rapid, till in 1861–'62, the passenger business was only 54 per cent., and the gross earnings 34 per cent. of those in 1859–'60. In the two succeeding years, the increase was so large as to swell the gross earnings of 1864–'65, to 54 per cent. over those of 1859–'60, and to more than double those of 1861–'62. The business of the present year, though 16 per cent. below the earnings of 1864–'65, (the largest yet attained,) are still 30 per cent. greater than for the year 1859–'60. The President, in his Report, says:

An act of the General Assembly of Kentucky, approved January 19, 1867, provides that "the Louisville and Frankfort and Lexington and Frankfort Railroad Companies, in their united capacity, shall be known as the Louisville, Cincinnati and Lexington Railroads, and by that name may sue and be sued, contract and be contracted with, touching all their joint business and undertakings."

As it seems that the stockholders themselves do not clearly comprehend the relations of the two companies as affected by the assumption of a new name and the undertaking of a new enterprise, it is proper that a succinct explanation of the whole matter be now given them.

On the 30th of March, 1859, the Louisville and Frankfort Railroad Company (owners of the railroad from Louisville to Frankfort, sixty-five miles in length,) and the Lexington and Frankfort Railroad Company (owners of the railroad between Lexington and Frankfort, twenty-nine miles in length,) entered into an agreement, whereby it was provided that the whole road from Louisville to Lexington should be run as one road, under the control of an Executive Committee of six persons, four of whom should be chosen by the Directors of the Louisville and Frankfort, and two by the Directors of the Lexington and Frankfort Railroad Company. It was further provided that the receipts and expenditures of the road should be apportioned between the two companies in the ratio of 65 parts to the Louisville and 29 parts to the Lexington company, and the agreement was made indissoluble unless by the consent of the stockholders of both companies.

An act of the General Assembly, approved February 2, 1866, authorized the united companies "to construct a branch railroad from some point on the line of their railroads above Lagrange to the Ohio River, at or near the cities of Covington or Newport." In order to raise money to build the branch, the two companies were authorized to issue and sell their *joint* bonds to an extent not exceeding three millions of dollars, bearing interest at a rate not exceeding seven per cent., and to secure the payment of the principal and interest of the same by a deed of trust upon their railroads and branch railroads. The Lexington company was authorized to increase its capital stock by an addittonal issue of $300,000, and the Louisville company by a similar issue of $700,000. The two companies were declared to be the joint owners of the branch in the proportion fixed by their operating agreement, and the entire management and control of the branch during its construction and after its completion was vested in the Executive Committee.

The act of January 19, 1867, which has already been referred to, provides that the additional stock authorized by the last recited act, instead of being issued as the stock of the separate companies, may be issued as the joint stock of the two companies, upon which dividends may be guaranteed to an extent not exceeding ten per cent. per annum.

It thus appears that while each company retains its separate organization, the two companies, under the firm name of the Louisville, Cincinnati and Lexington Railroads, are partners in operating the railroad from Louisville to Lexington, and joint owners of the Cincinnati branch, to be built with moneys raised on their joint credit. Both lines will be operated under the direction of the Executive Committee, and the entire profits of both will be divided between the two companies in the ratio of 65 to 29.

It is easy to see that this organization is cumbrous, and would be greatly simplified by a consolidation of the stock of the two companies. Hitherto this has not been practicable from the fact that there has always been a material difference in the *market* value of the two stocks, though

their ultimate intrinsic value was very nearly the same. The difficulty will rapidly disappear with the extinguishment of the separate debts of the two companies. The interests of the two are becoming so intimately blended that it can not be long before the present connection between them must give place to one of simpler form.

At the date of our last Annual Report the surveys and estimates for the Cincinnati Branch had just been completed, and were then submitted to you. On the 28th day of September it was determined by the committee not to enter upon the construction of the Branch until at least one million and a half of the mortgage bonds should be subscribed for by responsible parties. It was not thought proper to offer at once the whole issue authorized by the act of February 2, 1866, for these reasons:

1. As the work would require two years for its completion, there would be a considerable loss of interest if the whole sum should be borrowed so far in advance of your wants.

2. The current profits of your road in operation were already more than sufficient to pay the interest on a million and a half of bonds, which would thus be perfectly secure in their payment without reference to the Branch.

3. And the expenditure of the proceeds of the first issue in completing the grading and masonry of the Branch would give us a large additional basis of credit, and thereby enhance the value of the remaining issue when required to be made.

In pursuance of the resolutions referred to, subscriptions were invited, and on the 7th day of December the whole amount asked for had been subscribed by citizens of Kentucky alone, at the price of 85 cents to the dollar. The promptness with which so large a subscription was made, while it was yet uncertain whether the bonds would ever be issued, indicates the confidence felt in your enterprise by those who were best acquainted with its merits.

On the 1st of January, 1867, a deed of trust was executed by the proper officers of each company, conveying to Dr. Norvin Green (who was one of the largest subscribers for our bonds) all the property and franchises then held or thereafter to be acquired by the joint companies, or either of them, in trust, to secure the payment of the principal and interest of three thousand bonds, of $1,000 each, issued or to be issued under it.

Eight hundred and sixty-three bonds had been paid for on the 30th of June last. The amount received, together with the interest accrued to the several dates of payment, has been $712,820 14. Reserving so much as was needed for our immediate purposes, the remainder of this sum has been temporarily invested in government securities, and loans secured by abundant collaterals.

On the 11th day of January, 1867, the Branch was finally located, by resolutions of the committee, on the "Legrange and Mill Creek route," and on the 19th of February the grading and masonry, with the exception of a few light sections, was put under contract. The work has since been steadily prosecuted.

At the end of the fiscal year, it became a question whether the earnings of the last six months should be divided as usual, or applied to the construction of the Cincinnati Branch. On the one hand, there was manifest hardship in refusing to the stockholders any present enjoyment of the profits of their roads, and on the other it seemed unwise to pay dividends in money while continuing to borrow. The difficulty was reconciled by issuing to each company an amount of the preferred stock of the Louisville, Cincinnati and Lexington Railroads equal to three per cent. on its own capital. Each company then declared a dividend of three per cent., payable to its stockholders in the stock thus issued, and bearing nine per cent. interest per annum. Those of the stockholders who preferred the money have found no difficulty in disposing of the preferred stock at par. It is proposed to continue this system of dividends during the construction of the Branch.

It has hitherto been customary to submit to the stockholders of each company a separate report of its condition. The affairs of the two are now so closely interwoven as to make it unnecessary to do more than furnish with these reports the balance-sheets of the general ledgers, and the profit and loss account of each. The most material changes to be noted in them are that the debt of the Louisville Company has been reduced by the sum of $25,000, and that of the Lexington Company by the sum of $16,000, paid during the year. Excluding their joint engagements entered into on account of the Cincinnati Branch, which have already been fully explained, the general condition may be stated as follows:

The capital stocks of the two companies are	$1,624,240 82
Their mortgage debts	283,000 00
Debts not secured by mortgage	74,519 50
Cost of the road from Lexington to Louisville	2,186,910 36

The revenue from your roads is ample to meet the interest accruing on the Cincinnati Branch bonds during the time occupied in construction. When that Branch shall be completed, you will be the owners of 174 miles of road, upon which will have been expended over six millions of dollars. The entire mortgage debt will then but slightly exceed half that sum. So that neither before nor after can any reasonable doubt be entertained of your ability to meet with promptness every liability which you may have incurred.

The equipment of the road consists of 14 locomotives, 13 passenger cars, 5 baggage, 24 house, 50 stock, 24 open, 51 platform, 18 construction, 20 ballast, 32 hand and dump, and 1 boarding car.

The number of miles run by locomotives with passenger trains was 143,889; with freight trains 79,764; with distributing trains, 24,668—total miles run, 248,321; against 239,626 miles in 1866, and 236,061 in 1865. Cost per mile for repairs, 7.42 cents. Cost of fuel per mile run, 23.88 cents. Total cost per mile run, 42.28 cents.

Number of passengers carried, 279,466. Number carried one mile, 7,157,723. Average number of miles traveled by each passenger, 25.61. Earnings per passenger carried one mile, 3.96 cents. Earnings per mile run by passenger trains, 224.20 cents. Number of tons of freight hauled, 64,432; do., hauled one mile, 3,852,328. Earnings per ton of freight hauled one mile, 5.25 cents; do,, per mile run by freight trains, 297.42 cents. Total earnings per train mile, 249.54 cents.

The total mileage of passengers for 1866-'67 was 7,157,723, and for 1859-'60, 6,203,202, an increase of 15 per cent., while the earnings are 33 per cent. greater than 1859-'60, in consequence of the difference of rate charged, being 3.42 cents, per mile in 1859-60, and 3.96 cents, in 1866-'67. The increase in number of passengers has been large between nearly all stations except Lexington and Louisville, where a loss is sustained of 30 per cent. The freight earnings exceeds those of 1859-'60, 22 per cent., though the tonnage is about equal, the difference being due to an increase of 20 per cent. in the rate charged per ton per mile.

Inter-Colonial Railway Route.

We notice that several of our cotemporaries, including the Montreal *Trade Review*, confound the "Western" with the "Frontier" route. The Western line, as recently defined, is Frontier from River du-Loup to Grand Falls, then diverges to the interior by a route explored by Mr. Buck in 1861, following this across the Tobique river to the N. W. Branch of the Miramichi river, and along same to the Central line by Mr. Fleming thence along this to the Keswick summit, and then by the Keswick valley to the main river, and thence across the river somewhere most practicable, and never yet mentioned by any one, and thence along the Fredericton Branch and Western Extension to St. John. This is said to be the shortest line to St. John, but it nevertheless entails a work of great magnitude and cost, viz: the bridging of the river at Fredericton; but then the St. Lawrence has been spanned at a cost of ten millions of dollars, and why not the St. John, at one half the scale, to favor the Fredericton branch. —*St. Andrews Standard.*

Boston, Hartford and Erie Railroad.

The Webster *Times* says that the work of gravelling the road between East Thompson and Mechanicsville is nearly completed. Workmen will commence immediately to build a turn-table and a brick engine house at the junction of the Southbridge branch with the main road, at East Thompson, with accommodations for three engines. When the main road is re-opened the through train from Boston will run over it, and the Webster and Southbridge branch will be used only as a branch, its engines stopping at East Thompson. It is expected these changes will take place next month, and in October a boat train will run on the main Boston, Hartford and Erie Railroad, connecting with the Norwich and Worcester boat train, at Mechanicsville.

Albany and Susquehanna Railroad.

At the election for directors of this company held in Albany on the 3d inst., the following gentlemen were chosen: Joseph H. Ramsey, Jacob Leonard, Peter Cagger, Jeremiah Austin, Albany; Minard Harder, Cobleskill; John Westover, Richmondville; John Cook, Worcester; Jared Goodyear, Colliersville; Eliakim R. Ford, Oneonta; Samuel North, Unadilla; Ira E. Sherman, Sidney; Alonzo Everts, Binghamton; Daniel Drew, New York.

At a subsequent meeting of the directors, Joseph H. Ramsey, Esq., was elected President, and Jared Goodyear, Vice President.

Toronto, Grey and Bruce Railroad.

Notice is given in the Canada *Gazette* that application will be made to the Legislature of Ontario, at its next session, for an act to incorporate the Toronto, Grey, and Bruce Railway Co., and to empower it to construct a railway from Toronto to Orangeville, thence to Mount Forrest, and thence through the county of Bruce to some point on Lake Huron; also to empower the company to construct a railway from Mount Forrest, or from some other point of the above mentioned line, to Owen Sound, county of Grey.

Holland's Permanent Way.

In England, and on the Continent of Europe, great attention is being paid to improving the condition of the railroads by the construction of a permanent way not liable to decay, displacement, or breakage. The subject is also very properly assuming some importance in this country. In time, it is confidently believed, our present system of cheaply laid and rapidly decaying roads will be

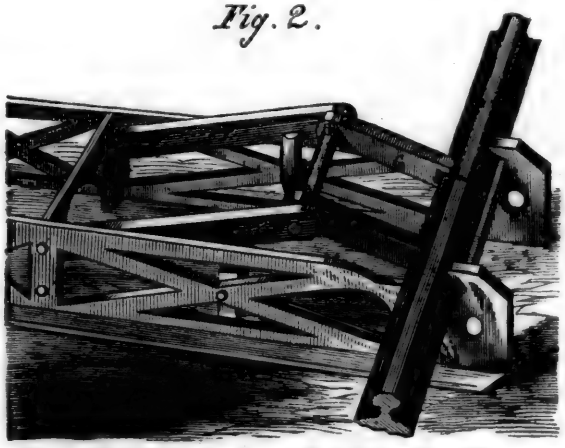

Fig. 1.

superseded by others of an enduring character. The engraving represents an attempt of this sort, which was patented July 16, 1867, by Robert M. Holland, of Philadelphia.

Fig. 1 presents a view of a sleeper with the iron attachment for securing the rails in place, and Fig. 2 a girder to be used at cuts, culverts, etc. The sleeper A, may be of wood, as usual, having the castings secured to the top, or it may be wholly of iron with a broad base. A central rib, B,

Fig. 2.

rises from the plate between the rails, having, at a proper distance from each rail, a pivot projecting from each side with which engage links, C, on either side of the rib. These links are pivoted to blocks formed with upper and lower flanges, and shaped so as to accurately fit the side of the rail. The ends of the plate are similarly formed, as at D. It will be seen that when the links are pressed down into position the rail, or the ends of two rails, will be held with great steadiness. To give perfect security a key is passed through a slot in the links and the rib and turned partially around, so the heads may stand across the slot. The key is removed at C, and is seen lying on the ground as at E. It is not believed, however, that this key is absolutely necessary to retain the block and links in position. At one end of the sleeper, Fig. 1, the links are seen raised so that the rail can be removed or seated, and at the other end they are locked.

Fig. 2 is a frame or girder of cast iron showing the rails in place. The links and blocks, F and G, are shown quite distinctly. It is evident that with these devices no spikes are necessary to fasten the rails, nor are any chairs required to hold their ends. The labor of laying and repairing tracks will thus be materially reduced.

We do not limit ourselves to its mode of construction in any particular.

Further information may be obtained by addressing Leonard Repsher, Camden, N. J.

Railroads in Maine.

The Kennebec *Journal* says that work on all the railroad extensions is going forward with a good degree of energy. The President of the Rochester road thinks the entire route will be open by December. Railroad iron has been received at Portland for the Oxford Central extension road to Hartford. The Dexter and Newport road is in a forward state, as is the European and North American road. The surveyors are at work on the Belfast and Moosehead Lake route, and we presume there will be little delay on the Knox and Lincoln Railroad, now that differences are settled. Maine will show a considerable increase in the number of railroads by the next census.

☞ The Winchester (Va.) *Times* is informed that as soon as the terms of sale are agreed upon, and the Winchester and Potomac road passes into the hands of the Baltimore and Ohio Railroad Company, the construction of the Winchester and Salem Railroad will be begun.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to 31st August, inclusive, during the years 1866 and 1867, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1866 ..	136,200	1,763,200	14,900,900	142,300
1867 ..	83,100	498,000	8,838,800	62,000
Dec..	53,100	1,265,200	6,101,100	80,300

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a decrease of 306,140 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of August, in the years indicated:

	1865.	1866.	1867.
Canal opened—	May 1.	May 1.	May 6.
Flour, bbls.....	391,600	136,200	88,100
Wheat, bushels...	4,686,600	1,763,200	498,000
Corn, bushels....	7,554,000	14,080,900	8,838,800
Barley, bushels..	174,800	142,300	62,000
Oats, bushels....	5,311,400	5,286,400	1,983,100
Rye, bushels.....	282,600	616,500	156,500
Malt, bushels....	355,300	224,800	177,900
Beef, bbls.....	7,190	100	.....
Pork, bbls.....	14,350	11	777
Bacon, lbs.....	1,258,100	.....	34,400
Butter, lbs.....	52,500	42,100	20,900
Lard, lbs.....	1,750,400	58,100	620,500
Cheese, lbs.....	2,482,800	465,400	244,600
Wool, lbs.....	341,800	191,800	154,600

Baltimore and Potomac Railroad.

The annual meeting of the stockholders of this company was held at Upper Marlborough Md., on the 4th inst., and the following gentlemen elected directors for the ensuing year: Col. Oden Bowie, Samuel Cox, Wm. D. Bowie, Daniel Clarke, E. G. W. Hall, Eli J. Henkle, and James C. Clarke. At a subsequent meeting of the directors, Col. Oden Bowie was unanimously re-elected President.

The Main Line of the road has been located between Marlborough and the crossing of the Annapolis and Elkridge Railroad; and the Washington Branch between Junction and the Eastern Boundary of the District of Columbia.

Sealed proposals for the graduation and masonry of the above named portions of the road will be received at the office of the Chief Engineer, Col. Geo. Webb, 56 St. Paul street, Baltimore, until the 20th inst. The work will be let in sections, and payments made monthly in currency, as the work progresses. Maps, profiles, etc., will be ready for inspection on the 16th inst.

☞ The following gentlemen have been elected directors of the Chesapeake and Ohio Canal Company: President—Colonel Alfred Spates, of Alleghany county: Directors—Joseph Murray and A. K. Stake, of Washington county; John B. Thomas, of Frederick county; W. Veirs Bonic, of Montgomery county; John H. Barnes, of Baltimore city, and Mr. Pickrell of the District of Columbia.

☞ A party of gentlemen from New York, having procured the right of way, intend building a railroad from Marlboro' Md., to the Patuxent river, at Hill's Landing. Their object is said to be to ship marl, which abounds in great quantities, and of superior quality, in that neighborhood.

American Railroad Journal.

Saturday, September 14, 1867.

Stock Exchange and Money Market.

Money has been in rather more active demand during the week. The speculative call has increased. The mercantile inquiry has been brisker. There have been further important remittances of currency to the interior. Yet the supply of capital in the open market has been quite liberal, fully up to the requirements of borrowers. And though the city banks have been less generous lenders, the offerings through private channels have been sufficiently extensive to prevent any material alteration in rates, which now range on call loans from 3@5 per cent., and on discount, from 5@7, generally from 6@7 per cent. per annum. The U. S. Sub Treasury received more money than it disbursed last week and thus, it gained nearly a million and a half in its cash reserves. The first two days' business, in the current week, it paid out more than it received, and this cut down its balances again. On Wednesday, however, its receipts were in excess of disbursements, and almost a million was added to the cash balances. The aggregate cash balances of the National Treasury, on Monday, were $97,633,910 in coin, and $46,903,000 in currency, which figures show a falling off, since the 1st inst., of $3,629,-110 in coin and $170,075 in currency. The city banks, last week, gained $1,724,874 of legal tender, $696,024 of specie, and $4,289,700 in deposits. Their loans were increased $2,346,898. Their circulation was cut down $6,956. The specie reserve of the banks is now $7,967,619, against $7,455,910 same time last year. The city bank deposits are now $195,182,114, against $225,107,-991 week ending Sept. 8, 1866. The legal tender reserve amounts to $69,657,445, against $90,194,-254 same time last year. The circulation now stands at $33,708,172, against $28,506,288 same time last year. The loans are now $250,224,560, against $268,941,668 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $73,617,897 a day, against a daily average of $64,265,258 the preceding week, and $70,249,439 the week ending with Aug. 24. The current week's exchanges average about $79,000,000 a day.

National Bank notes to the amount of $46,-850 were issued last week, making the total issue to 1,671 banks thus far, $303,836,006, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,755,395, leaving, with the existing 1,648 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $299,080,611. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,660,-000; and for the public deposits, $38,640,522—making a total of $379,189,950. The Treasury Department last week redeemed and destroyed $451,600 of worn and mutilated fractional currency, and issued $453,094 of new.

The Philadelphia Bank movement the past week shows an increase in loans, of $41,765; a decrease of $27,944 in specie; a decrease in legal tenders of $468,251; an increase of $135,-184 in deposits; and an increase of $3,438 in circulation. The Bank Clearings show an increase of $7,851,660, and the balances, an increase of $478,386.

Government revenues were on a more liberal scale, last week, especially in the excise form. The excises, last week, yielded $5,580,384, against $3,675,353 the preceding week; customs at the port of New York $2,984,220, and at the outports, about $950,000 (in coin) more, making the grand total income for the week equal about $11,154,-400 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,-195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $51,000,000.

The U. S. Sub-Treasury receipts, week ending with Sept. 7, were $16,927,245, including $2,894,-220 from customs duties; payments, $15,478,597 balance at the close of the week, $114,214,667 against $112,766,019, at the close of the preceding week, showing an increase of $1,448,648. The

business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,195,979 including $395,189 from customs, and payments, $4,966,969; on Tuesday, receipts, $1,477,754 including $578,856 from customs, and payments, $1,726,390. The balance at the close of business on Tuesday stood at $111,-175,042, against $110,514,354 a week previous.

Gold has been unusually active, during the past week. The speculative element has been quickened into extraordinary activity by the various exciting reports from Washington, most of which reports, by the way, have been subsequently proved to have been utterly groundless. The most potential rumors have been those affecting the Treasury Department, having been generally to the effect that a change in its administration was imminent. These rumors had not a particle of foundation on fact, Mr. McCulloch was not, and is not, likely to be disturbed in his position, notwithstanding the unscrupulous efforts of the politicians here and at Washington, to effect a change. The politicians have abandoned the project, as a fruitless one; but the telegraph has been kept busy in the interest of the Gold Room, in transmitting "the old, old story," of impending cabinet changes, in a variety of forms. The price of gold was carried up on Wednesday to 145⅜@145½, and the market closed firmly and buoyantly under the speculative manipulations. The customs demand has been fair, but there has been very little of an export inquiry. The *Etna* hence for Liverpool on Wednesday took out only $96,500. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $1,517,612. The customs demand for Gold last week, averaged $482,368 a day; thus far, this week, it has been equal to $487,022 a day, or equal to a weekly aggregate of $2,862,130. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $79,366, and from California, $211,662. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $85,989,655, against $96,175,560 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $21,254,518, against $30,397,184 same time last year, showing a decrease this year, of $9,142,666. The exports of specie from this port, last week, were $1,013,959. The total outflow of specie from the port, since Jan. 1, 1867, has been $41,989,922, against $53,-343,422 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,196,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $42,754,765, against $31,352,165 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to August 10, reached $26,822,585, against $29,240,887 same time last year, showing a decrease, in 1867, of $2,418,301.

A rather more active business has been transacted, since our last, in foreign exchange, at somewhat firmer prices. The supply of bills has been less extensive. Bankers' 60 day bills on London closed at 109⅝@110, and on Paris to 5.18¾ @5.15; sight bills on London to 109⅞@110⅜; and on Paris to 5.15@5.12½. The offerings of produce bills have been quite light this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $1,789,059, making the total value of exports since Jan. 1, 1867, $126,767,997, against $137,168,392 same time in the preceding year.

Government securities have been somewhat variable in price, under more liberal offerings of the bonds and notes, and a restricted investment and speculative demand. Within a day or two, the inquiry has improved, influenced in part by the rapid rise and notable buoyancy in gold. Prices close firmly, with an upward tendency. The last debt exhibit erred in making a double charge of matured compound interest notes (amounting to $12,672,730,) against the department. Secretary McCulloch has since issued an official correction of the error, which shows that the net liquidation of debt, in August, was $18,-523,161, and in the two years ending with Sept. 1, 1867, the net liquidation under the honorable Secretary's capable direction, was $264,906,206, or about a tenth of the recognized debt of the country, as it stood two years ago. U. S. sixes of 1881 closed here on Wednesday at 111⅞@112; U. S. Five-twenties of 1862, 114¾@114⅞; U. S. Five-twenties of 1864 at 109⅞@110; U. S. Five-twenties of 1865 at 111¼@111⅜; U. S. Five-twenties of 1865, consolidated, 108@108¼; U. S. Five-twenties of 1867, 108@108¼; U. S. Ten-forties at (ex-September coupon) 99⅞@100, and U. S. Seven-thirties at 107⅛@107⅜. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

October, 1864....119	August, 1865....116
December, 1864..118	September, 1865..115½
May, 1865 117	October, 1865....115

A very buoyant speculation has been developing in the railway and miscellaneous share list, during the past few days. Prices have improved materially in the instance of the more active stocks of the railway share list, under a brisk speculative demand. At the close the market was firm, though less excited.

General business is steadily increasing in volume. The produce trade is quite active. Breadstuffs are dearer, as a rule, on a more animated trade, partly speculative. Provisions are irregular in price, pork closing in favor of buyers. The cotton trade has been very light, and the market quite dull and heavy, with middling grades on Wednesday at 26@27 cents per lb. as extremes. The stock of cotton now here is estimated at about 40,000 bales. The receipts at the port this week, have averaged about 600 bales a day. The receipts during the cotton year, ending Sept. 1, 1867 were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from September 1, to Aug. 31, 1867 were 1,850,014 bales, against 2,066,786 bales the preceding cotton year; exports, 1,553,000 bales, against 1,550,437 bales last year; estimated stock at latest dates, 65,000 bales, against 253,000 bales same time last year. Foreign merchandise has been more sought after, and desirable articles, particularly in the dry goods line, have been held more firmly. The total imports of foreign dry goods, last week, were $2,213,065, and the total amount marketed $2,644,061. The value of foreign merchandise imported last week, was $3,-195,211—making the grand total specie value of last week's imports of dry goods and merchandise, $5,408,276, and since Jan. 1, 1867, $176,586,-334, against $210,222,876 same time in the preceding fiscal year. The ocean freight market has been rather more active, since our last, closing with more firmness with 569 vessels of all classes in port. For Liverpool we quote flour at 1s.@1s. 3d. per bbl.; grain at 2c.@2½d. per bushel; cotton at ⅛d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 28.	Sept. 4.	Sept. 11.
Consols.....	94¾	94⅞	94 9/16
U. S. 5-20's of 1862....	73⅜	73¾	73
U.S. 5-20's of 1865....	71⅞	72¼	..
Erie.....	45½	45¼	44½
Ill. Central.....	77¼	77¼	77

The New York exports, exclusive of specie, for the week ending Sept. 10, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week.....	$3,042,586	$1,789.059
Prev. reported.....	134,125,806	124,978,938
Since January 1.....	$137,168,392	$126,767,997

The balance in the Sub-Treasury on Wednesday was $112,095,323 45.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Del., Lack. and Western 2d mort., 97; Troy, Salem and Rutland 1st mort., 96½; Ohio and Miss. 1st mort., 87; Chicago and Milwaukee 1st mort., 88; Chicago and Northwestern 10s, Equipment bonds, 97½; Joliet and Chicago 1st mort., 104; Great Western 2d mort., 74; Toledo and Wabash S. Holland's Permanent Way.

We give elsewhere a description, with illustrations, of HOLLAND'S NEW METALIC RAILWAY CHAIR AND SLEEPER, which it is claimed far surpasses anything in the market for securing Rails to the Sleeper. These sleepers can be made very light, strong and durable, by making the rib of wrought iron; they are not liable to decay, and have a representative value when worn out, which wood has not. They can be used for the T rail, single faced, or the I rail, doubled faced, which can be used on both sides, making it of great value over the common sleeper to the railroad companies in wear and tear of road. Its advantages are:

1st. It requires no gauging or spikes, being fastened by one movement of the lever bolt, which can be done by any ordinary man with a crowbar, being all the tools required for the laying of the track upon the sleeper.

2d. The repairs to this plan of road will be quite nominal, there being no spikes to work out and rails to jump loose, as the lever bolt holds them very secure and firm in their position.

3d. For military purposes it is always ready. Can be quickly laid down and taken up by soldiers of ordinary capacity.

4th. For durability and wear, it has no equal, being fire proof, and cannot be carried off by floods and other destructive elements.

For further information, address LEONARD REPSHER, Camden, N. J.

New and Improved Steam Car Brake.

IMPORTANT TO RAILROAD COMPANIES AND THE TRAVELING PUBLIC.

We would call the attention of our subscribers and readers to the advertisement of the Loughridge Car Brake Company, regarding their improved steam car brake—the great merits of which are self evident. We do not hesitate to recommend it to railroad companies, being convinced by an examination of the same on the New Jersey Central Railroad where it has been in daily use for over one year, as well as on other roads, where it has been fully tested and found to work satisfactorily.

Not only is the safety of the travelling public made secure, but it also proves to be a great economist to railroads in wear of engine, and prevention of sliding wheels. By the use of this brake railroad companies need not feel any anxiety about inexperienced or careless brakemen as the engine does it all, under the control of the Engineer, (who uses it in every case when he has to stop his train,) and at last they can place the blame, if any arises from bad braking where it belongs. The public are interested in this improved method of braking cars. What they want is to feel secure when traveling by day or night, and this patent brake seems to be just what is needed.

Railroad companies will be doing but justice to the public by giving this brake a fair and impartial trial.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States Aug. 1 and Sept. 1, 1867:

	August 1, 1867.	Sept. 1, 1867.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$198,431,350.00	$198,431,350.00
Six per cent. bonds of 1867 and 1868	14,932,141.80	14,869,791.80
Six per cent. bonds of 1881	283,746,400.00	283,676,100.00
Six per cent. Five-twenty bonds	1,168,796,800.00	1,205,710,500.00
Navy pension fund	13,000,000.00	13,000,000.00
Total	$1,678,906,691.80	$1,715,687,741.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$15,402,000.00	$16,346,000.00
Three-year compound interest notes	108,329,430.00	78,839,600.00
Three-year seven-thirty notes	451,233,425.00	400,786,025.00
Total	$574,964,855.00	$495,971,625.00
Matured debt not presented for payment	15,636,815.87	19,440,375.87
DEBT BEARING NO INTEREST.		
United States notes	$369,164,844.00	$365,164,844.00
Fractional currency	28,554,729.72	29,392,172.97
Gold certificates of deposit	19,457,960.00	15,462,700.00
Total	$417,177,533.72	$410,019,716.97
Total debt	$2,686,685,896.39	$2,641,119,459.64
AMOUNT IN THE TREASURY.		
Coin	$102,905,174.00	$101,263,620.00
Currency	72,474,296.38	47,073,074.59
Total	$175,379,470.38	$148,336,094.59
Amount of debt less cash in the Treasury	$2,511,306,426 01	$2,492,783,365.05

The matured debt not presented for payment, consists of—

Compound interest notes matured June 10th, July 15th and August 15, 1867	$12,672,730 00
Bonds of Texas indemnity	263,000 00
Treasury notes, acts July 17, 1867, and prior thereto	165,311 64
Bonds, April 15, 1842	64,768 68
Treasury notes, March 3, 1863	959,380 00
Temporary loan	5,279,185 55
Certificates of indebtedness	36,000 00
Total, as above	$19,440,375 87

By comparing this with the statement of August 1, it is shown that the debt bearing coin interest has increased $36,781,050; the debt bearing currency interest has decreased $78,993,230; the matured debt not presented for payment has increased $3,803,560, and the debt bearing no interest has decreased $7,157,816 75—making the decrease in the total debt since Aug. 1, 1867, $45,566,436 75. The amount of coin in the Treasury during the same period has decreased $1,641,554, and the amount of currency has decreased $25,401,221 79—leaving the amount of debt less cash in the Treasury on September 1, $18,523,060 96 less than on August 1st.

Railroad Earnings.---Weekly.

The earnings of the Chicago and Northwestern Railroad for 1st week in Sept., 1867 ..$303,602 56
Corresponding week previous year .. 218,050 24

Increase $85,552 26

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Sept. 1867, were $97,212 00
Corresponding week of 1866 .... 97,291 00

Decrease.... .... $79 00

The earnings of the Detroit and Milwaukee Railroad for the week ending September 5, 1867, were $40,574 00
Corresponding week of 1866.... .... 43,013 00

Decrease.... .... $2,439 00

The earnings of the Chicago and Rock Island Railroad for the 1st week in Sept., 1867, were $113,900 00
Corresponding week of previous year..110,812 00

Increase.... .... $3,088 00

The earnings of the Virginia and Tennessee Railroad for the fourth week of Aug., were $29,721, an increase of $16,533 on the same week last year. Total for the fiscal year commencing 1st of July, $143,496, an increase of $44,963 on same time in 1866.

Journal of Railroad Law.

THE RULE AS TO PLAINTIFF'S NEGLIGENCE APPLIED TO THE CASE OF A CHILD SIX YEARS OF AGE.

The case of Honeysburger *vs.* The Second Avenue Railroad Company, just decided by the Court of Appeals of this State, reverses the judgment for plaintiff below, and determines a very important question of law. The plaintiff sued to recover damages sustained by him in consequence of injuries inflicted on his infant son by being run over by one of the defendant's cars. The court held that the well settled rule that the person bringing an action for negligence must be free from contributing to the injury, is as applicable to a child six or seven years of age, who may bring the action, as to an adult plaintiff. And as to the *degree* of care which would be required of the infant to exempt him from the imputation of negligence, there is but one rule on the subject, and it applies to all persons without exception, and makes no discrimination on account of age. It is that degree of care which a person of ordinary prudence would exercise in the situation supposed. The judge in charging the jury on the trial, charged them that in judging what would be negligence on the part of the boy, it was not to be understood that a child of his age (six or seven) was to be held to the same degree of caution, foresight and discretion that would be exacted from an adult. The court above now decide that the charge in this regard was erroneous. The opinion of the court is written by

HOGEBOOM, J.—The charge of the judge, as construed in the light of the evidence must be considered as applied to a child six or seven years of age. So understood, and remembering also the fact that the father, and not the child is the plaintiff in the action, I am of opinion that the charge was erroneous.

Even as applied to the child, if he had been plaintiff, I do not see how such a charge could be sustained, if we adhere to the case of Hartfield *vs.* Roper, 21 Wend. 615, decided five and twenty years ago, and followed in subsequent cases.

In Hartfield *vs.* Roper, the infant himself, a child of about two years of age, was himself the plaintiff, and Justice Cowen speaking of the rule that a negligent party cannot recover damages consequent upon a collision in the highway, says: "the application may seem harsh when made to small children, as they are known to have no personal discretion. Common humanity is alive to their protection but they are not therefore exempt from the legal rule when they bring an action for redress, and there is no other way of enforcing it except by requiring due care at the hands of those to whom the law and the necessity of the case has delegated the exercise of discretion.

An infant is not *sui juris;* he belongs to another, to whom discretion in the care of his person is exclusively confided. That person is keeper and agent for this purpose, and in respect to third person, his act must be deemed the act of the infant, his neglect the infant's neglect."

It is plain in the nature of things, that if an infant insists upon a right of action, he must show a compliance with the conditions on which his right of action is to arise, and this is entirely irrespective of his age.

In Munger *vs.* Tonawanda Railroad Company, (4 Conest. 349) Judge Huebert, in delivering the opinion of the court, while speaking of the general rule that in actions for negligence, the person bringing the action must be free from negligence, remarks as follows: "Lord DENMAN in Lynch *vs.* Nurdin (1 Ad. and Ellis, 29) allowed an exception in favor of plaintiff, a child seven years old, who received an injury, by getting into defendant's cart while it was carelessly left in the street. The decision, however, has not been followed in this state; but the negligence and imprudenceof the parents or guardians, in allowing a child of tender years to be exposed to injury in the highway has been held to furnish the same answer to an action by the child as the negligence or after fault of an adult plaintiff would have done in a similar case." (6 Hill 592.)

In Willetts *vs.* Buffalo and Rochester Railroad Company, 14 Barb. 585. The same rule was applied in the case of a lunatic, who being in company with his father on a railroad train was temporarily left by the latter who stepped off the car to procure refreshments, and during his absence the lunatic being applied to by the conductor for his fare, refused to pay the same, and thereupon was ejected from the car and was run over by another train of cars and killed. If therefore, the infant had been plaintiff, and had been guilty of negligence, he could not recover under the law as it is administered in this State, and if he could not recover, this right of action is no greater than that of the infant would be, for he claims through the infant, and upon the theory that the infant is free from blame. There may be possibly some reason for saying, that as he adopts the act of the infant and seeks to derive benefit from it, he must be considered as in the place of the infant, and responsible for negligence in the same way as if he had been the party injured. But it is not necessary to decide that question. The point then to be determined is what would be the degree of care which would be required of the infant to exempt him from the imputation of negligence, I know of but one rule on the subject as the law is held with us, and I think it applies to all persons without exception, and makes no discrimination on account of age. It is that degree of care which a person of ordinary prudence would exercise in the situation supposed. There is no other safe rule. No other rule would protect the community. An infant of tender years, incapable of exercising requisite discretion, is not to be permitted to occupy the highway, for the purpose of entitling himself to an action for an injury, except upon the condition of being subjected to the consequences of negligence attached to persons in general. Otherwise the tenderer the age, and the less the discretion, the more perfect and frequent the cause of action, because more easily sustained and oftener occurring. Such a rule is not capable of safe practicable enforcement. I think this position is not answered by saying that the charge assumes that the jury should find the plaintiff free from negligence in sending the boy to school unprotected. The defendant asked the court to charge that such act of the father in sending so young a child to school through so crowded a thoroughfare as the streets of New York, without a protector, would be itself negligence. The court refused so to charge and the defendant excepted. But assuming that such conduct might not be subject to the imputation of negligence, that is that a prudent person might send his boy of six years old to school alone, through the streets of New York, it does not follow that this particular act is free from negligence nor such as would be likely to be practiced even by boys of that age, nor does it follow that even for purposes of education, such conduct on the part of the father should not be discouraged, that it is not subject to the condition that if the infant in fact becomes guilty of negligence, and in consequence thereof suffers a personal injury, he is not to take advantage of his own wrong and thereby entitle himself to an action for redress. The charge must be read, I think as speaking of negligence in a general way, in reference to a general practice of sending children of such an age to school, as not censurable, and not as applied to the actual circumstances of the present case, I think the judgment should be reversed and a new trial granted with costs to abide the event.

Western Railroad.

At a special meeting of the directors of this road at Boston on the 4th inst., it was unanimously

"*Voted*, That the stockholders of the Western Railroad Corporation agree to unite and consolidate the same with the Boston and Worcester Railroad Corporation, in accordance with an act passed by the General Court of the Commonwealth of Massachusetts, entitled an act to authorize the extension of the Western Railroad to the City of Boston, and for other purposes."

The President stated that at a recent meeting of the directors of the two roads, a verbal agreement was arrived at by which the business of each road was to be managed separately till the close of the current year, when a new corporation would be organized and go into operation Jan. 1st, 1868. Which corporation should pay the dividend had not been determined. The main difficulty would arise from the attempt to settle the value of the stock of the roads. The Western Railroad property amounts to $11,000,000 in 87,000 shares; that of the Worcester road to $6,000,000 in 50,000 shares. The net earnings of

the former, for three years past, were $1,270,720; of the latter, $504,907. Capitalize these earnings, at 8 per cent., and there results a capital stock for the Western of $15,884,000, for the Worcester of $6,311,347. After deducting all its debts, the Western will have a capital stock of $13,350,880,

A vote, offered by Mr. Stetson, of New Bedford, was passed, giving the directors full powers to agree with the Worcester corporation on terms of consolidation, and authorizing the directors, in case an agreement is not reached, to petition the Supreme Court to appoint Commissioners, in accordance with the act of the last Legislature.

Savannah, Griffin and North Alabama R.R.

This road will be about 170 miles in length commencing at Griffin, Ga., a point on the Macon and Western Railroad, 60 miles west of Macon, and extending thence, *via* Newnan and Jacksonville, to Decatur, Ala., a point on the Memphis and Charleston Railroad, 188 miles east of Memphis.

A meeting of the directors of this company was held at Newnan, Ga., on the 30th ult., at which the contract for the construction and equipment of the road from Griffin to Jacksonville, Ala., about 85 miles, and which had been previously agreed to by a committee of the directors in conjunction with a committee of stockholders appointed for that purpose, was duly sanctioned and approved. The contract is with Messrs. B. F. French and his associates, of this city, represented at the South by Hon. P. C. Wright. The road is to be completed and equipped to Newnan, Ga., about 30 miles, by the 1st of May next; and in the meantime the work is to be pushed vigorously forward beyond that point. Col. R. A. Crawford, of Griffin, Ga., is President of the company.

Merchants' Union Express Co.

Judge Barnard, in the case of Waterbury *vs.* Ross and others of the Executive Committee of the Merchants' Union Express Company, denied the motion by the plaintiff for an injunction and receiver, and dismissed the case, and stated that the Merchants' Union was not only solvent but owed no debts, and had several hundred thousand dollars in the treasury, beside $15,000,000 of unexpended capital.

Savannah and Charleston Railroad.

The work of reconstruction on the line of this road has been completed as far as its junction with the Port Royal Railroad, a half mile west of Yemasse station, at which point, and at all intermediate stations between it and Charleston, passengers and freight are delivered. The passenger fare to Yemasse's is four dollars and fifty cents.

☞ A contract has been made for the rails, bolts and straps to be used in laying the track of the Portland and Rochester Railroad to Alfred from the Saco River, some 14 miles, at $128,000. The rails are to be made at the Portland Rolling Mills.

☞ We learn that Mr. Oakes Ames has taken the contract to build the mountain section of the Pacific Railway, some six hundred miles, receiving therefor over $47,000,000.

☞ Coupons due Nov. 1, 1856, on the bonds of the Chester Valley R. R. Co., will be paid, with interest to July 1, 1867, on presentation at No. 304 Walnut street, Philadelphia.

Louisville and Frankfort and Lexington and Frankfort Railroads.

We give elsewhere a detailed statement of the earnings and expenditures of these roads for the years ending June 30, 1866 and 1867. The following is a recapitulation:

	1865–'66.	1866–'67.
Earnings	$562,801 69	$510,319 02
Expenses	403,696 14	357,101 90
Net	$159,105 55	$153,217 12

These are apportioned to the different roads in the ratio of their mileage, viz: 65 parts to the Louisville and 29 parts to the Lexington company.

The receipts of the Louisville and Frankfort Railroad Company from all sources, including $9,619 98 from the previous year, were $142,480 23; and the disbursements were:

Preferred joint stock dividend	$33,198 80
Cash dividends paid	46,262 10
Redemption of railroad bonds	25,000 00
Interest on bonds, etc.	24,930 40
Taxes, State and National	7,877 62
General expense account	1,929 40
Cash on hand	3,281 91
Total, as above	$142,480 23

The financial condition of the company, June 30, 1867, was as follows:

Capital stock	$1,109,594 40
Railroad bonds (see Bond List)	120,000 00
City of Louisville bonds	100,000 00
Loan from State of Kentucky	74,519 50
Cash dividends unclaimed	7,429 66
Profit and loss	175,379 12
	$1,586,922 68
Construction	$1,532,644 99
Real estate	33,235 10
Bills receivable	6,418 68
Stock in other companies	8,500 00
Cash in New York	2,842 00
Cash on hand	3,281 91
	$1,586,922 68

The receipts of the Lexington and Frankfort Railroad Company from all sources, including $7,243 48 from the previous year, were $68,099 20; and the disbursements were:

Preferred Joint stock dividend	$15,439 38
Cash dividends paid	23,106 35
Railroad bonds redeemed	16,000 00
Interest, taxes, etc	6,080 11
General expense account	287 34
Cash on hand	7,186 02
Total, as above	$68,099 20

The financial condition of the company June 30, 1867, was as follows:

Capital stock	$514,646 42
Railroad bonds (see Bond List)	63,000 00
Cash dividends unpaid	1,789 93
Renewal and contingent fund	35,296 72
Stock profits	66,242 94
Sinking fund	10,000 00
	$690,976 01
Construction	$654,265 37
Real estate	9,255 30
Bills receivable	1,166 44
Bonds receivable	17,000 00
Stock in other companies	1,500 00
Treasurer	602 88
Cash on hand	7,186 02
	$690,976 01

☞ The new president of the New York and New Haven Railroad has for his office a neatly fitted car, and his headquarters are anywhere on the road where his presence is needed.

St. Louis and Iron Mountain Railroad Co.

The St. Louis and Iron Mountain Railroad Co., was organized July 31, 1867, and the following officers were elected for the ensuing year: Thomas Allen, President; Henry G. Marquand, Vice President; L. B. Clark, Treasurer, and William Allen, Secretary. The road from St. Louis to Pilot Knob is now in excellent condition, a distance of eighty-six miles. The extension from Pilot Knob to Belmont, opposite Columbus Ky., a distance of some one hundred and nineteen miles, is partly under contract, and will all be in the process of construction before the 1st of January next. The company hope to have the road completed within the next eighteen months.

The Public Debt.

A clerical error having occurred in the September Public Debt Statement of the Secretary of the Treasury, as published by us last week, we reinsert it entire with the correction. It will be seen that the amount of Three Years' Compound Interest Notes outstanding on the 1st of September was $78,839,600, instead of "$91,512,330," as previously stated; making the reduction of the total debt $45,566,436 75, instead of "$32,893,706 75;" and the amount of debt, less cash in the Treasury, $18,523,060 96, less than on August 1, instead of "$5,850,331 01."

Freight Railroads in the Southern States.

A large and enthusiastic meeting of the citizens of Harris County, Texas, was held at Houston on the 16th of August, for the purpose of founding an "Anti-Monopoly Cheap Freight Railway League." Mr. Peter B. Gray addressed the meeting at considerable length. He advocated the construction of a double track freight railway from Galveston, Texas, to Fort Riley, Kansas, a distance of four hundred miles, the road to be open to everybody who may wish to use his rolling stock on it, at a reasonable compensation.

Eastern of France Railway.

It appears that this company made the following additions to its rolling stock last year:—20 locomotives, 9 tenders, 147 passenger carriages, and 1,858 miscellaneous trucks. The aggregate rolling stock of the company amounted at the close of 1866 to 762 locomotives of various kinds, 682 tenders, 1,962 passenger carriages, and 16,316 goods trucks. The following further plant is expected to be delivered in the course of this year —37 locomotives, 44 tenders, 235 passenger carriages, and 1,600 miscellaneous trucks.

☞ The bridge which the Hartford and New Haven R. R. Co. is building over the Farmington River, at Windsor, is rapidly approaching completion, and will be the finest structure of the kind in New England. It will be 460 feet long and 35 feet above the water.

☞ The Bethlehem Railroad, extending from the Lehigh and Susquehanna Railroad to the Chapmanville State Quarries, is partly laid with rails, and will soon be completed.

☞ Scranton, Penn., has two first class street railroads, and the *Register* says "they both are paying a big dividend."

☞ A railway has been proposed between Calcutta and Darjealing, and the scheme is approved by the Bengal and India Governments.

☞ A dispatch dated London, Sept. 7th, says: Francis Morris, of New York, has concluded here an arrangement with Capt. Pim, of the Royal Navy, looking to the establishment of a new inter-oceanic line across Nicaragua by railroad, connecting with steamers on the lake.

☞ D. C. Linsley, Engineer, will receive proposals at his office in St. Johnsburg, Vt., until noon of Sept. 20th, for the construction of the Montpelier and St. Johnsbury Railroad, between St. Johnsbury and West Danville, Vt.

☞ The Columbus, Tiffin and Toledo (O.,) Railroad Co. has been incorporated with a capital stock of $1,000,000. The line of the road is to pass through Franklin, Delaware, Morrow, Crawford, Seneca, Sandusky, Ottawa, Wood and Lucas Counties.

☞ The Savannah *Republican* mentions the arrival there of the Schooner J. Simpnson, with 550 tons of railroad iron for the Atlantic and Gulf Railroad. Also the Loyal Scranton with 1,131 bars of railroad iron, intended for the Bainbridge Extension.

☞ The August product of the Hancock Copper mine was 41 tons, 685 pounds.

Publish this day a New Edition of the

IRON MANUFACTURE

OF GREAT BRITAIN.

Theoretically and Practically Considered, Including Descriptive Details of the Ores, Fuels, and Fluxes employed, the Preliminary Operation of Calcination, the Blast, Refining, the Puddling Furnaces, Engines, and Machinery, and the various Processes in Union, etc., etc. By W. TRURAN. Second Edition. Revised from the Manuscripts of the late Mr. Truran, by J. ARTHUR PHILLIPS, Author of "A Manual of Metallurgy," and WM. H. DORMAN, C. E. 1 vol., large 8vo. Illustrated with 84 Plates. Price, $10 00.

Mr. Truran's work is really the only one deserving the name of a treatise upon and text-book of the Iron Manufacture of the kingdom. It gives a most comprehensive and minute exposition of present practice, if the term may be applied to iron manufacture as distinguished from strictly professional subjects. The author does not go out of his way to theorize upon how iron should be or may be made, but he describes how it is made in all the iron districts of the kingdom.—*Engineer.* 4t37

FOR SALE

3 LOCOMOTIVES,

4-8 1-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-56 in. Drivers connected. Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,

62 Broadway, New York

LOUGHRIDGE CAR BRAKE COMPANY.

W. LOUGHRIDGE, Pres't. T. B. OAKLEY, Gen'l Sup't. R. S. GRANT, Treas. & Sec.

OFFICE, NO. 33 WALL ST., NEW YORK.

We are now prepared to furnish to Railroad Companies our improved

PATENT STEAM CAR BRAKE

ON MODERATE TERMS. This BRAKE has been practically tested for over one year by the NORTHERN CENTRAL RAILROAD, PENNSYLVANIA CENTRAL, NEW JERSEY CENTRAL, and others, and found to be the BEST AND MOST RELIABLE BRAKE NOW IN USE. By the use of the Patent Steam Brake at least 15 to 20 per cent. is saved in the wear of the Engines and Wheels.

It has the following advantages which show its superority over all other Engine, Hand, or Safety Brakes.

The control of all the Brakes is under the SOLE MANAGEMENT of the Engineer, giving him at once the power to stop his train at pleasure (WITHOUT THE AID OF BRAKEMEN) and when under any rate of speed.

The REGULATION OF THE POWER for the use of brakes on a wet, dry, dewy, or frosted rail, so as TO GRADUATE THE PRESSURE TO THE DEGREE REQUIRED TO MAKE GOOD BRAKING (without leaving his post,) or in case of great danger, to give power enough to make an immediate stop.

The PREVENTION OF SLIDING WHEELS which is a great saving to Railroad Companies.
Economy in time making stops at stations, and its reliability at all times and simplicity of construction.
ITS GREAT SAFE GUARD FOR HUMAN LIFE and the saving of property and stock.

That this Brake, is not a brake to be held in reserve in case of accident, BUT IS USED BY the Engineer in every instance when a stop is required to be made.

It is easily attached to the ordinary Handbrake WITHOUT DISPENSING WITH THE SAME, leaving the handbrake ready for use at any and all times, either to be used simultaneously with the Steam Brake or separately as may be desired or required, and when danger is present the Brakes can be used without the risk of the Brakesmen being crushed at any moment on the platform.

THE ELNATHAN SAMPSON

NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.

Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

MEAD RUBBER COMPANY,

12 Vesey Street, New York.

MANUFACTURERS OF

INDIA RUBBER CAR SPRINGS AND STEAM PACKING.

Our Works being now under the management of a competent Superintendent, we are prepared to offer Springs of various qualities and prices to suit. Our A No. 1 Spring made of fine Para Rubber, and the Compound used by the Patentee, the late Fowler M. Ray, will be found to be cheaper than others made, from inferior stock and offered at lower prices.

Sample setts forwarded on application. All Springs fully warranted.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

EDWARD CLARKE,

STOCK BROKER.

Chesapeake and Lake Erie Railroad.....912, 914

American Railroad Journal.

New York, Saturday, September 21, 1867.

Another Arkansas Railroad.

This is the age of great railroad enterprises, and we are glad to record the fact that the State of Arkansas, so long neglected, and so long oblivious to the spirit of progress which distinguishes her more northern sisters, is arousing from her Rip Van Winkle sleep, and seems about entering upon a new career of prosperity.

The only road now in operation in Arkansas is from Memphis to Little Rock, a distance of 131 miles, which will all be finished and ready for business on the 1st of January next. This will give us access to the heart of the State. But the most beautiful and valuable part of Arkansas lies west and north of Little Rock. In the valley of the Arkansas alone, it is estimated, there is now a population of considerably upwards of 100,000 souls, engaged almost exclusively in agricultural and pastoral pursuits. To penetrate and develop this vast and inviting region, and bring it within the bounds of modern life and civilization, a road has been projected from Little Rock to Fort Smith, a distance of 152 miles. The route was surveyed some years ago, and some work done upon the road, which was interrupted by the late rebellion. The company, however, have recently re-organized under a late act of Congress, and now wish to proceed with the work of construction. They have an endowment of ten sections of land to the mile from the General Government. They also have a considerable grant of lands from the State of Arkansas, and they will also receive, as the grading progresses, $10,000 per mile in eight per cent. bonds of the State. The lands owned by this company have been recently examined, and are known to be rich in minerals, and also to embrace some of the finest agricultural timber lands in the Arkansas Valley. The Indian country, immediately west, is reached by this road. This country is occupied by several of the largest and most highly civilized tribes in the United States, viz: the Cherokees, Creeks, Choctaws, Chickasaws and Seminoles. The wonderful fertility of the soil, the almost Arcadian loveliness of its numerous valleys, its vast prairies and immense forests, and its mild, salubrious and genial climate, to say nothing of its almost fabulous mineral wealth which is everywhere plainly to be seen, mark this wonderful region as the future seat and centre of population, industry and wealth on this continent. This is no overdrawn picture, but will be readily recognized and confirmed by any one who has ever visited this fairest portion of our immense territory.

Mr. J. H. HANEY, the Chief Engineer of the company, is now at the Spingler House in this city, with full authority to contract for the construction of the entire road. He will give all needful information to capitalists and railroad men who may desire to investigate the affairs of the company. The late hasty mineralogical examination of the company's lands has disclosed very astonishing results, and Mr. Haney will exhibit specimens of ores, &c., to those who feel interested.

We believe that no more promising enterprise than this has been presented for many a day, and we are assured by Mr. Haney, that those who have the requisite capital and ability to manage an enterprise of this magnitude can get most liberal terms.

Chicago, Burlington and Quincy Railroad.

The earnings of this road for the years ending April 30, 1866 and 1867, have been as follows:

	1866.	1867.
From freight	$4,204,740 82	$4,124,692 99
" passengers	1,757,387 99	1,543,714 15
" mails, etc	213,424 54	414,730 91
	$6,175,553 35	$6,083,138 05
Expenses, viz:		
Repairs of track	$863,573 46	$845,254 72
" bridges	77,347 01	36,526 10

		1,736,483 23
Leaving balance of income account May 1, 1867, as shown in general account		$1,905,496 00

—exclusive of the amount paid into the sinking fund during the present and all past years. The report says:

The gross earnings of the road, it will be seen, are less than those of the preceding year by $92,415 30, not occasioned however by any diminished amount of business in the aggregate, because that has been much larger than in any former

year, but from the fact that the prices of transportation have been considerably reduced. The aggregate increase of tonnage transported over the road during the year has been very great. In corn the increase has been 109,252,105 pounds. In hogs the increase in numbers has been 49,579. In cattle the increase has been 19,271. There was no falling off, but rather a general increase, in the quantities of other articles of transportation. The business of the year therefore, though not proportionably profitable to the company, is equally striking as a proof of the general progress of the West as it has been in any former year. It was unequaled even during the greatest activity of the busiest year of the war, when the immense expenditures of the Government stimulated every species of business into the utmost life. Had it been possible, therefore, or rather, had it been expedient, to have exacted for transportation prices as high as they were during the last year of the war, and the year after, the gross revenues of the company would have exceeded those of the preceding year by a large amount. This however was hardly possible and certainly not expedient. It has been thought wise by the officers having charge of the road, as it has been easy to do, so to regulate the rates, that while they may be sufficiently remunerative to stockholders, there should be no fair or just grounds of complaint on the part of the public.

In the passenger business there has been a falling off from that of the former year of $213,673 84. This is partly owing to the fact that there was considerable military travel at the close of the war, and perhaps entirely so. Though there was much other travel growing out of the then state of things which has ceased, as the country has generally subsided into peace. In freight there has been a nominal falling off in revenue of $80,047 83. This however is not real, as much freight is now carried by express companies which has before been carried by the road as the business of the railroad company. This freight so carried is represented under the head of miscellaneous business, which has increased during the year $201,306 37.

It may be remarked in this connection that it ought not to be long before there shall be a general change of policy by railway companies toward the express companies. These latter are absorbing the business of transporting freight, which is the legitimate business of the railroad, instead of doing the proper business of the express, which is to carry packages and small valuable parcels. Large masses of freight are now put into cars connected with passenger trains to the detriment of the freight business of the road itself, and to the great annoyance of the passenger trains. Express companies are by this means, and to the actual injury of the railroad companies, absorbing much of the revenues which should go into the Treasury of the latter. The same remarks are applicable to all fast freight lines in control of private companies and running over the railway lines. It is however only of the express companies proper that we speak upon our road, as there are no fast freight lines there not in the control of the company itself. The express and despatch companies, however, so called, send much freight over this and other roads in a fast freight line established by the railroad companies themselves, a method less obnoxious than in the case where private companies establish lines themselves, own their cars and run them over the railways. All these methods of carrying freight are, however, objectionable. The freight business should be done by the railway companies themselves. They can establish fast lines, charging a higher freight by these lines, and they and they alone should receive the profits of transportation on their roads. The mischief is becoming one of enormous magnitude, and involves, to a considerable extent, the value of railway property itself, as well as the character of its management. It is to be hoped that soon the railway companies may be able to devise some means, not only to prevent a further absorption of their proper business by express and other companies, which are really parasites of railway property, but may do away altogether with the present mode of transporting freight by these companies.

The operating expenses of the road have not materially varied in the past two years. In the last year they were fifty and eighty hundredths per cent. of the earnings if taxes be excluded, and fifty-three and ninety-four hundredths if taxes be taken as a part of those expenses. This proportion of the expenses to the gross earnings is quite satisfactory, when it is considered that while earnings are about the same as in the former year, the amount of freight tonnage from which these earnings have been derived is so greatly in excess of that of last year—an excess in tons amounting to upwards of 160,000.

There has been constructed during the year a large brick passenger house at Aurora, and several of less importance at different stations on the line. Additions have been made to some freight and grain houses. Several new bridges of iron have been built to replace wooden ones which had become unfit for further use. Very nearly all the bridges upon the road, or rather upon the main lines from Chicago to Quincy and Burlington, are now of iron, and in the future it is not anticipated that there will be required any considerable expenditure in any one year, either in the repairs or reconstruction of the bridges of the road. It has been deemed the best economy, as these structures were required to be rebuilt, to do it with material not subject to decay, and in as permanent a form as possible. The cost has been therefore, greater in the past year than it will ever probably be again in the same space of time.

The expenditure for passenger and freight houses has also been much larger than it will be in any future year. On the road from Galesburg to Quincy, and also between Peoria and Burlington, until these roads became the property of this company there never had been passenger houses at many stations, and very unfit and inadequate freight houses, and at many places none at all belonging to the company. These have been built now at several stations, and at others enlarged to meet the demands of increased and increasing business. Additional lands at the Quincy station and at Chicago, made necessary by the increased traffic of the road, and to a smaller extent at some less important stations, have been purchased; in the aggregate however at considerable cost. They were, however, of indispensable necessity and add more than their cost to the permanent value of the property of the company, in the additional convenience they afford to the public, and the increased facilities for the transaction of the ever increasing business of the road.

There have been relaid with new and re-rolled iron thirty-six miles of track. There have been constructed of new side tracks or double track nine and sixty hundredths miles. When the road from Galesburg to Quincy became the property of this company about two years ago it was entirely without ballast. During the past two years the work of ballasting and completing that part of the line has been prosecuted with all the force which could profitably be employed upon it. Gravel is not found upon that part of the road nor nearer than twenty miles from it upon the line towards Peoria. It must be taken a distance of seventy miles to reach the centre of the road between Galesburg and Quincy, and is an expensive and slow process. On no part of that road can gravel be placed without a transportation of from twenty to seventy miles. The fifty miles nearest Quincy can be best ballasted with broken stone from that end. During the year there has been put upon the road of broken stone and gravel twenty-nine miles. The work will be continued till it is completed, and with such force as can well be used upon it. The ballasting of all or very nearly all the rest of the road is completed. The whole track of the road is in quite as good order as ever before, and the most of it is equal to that of any road in the country.

The equipment has been enlarged during the year by the addition of 8 first class locomotives, 1 new passenger coach, 2 baggage and express cars, 20 large stock cars, 40 Blue Line freight cars, 51 platform cars, 7 drovers' and conductors' cars. There are now upon the road 119 locomotives, 59 passenger, 27 baggage, mail and express, 1,699 house freight, 493 platform, and 43 drovers' cars, and other cars employed in the work of repairs. The whole is kept in excellent condition and constitutes an equipment equal if not surpassing that of any road in the West, in proportion to its length or miles of road. Yet during the past year, for a long time together, its whole power and rolling stock was tasked to the utmost to meet the calls made upon them. There will be required however but little addition during the present year.

The capital stock of the company which stood at the date of the last Annual Report at $10,103,010, has been increased to $10,399,010, by the conversion of bonds which were convertible into stock at the option of the holder. Its funded debt and other outstanding liabilities, created for construction and the purchase of the road from Galesburg to Quincy, including $270,000 (due on that purchase and not yet called for as at the date of the last report) amounts altogether to $5,728,250. The whole aggregate of capital stock and debt is now $15,921,260. The gross revenues of the property charged with this capital and debt has been during the year $6,146,861 75. The net earnings above the expenses, taxes and interest on the debt, and therefore belonging to the stockholders, have been $2,386,704 45. The balance left to credit of income account after paying dividends has been considerably more than the dividends, and the amount now standing to the credit of income account is $1,905,496 00, besides the amount paid into the sinking fund which is $828,725 99. The amount of cash now in the Treasury is $1,563,890 91.

While the directors have always deemed the Western connections of the road of very great importance, and have ever recommended that aid be given to extend them within reasonable bounds—and while the roads through Missouri and extending into Iowa are not only very important as contributors to the business of our road, and becoming with each year much more so, yet they know full well also, that the great and paramount value of the road is in its local business, proceeding wholly from the country along its various lines of road. A statement of the figures in this connection will be somewhat striking. The gross earnings of the road were the past year $6,083,138 05. The amount earned from the business coming from or going to the Hannibal and St. Joseph road was $508,759 46. The amount earned from the business passing to and from the Burlington and Missouri road was $358,064 46. Total from both roads so far as it can be traced by tickets and way bills is $865,814 00, which is not quite one-seventh of the gross business of the road of this company. The substantial business, of the road and the chief element of its value is its local trade.

The through business however which is thus added to the local trade of the road is, as is seen above, of great value presently and is destined to rapidly increase. That added by H. and St. J. is more now than half a million, and with the extensive connections of that road, now in progress and contemplated in the West, may be expected soon to become double that amount. The business added by the B. and M. road has been during the past year mainly from seventy-five miles of road and the country adjacent to it in Iowa. Late in the fall twenty-five miles more were added, and about this time has been added thirty more. In the coming fall another section of twenty-five miles will be added, which will make a distance of 156 miles which will be in operation this present year. It will probably be safe to estimate the addition to our business from that road also the present year at not far from half a million. Let it be considered that both these roads run through a country very nearly if not quite as fertile as your road does, and that it is much in the

same condition as that country was ten years since, and a better judgment may be formed of the future value to this company of the business to be derived from them. The bridges at Quincy and at Burlington will stimulate freight business, enabling us to take corn and grain of all sorts in bulk from Iowa by avoiding the expense and delay of ferry and double handling at the river. In grain and lumber and other articles this expense and delay has been so great as to amount to total prohibition.

These bridges are both well under way. The material for them is mainly ready and as soon as the water returns to its ordinary stage the work upon both will be pushed with all possible vigor. We hope that by another season these very important structures will be ready for use. That at Quincy is built by a bridge corporation, but under such an agreement with the railroad companies terminating at that point, that their traffic can be subject to no exorbitant charges in passing over it. It is to be leased to the railroad companies, and the tolls can only be such as will yield a revenue net of ten per cent. on the bridge stock or cost of the bridge. The bridge at Burlington will be built by and owned by this company, and constitute a part of its line into that city. It will subject the traffic of the company passing over it to no separate charge for bridge tolls. Our trains will cross it to depot grounds in Burlington where all the business of the western terminus will be transacted. The road of this company and that of the B. & M. R. R. Co. will occupy the same or rather adjacent grounds—an arrangement convenient for both, and subjecting business to the least possible expense.

As this company has become largely interested in the Burlington and Missouri River Railroad, under the contract made with the company owning it, by which, for a period of ten years from its date two years ago, we are to become the purchasers of its securities convertible into preferred stock to the extent of $120,000 a year, it is not deemed inappropriate to bring its condition and business and prospects before our stockholders. That company has conveyed its road and all the appurtenances and lands (near 400,000 acres) to trustees, to secure an issue of bonds which shall not exceed $18,000 per mile upon the road, and with such provisions that none of this sum can be anticipated, that is, the bonds intended to be used for the construction of the Western portion of the road cannot be used for any Eastern portion. The result is that when stock is taken to a sufficient extent in connection with the $18,000 per mile to complete any section of the road that section may be put under contract and not otherwise. From the point where the present construction contract terminates therefore, there is a mortgage security of that amount per mile to aid in the construction of the remaining portion of the line whenever the rest of the money in the form of stock or otherwise can be realized. The cost of the road is about $25,000 per mile. On all the mortgage bonds, if the road was all completed which is now under contract and the bonds all sold, that is for 181 miles, the amount thereof being $3,258,000, the interest would amount to $228,060. The road the past year, with only eighty-eight miles on an average in operation and part of it just opened, has earned $478,999 46. At this time with only thirty-four miles added it is earning at the rate of $600,000 per annum, and more, therefore, than enough to pay the interest on its mortgage debt, when fifty miles more shall be completed, and enough to pay the whole interest not only upon that debt but upon all the securities out, and of which this company is becoming the purchaser at the rate of $120,000 per annum. There can hardly, therefore, it seems, remain a possibility of doubt of the value of all these securities when there shall be a further section of fifty miles added to the road. Nor to those who consider the rapid development of the West, and the ease with which its prairies are subdued and brought under cultivation, and the fact that at least nineteen-twentieths of the country along the line of that road yet remains unimproved, and to be settled and made to contribute to the revenues of the road, would there seem to remain any question either of the entire safety of the investment, now making by this company, in its bonds to be converted into a preferred stock, or of its great future value in the addition of business it will bring to the C., B. and Q. Railroad.

Since the last annual report important arrangements have been made with the Toledo, Wabash and Western, and the Hannibal and St. Joseph Railroad Companies. By these terms it is agreed that the T., W. and W. shall have the right forever to run over our track twenty-two miles into Quincy, paying half the expense of keeping it in repair, and paying a rent equal to the interest on half the cost of the road and depot grounds used by it, at 10 per cent. after three years from the date of the contract, and in the mean time seven, eight and nine per cent. per annum, for the several years, making a rent of that part of our track and grounds net of not far from $50,000 per annum in the future. This agreement is doubtless of great value to that company as it relieves it of the expense of the construction of a new road and the purchase of new grounds either at Quincy or Hannibal, and if at Hannibal also the expense of another bridge, while at Quincy it has all the advantages it could acquire by another road to either or both points. It was also advantageous to this company inasmuch as the competition being inevitable at one point or the other, or at both, it avoids the severity which an investment of a large amount of additional capital would impart to it, and at the same time acquires a net profit from it of about $50,000 per annum in perpetuity.

The directors do not anticipate so large a revenue the current as in the past year. The failure of the corn crop last season, which is the great staple of Illinois, and which to a great extent was destroyed by frost, will not only directly seriously impair the revenues of the road, but will indirectly also greatly affect them, as it diminishes the general prosperity of the country, and more or less affects every branch of business. It is not easy to estimate the full extent to which it may affect the general business of the year upon the road, but it is safe to count upon a very large falling off from revenues of the last two, during the first six months of this year.

In concluding this report of the year's business and of the general affairs of the company, the board may again congratulate the stockholders upon the present large success and the future prospects of their investment. With their own road in the best condition, in all its appointments equal at present to all demands of the country upon it, yielding its large revenues at moderate tariffs, and with a local traffic equal to six-sevenths of its whole year's business, and with connecting roads from its southern and western termini, extending west through and towards regions of country which for many hundred miles is of equal or nearly equal fertility with that along their own road, and fast becoming as populous and productive, and soon therefore to send over it a large volume of through business, it may be assumed, reasonably, that successful as it has been in the past, its usefulness to the country and its value to the stockholders, has scarcely even yet been fully tested. As the country west becomes populous, and Iowa and Missouri and the country still farther west becomes what Illinois has become since this road was constructed, it is not difficult to see, or rathes predict an immense and very rapid increase of business, a much more extended usefulness and a continued increase of the value of their investment to the stockholders.

The equipment of the road consists of 119 locomotives, 55 passenger, 27 baggage, mail and express, 1,659 house, freight and cattle, 40 Blue line, 493 platform and coal, 43 drovers' and conductors' cars, 4 snow plows, 40 gravel, 2 tool, 1 pile driving, 86 rubble, 123 hand, and 2 wrecking cars.

Number of miles run by locomotives with passenger trains 644,560; with freight trains, 1,192,752; with miscellaneous trains, 584,254—total miles run, 2,421,566.

The number of passengers carried over the whole line during the year was 917,820; of these 49,335 were through, and 868,485 were way. Of the through passengers, 27,742 were carried west, and 21,593 east. Of the way passengers, 439,160 were carried west, and 429,325 east. Total carried east, 450,918; do., west, 466,902. Total mileage of passengers, 42,334,983—a decrease from the previous year of 7,335,642.

The total number of tons moved over the whole line in 1866, was 821,883; in 1867, 978,563—an increase of 156,680. Total tonnage east in 1867, 593,823; do., west, 384,740.

GENERAL ACCOUNT.

Capital stock	$10,399,010 00
Funded debt (see BOND LIST)	5,458,250 00
Unclaimed dividends	2,016 00

Burlington and Missouri River Railroad preferred stock	180,023 22
Due from agents and connecting roads	64,728 74
Amount due bondholders under decree of the court foreclosing mortgage on Northern Cross R.R.	270,000 00
Dividend No. 13, and tax thereon	547,315 78
Deposits in New York, Boston and Treasury	746,575 13
Deposits with Trustees' sink'g fund	282,664 86
	$18,957,024 01

The directors chosen at the annual meeting June 26, 1867, are as follows:

President.—JAMES F. JOY.

Directors.—Erastus Corning, James F. Joy, Chauncey S. Colton, John C. Green, Nathaniel Thayer, John M. Forbes, Sidney Bartlett, John W. Brooks, Robert S. Watson, William Boott and John N. Denison.

Chairman of Board.—JOHN N. DENISON.

Gen'l Superintendent.—ROBERT HARRIS.

Secretary and Treasurer.—AMOS T. HALL.

Middleburgh Railroad.

The directors of this road have obtained the right of way for their road. The contract for grading, masonry, &c., has been given out. The construction of this road is therefore "a fixed fact," and we shall have the cars running from Schoharie Court House to Middleburgh. This road will be a valuable affluent to the Susquehanna road, and thus from day to day do we see the great benefits that the construction of the latter has conferred upon that section of the State so long isolated.—*Albany Journal.*

☞ The mail from Peru brings intelligence that the company which obtained the concession for a railroad from the coast to the city of Arequipa have not been able to comply with their contract, the time having expired at which they were to have commenced the works. They had been ordered to pay the fine, and the Government had declared themselves open to fresh proposals. A telegraphic line to Arequipa has been recently finished, and is now in full operation.

Railroads of the State of New York.

A tabular Statement of the Railroads of the State, their Capital and Cost, Length, Earnings and Expenses, Dividends, &c., for the year ending 30th September, 1866.

Compiled from the Annual Report made to the Legislature by the State Engineer and Surveyor.

The "Length of Road" when in connection with Horse-Power Passenger Railroads is expressed in equivalent single track; in connection with Steam-Power Railroads the length of route alone is given.

The following companies, which are required by law to make annual statements, did not report: *Albany and Boston;* Albany and Lackawanna; Albany and New York; Bay Shore; Boonville and Turin; Broadway and Yonkers, Patent; Brooklyn, Middle Village and Jamaica; Brooklyn, Flatbush and Coney Island; *Brooklyn City and Ridgewood; Brooklyn, East New York and Rockaway;* Canarsie, Brooklyn and Winfield; Central Park and Kingsville; Clinton Avenue; *Cohoes and Waterford;* Columbia street and Erie Basin; Copenhagen and Turin; Cooperstown and Susquehanna; Dunkirk and Chautauqua Lake; Dunkirk and Fredonia; Dutchess and Columbia; *East New York and Jamaica;* East New York and Jamaica Bay; East and North River; East Side and New Rochelle, Patent; Flatbush, Coney Island and Canarsie; Flushing; Flushing and College Point; First Avenue and Jersey Ferries; Fort Edward, Glens Falls and Sandy Hill; *Forty Second street and Grand street Ferry;* Fulton; *Fulton Ferry and Tenth Avenue;* Genesee and Water street; Greenpoint and Calvary; Greenpoint and Williamsburg; Hempstead and Jamaica; *Hicksville and Cold Spring;* Hicksville and Huntington; Highbridge; *Hudson Avenue and Prospect Park;* Hudson and West Shore; Hunterspoint, Ravenswood and Astoria; International Coal; Ithaca and Towanda; Jersey Ferries and First Avenue; Junction; Kingsbridge, Highbridge and Forty-second street; Lake Ontario, Auburn and New York; Metropolitan; Middletown, Union and Water Gap; Middle Village; Montgomery and Erie; Nassau; N. Y. Northern Central; N. Y. City Crosstown; N. Y. and Lake Mahopac; New York and Oswego Midland; Newburg and Middletown; North River and Wall street Ferry; Oneida Valley; Piermont and Nyack; Port Morris and Westchester; Richfield Springs and Otsego Lake; Rockaway and Brooklyn; Rondout and Kingston; Rondout and Port Jervis; Rondout and Oswego; *Sackett street;* Schenectady and Catskill; Schoharie Valley; Sheepshead Bay and Sea Shore; Sodus Point and Southern; *South Brooklyn and Bergen street;* Staten Island Shore; Staten Island (Horse); Syracuse Connecting; *Third Avenue and Fordham;* Tioga and Erie; Troy and Albia (Horse); Utica and Syracuse; Wallkill Valley; *Waterford and Cohoes;* Westchester; West Farms and Morrisania; West Shore; West Side and Rondout, Patent; Whitehall and Plattsburg; Williamsburg and Flatbush; Williamsburg and Newtown; Williamsburg and Coney Island; Williamstown and Redfield; Yonkers and New York. Most of the lines here named are as yet simply projects; but several are in course of construction and a few of them are in operation. Forty of the companies proposing to construct railroads were organized during the year closing 30th September, 1860. The roads, any part of which is constructed at date (September 14, 1867,) are printed in *Italics.*

The following are exempt by law from making annual reports: *Buffalo street; Central City* (Syracuse); Chenango Valley; *Grand street and Newtown; Hicksville and Cold Spring; Maine and Ohio street* (Buffalo); *Niagara street; Syracuse and Geddes;* Syracuse and Onondaga; *Troy and Lansingburg;* Watervliet.

Commerce of New York.

The foreign imports at New York for the month of August, are officially stated as follows:

	1866.	1867.
Entered for consumpt'n.	$14,560,161	$13,547,834
Do. for warehousing....	8,123,406	9,340,292
Free goods	931,856	844,664
Specie and bullion	269,221	540,244
Total entered at port...	$23,884,644	$24,273,034
Withdrawn fr. wareh'use	10,530,593	10,490,050

The foreign imports at New York for the eight months from January 1st, were:

	1866.	1867.
Entered for consumpt'n.	$117,624,326	$89,557,409
Do. for warehousing...	85,851,147	84,638,097
Free goods.....	8,868,021	7,587,141
Specie and bullion	1,795,368	2,153,546
Total entered at port..	$214,138,862	$183,936,193
Withdrawn fr. wareh'se	69,608,689	77,538,337

The following statement will show the revenue from Customs at New York for the months of July and August, the previous six months, and for the eight months ending August 31st:

	1866.	1867.
Previous 6 months.	$67,548,189 78	$59,354,688 90
In July.....	11,507,186 60	9,505,432 94
In August.....	12,349,769 82	12,623,300 45
Total since Jan. 1.	$91,405,137 20	$81,483,422 29

The exports from New York to foreign ports in the month of August, were:

	1866.	1867.
Domestic produce	$12,646,004	$12,116,096
Foreign free goods.....	50,720	24,096
Do. dutiable.....	226,786	717,161
Specie and bullion	1,587,851	1,714,594
Total exports.....	$14,511,361	$14,571,947
Do. exclusive of specie.	12,923,510	12,857,353

The exports from New York to foreign ports for eight months from January 1, were:

	1866.	1867.
Domestic produce.....	$129,957,616	$116,930,052
Foreign free goods....	536,783	331,502
Do. dutiable	3,654,497	5,311,300
Specie and bullion.....	53,191,740	39,830,150
Total exports	$187,340,636	$162,403,004
Do. exclusive of specie	34,148,896	122,572,854

Neosho Valley Railroad.

We learn that the Neosho Valley Railroad, from Junction City *via* Council Grove, Emporia and Burlington, to the north boundary of the Osage Indian lands, is contracted for to A. F. Beach, of Balston Spa, N. Y.; I. F. Baker, Troy, N. Y.; Wm. McMichael, of Saratoga Springs; J. J. Crane, of Balston Spa; Mr. Dorn, Canal Commissioner of New York, residing in Schenectady; Jas. Gowan and J. Dull, of Harrisburg, Pennsylvania. We expect now to see energetic work between this company and the Leavenworth, Lawrence and Galveston Railroad Company, to demonstrate which will reach the southern line of Kansas first, and thereby secure the prospective franchise in the Indian country.—*Lawrence Tribune.*

Portland and Ogdensburgh R. R.

The following gentlemen have been elected directors of this company for the ensuing year: John G. Sinclair, Bethlehem, N. H.; Israel Washburn, Jr., Portland, Me.; Horace Fairbanks, St. Johnsbury, Vt., James B. Sumner, Dalton, Vt.; Charles Hartshorn, Littleton, N. H.; Timothy Walcott, Conway, N. H.; Ossian Ray, Lancaster, N. H. Hon. John G. Sinclair was subsequently chosen President of the corporation, and George A. Bingham, Clerk.

RAILROAD AND CANAL DIVIDEND STATEMENT.

Showing the amount of Stock Outstanding, the Dividend Periods and the date of last Dividend.

Marked thus (*) are leased roads.	Stock outstanding.	Dividend Periods.	Last Dividend Payable.

OSS THE SIERRA NEVADAS.

THE

CENTRAL PACIFIC RAILROAD,

THE WESTERN HALF OF THE

GREAT NATIONAL TRUNK LINE

Across the Continent,

Being constructed WITH THE AID AND SUPERVISION OF THE UNITED STATES GOVERNMENT, is destined to be one of the most important lines of communication in the world; as it is the *sole link between the Pacific Coast and the Great Interior Basin*, over which the immense Overland travel must pass, and the

Principal Portion of the Main Stem Line between the two Oceans.

Its line extends from Sacramento, on the tidal waters of the Pacific, eastward across the richest and most populous parts of California, Nevada and Utah, contiguous to all the great Mining Regions of the Far West, and will meet and connect with the roads now building east of the Rocky Mountains. About **100** miles are now built, equipped and in running operation to the summit of the Sierra Nevada. Within a few days **35** miles, now graded, will be added, and the track carried entirely across the mountains to a point in the Great Salt Lake Valley, whence further progress will be easy and rapid. Iron, materials and equipment are ready at hand for **300** miles of road, and **10,000** men are employed in the construction.

The local business upon the completed portion surpasses all previous estimate. The figures for the quarter ending August 31 are as follows in GOLD:

GROSS EARNINGS,	OPERATING EXPENSES,	NET EARNINGS,
$487,579 64	**$86,543 47**	**$401,031 17**

or at the rate of two millions per annum, of which more than three-fourths are net profit on less than 100 miles worked. This is upon the actual, legitimate traffic of the road, with its terminus in the mountains, and with only the normal ratio of government transportation, and is exclusive of the materials carried for the further extension of the road.

The Company's interest liabilities during the same period were less than $125,000.

Add to this an ever-expanding through traffic and the proportions of the future business become immense.

The Company are authorized to continue their line eastward until it shall meet and connect with the roads now building east of the Rocky Mountain ranges. Assuming that they will build and control half the entire distance between San Francisco and the Missouri River, as now seems probable, the United States will have invested in the completion of **865** miles **$28,592,000,** or at the average rate of **$35,000** per mile—not including an absolute grant of **10,000,000** acres of the Public lands. By becoming a joint investor in the magnificent enterprise, and by waiving its first lien in favor of the First Mortgage Bondholders, THE GENERAL GOVERNMENT, IN EFFECT, INVITES THE CO-OPERATION OF PRIVATE CAPITALISTS, and has carefully guarded their interests against all ordinary contingencies.

The Company offer for sale, through us, their

First Mortgage Thirty-Year Six Per Cent. Coupon Bonds,

Principal and Interest Payable in Gold Coin,

in New York City. They are in sums of $1,000 each, with semi-annual gold coupons attached, and are selling for the present at **95** per cent. and accrued interest from July 1st added, in currency, at which rate they yield nearly

Nine Per Cent. upon the Investment.

These Bonds, authorized by act of Congress, are issued only as the work progresses, and to the same amount only as the Bonds granted by the Government; and represent in all cases the *first lien* upon a completed, equipped and productive railroad, in which have been invested Government subsidies, Stock subscriptions, donations, surplus earnings, etc., and which is worth more than three times the amount of First Mortgage Bonds which can be issued upon it.

The Central Pacific First Mortgage Bonds have all the assurances, sanctions and guaranties of the Pacific Railroad Act of Congress, and have in addition several noticeable advantages over all other classes of railroad bonds.

First—They are the superior claim upon altogether the most vital and valuable portion of the through line.
Second—Beside the fullest benefit of the government subsidy, (which is a subordinate lien,) the road receives the benefit of large donations from California.
Third—Fully half the whole cost of grading 800 miles eastward of San Francisco is concentrated upon the 150 miles now about completed.
Fourth—A local business already yielding three-fold the annual interest liabilities, with advantageous rates payable in coin.
Fifth—The principal as well as the interest of its Bonds being payable in coin, upon a legally binding agreement.

Having carefully investigated the resources and prospects of the Road, and the management of the Company's affairs, we cordially recommend these Bonds to Trustees, Executors, Institutions and others as an eminently *sound, reliable and remunerative form of permanent investment.*

CONVERSIONS OF GOVERNMENT SECURITIES INTO

CENTRAL PACIFIC FIRST MORTGAGE BONDS,

now *realize for the holders from*

Twelve to Eighteen per Cent. Advantage,

WITH THE SAME RATE OF INTEREST.

The following are the current rates (September 9th,) subject, of course, to slight variations from day to day. We receive in exchange:

☞ We are informed that the plan presented by the trustees at the certificate holders' meeting on the 10th instant, for re-organizing the Ohio and Mississippi Railroad Company and closing the trust, has been adopted by a unanimous vote of a million dollars above the three-fourths amount required. The Trustees, it is said, will take immediate steps to re-organize the company in accordance with the plan.

American Railroad Journal.

Saturday, September 21, 1867.

Stock Exchange and Money Market.

There has been a decided increase of activity in the loan and discount market, this week. The demand has gained rapidly on the supply. The Treasury department has been augmenting its cash balances, partly by sales of coin on Government account. The banks have been making more liberal remittances of currency to the interior, and have been less disposed to grant accommodation to local customers, unless at advanced rates. The speculative call for aid has been quite brisk, especially from Stock and Gold circles, and the prices of call loans have been generally marked up to 6@7 per cent. The mercantile inquiry has also improved; and the best discount applications are now quoted up plumply to the full legal rate of 7 per cent. per annum. The U. S. Sub-Treasury has enlarged its cash reserve about eleven millions, during the week, partly as before stated, through sales of Government coin; partly it is rumored, through fresh sales of Five-twenties bonds of the 1865 and 1867 issues; but more largely than by any other means, through transfers from Washington to New York, and from some of the country National banks acting as depositories of the public money. The aggregate cash balances of the Treasury Department on Monday, were $146,581,000. including $106,022,000 in coin, and $46,559,000 in currency. The city banks, in their last weekly exhibit, showed a loss of $4,760,379 in legal tender, and $2,835,328 of deposits, with an increase of $3,104,241 in the loan averages, $217,327 in specie, and $57,856 in circulation. The banks of the country are now making arrangements for a creditable exhibit in their next quarterly statement, first Monday in October, and a close money market throughout the interior may consequently be looked for, for some weeks to come. The city banks will be put to no such straits to present a fair summary of the closing quarter's business. The specie reserve of the banks is now $8,184,946, against $7,357,369 same time last year. The city bank deposits are now $193,086,775, against $224,844,647 week ending Sept. 15, 1866. The legal tender reserve amounts to $65,176,903, against $90,773,232 same time last year. The circulation now stands at $34,015,223, against $29,360,374 same time last year. The loans are now $254,160,587, against $270,806,504 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $85,681,445 a day, against a daily average of $73,617,897 the preceding week, and $64,265,258 the week ending with Aug. 31. The current week's exchanges average about $98,000 a day.

National Bank notes to the amount of $71,660 were issued last week, making the total issue to 1,671 banks thus far, $303,907,660, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,793,295, leaving, with the existing 1,648 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $299,114,371. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,660,000; and for the public deposits, $38,373,950—making a total of $379,033,950. The Treasury Department last week redeemed and destroyed $471,000 of worn and mutilated fractional currency, and issued $571,585 of new.

The Philadelphia Bank movement the past week shows an increase in loans, of $15,751; a decrease of $27,023 in specie; a decrease in legal tenders of $188,925; a decrease of $195,192 in deposits; and an increase of $3,943 in circulation. The Bank Clearings show an increase of $227,761, and the balances, an increase of $40,658.

Government revenues have been on a reduced scale, since our last, particularly in the excise line. The excises, last week, yielded $3,850,000, against $5,580,384 the preceding week; customs at the port of New York $2,605,971, and at the outports, about $850,000 (in coin) more, making the grand total income for the week equal about $8,852,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal

year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $54,000,000.

Hon. David A. Wells, Commissioner of the Revenue, says:

The following table exhibits the exact receipts of the Federal Treasury from Internal Revenue and Customs dues from the period of the inauguration of the system of internal taxation and the augmentation of the tariff in 1862–'63 to the close of the fiscal year, June 30, 1866:

	Internal Revenue. Currency.	Customs. Gold.
1863	$41,003,193	$69,059,642
1864	116,850,672	102,316,153
1865	211,129,529	84,928,260
1866	310,906,634	179,046,630

The above figures are official. For the fiscal year ending June 30, 1867, the receipts have not been officially made public, but they are known to have been substantially as follows:

Internal Revenue.	Customs.
Currency. $267,000,000	Gold $173,000,000

The U. S. Sub-Treasury receipts, week ending with Sept. 14, were $20,619,828, including $2,605,971 from customs duties; payments, $15,453,207; balance at the close of the week, $119,381,287, against $114,214,667, at the close of the preceding week, showing an increase of $5,166,621. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $6,509,801 including $467,330 from customs; and payments, $5,105,749; on Tuesday, receipts, $2,436,757 including $595,186 from customs, and payments, $609,000. The balance at the close of business on Tuesday stood at $122,026,911, against $111,175,042 a week previous.

The total amount of gold certificates issued and redeemed by the U. S. Sub-Treasury, together with the outstanding balance on the 18th May, and at subsequent intervals:

	Issued.	Redeemed.	Outstanding.
20s ...	$333,900	$206,600	$127,300

Total 14th.	218,201,780	191,882,000	26,319,780

The Gold speculation has been on a less confident basis, since our last. The supply in the open market has been more liberal, partly on account of the Government offerings, which have been about equal to the daily customs revenue. The demand has been less active, particularly from speculative sources. The price fell off to 144. On Wednesday, however, the market became more animated, under less favorable advices from the foreign markets, relative to U. S. securities, and the current rate was worked up again to 145½@145⅝, chiefly on speculative transactions, as the customs call was moderate, and there was no export inquiry of moment. The closing figures were 145⅜. The *Persia* for Liverpool on Wednesday took out only about $5,104 in specie. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $2,263,975. The customs demand for Gold last week, averaged $434,328 a day; thus far, this week, it has been equal to $538,000 a day, or equal to a weekly aggregate of $3,228,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $37,790, and from California, none. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $88,640,655, against $99,262,550 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $21,254,504, against $30,397,184 same time last year, showing a decrease this year, of $9,142,680. The exports of specie from this port, last week, were $325,328. The total outflow of specie from the port, since Jan. 1, 1867, has been $42,315,250, against $53,540,758 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $283,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $43,037,765, against $31,614,165 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to August 10, reached $26,822,585, against $29,240,887 same time last year, showing a decrease, in 1867, of $2,418,301.

An increased supply of Foreign Exchange has had the effect of depressing the price of bills materially, without inducing anything like a livelier demand. The market closed heavily, under liberal offerings of both produce bills, and bills drawn against recent export purchases of our national securities. Bankers' 60 day bills on London closed at 109⅛@109½, and on Paris to 5.17½@5.16¼; sight bills on London to 109⅝@110; and on Paris to 5.15. The offerings of produce bills have been quite more extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,378,820, making the total value of exports since Jan. 1, 1867, $130,146,817, against $139,950,607 same time in the preceding year.

The increased activity in Money has led to a rather more extensive realization on Government securities, which have been in much better supply and have been depressed in price, throughout the week, closing quite tamely and languidly. The earlier issues have suffered most, under the realizing process. Five-twenties of 1862 and 1865 (May and November issues), and the six per cents. of 1881 are being exchanged pretty freely for the later issues of the Five-twenties, which are relatively much cheaper. Seven-Thirties of the first or August series have ceased to be dealt in in the open market. The conversion privilege attached to this series expired on Saturday last, when, out of the original issue of three hundred millions, there remained outstanding only about five millions, which the Department is now ready to redeem in cash, at par and accrued interest. The second and third series of these notes have been more freely offered and have been on the decline. Government announces its readiness to take quarter million lots of these two later series at 107 and interest, in exchange for new Five-Twenties at 108, flat. U. S. sixes of 1881 closed here on Wednesday at 111@111⅝1; U. S. Five-twenties of 1862, 114½@114⅝; U. S. Five-twenties of 1864 at 109½@109⅝; U. S. Five-twenties of 1865 at 110¾@110⅞; U. S. Five-twenties of 1865, consolidated, 107¾@107⅞; U. S. Five-twenties of 1867, 107¾@107⅞; U. S. Ten-forties at 99½@99⅝, and U. S. Seven-thirties at 106⅞@107⅛. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

October, 1864 .... 119⅛	August, 1865 .... 116⅛
December, 1864 .. 118⅛	September, 1865 .. 115⅝
May, 1865 ..... 117⅛	October, 1865 .... 115⅛

Washington advices state that "last Saturday the returns to the Treasury showed that there were but $393,000,000 of the several issues of Seven-thirty notes unconverted. Of these $7,000,000 are of the issue which matured in August last, the option for the conversion of which expired on the 15th; $136,000,000 are of the issue maturing in June, 1868, and the balance mature in July following. Thus it will be seen that, adding the $85,000,000 of compound interest notes yet outstanding, the entire short date indebtedness of the Government is less than $500,000,000, against $1,100,000,000 at the beginning of the present year. The Secretary of the Treasury considers the payment of this part of the debt as positively assured, and that the Treasury has passed the most critical period with reference to the management of the national debt."

The railway and miscellaneous share speculation has been decidedly less active, on a lower basis, as to price, under the adverse influence of the renewed activity and the sharp rise in the price of money. The general market closed up on Wednesday quite heavily and feverishly, many of the speculative favorites being quoted at the lowest figures of the week.

In general business, there has been a marked revival, especially in the prodoce lines. Breadstuffs have been in brisk request, for home use, shipment, and speculative purposes, at much firmer prices. Provisions have been less buoyant, under freer offerings. Cotton has been unusually dull and heavy at reduced figures closing with middling grades on Wednesday at 24½@26 cents per lb. as extremes. The stock of cotton now here is estimated at about 40,000 bales. The receipts at the port this week, have averaged about 850 bales a day. The receipts during the cotton year, ending Sept. 1, 1867 were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from September 1, 1866, to Aug. 31, 1867 were 1,969,291 bales, against 2,066,786 bales the preceding cotton year; exports, 1,554,458 bales, against 1,550,437 bales last year; estimated stock at close of year, 71,431 bales, against 253,000 bales same time last year. At the live stock market this week beeves have been in large supply and good demand at full rates, ranging from 9@17½c.; sheep at 5@6¼; lambs at 7@8½; swine at 7@8¼ per pound, all live weight. The week's receipts were: 6,471 beeves, 36,806 sheep and lambs, 1,500 calves, and 28,594 swine. Foreign merchandise has attracted more attention, particularly foreign dry goods, which have been held more confidently. The total imports of

foreign dry goods, last week, were $2,096,237, and the total amount marketed $2,579,197. The value of foreign merchandise imported last week, was $2,487,319—making the grand total specie value of last week's imports of dry goods and merchandise, $4,583,556, and since Jan. 1, 1867, $181,169,890, against $216,393,385 same time in the preceding fiscal year. The ocean freight market has been rather active, since our last, closing very firmly at a decided advance in rates with 578 vessels of all classes in port. For Liverpool we quote flour at 1s. 9d.@1s. per bbl.; grain at 5½c. @6d. per bushel; cotton at ⅛d. per lb.; and heavy goods at 15s.@25s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 4.	Sept. 11.	Sept. 18.
Consols	94 13/16	94 9/16	94 13/16
U.S. 5-20's of 1862	73¾	73	72⅞
U.S. 5-20's of 1865	72¼	..	..
Erie	45¼	44½	44¼
Ill. Central	77¼	77	77½

The New York exports, exclusive of specie, for the week ending Sept. 17, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,782,215	$3,378,820
Prev. reported	137,168,392	126,767,997
Since January 1	$139,950,607	$130,146,817

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,914,072	$2,096,237
Gen. merchandise	3,256,437	2,487,319
Total for the week	$6,170,509	$4,583,556
Previously reported	210,222,876	176,586,334
Since January 1	$216,393,385	$181,169,890

The balance in the Sub-Treasury on Wednesday was $122,712,875 90.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Across the Sierra Nevadas.

The great tunnel of the Central Pacific Railroad at the summit of the Sierra Nevada Range is opened. The track is being laid on the eastern slope, a locomotive is already running in the Truckee Valley, and in a few days the road will have reached the open country of the Salt Lake Basin, after which progress will be rapid and easy. This overcomes the only noticeable obstacle on the Western portion of the through line; and its significance is understood when we are told that the cost and difficulty of grading the 150 miles now nearly completed, is greater than for the 650 miles next following. The Chief Engineer expects to average a mile a day across the interior valley next year. The local traffic on the completed portion surpasses all previous estimate, and is lucrative without the immense through business which we may expect to flow over it.

In accordance with the Act of Congress, the Central Pacific Railroad Company receive a large Government subsidy, and are issuing their first mortgage bonds to a limited amount. The merits and advantages of these securties as an investment are fully set forth in their advertisement in another column.

☞ Hon. Samuel Sloan has been elected President of the Delaware, Lackawanna and Western Railroad Co.

Railroad Earnings.--Weekly.

The earnings of the St. Louis, Alton and Terre Haute Railroad for the 1st week in September, 1867, were $52,517 17
Corresponding week of previous year. 44,990 03

Increase $7,527 14

The earnings of the Michigan Central Railroad for the 1st week in Sept., 1867, were. $93,991 25
Corresponding week of previous year.. 99,524 21

Decrease $5,532 96

The earnings of the Atlantic and Great Western Railway for the first week in Sept., 1867, were..... $112,387 00
Corresponding week previous year... 123,360 00

Decrease..... $10,973 00

The earnings of the Chicago and Alton Railroad for the first week in Sept., 1867, were $103,993 00
Corresponding period previous year.. 83,105 00

Increase..... $20,388 00

The earnings of the Western Union Railroad for the 1st week in Sept., 1867 ..... $27,089 35
Corresponding week previous year..... 19,371 09

Increase $7,718 26

The earnings of the Marietta and Cincinnati Railroad the 1st week in Sept., 1867.. $26,894 00
Corresponding week previous year..... 24,336 00

Increase $2,558 00

The earnings of the Detroit and Milwaukee Railroad for the week ending September 12, 1867, were $46,640 00
Corresponding week of 1866..... 41,591 00

Increase..... $5,049 00

The earnings of the Chicago and Northwestern Railroad for 2d week in Sept., 1867.. $317,672 15
Corresponding week previous year .. 223,473 71

Increase $94,198 44

The earnings of the Chicago and Rock Island Railroad for the 2d week in Sept., 1867, were..... $122,000 00
Corresponding week of previous year.. 89,512 00

Increase..... $32,488 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Sept. 1867, were..... $122,300 00
Corresponding week of 1866 ..... 100,654 00

Increase $21,646 00

The earnings of the Virginia and Tennessee Railroad for the first week of Sept., were $18,867, a decrease of $1,114 on the same week last year. Total for the fiscal year commencing 1st of July, $162,364, an increase of $53,849 on same time in 1866.

Memphis and Little Rock Railroad.

We are reliably informed that a contract has been concluded between the Memphis and Little Rock Railroad and Mr. Denmead, of Georgia, whereby the latter undertakes the repairs of the road between here and Devall's Bluff, and Madison and Hopefield. The terms are very favorable to the company, the contractor furnishing all the means and repaying himself from the net earnings of the road. The work will commence on the 1st of September, and will be finished by the 1st of January next.

The contractor is a man of means and thoroughly practical, and will doubtless do the work within the time specified. In the meantime, Gen. Forrest is pushing ahead this work on the middle division, and by the time the road is repaired to Madison will have about fifteen miles of road bed ready for the iron. We are encouraged at the prospect of reducing the distance of stage travel from here to Memphis, within the coming six months, to twenty-five miles.—*Little Rock Gazette.*

Indestructible Railway Sleepers.

Numerous attempts have been made to render the timber sleepers on railways more durable by enabling them to resist the destructive action of damp and moisture. Experience has shown, however, that the results produced have not been proportionate to the extra cost incurred. The average length of prepared sleepers has been found to be about five years, or, considering the additional cost, showing but a slight increase of longevity over the timber in its natural state. Some of our railway managers have accordingly decided upon abandoning the use of prepared sleepers on their lines. A process of indurating timber has, however, been brought under our notice during the last week which promises results of a most satisfactory character, and which is well deserving the attention of managers of our railways. The inventor of the process is Colonel Szerelemy, whose name is well known in connection with the preservation of portions of the stone of the new Houses of Parliament. The material employed possesses, we are informed, qualities in many respects identical with that which has so remarkable an effect upon the surfaces of stone. Applied to timber the preservative effects are very remarkable, as instanced in the specimens which were submitted to the inspection of a number of scientific gentlemen last week. They were treated by the process in 1851, and were shown in the exhibition of that year. Like many other germs of great inventions which were passed over unnoticed at that time, these prepared sleepers did not attract the attention which they deserved. Besides being but newly treated, the inventor, though perfectly convinced of the completeness of the induration which he had effected, could not appeal to that test of experience which is considered alone sufficient to satisfy the minds of practical men. When the sleepers were removed from the exhibition building they were buried in the ground, and, if not wholly forgotten, they have been, at least, undisturbed, until the recurrence of the exhibition at Paris has directed anew the attention of Colonel Szerelemy to the existence of those sleepers of sixteen years ago. The timbers were accordingly unearthed, and to the surprise of many, though certainly not of the inventor himself, the timber is as sound as on the day when it first came into his hand. The sleepers thus prepared are now on view at the Albion Works, Battersea, and managers of railways and of other public works, who really desire to keep down working expenses, would do well to pay a visit to the place, and ascertain for themselves the value of this mode of treatment. We believe that some astute Americans, who have profited by their visit to the Paris exhibition, have within the last week purchased the rights of the inventor for the United States.—*London Railway News.*

Savannah, Griffin and North Alabama R.R.

On Friday of last week, Mr. P. C. Wright, agent of French & Co., of New York, visited our place and addressed our citizens on the proposed contract between the company he represented and the Board of Directors and a committee of stockholders for the building of the Savannah, Griffin and North Alabama Railroad. French & Co., have agreed, for certain considerations, to equip the road from Griffin to Newnan, and turn it over to the directors by the first of May next, and to prosecute its completion to Decatur, Alabama, *via* Jacksonville, with all possible dispatch. There need no longer be any doubt as to the construction of the road to this point at an early day, for the New York capitalists who have interested themselves in the enterprise have abundant means to fulfil their contract.

Mr. Wright in his address gave it as his opinion that the line from Griffin to Decatur will be the most important and paying one in the South, and that its construction is urged by every consideration of policy and interest. * * * *

After the conclusion of the speaker's address, the directors and committee of stockholders completed with him the contract referred to above.—*Newnan Herald.*

Indianapolis and St. Louis Railroad.

Our readers are probably aware that important negotiations have been in progress for some time past in respect to the line of railroad between St. Louis and Indianapolis. A deep interest has been manifested in business circles for the successful accomplishment of the proposed arrangement, and we take pleasure in stating that it has now been fully consummated. The Terre Haute and Indianapolis Railroad Company having declined to enter into the arrangement desired by the Eastern companies a corporation under the name of the Indianapolis and St. Louis Railroad Company has been formed under the general railroad law of the State of Indiana to construct another line of road between the cities of Indianapolis and Terre Haute, connecting at the latter place with the St. Louis, Alton and Terre Haute Railroad. The new company has been organized, and is composed of the following Board of Directors: Geo. W. Cass, President of the Pittsburgh, Fort Wayne and Chicago Railroad; Stillman Witt, President of the Bellefontaine Railroad; Henry C. Lord, President of Indianapolis, Cincinnati, and Lafayette Railroad; L. M. Hubby, President of Cleveland, Columbus and Cincinnati Railroad; Thomas A. Morris, of Indianapolis, Indiana; Pliny Hoagland, of Fort Wayne, Indiana. Gen. Morris has been elected President, and Edward King, of Indianapolis, Secretary of the Company. The surveys of the new line have been in progress for some time, and the work has now commenced and will be pushed forward to a speedy completion. The operating contract with the St. Louis, Alton and Terre Haute Railroad has been executed by this company, under the guarantee of the associated roads, in the place of the Terre Haute and Indianapolis Road, and on the 11th inst. the parties met in this city and the arrangement was consummated by the formal surrender by Mr. Butler, the President, (in the presence and under the direction of the Board of Directors,) of the main line from St. Louis to Terre Haute, and the Alton Branch, which will in future be operated and managed by the Indianapolis and St. Louis Railroad Company, in the interest of the associated companies, whose object is to increase the facilities of communication between St. Louis and Eastern cities by this great central trunk line.—*St. Louis Republican Sept. 14th.*

Chesapeake and Lake Erie Railroad.

For some time past the question of a railroad from Washington City to Lake Erie has been agitated and is now assuming tangible shape. The route for this road has been examined from Washington as far as Williamsport on the Potomac, and has been found entirely practicable. From Williamsport it will follow the Potomac to the mouth of Licking Creek, thence up Licking Creek by the shortest and best route to Mt. Union on the Pennsylvania Railroad, and thence to Lake Erie. One of the objects of the road is the Broad Top coal fields, and if anthracite could be developed at New Granada in sufficient quantities to justify working, so much better; but this road is not made contingent on this—the great object of this enterprise lies beyond. From present indications, Mt. Union is a point, but examinations and surveys may modify this, though the feasibility of a road through this valley and on to Mt. Union will, in all probability, make that the favored place. It is not an absolute condition that the main stem of this road shall penetrate the Broad Top coal fields, if not convenient or suitable, but in that event a lateral or branch road will do it. Gentlemen of large means, who are conversant with the importance of this road, regard this as the leading project of the day, and sooner or later, it will be accomplished. We may

look, before the season closes, for parties in this neighborhood, prospecting and examining for a route.—*Fulton (Pa.) Republican.*

Chicago, Burlington and Quincy Railroad.

We give elsewhere a comparative statement of the earnings, expenses, etc., of this road for the fiscal years ending April 30, 1866 and 1867, together with the report of the President, and the statement of the Treasurer showing the financial condition of the company at the close of the last year.

From the Report of the Engineer we learn that during the year 36¾ miles of track were relaid with new or re-rolled iron, of which 11¼ miles were between Chicago and Galesburg, 13⅝ between Galesburg and Quincy, and 11⅞ between Peoria and Burlington. Also 2.94 miles of additional side track in the city of Chicago, and 6.60 miles of extension of side track on the line of the road, and ⅜ mile to Burlington Bridge. There are now about 16½ miles of double track between Chicago and Galesburg. 29 miles of the road bed have been ballasted, and the cost of the same charged to construction. The total expenditures on account of track repairs were $845,254 72, or about $2,113 14 per mile of road. The quantities of material used were as follows: 18,181 bars of new and re-rolled iron, 163,494 new ties, 3,095 new chairs, 348,120 lbs. spike, 16,457 pairs splice bars, 151 frogs (T rail and cast,) 114,082 feet switch ties, and 146,220 feet crossing plank.

From 4,000 to 4,500 tons of new or re-rolled iron will be required the coming year, and from 100,000 to 150,000 ties. A large portion of the latter were contracted for last winter at low prices.

About 19 miles of fence have been rebuilt or repaired at a cost per rod of single fence of about 70c., or $4,096 18 in all.

The total amount charged to repairs of bridges during the year was $36,526 10, or $91.31½ per mile, which is less than half the amount per mile expended the previous year, showing an actual saving in cost of repairs of nearly 53 per cent., as compared with any year since repairs became necessary.

The docks at Chicago station, and on Joy's Canal, as well as the levees on the Mississippi River, have been repaired and mostly rebuilt, at an aggregate cost of $5,917 15.

The amount charged to repairs of buildings is $84,275 32, distributed among passenger, freight, engine and water houses, car and machine shops, coal and wood sheds, etc.

The total amount charged to ordinary expenses, for repairs, is therefore $976,069 47.

Lands have been purchased at Quincy and Burlington; depot grounds at Keweenee, Aurora and Peoria; and right of way at Chicago, for tracks connecting this road with the Chicago and Great Eastern Railway.

The amounts expended for Mississippi River Bridge at Burlington, bridges on the line, new track, buildings, right of way and other lands and improvements, have been $469,158 78; and for new locomotives, freight and passenger cars, $286,117 72—total, $755,276 50; all of which has been charged to construction and equipment account.

The Mississippi River Bridge at Burlington, which was in course of construction, and upon which and the approaches thereto, the sum of $94,864 87 had been expended at the date of the Report, will be 2,237 feet long, and will consist of six spans of 250 feet each, one span of 200 feet, one span of 175 feet from centre to centre of piers, and one pivot draw span of 362 feet in length over all. It will be constructed on the plan known as the "Pratt Truss," and will be entirely of wrought iron, with the exception of the top chord, and supported on piers of masonry founded partly on piles and partly on solid rock. Nearly all the materials required for foundations and cribbing have been bought and delivered; and all the masonry and iron work contracted for, together with steamer and boats, steam dredge, pile drivers, etc. It is thought that this bridge can be completed in time to affect the business of the road for the present fiscal year.

Boston, Hartford and Erie Railroad.

The annual meeting of the stockholders of this company was held in Boston on the 11th inst. Mr. H. N. Otis was chosen clerk of the corporation. The President stated that the present Board of Directors, under existing circumstances, did not propose to make any formal report. As all interested well knew, there were many matters connected with the corporation which unavoidably remained in an unsettled condition, but they were in hopes to complete all pending negotiations by the 1st of January next, when they would be in condition to accept the aid which had been tendered them by the States of Massachusetts and Connecticut. This being done, he believed there could be no doubt that the bonds and stock of the corporation would find a ready market. The following gentlemen were elected directors for the ensuing year: John S. Eldridge, Mark Healey, Henry N. Farwell, Joseph W. Clark, James S. Whitney, James W. Converse, Henry Thompson, Edward Harris, O. J. Rathburn, Geo. M. Bartholemew, Edmund G. Howe, Gilbert W. Phillips, Thos. E. Graves.

On motion, a vote was unanimously passed accepting the provisions of "an act to aid the construction of the Boston, Hartford and Erie Railroad," passed by the Legislature of Massachusetts in 1867.

Boston and Maine Railroad.

The annual meeting of the stockholders of this company was held at Lawrence, Mass., on the 11th inst. The Annual Report of the directors for the year ending May 31, 1867, (an abstract of which was published in the RAILROAD JOURNAL of August 31st,) was accepted. Mr. James C. Merrill was re-elected Clerk of the Corporation without opposition. It was voted that the directors have authority to issue 3,943 shares of the capital stock authorized by the charter, now unissued, which, together with any shares now owned by the corporation as an investment, shall be offered to the stockholders at $100 per share on the first day of October next, in the proportion of one share of new stock to every ten shares of old stock, and in that ratio for more or less shares, payable in such instalments as the directors may order. No dividend to be paid before July, 1868. A resolution was also passed authorizing the directors to lay a double track from North Andover to Haverhill Bridge, and at such other points as it may be necessary, as soon as a due regard to economy and the benefit of the road will permit. The following gentlemen were elected directors: Francis Cogswell, Andover; Peter T. Homer, Boston; Nathaniel G. White, Lawrence; E. J. M. Hale, Haverhill; Geo. C. Lord, Boston; Amos Paul, South Newmarket, N. H.; John E. Bickford, Dover, N. H.

Pittsburg, Ft. Wayne & Chicago Railway.

The earnings and expenses of this road for the months of August, 1866 and 1867, have been as follows:

	1866.	1867.
Earnings	$648,200 73	$602,069 21
Expenses	399,897 77	388,214 98
Net earnings	$248,303 06	$213,854 23

This shows a decrease in earnings of $46,131 62; with a decrease in expenses of $11,682 79—making the decrease in net earnings, $34,448 83.

The earnings and expenses from January 1, to August 31, 1866 and 1867, were:

	1866.	1867.
Earnings	$4,819,693 93	$4,519,893 67
Expenses	3,465,050 95	3,229,150 15
Net earnings	$1,354,642 78	$1,290,743 52

This shows a decrease in earnings, during the eight months, of $299,800 06; in expenses of $235,900 80; and in net earnings of $63,899 26.

In explanation of the apparent anomaly of this company showing a decrease in its August earnings, while some other east and west lines exhibit more or less of an increase, it is proper to say that the movement of the grain crop, from which such increased earnings arise, is thus far by the lines leading into Chicago from the south and west, and from that City by lines leading to and from Ports on Lake Erie. The movement of the crop by all rail lines to the east has not yet commenced. The late advance in freight rates was also made so late in the month as to produce no favorable effect on the August earnings.

Illinois Central Railroad.

The statement of this Company for the month ending August 31, 1867, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	11,823.95 for	$103,020 13
Acres Int. Fund Lands sold	320.00 for	4,454 60
Acres Free Lands sold	3,796.49 for	46,999 06
Total sales during month of August, 1867	15,940.44 for	$154,473 79
To which add Town Lot Sales		1,762 40
Total of all	15,940.44 for	$156,236 19
Cash collected in August		$266,211 95

TRAFFIC DEPARTMENT.

Receipts from Freight		$487,715 00
do.	Passengers	136 303 78
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	50,000 00
Total Receipts in August, 1867		$684,377 11
Total Receipts in August, 1866		$585,715 74

Western Maryland Railroad.

A few days since we rode along the line of the Western and Maryland road, and were agreeably surprised at the gratifying progress of the work. The grading of a very considerable portion of the road, from Hagerstown to the Mountain, is completed. The immense job of filling, with the huge abutments of the bridge Raven Rock gulch, under the energetic management of the Malones, is far ahead of what might might have been expected.—*Hagerstown Mail.*

Cedar Falls and Minnesota Railroad.

The Dubuque *Herald* says that this railroad is to be extended from Waverly northward, and that the work will soon be commenced. Some weeks ago the iron was purchased in New York for the ten miles north of Waverly, and iron for ten miles further, or to Nashua, will soon be purchased. The contract for the grading of the road as far as Nashua has been let to Messrs. Williams, Brown and Dillon. The grading is to be done in five mile sections, and the whole work to be completed by the 1st of December, the contract containing a provision for a brief extension of the time on certain conditions.

The Minnesota Central & McGregor Western Railroads.

We learn from the St. Paul *Press* that the Minnesota Central Railroad has been completed to Austin, in Mower Co., Minnesota, and trains commenced running to that point on the 16th inst.; and that the McGregor Western Railroad has been completed to Le Roy, in the same county. Austin and Leroy are distant from each other about 28 miles. Over this intervening gap the roads mentioned are being rapidly constructed, and it is thought the connection will be made, and trains running over the entire line during the month of October.

☞ At a meeting of the stockholders of the Kent and Queen Anne's Railroad Company, held in Centreville, Md., last week, the following officers were elected:—President, Lloyd Tilghman; Directors, Benjamin T. Briggs, John W. E. Sudler, James B. Roe, Dr. Thomas H. Crane, Charles McCollister, Wm. H. Jacobs and Hon. John M. Robinson; Treasurer, Mordecai Price; Secretary, William H. Jacobs.

Chesapeake and Lake Erie R. R.

For some time parties have had in contemplation a more direct railroad route from Washington city to Lake Erie, and the lake shore country. This road, to be called the Chesapeake and Lake Erie Railroad, will run from Washington City to Frederick direct, passing through Middletown and Boonsboro', will strike the Potomac at Williamsport, from thence to the Broadtop Mountain, in Bedford county, connecting with the Pennsylvania Railroad (in all probability) at Mount Union, Pennsylvania. It is claimed by those who have examined it that this route is 120 miles shorter, to Washington city, than any other route, and the grades, &c., no more difficult.

Mr. Joseph S. Gitt, Engineer, of the Chesapeake and Lake Erie Railroad, recently passed over this route, and stopped in Boonesboro'. From him we learn that the route from Frederick to Middletown presented itself very favorably indeed. To pass the Catoctin Mountain will require a tunnel of from 800 to 1,000 feet. The route from Middletown to Boonsboro' is more broken, requiring higher grades, but still practicable. To pass the South Mountain, it will require a tunnel of from 1,500 to 2,000 feet running through Turner's Gap, near the South Mountain House. The contemplated route will then pass along the mountain, around the factory, and in the rear of Short Hill near the lower end of town. From Boonsboro' to Williamsport the route is very favorable, crossing the Antietam about eight miles south of Hagerstown.

In a very short time the survey from Boonsboro' to Williamsport will be made by Mr. Gitt, when we shall be able to give our readers further facts in the case.

We also learn that a survey of the Frederick and Pennsylvania Railroad, from Frederick city to Littlestown, has been made, and will soon be published. The Chesapeake and Lake Erie Railroad will connect with this road, and thus give an outlet to New York, Philadelphia and the Eastern cities.—*Boonsboro' Odd Fellow.*

AUCTION SALE.

3 LOCOMOTIVES,

4-81-2 GAUGE,

At Monument Foundry, Baltimore, Md.,

Thursday 12 M., Oct. 17, 1867.

No. 1. Engine and Tender complete. Cylinders 15x20. Link Motion. 4-56 in. Drivers connected. Copper Flues. Weight about 25 tons. Tender 8 wheeled. Capacity, 1800 gallons.

No. 2. Engine and Tender complete. Cylinders 15x20, Hook Motion. 4-66 in. Drivers connected. Copper Flues. Weight about 24 tons. Tender, 8 wheeled.

Both the above, thoroughly REBUILT by one of the best makers, and ready for immediate use.

No. 3. Without Tender, as it stands without repairs. Cylinders 18x22. 8-41 in. Drivers connected. Weight about 33 tons.

These Engines or any of them are offered at PRIVATE SALE at low figures, subject to inspection, any time prior to date above mentioned, on which day, unless so disposed of, they will be POSITIVELY SOLD AT AUCTION to the highest bidder, on account of whom it may concern.

For further particulars, address

KASSON & CO.,
62 Broadway, New York.

FARNUM & SAMUEL,
IRON COMMISSION MERCHANTS,
No. 339 Walnut Street,
PHILADELPHIA.

RAILROAD IRON

OF ALL PATTERNS.

Pig, Bar and Sheet Iron. Boiler Plate, Fire Bricks, etc.

SOLE AGENTS FOR

LEBANON SPIKE WORKS.

Samples and Prices furnished on application.

TO IRON FOUNDERS.

BY USING THE WASTE HEAT FROM A Cupola Furnace, connected with a Harrison Boiler, a saving of the entire cost of fuel for the blast can be guaranteed.

As thus applied, it may be seen daily in operation from 2 to 5 o'clock, p. m., at the Harrison Boiler Works, Gray's Ferry Road, Philadelphia, Pa.

J. B. HYDE, Agent,
119 Broadway,
38tf **New York.**

NOTICE TO CONTRACTORS.

LYNCHBURG AND DANVILLE RAILROAD,
CHIEF ENGINEER'S OFFICE,
LYNCHBURG, July 12, 1867.

At a meeting of the Board of Directors of the Lynchburg and Danville Railroad Company, held at the office of the Company on the 11th day of July, 1867, it was ordered that the Chief Engineer be directed to proceed at once to locate the road on the route adopted, near Pittsylvania Court House, and that he advertise FOR SEALED PROPOSALS for the construction of Twenty-five miles of the road, (from Lynchburg to Staunton River,) including Staunton River Bridge, near the Pocket Ford. Said proposals to be opened and examined on the FIRST DAY OF NOVEMBER, 1867. And that he prepare, as soon as practicable, before the FIRST OF NOVEMBER, plans, profiles and specifications of the work for the inspection and information of all persons concerned.

In obedience to the above order, on and after the 15th day of October next, plans, profiles and specifications of the Work will be open for inspection at this office.

Sealed proposals to be addressed to the undersigned,

WM. W. BLACKFORD,
6t38 Chief Engineer.

Machinists Tools,

MADE BY

Lowell Machine Shop.

FOR SALE BY

STEVENSON & PEIRSON, Agents,

48 KILBY ST., BOSTON.

From new and improved patterns. Tools from Special Patterns built to order. 6m35

FIRST MORTGAGE BONDS.

ST. LOUIS AND IRON MOUNTAIN

RAILROAD COMPANY.

Seven Per Cent. Interest, Payable February and August.

These Bonds cover a Road of 91 miles, finished from St. Louis to Pilot Knob, and in first-class order, and an extension of about the same length from Pilot Knob to Belmont, now rapidly constructing, for which the proceeds of these bonds are to be used, making a through route from Saint Louis to New Orleans by rail.

The earnings of the 91 miles are $600,000 a year; the net profits now are sufficient to pay the interest on the entire amount of bonds, were they all issued.

The basis of security is believed to be beyond that of any other bonds now offered.

Apply at the Office of the Company, No. 43 Wall st., to

IRON MANUFACTURE

OF GREAT BRITAIN.

Theoretically and Practically Considered, Including Descriptive Details of the Ores, Fuels, and Fluxes employed, the Preliminary Operation of Calcination, the Blast, Refining, the Puddling Furnaces, Engines, and Machinery, and the various Processes in Union, etc., etc. By W. TRURAN. Second Edition. Revised from the Manuscripts of the late Mr. Truran, by J. ARTHUR PHILLIPS, Author of "A Manual of Metallurgy," and WM. H. DORMAN, C. E. 1 vol., large 8vo. Illustrated with 84 Plates. Price, $10 00.

Mr. Truran's work is really the only one deserving the name of a treatise upon and text-book of the Iron Manufacture of the kingdom. It gives a most comprehensive and minute exposition of present practice, if the term may be applied to iron manufacture as distinguished from strictly professional subjects. The author does not go out of his way to theorize upon how iron should be or may be made, but he describes how it is made in all the iron districts of the kingdom.—*Engineer.* 4t37

THE UNION PACIFIC RAILROAD CO.

THEIR FIRST MORTGAGE BONDS
As an Investment.

THE rapid progress of the Union Pacific Railroad, now building west from Omaha, Nebraska, and forming, with its western connections, an unbroken line across the continent, attracts attention to the value of the First Mortgage Bonds which the Company now offer to the public. The first question asked by prudent investors is, "Are these bonds secure?" Next, "Are they a profitable investment?" To reply in brief:

1st. The early completion of the whole great line to the Pacific is as certain as any future business event can be. The Government grant of over twenty million acres of land and fifty million dollars in its own bonds practically guarantees it. One fourth of the work is already done, and the track continues to be laid at the rate of two miles a day.

2d. The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of railroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and being without competition, it can maintain remunerative rates.

3d. 425 miles of this road are finished, and fully equipped with depots, locomotives, cars, &c., and two trains are daily running each way. The materials for the remaining 92 miles to the eastern base of the Rocky Mountains are on hand, and it is under contract to be done in September.

4th. The net earnings of the sections already finished are *several times greater* than the gold interest upon the First Mortgage Bonds upon such sections, and if not another mile of the road were built, the part already completed would not only pay interest and expenses, but be profitable to the Company.

5th. The Union Pacific Railroad bonds can be issued only as the road progresses, and therefore can never be in the market unless they represent a *bona fide* property.

6th. Their amount is strictly limited by law to a sum equal to what is granted by the U. S. Government, and for which it takes a *second* lien as its security. This amount upon the first 517 miles west from Omaha is only $16,000 per mile.

7th. The fact that the U. S. Government considers a second lien upon the road a good investment, and that some of the shrewdest railroad builders of the country have already paid in five million dollars upon the stock (which is to them a third lien), may well inspire confidence in a first lien.

8th. Although it is not claimed that there can be any better securities than Governments, there are parties who consider a first mortgage upon such a property as this the very best security in the world, and who sell their Governments to re-invest in these bonds—thus securing a greater interest.

9th. As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accrued interest, they are the cheapest security in the market, being more than 15 per cent. less than U. S. Stocks.

10th. At the current rate of premium on gold, they pay

Over Nine per Cent. Interest.

The daily subscriptions are already large, and they will continue to be received in New York by the

CONTINENTAL NATIONAL BANK, No. 7 Nassau St.,

They will also be sent by mail from the Company's Office, No. 20 Nassau Street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

JOHN J. CISCO, *Treasurer,*
NEW YORK.

THE ELNATHAN SAMPSON

NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.

Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

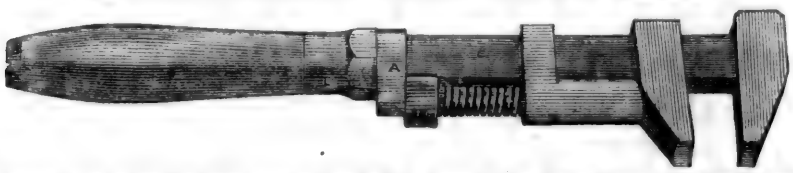
Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

MEAD RUBBER COMPANY,

12 Vesey Street, New York.

MANUFACTURERS OF



INDIA RUBBER CAR SPRINGS AND STEAM PACKING.

Our Works being now under the management of a competent Superintendent, we are prepared to offer Springs of various qualities and prices to suit. Our A No. 1 Spring made of fine Para Rubber, and the Compound used by the Patentee, the late Fowler M. Ray, will be found to be cheaper than others made, from inferior stock and offered at lower prices.

Sample setts forwarded on application. All Springs fully warranted.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

New York, Saturday, September 28, 1867.

The Keystone Bridge Company.

The Keystone Bridge Company having purchased the extensive Bridge Works of Messrs. Piper & Shiffler, located in the Ninth Ward of the City of Pittsburgh, Pa., with the right for the United States to manufacture and erect the celebrated Iron Railway Bridges under the "Linville & Piper" Patents, and "Piper's Patent" Wooden Bridges and Roof Frames, possess unusual facilities for manufacturing Iron and Wooden Bridges, Roof Trusses, &c., &c., and are prepared to enter into contracts with railway companies and others, throughout the United States, to furnish them with permanent and durable structures of any specified span and design.

The machinery has been provided with special reference to the peculiar requirements of Iron Bridge work. The facilities are ample for the execution of the extensive contracts now in progress, and will be increased as rapidly as found expedient, in order to complete promptly the most extensive structures.

The officers who superintend the manufacture and erection of all structures, are *practical men*, with extensive and varied experience, acquired in pursuing successfully, for many years, the business of constructing and erecting Iron and Wooden Railway Bridges, Roofs and Buildings.

These Iron Bridges have been in constant use on the Pennsylvania Railroad and its dependencies and connections, for many years. The Iron Railway Bridge over the Ohio River at Steubenville, Ohio, was erected by this company, in accordance with the prescribed plans and specifications. It consists of four spans 235 feet each, and one channel span 320 feet, and three spans 210 feet each. The channel span is 90 feet above low water. The bridge was commenced in 1863, and completed in 1865, and gives entire satisfaction. The double track Iron Bridge of 260 feet span over the Monongahela River at Pittsburgh, for the "Steubenville Extension" of the Pennsylvania Railroad, was constructed by this company, from designs and specifications furnished by the Superintending Engineer of the railroad company. To which may be added the numerous iron bridges for the Connecting Railway Co., including one improved wrought iron span 262 feet in length, over the Schuylkill River, recently completed. The wrought iron pivot bridge at Chicago, span 306 feet, also the wrought iron pivot bridge at Cleveland over the Cayahuga River, span 326 feet, were also erected by this company under the patents obtained in 1862 and 1865.

The success of the "Linville & Piper" Patent Bridges has been unprecedented; for many years they have borne without visible defect or deterioration, the immense traffic of the Pennsylvania Railroad, Philadelphia and Erie Railroad, Northern Central Railway, Junction Railroad, and others. Miles of wooden bridge superstructure have been replaced by permanent iron structures, by the superintending officers of this company, without detention to the business of the roads. No single instance of failure, either in materials or workmanship, has yet been reported.

The invariable success of these bridges, and their perfect adaptation to the exigencies of heavy railway traffic, may be attributable mainly to the following important considerations: By novel and original methods of calculation, tested by the most rigid analyses, and illustrated by models, the *maximum strains* on each portion of the system, for *every* condition of the permanent and variable load, are carefully determined for each structure; *each part of the structure* is then carefully and accurately proportioned to sustain the *maximum* strain to which it may be subjected under the most unfavorable condition of the "maximum" variable load or traffic; due allowances are made for the effects of impact, vibration, &c., &c.; the *best* quality of wrought and cast iron is always used.

Cast iron is used only to resist forces of compression; it is employed almost exclusively in the *tubular* form, and the parts are graduated in strict accordance with the deductions of theory and experiment. Every portion of all structures is accurately fitted by machines designed for the purpose, thus insuring accuracy and uniformity in the bearings, and obviating the danger of undue strains in any portion of the system.

These Railway Bridges are usually proportioned to sustain, in addition to the weight of the structure, a uniformly distributed load of one and a half tons per lineal foot, per track, without producing effects exceeding one-sixth, and for some conditions, one-eighth of the ultimate strength of the materials employed. By rigid adherence to correct scientific principles and liberality in proportions, with a careful selection of materials, and accuracy in workmanship, this company is prepared to furnish the great *desideratum*, a Railway Bridge, secure, economical and imperishable.

It will be seen that this company are perhaps the most extensive bridge builders in the United States; and having unlimited facilities, and being located at the centre of the iron trade for the West, possess peculiar advantages for this business.

The office of the company in Philadelphia is at 426 Walnut street. Address J. H. LINVILLE, President.

☞ The Detroit *Post* says that arrangements have been made with Mr. J. Edgar Thomson, the president of the Pennsylvania Railroad, that will secure the early completion of the railroad between St. Paul and Superior, at the western end of Lake Superior.

The Alpine Railways.

On the same day on which an account was given of the opening of the Austrian Railway over the Brenner, intelligence was also received of the first journey performed by the locomotive engine over the whole line of the Mont Cenis Summit Railway. These two important events occurred only at four days' interval from each other. The experimental trip from Botzen to Innsbruck, in the Tyrol, was made on the 18th, and that from St. Michel de Maurienne, in Savoy, to Susa, in Piedmont, on the 21st of August.

The circumstances which suggested the construction of the Mont Cenis Summit Railway ought to be sufficiently familiar to our readers. When the Italian railway lines leading to France had been carried as far as Susa, and the Victor Emmanuel line, in connection with the French trunks, had opened a communication through the whole length of Savoy to St. Michel de Maurienne, there only remained, to complete the junction between the two countries, a distance of 77 kilometres, or about 48 English miles, daily traversed by post carriages in from 10 to 18 hours. Across that distance, however, lay the main chain of the Alps, with the Pass of Mont Cenis, over which an admirable highway had been opened, under the auspices of the First Napoleon, in the early years of the present century. To overcome this great barrier thrown by Nature in the way of railroad progress, a tunnel was projected which was to pierce the Little Mont Cenis, from the village of Fourneau, nine miles above St. Michel, to Bardonneche, near the head of the valley of the Dora, whence by Oulx and Exilles, the line would come down to Susa. This tunnel, one of the noblest enterprises of modern genius nearly eight miles in length, was begun in 1857, and was to be completed in a period of years variously estimated at from 14 to 21. The work was little more than started when Mr. Fell, an English engineer, conceived a scheme for carrying a railway over the summit of the Mont Cenis Pass, availing himself mainly of the carriage road as it was, and adapting to it a system of double rails and powerful engines which had already been for some time employed with success in this country. Mr. Fell made his application to the Italian Government in 1861, and was then confident of his ability to achieve his enterprise within a year. Much precious time was, however, wasted in preliminary financial and technical operations; but the actual construction itself has taken no more than eighteen months, so that the engineer's original pledge may be looked upon as approximately redeemed.

The Summit Railway now opened over Mont Cenis differs very materially from the works on the Brenner and Sommering in Austria, from that of the Giovi above Genoa, and that on the Porretta between Bologna and Florence. These lines, although their steep gradients render them unfit for very heavy traffic, so that they will never attain the same degree of usefulness which may be expected from the tunnel under Mont Cenis, are yet at least perfectly continuous, and can be traversed in the same carriage from end to end. But Mr. Fell's railway still causes a break in the great Franco-Italian line. Passengers from France on reaching St. Michel, have to be transferred from one train to another, as they had hitherto to step from the train into the diligence. The inconvenience to travelers is of course trifling; but we all know what difference in the conveyance of goods arises from the change of gauge on the same line. As an accommodation to light traffic, however, and till such time as the works at the tunnel are completed, Mr. Fell's achievement is invaluable, for, independent of the gain in time, it will render sledges unnecessary, and, by the protection of galleries and covered ways over the most exposed parts, it will obviate all delays and dangers from avalanches, snowdrifts, and all the other dangers of Alpine traveling in the winter season. So far as passengers are concerned, the boast "*Illn'y a plus d' Alpes*" is made good, for a man on his way from Paris to Turin will be enabled to go over these mountains without any of the hardships that formerly used to make him so painfully aware of their existence. The conveyance of mails and mail-passengers, greatly improved of late as to regularity, will be liable only to such interruptions as are common to other lines, and from this moment Italy may safely reckon on becoming the permanent highway for the Overland Mail.

Little Miami and Columbus and Xenia R.R.

The joint earnings of the Little Miami and Columbus and Xenia railroads for the years ending November 30, 1865 and 1866, have been as follows:

	1865.	1866.
From passengers	$1,319,171 18	$906,572 57
" freight	959,366 70	895,994 81

Surplus Nov. 30, 1866	$53,192 73

The equipment of the road consists of 42 locomotives, 40 passenger cars, 23 baggage, mail and express, 428 box, 21 stock, 95 rack, 107 platform and 10 lime cars.

The number of miles run by locomotives has been: with passenger trains, 507,086; with freight trains, 590,731; with wood and construction trains, 63,032—total miles run, 1,160,900; an increase over the previous year of 71,833.

The following statement exhibits a comparison of mileage and cost of repairs for ten years:

	Miles run.	Cost of Repairs.	Cost per mile.
1857	666,546	$65,479 46	9.82 cents.
1858	637,835	59,031 92	2.25 "
1859	732,924	54,507 41	7.43 "
1860	796,187	60,778 92	7.64 "
1861	814,908	55,469 20	6.80 "
1862	846,882	67,395 35	7.95 "
1863	1,002,647	96,713 78	9.64 "
1864	1,117,836	120,426 58	10.77 "
1865	1,089,067	98,389 89	9.03 "
1866	1,160,900	89,430 33	7.70 "

The following is a comparative statement of the mileage and cost of repairs and renewals of passenger cars for the past and preceding years:

	Miles run.	Cost of repairs.	Cost per m.
1865	2,353,354	$57,125 74	2.4 cents.
1866	2,684,174	48,958 18	1.9 "
Increase.	330,820	Dec. $8,167 56	0.5 cents.

The mileage and cost for repairs and renewals of freight cars during the same time have been as follows:

	Miles run.	Cost of repairs.	Cost per m.
1865	7,343,721	$111,075 48	1.51 cents.
1866	6,830,124	91,440 64	1.30 "
Dec.	513,597	$19,634 84	0.21 cents.

The actual working expenses of the road 68.22 per cent. of the gross earnings, are an increase of 9.80 per cent. over those of last year, the expense of rent and taxes not being included.

The cost of renewal and repair of iron rail, renewal of cross ties and chairs, opening of ditches, renewal and repair of culverts, cattle guards, and other masonry, repairing fences, surfacing track, etc., has been $251,802 19; against for last year, $348,011 47—a decrease of $96,209 28. The cost of repairs of road per mile run by locomotives and cars, was 2.3 cents. In 1865 it was 3.2 cents.

The following materials have been used in renewals during the year; 1,571 tons new rails, 18,311 new chairs and joint fastenings, 129,950 lbs. of spikes, 63,463 cross ties, and 2,850 iron rails repaired—the total cost of which has been $121,689 95.

The increase in cost of repairs of station buildings, has been $520 70; in water stations, $2.881 50; in shop machinery, $365 44; with a decrease in repairs of bridges of $12,771 21; and in repairs and renewals of locomotives of $8,959 56.

There have been carried on the road during the year exclusive of commuters, 486,349 passengers, of whom 153,466 were through, and 332,883 local. Number of passenger carried one mile, 25,461,623, of whom 15,862,627 were through, and 9,598,996 were local.

The tonnage carried during the year, exclusive of express matter, amounts to $242,550 tons through freight, and 166,460 tons local—an increase over the previous year of 43,900 tons.

The officers and directors of the Little Miami Railroad Company, for 1867 are as follows:

President.—E. W. WOODWARD.

Directors.—Larz Anderson, Nathaniel Wright, W. H. Clement, Alphonso Taft, Chas. H. Kilgour, N. L. Anderson, B. F. Strader, E. W. Woodward, J. N. Kinney, John Bacon, Abraham Hivling, Jos. R. Swan.

Vice President.—CHAS. H. KILGOUR.

Secretary.—N. L. ANDERSON.

Treasurer.—S. E. WRIGHT.

Auditor.—D. G. A. DAVENPORT.

The officers and directors of the Columbus and Xenia Railroad Company, for 1867, are:

President.—Jos. R. SWAN.

Directors.—Wm. Dennison, Robert Neil, D. W. Deshler, L. Goodale, Henry C. Noble, Jos. R. Swan, Geo. M. Parsons, W. H. Clement, Chas. H. Kilgour, E. W. Woodward, Abraham Hivling, Simon Gebhart.

Vice President.—E. W. WOODWARD.

Secretary and Treasurer.—CYRUS FAY.

The Express Companies.

The gross receipts of the several lines for the first seven months in 1866 and 1867, have been as follows:

	1866.	1867.
Wells-Fargo	$354,159	$401,001
Adams	2,307,545	1,990,030
United States	2,193,178	1,312,858
American	1,993,678	1,217,510
Merchants' Union		2,043,351

The Merchants Union was not in operation in 1866. The competition made by this company operates chiefly on the United States and American companies, though the Adams is somewhat affected. It would appear that the aggregate of business done by the three companies, the Adams, the United States and American, during the first seven months of the year, amounted last year to $6,494,391, and this year to $4,520,398—decrease, $1,973,993, against $2,043,351 done by the Merchants' Union in the first seven months of this year. While gross receipts over these lines for the seven months have increased but $69,760 over those of last year, the amount of business transacted has been largely augmented under reduced rates.

The Cotton Crop.

The following statements of the movements are compiled from the *New York Shipping and Commercial List*:

COMPARATIVE PRODUCT OF COTTON.

	1861.	1866.	1867.
Louisiana	1,751,599	711,629	702,131
Alabama	546,794	429,102	289,516
Texas	144,747	174,985	185,919
Florida	121,172	149,139	68,349
Georgia	477,584	263,378	256,965
South Carolina	336,339	112,273	162,247
North Carolina	56,295	64,559	38,522
Virginia	78,132	37,531	123,627
Tennessee, &c.	143,424	211,885	185,712
Total bales	3,656,086	2,154,476	1,951,988

The exports of cotton from the United States in each of the last two years (ending September 1st,) were as follows:

	1865-'66.	1866-'67.
To Great Britain	1,262 271	1,216,262
To France	220,650	198,147
To Northern Europe	48,647	95,842
To other foreign ports	23,096	47,303
Total bales	1,554,664	1,557,054

The amount consumed in the United States is given by the same authority as 854,039 bales for the year ending September 1st, 1867. In this connection we bring forward our statement of the total crop for the last forty five years, adding the estimates by the *Shipping List* for the period of the war. The figures for each year are given, as shown by the receipts at the ports, according to our usual custom. The actual growth in 1855-'56 was generally estimated at less than a quarter of the supplies which reached the ports then newly opened:

COMPARATIVE CROP STATEMENT.

Year.	Bales.	Year.	Bales.
1820-'21	430,000	1844-'45	2,394,503
1821-'22	455,000	1845-'46	2,100,537
1822-'23	495,000	1846-'47	1,778,651
1823-'24	509,158	1847-'48	2,347,634
1824-'25	569,249	1848-'49	2,728,596
1825-'26	720,027	1849-'50	2,096,706
1826-'27	957,281	1850-'51	2,355,257
1827-'28	727,593	1851-'52	3,015,029
1828-'29	870,415	1852-'53	3,262 882
1829-'30	976,845	1853-'54	2,930,027
1830-'31	1,038,848	1854-'55	2,847,339
1831-'32	987,477	1855-'56	3,527,845
1832-'33	1,070,438	1856-'57	3,939,519
1833-'34	1,205,324	1857-'58	3,113,962
1834-'35	1,254 328	1858-'59	3,851,481
1835-'36	1,360,725	1859-'60	4,669,770
1836-'37	1,422,930	1860-'61	3,656,086
1837-'38	1,801,497	1861-'62 est.	4,800,000
1838-'39	1,360,532	1862-'63 est.	1,500,000
1839-'40	2,177,835	1863-'64 est.	500,000
1840-'41	1,634,945	1864-'65 est.	300,0 0
1841-'42	1,683,574	1865-'66	2,154,476

1843-'44	2,030,409		

—*N. Y. Journal of Commerce.*

☞ The grantees of the Portsmouth and Dover, N. H., R. R., have chosen Albert L. Jones, President, and G. W. Tucker Treasurer of their corporation. Dover and Portsmouth are ten miles apart. The route of the road has not been fully decided upon.

Atlanta and West Point Railroad.

The income of this road for the years ending June 30, 1866 and 1867, has been as follows:

	1866.	1867.
From passengers	$187,655 10	$158,911 41
" freight	193,271 60	208,638 38
" mails	5,468 70	6,562 44
" express	17,539 89	12,739 77
" U. S. Government	11,183 38	4,624 81
" miscellaneous	292 00	
	$415,410 67	$391,476 81

And the expenses, were:

Conducting transport'n.	$46,680 15	$62,202 14
Motive power	64,387 58	72,923 46
Maintenance of way	68,214 90	72,676 55
Maintenance of cars	6,463 72	11,574 15
Total ordinary exp	$185,746 35	$219,376 30
Leaving	$229,664 32	$172,100 51

From which deduct extraordinary expenses in 1866-67, viz:

Rebuilding cars	$20,000 00	
Two new engines	32,476 54	
One express car	1,500 23	
Repairs of engines	15,000 00	
Cross ties	5,000 00	
Rents of cars	2,296 23	
Government taxes	7,465 72	
Donation	600 00	
Map and profile of road	1,088 00	
Old claims	17,793 40	
		103,220 12
Leaving balance of earnings unappropriated		$68,880 39

In 1866 the extraordinary expenses were $175,016 04, leaving the balance of earnings unappropriated at the close of that year $54,648 28.

The per centage of ordinary expenses to gross receipts in 1867 was about 56 against 45 for the previous year. This is the result of competition and low rates, as will be seen by the following comparison: In 1866 the average receipt per passenger was $4.28¾; in 1867, $3.36⅛; and per ton of freight, $7.97 against $4.48. The number of passengers for the year ending June 30, 1866, was 43,703, and the number of tons of freight, 24,250. In 1867, the number of passengers was 47,253; and the numbnr of tons of freight, 46,569. The report says:

It thus appears that while the gross receipts have fallen off $23,933 86, the tonnage has increased 22,319 tons; and the passengers carried have been 3,550 more than last year.

It will also appear, that the *extra* expenditures from earnings, for renewal and repairs, have been large. Further expenditures for these purposes will be required to repair the waste and ravages of war, and restore property to its former condition. But these extra expenditures are drawing to a close; and we have the opinion of the Superintendent, that demands for these purposes will not, probably, hereafter interfere with regular dividends. It can not be expected that the company will ever be restored to the unequalled prosperity it once enjoyed; but it can scarcely be doubted, that the opinion of the Superintendent will be fully justified by future profits. With freedom from debt, dividends of 8 per cent., as indicated by him, may be derived from our local business, which, after all, is the only reliable business for the payment of dividends. Railroads in the South-west are multiplying and extending; and competition for the distant or through travel is constantly increasing. Perpetual vigilance, in guarding against competition, by securing proper connections and extensions, is a peculiar feature in railroad investments. The competition of the routes from New Orleans, by Jackson and Grand Junction, and from Mobile, by Maredian and Corinth, rendered the extension of our connections from West Point to the Gulf almost a necessity. To accomplish this important object, it was found necessary to give aid, in some way, to the Alabama and Florida Railroad; the completion of which would give us connection with Mobile and with the fine harbor of Pensacola.

With this important object in view, the Stockholders, in Convention, were induced in 1857, to join the Montgomery and West Point Railroad Company, in a guaranty of the bonds of the Alabama and Florida Railroad Company, for the sum of three hundred thousand dollars, at ten years. A first mortgage was given to secure the guarantors against loss; and as the resources of the company were deemed ample, at the time, to meet, punctually, all its engagements, there was no apprehension of either loss or inconvenience. The depredations of war defeated these calculations. The bonds became due the 1st instant, and it became necessary to provide for them; this will be done by a substitution of the bonds of the guarantors, at five years, dividing the amount as principle, with mutual indorsements. This company, by agreement, controls the whole loan for the benefit of both guarantors. No loss is apprehended; but the transaction is referred to, as it concerns the interests of the Stockholders.

The contemplated advantages of a connection with Mobile are still enjoyed; but the extension to Pensacola was destroyed by the Confederate Government, which, it is hoped, however, will soon be rebuilt.

The permanent effect of emancipation upon the profits of railroads is a problem not yet fully worked out. As their main purpose and business is to circulate the exchangeable wealth of the country, and accommodate the travel connected with and dependent upon it, their profits must greatly depend upon the general prosperity.

After the cessation of hostilities, an activity was exhibited for a time, which the slender resources left by the war could not long maintain. The people were destitute of both luxuries and necessaries, and the exports remaining in the country were rapidly brought to market, and converted into necessary supplies. Many citizens of the North too, deceived equally with ourselves into a belief of a speedy restoration of the Union, with all its constitutional guarantees, and a return of that general prosperity which a restoration of the Union can alone restore, were flocking into the country, purchasing property, and preparing for new enterprises. This activity was only fitful. In the policy of the government, they were disappointed. Our slender resources left by the war, were soon exhausted, and were but slightly replenished by the last year's crop, which was nearly a failure. Our people are now very poor; they were greatly impoverished by the war, and under our disorganized political *status*, have not felt much encouragement to improve their condition. For want of means, we have but little local travel or traffic; for want of confidence, we have but little from other States. But we should not be without hope; our present position bears too heavily on national interests and the prosperity of the whole country, to continue much longer. With all discouragements, the material resources of the country are visibly improving. Crops are reported promising, and the freedmen are working and conducting themselves very well; they are, of course, as yet, in general knowledge, an uninstructed race; but there is much more intelligence and good sense among them than is generally supposed. They have some very sensible counsellers of their own race and color, and are beginning to see their peculiar advantages as a laboring class in the South. They are, of course, free to engage in any employments for which they think themselves best qualified; but as agricultural laborers, their advantages are, perhaps, unrivalled. Inured to the climate, disciplined to order and economy, and educated in the peculiar agriculture of the South, they may be considered experts in the production of a profitable export, for which there is constant and almost unlimited demand. With these advantages, and sobriety and industry, they may soon become the most independent and prosperous laboring class on the earth! That such should be their fortune, should be the wish of all; for the prosperity of both races is strictly and closely identified. If one prospers, so will the other; and if both prosper, so will the South, with all its material and dependent interests,—Railroads included.

Should these hopes be even partially realized, and good government, with constitutional guarantees, fully restored, we may fondly and reasonably hope for a large share of that prosperity which we once enjoyed. In comparing net profits, however, with those realized before the war, there are some elements which will, for a time, at least, contribute to an unfavorable result. We allude to reduced mail pay, and onerous taxation. Before the war, 50 per cent. of gross receipts was considered an average outlay for the expenses of management. It is now about 60; sometimes more, very rarely less. In view of the heavy claims upon income for renewals and repairs, no dividend was declared in January last. Further appropriations might well be made for these purposes; but as the most pressing claims of this kind have been satisfied, and the Stockholders are much in need of dividends, a dividend of $3 50 per share, free of tax, was declared payable on this day.

The assets and liabilities of the company, July 1, 1867, were as follows:

ASSETS.

Road outfit and real estate	$1,200,078 76
Bills receivable	22,779 20
Supply fund	2,500 00
Jno. D. Gray & Co.'s note	5,000 00
Due by agents and companies	103,026 52
Cash	13,248 11
	$1,346,632 59

LIABILITIES.

Capital stock	$1,232,200 00
Bonds of the company	35,500 00
Dividends unpaid	16,569 11
Due to agents and companies	40,005 89
Profit and loss	22,357 59
	$1,346,632 59

The equipment of the road consists of 18 locomotives, 6 passenger cars, 4 baggage, 1 express, 2 cab, 1 shanty, 45 box, 12 stock and 21 platform cars.

President.—HON. JOHN P. KING.

Directors.—W. B. Berry, Jesse McLendon, John E. Robinson, Richard Peters, F. Phinizy, Hon. Orville A. Bull.

Secretary and Treasurer.—WILLIAM P. ORME.

Gen'l Superintendent.—L. P. GRANT.

☞ The Franklin copper mine produced 44 tons, 498 pounds, of copper in August; the Pewabic, 113 tons, 165 pounds; Quincy, 90 tons; 165 pounds; Isle Royale, 52 tons, 1,263 pounds; Sheldon-Columbian, 34 tons.

The Mont Cenis Summit Railway.

The opening of the railway over Mont Cenis has already been announced. The following particulars of the trial trip are given in an English paper

A train, composed of an engine and two carriages, left for Michel station at 6.30 A. M. on the 21st of August. Mr. Fell's system consists of the application of a central double-headed rail placed on its side in the middle of the way, and elevated about fourteen inches above the ordinary rails. There are four horizontal driving wheels on the engine, under the control of the engine driver, which can be made by pressure to grasp the central rail so as to utilize the whole power of the engine and so enable it to work up incredible gradients without slipping. The carriages also have four horizontal wheels underneath which, with the central rail, forms a complete safeguard. In addition to the ordinary brakes there are brakes upon the central rail. It would appear, therefore, impossible for the engine or carriage to leave the rails where the central one is lain. The morning was admirably adapted for the trip, the sun shining with great brilliancy upon the Alpine peaks and the numerous glaciers which are visible in different parts of the route.

After leaving the deep valley in which St. Michel is situated, the line passes by a gradient of one in thirty to the Point de la Denise, where an iron bridge spans the river Arcq, near the site of that which was carried away by the inundations of last year. As the little train passed the village of Fourneau, the workmen of the Grand Tunnel of the Alps turned out *en masse*, and, as at all other parts of the route, they were observed stooping down and even endangering their lives for the purpose of inspecting the unusual mechanism of the engine for working on the central rail. The first very steep gradient of one in twelve was seen in passing Modane, and, foreshortened to the view, appeared on the approach as if impossible to surmount; but the engine, the second constructed on this system, had already proved equal to the task on the experimental line, and, clutching the central rail between its horizontal wheels, it glided quickly up, under a pressure of steam not more than eighty pounds to the square inch, without apparent effort.

The progress was purposely slow, because no engine or carriage had previously passed over the line, and also to give opportunity for examining the works. The damages to the road on which the line was chiefly laid we found to be substantially repaired by the French Government. The magnificent scenery around, and the waterfall near Fort Sassaillon, were much admired, as the sharp curves afforded different views while passing on the edges of the deep ravines. The train entered Lauslebourg Station under a triumphal arch, having accomplished twenty-four miles of distance, and attained an elevation of two thousand one hundred feet above St. Michel. From this point the zigzags of ascent commence, and the gradients over a distance of four miles were for the most part one in twelve. Looking down from the train near the summit, as if from a balloon, four of the zigzags were visible at the same instant to a depth of two thousand feet. The power of the engine was satisfactorily tested in this ascent, and the summit was reached under salvos of artillery from an improvised battery, and amid the cheers of French and Italians who had gathered to welcome the English on the frontier.

The engine came to a stand under a triumphal arch, at an elevation of 6,700 feet above the sea. Flags of the three nations, and a silk flag especially presented by Signor Ginaoli, to Mr. Fell, waved over a sumptuous breakfast, also provided by that gentleman. The hospice, the lake, and the plateau of the summit, surrounded by snow clad peaks and glaciers, rising to an elevation of from 10,000 feet to 13,000 feet were passed, and the portion of the descent commenced from the Grand Croix. The railway here follows the old Napoleon Road, which was abandoned long since for diligence traffic on account of the dangers from avalanche. Masonry covered ways of extraordinary strength had here been speedily provided for the railway. The descent to Susa was a series of the sharpest curves and steepest gradients, on which the central rail had been continuously laid. The valley of the Dora, with Susa and the convent of St. Michel, and even the Superga above Turin, visible for thirty miles in the distance presented a magnificent panorama, as the train wound through a clear atmosphere round the mountain side. The confidence of the party on a trip which would, under ordinary circumstances, have been so dangerous was manifested by their crowding round all parts of the engine, from which, under a feeling of the security afforded by the central rail, they thoroughly enjoyed the everchanging scenes as they passed round the edges of the various precipices. Susa was entered amid the acclamations of multitudes of spectators, and the party adjourned to dine at the Hotel de France. Thus was completed a journey unexampled in its character, both as respects the steepness of gradients, the elevation of the summit level, and the difficulty with which the curves and precipices were overcome.

Selma and Montgomery, & Vicksburg and Meridian Railroads.

It is now a certainty that the short gap of about forty-five miles, existing between Montgomery and Selma, will, within the next twelve months, be a link in the great railway route, on the *shortest line between the Mississippi river from any point and the Atlantic sea-coast!* The distance from Vicksburg to Savannah, *via* Selma and Montgomery, will be 670 miles, between which points passengers will be conveyed in 30 hours, at a very moderate rate of speed, and freight in about 48 hours. A regular line of steamers ply between New York and Savannah, and it will no doubt become the preferred route with the Vicksburg and other merchants in this section of the South, for a certain class of their merchandise freight from New York, for which the speediest transportation is desired. Thus it will become a great thoroughfare for Western freight, to be distributed in Alabama, Georgia, &c., starting from Vicksburg; and for New York freights, destined for portions of Mississippi, Louisiana and Texas, for the most part, coming through Vicksburg. Consequently, Vicksburg will be the point of concentration for a vast amount of Western and Eastern freight, of every description, which must enure to the benefit of her trade, and advance her commercial growth and prosperity.

In this connection, we can state that the Vicksburg and Meridian Railroad is now being put in good working condition for the fall trade. The President of the company has succeeded in making highly important financial arrangements, which will enable him to add very much to the safety and efficiency of the road, and to increase the rolling stock to the full extent that will be required to accommodate the business that will be offered.

In a word, the Vicksburg and Meridian Railroad, with its Eastern connections, is to form the great trunk line from the Atlantic to the Pacific. —*Vicksburg Times.*

Memphis and Little Rock Railroad.

We have been informed that the president and directors of the Memphis and Little Rock Railroad have made arrangements whereby the eastern division of their road, extending from Memphis to Madison, on the St. Francis river and the western division, from Devall's Bluff to Little Rock, are to be completed by the first of next January. They have made a contract with Mr. Edward Denmead, of Marietta, Ga., who agrees to put the above divisions of the road in complete running order; to furnish labor, timber, ties, and all materials necessary (except iron, the company agreeing to supply the rails, chairs, spikes, etc.) He is to erect all bridges, and trestle-work required, build sidings, depots, water stations, stock pits, etc.; put in new cross-ties; and, in short, put the road in thorough condition. The entire cost to the company, including iron, is estimated at $200,000. The company agree to pay Mr. Denmead $20,000 in cash instalments as the work progresses. The balance which may be due him on the estimates of the engineer, is to be paid out of the earnings of the road after it is put in working order. The divisions referred to will be placed in charge of an experienced superintendent, to be selected jointly by the company and contractor, who will take charge of the working of the road, the company furnishing the rolling stock. He will make monthly reports to both parties, and pay over monthly the net earnings to Mr. Denmead, until the entire amount due on his contract shall be paid, when the working management of the road will revert to the company. The affairs of the road, meantime, are to be subject to the inspection of both parties, and the general charge of the superstructure and work of the road will still be in the hands of its chief engineer, J. L. Meigs, Esq. A stage line is to be established from Madison to Clarendon, from whence a boat will convey passengers to Devall's Bluff, where they will take the cars on the western division for Little Rock. Some time since, a considerable amount of stock was subscribed by our business men to aid the company in grading the middle division of the road, which extends from the St. Francis to White river, forty-six miles, but payments have not been made promptly, and the work has been retarded. The contract to grade the middle division was awarded to Gen. Forrest, who as nearly twelve miles west of Madison completed, and is still at work. An agent of Gen. Fremont, president of the El Paso railroad, is expected here in a few days, and an arrangement may then be perfected whereby the work on the middle division will be pushed along more rapidly, and direct railroad communication between Memphis and Little Rock established.—*Memphis Appeal.*

New York and Oswego Midland Railroad.

The route of what is to be known as the New York and Oswego Midland Railroad, has, after much deliberation, been decided upon. The Rochester *Democrat* says that the directors have published a long address giving a description of the route proposed, and assigning reasons for their action. The line will commence on the Hudson River, at or near Jersey City, and go to Pompten, New Jersey; thence to the village of Middletown on the New York and Erie Railway, in Orange County; thence through the Sandburgh and Sheldrake valleys to Young's Gap, in Sullivan county; from Young's Gap the road will pass through Delaware county, *via* Walton, to Sidney, and thence across the Susquehanna and Unadilla Valleys through Guilford and Oxford to Norwich, in Chenango County; thence through the Chenango and Oneida Valleys, *via* Oneida Lake, to Fulton, Oswego County; thence to Oswego. A branch will be constructed through the town of Hamden to the village of Delhi. A strong effort was made to bring the road through Syracuse, but that city and the towns in Onandago County having refused to issue bonds to aid in the construction of the road, the directors located the route from Norwich to Fulton *via* Oneida.

Cleveland and Toledo Railroad.

A meeting the stockholders of this company will be held in Cleveland on the 8th of October, to consider and vote upon the question of a lease of its road to, and a running arrangement with, the Cleveland, Painesville and Ashtabula Railroad Company, and of an increase of its capital stock; and likewise to take action upon a proposition for leasing to the Cleveland and Pittsburgh Railroad Company the joint use of the Cuyahoga River Bridge at Cleveland.

American Railroad Journal.

Saturday, September 28, 1867.

Stock Exchange and Money Market.

Through the extremely liberal remittances of currency to the West, the free sales of gold and bonds by the Treasury Department, the consequent influx of funds into the Treasury vaults and the renewed activity in Stocks and Gold, Money has been rendered less abundant in the open market, since our last, while the demand for accommodation has been much brisker, and rates have been quoted decidedly firmer, or up plumply to full seven per cent. on call, on the best stock collaterals, and 7@8½ per cent. per annum on prime to good short date commercial paper. On Wednesday, there was a rather less urgent inquiry from the leading Stock Exchange firms, while there was a more animated demand from a few of the heavy dealers in the public securities. The outflow of currency to the West has been on a less extensive scale, since the opening of the current week, while the Treasury office has been a very heavy purchaser of outstanding Seven Thirty Notes. These circumstances give promise of a diminution of the pressure in the loan and discount market. The city banks, last week, suffered a sweeping reduction of their resources, having lost $7,467,518 of legal tender, and $7,482,836 of deposits. They reported an increase of $432,552 in their specie reserve, while they added $633,480 to their loans, and discounts, and $41,214 to their average circulation. The specie reserve of the banks is now $8,617,498, against $7,662,611 same time last year. The city bank deposits are now $185,603,939, against $224,-394,663 week ending Sept. 22, 1866. The legal tender reserve amounts to $57,709,385, against $90,-428,189 same time last year. The circulation now stands at $34,056,442, against $28,770,381 same time last year. The loans are now $254,794,067, against $272,777,166 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $98,690,393 a day, against a daily average of $85,681,445 the preceding week, and $73,617,897 the week ending with Sept. 7. The current week's exchanges average about $96,000,000 a day. The changes in the present Bank Statement, although large in amount as against the deposit and Greenback lines, still leave the lawful Money in reserve full 33 per cent. to the demand liabilities of the Banks, or $11,386,788 in excess of the required 25 per cent, to Deposits and Circulation. The Banks owe:

On deposits	$185,603,939
Circulation	34,056,442
Total	$219,660,381
Of which 25 per cent. would be	$54,940,095
They hold:	
In gold and gold notes	$8,617,098
In greenbacks	57,709,385
	66,326,883
Excess over required average	$11,386,788

National Bank notes to the amount of $40,-180 were issued last week, making the total issue to 1,671 banks thus far, $303,947,846, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,849,345, leaving, with the existing 1,648 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $299,098,451. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,690,-000; and for the public deposits, $38,373,950—making a total of $379,063,950. The Treasury Department last week redeemed and destroyed $340,700 of worn and mutilated fractional currency, and issued $593,731 of new.

The Philadelphia Bank movement the past week shows a decrease in loans, of $251,702; a decrease of $24,163 in specie; a decrease in legal tenders of $215,251; a decrease of $936,-144 in deposits; and a decrease of $3,993 in circulation. The Bank Clearings show a decrease of $725,316, and the balances, a decrease of $741,817.

A fair average income from customs, and a light revenue from excises was reported by the Treasury Department, for last week. The ex-

cises, last week, yielded $1,868,822, against $3,850,000 the preceding week; customs at the port of New York $2,996,877, and at the outports, about $956,000 (in coin) more, making the grand total income for the week equal about $7,664,295 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $56,500,000.

The U. S. Sub-Treasury receipts, week ending with Sept. 21, were $22,910,965, including $2,996,877 from customs duties; payments, $23,595,431; balance at the close of the week, $118,696,822, against $119,381,288, at the close of the preceding week, showing a decrease of $684,466. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,397,440 including $395,926 from customs; and payments, $644,073; on Tuesday, receipts, $3,238,353 including $655,419 from customs, and payments, $2,031,912. The balance at the close of business on Tuesday stood at $120,656,631, against $122,026,911 a week previous.

Under the influence of an enlarged supply, through increased offerings, chiefly on Government account, and of the stringency in money; the gold speculation has been less confident, since our last, and decidedly reduced prices have been marked in the Gold Board. On Tuesday, the lowest figures were made, namely 142⅛. On Wednesday, there was a rather sharp rally, the price rising to 144. The latest dealings were at 143⅝@143¾. The speculative demand has been less animated. The Customs call has been fair. There has been no export inquiry of moment. Government was again on Wednesday a seller of gold, but only to a limited extent, and its offerings did not perceptibly affect the market. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $2,417,026. The customs demand for Gold last week, averaged $499,479 a day; thus far, this week, it has been equal to $525,672 a day, or equal to a weekly aggregate of $3,354,032. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $153,061, and from California, $1,350,966. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $91,669,655, against $101,680,560 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $22,625,470, against $31,612,256 same time last year, showing a decrease this year, of $9,006,786. The exports of specie from this port, last week, were $179,222. The total outflow of specie from the port, since Jan. 1, 1867, has been $42,494,472, against $53,653,258 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $135,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $43,172,765, against $31,709,565 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to August 10, reached $26,822,585, against $29,240,887 same time last year, showing a decreate, in 1867, of $2,418,301.

A fair supply of foreign exchange has been available to purchasers, since our last, at generally less buoyant prices, though toward the close, the leading drawers claimed firmer rates. The demand has been comparatively moderate. Bankers' 60 day bills on London closed at 109¼@109⅝, and on Paris to 5.16¼@5.15; sight bills on London to 109¾@110⅛; and on Paris to 5.13¾@5.12½. The offerings of produce bills have been quite liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,425,523, making the total value of exports since Jan. 1, 1867, $133,572,340, against $143,286,217 same time in the preceding year.

Government securities have declined in price, since our last, under an increased supply, especially of the later issues, and a less active demand. The tightness in money has led to rather extensive realizations, thus adding to the depression in the market. The Treasury department has been a free purchaser of Seven-thirty notes, since Monday; but reduced its limit as to price on Wednesday, and this reduction prevented any round sums from being offered at the local office on that day. The general market closed heavily. U. S. sixes of 1881 closed here on Wednesday at 110⅝@110⅞; U. S. Five-twenties of 1862, 113⅞ 114; U. S. Five-twenties of 1864 at 109@109¼; U. S. Five-twenties of 1865 at 109⅞@110; U. S. Five-twenties of 1865, consolidated, 107¾@107⅞; U. S. Five-twenties of 1867, 107¾@107⅞; U. S. Ten-forties at 99½@99⅝, and U. S. Seven-thirties at 106¾@106⅞. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

October, 1864	119⅛	August, 1865	116⅛
December, 1864	118⅛	September, 1865	115⅜
May, 1865	117⅜	October, 1865	115⅛

The railway and miscellaneous share speculation has been quite brisk, since our last. Up to Tuesday noon, it ran severely against the operators for a rise, and decidedly lower prices were made on nearly all the list. The subsequent dealings were on a very confident basis at a notable improvement in current values; the market closing up very buoyantly and actively.

General business has been on a moderate scale, since our last. Breadstuffs have been firmer, and in lively request. Provisions have been less buoyant. Cotton has been plenty, and heavy at reduced figures closing with middling grades on Wednesday at 23@24½ cents per lb. as extremes. The stock of cotton now here is estimated at about 37,500 bales. The receipts at the port this week, have averaged about 1,200 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from September 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales last year; estimated stock at close of year, 80,296 bales, against 253,000 bales same time last year. Beeves have been in fairly active demand at the live stock markets, this week, at a range of from 10@17cts. per lb.; veal calves, at 8½@12½, and sheep at 5¼@8½c. per lb. Swine were plenty and heavy, at 6@8c. per lb., all live weight. The week's receipts include 7,807 beeves, 1,696 veal calves, 30,278 sheep and lambs, and 30,815 swine. At the auction sale of Scranton coal on Wednesday, 75,000 tons were disposed of at rather lower prices, ranging from $3.45@$4.75 per ton of 2,240 lbs. deliverable at Elizabethport, N. J. Also 10,000 tons at from $2.05@$3.20 per long ton, deliverable at Washington, N. J. Foreign merchandise has been in active request, and for seasonable articles remunerative prices have been realized, inquiry for dry goods has been somewhat less animated, than it was through the preceding week. The total imports of foreign dry goods, last week, were $1,846,197, and the total amount marketed $2,327,505. The value of foreign merchandise imported last week, was $2,880,218—making the grand total specie value of last week's imports of dry goods and merchandise, $4,726,415, and since Jan. 1, 1867, $185,896,305, against $221,884,297 same time in the preceding fiscal year. The ocean freight market has been moderately active, since our last, closing less firmly with 527 vessels of all classes in port. For Liverpool we quote flour at 1s. 9d. per bbl.; grain at 5½c.@6d. per bushel; cotton at ⅛d. per lb.; and heavy goods at 15s.@25s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 11.	Sept. 18.	Sept. 25.
Consols	94⅜	94⅛	94 7/16
U. S. 5-20's of 1862	73	72⅞	73
Erie	44½	44¼	41¼
Ill. Central	77	77⅛	77¼

The New York exports, exclusive of specie, for the week ending Sept. 24, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$3,335,610	$3,425,523
Prev. reported	139,950,607	130,146,817
Since January 1	$143,286,217	$133,572,340

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,462,663	$1,846,197
Gen. merchandise	8,028,249	2,880,218
Total for the week	$5,490,912	$4,726,415
Previously reported	216,393,385	181,169,890
Since January 1	$221,884,297	$185,896,305

The balance in the Sub-Treasury on Wednesday was $122,029,649 57.

St. Louis and Iron Mountain Railroad.

The St. Louis and Iron Mountain Railroad Company offer for sale a limited amount of their First Mortgage Bonds bearing seven per cent. interest payable semi-annually, the proceeds of which are to be expended in completing their line to the Mississippi river at the terminus of the Mobile and Ohio Railroad, twenty miles below Cairo. This road has for some years been in successful operation from St. Louis to Pilot Knob, with a branch to Potosi, and its local traffic alone, consisting of lead, iron, barytes, lumber, wood, cattle, with its mail, express and passenger business, affords a net profit sufficient to meet the interest on the loan asked for, to which a large through business will be added on completion. St. Louis has a population of two hundred and twenty thousand, and this road completed, will give her a direct and continuous connection with the southern states, and facilitate and increase the large commerce between them.

Transcontinental Railway.

Advices from Nicaragua and Costa Rica report that the Transcontinental Railroad project was again attracting attention. A representative of the house of Keith & Co., contractors for the section of the road between Lemon and Penare, had arrived at San Jose. A party of engineers were expected from New York to join in carrying out a complete survey of the route. Messrs. Keith & Co. express a highly favorable opinion as to the practicability of the projected road from Punta Arenas to the capital. The government and people strongly favor it, and hope the Americans who have it in charge will beat the English Railway projectors in Nicaragua.

Railroads in Arkansas.

The Arkansas *Gazette* notices the arrival at Little Rock of A. Pisson, Paris; Maj. Buel and J. C. Prescot, St. Louis; and E. A. Protois and Leonard Haskell, New York. The former gentleman is a civil engineer who has been sent to America by the French Government to investigate our railroad system and report upon mechanical improvements connected therewith. Messrs. Buel and Prescot are large contractors, and they contemplate contracting for the building of the Pine Bluff Branch of the M. & L. R. R. R. The two latter gentlemen represent the interests of Fremont and are looking after the Memphis, El Paso and Guyamas road.

Foreign Trade of the United States.

The Bureau of Statistics in the Treasury Department at Washington has compiled the figures of the foreign trade of the United States for the late fiscal year ending June 30, 1867, from which we have prepared the following statement:

FOREIGN MERCHANDISE MOVEMENT.

Imported—free of duty		$39,464,710
" paying duty		372,768,413
Total		$412,233,123
Less gold and silver	$22,264,285	
Less goods re-exported	20,732,990	
		42,997,275
Total (including goods in bonds)		$369,235,848

SPECIE MOVEMENT.

Foreign gold and silver imported		$22,264,285
Exported from Atlantic ports	$41,655,571	
And from Pacific ports	13,460,813	
		55,116,384
Net outgo of precious metals		$32,852,099
June 30, 1866, imported	$10,329,156	
Exported same year	86,044,071	
		75,714,915
Falling off in net specie outgo		$42,862,816

DOMESTIC PRODUCE MOVEMENT.

Currency values exported	$374,918,667
Reduced to gold, Atlantic ports	$268,553,949
Gold values from Pacific ports	10,803,783
Total gold value	$279,357,732

RESULTING TRADE BALANCES.

Import of merchandise, gold value		$369,235,848
Produce export, gold value	$279,357,732	
Net outgo of specie	32,852,099	
		312,209,831
Difference against United States		$57,026,017
Value of goods left in bond		$45,070,780
Left over close of previous year		45,409,995

☞ Work on the Macon and Warrenton Railroad is proceeding favorably. The Milledgeville *Union* thinks it will be completed to that point by the middle of November.

☞ The Lynchburg and Danville Railroad has been located for twenty miles from Lynchburg, and the location will shortly be completed to Staunton River.

☞ The Central Pacific Railroad is graded to the Nevada line. Workmen have moved further east.

Railroad Earnings.—Weekly.

The earnings of the St. Louis, Alton and Terre Haute Railroad for the 2d week in September, 1867, were $51,447 02
Corresponding week of previous year. 48,979 91

Increase $2,467 11

The earnings of the Michigan Central Railroad for the 2d week in Sept., 1867, were . $110,402 60
Corresponding week of previous year.. 92,647 91

Decrease $17,754 69

The earnings of the Atlantic and Great Western Railway for the second week in Sept., 1867, were $113,729 00
Corresponding week previous year... 166,635 00

Decrease..... $52,906 00

The earnings of the Western Union Railroad for the 2d week in Sept., 1867 ..... $30,415 31
Corresponding week previous year.... 19,154 35

Increase $11,260 96

The earnings of the Marietta and Cincinnati Railroad the 2d week in Sept., 1867 .. $29,700 00
Corresponding week previous year.... 26,384 00

Increase $3,316 00

The earnings of the Detroit and Milwaukee Railroad for the week ending September 19, 1867, were $43,362 00
Corresponding week of 1866..... 41,409 00

Increase..... $1,953 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Sept. 1867, were $122,218 00
Corresponding week of 1866 ..... 107,369 00

Increase $14,849 00

The earnings of the Chicago and Northwestern Railroad for 3d week in Sept., 1867.. $352,362 75
Corresponding week previous year .. 231,678 22

Increase $120,684 53

The earnings of the Toledo, Wabash and Western Railroad for the 1st, 2d and 3d weeks in September have been as follows:

	1st week.	2d week.	3d week.
1867.....	$84,575 07	$93,676 80	$90,959 67
1866.....	88,601 58	83,166 44	77,991 51
Decrease..	$4,026 51	.....	.....
Increase ..	.....	$10,510 36	$12,968 16

The earnings of the Chicago and Alton Railroad for the second week in Sept., 1867, were $103,502 58
Corresponding period previous year.. 85,882 58

Increase..... $17,620 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in Sept., 1867, were $145,500 00
Corresponding week of previous year.. 90,943 00

Increase..... $54,557 00

The earnings of the Virginia and Tennessee Railroad for the second week of Sept., were $23,122, an increase of $3,141 on the same week last year. Total for the fiscal year commencing 1st of July, $185,486, an increase of $46,989 on same time in 1866.

☞ The Colombian Government has extended the Panama Railroad Company's franchise for 99 years, for a consideration of $1,000,000 cash, gold, and annual payments of $250,000 from date.

Journal of Railroad Law.

LIABILITY FOR FIRE, COMMUNICATED BY DEFECTIVE ENGINE.—DAMAGES, WHEN TOO REMOTE.

We give this week the case of Ryan *vs.* The N. Y. Central Railroad Company, lately decided by the Court of Appeals of this State. The facts are these: On the 15th day of July, 1854, in the City of Syracuse, the defendant, by the careless management, or through the insufficient condition of one of its engines, set fire to its woodshed and a large quantity of wood therein. The plaintiff's house situated at a distance of one hundred and thirty feet from the shed soon took fire from the heat and sparks, and was entirely consumed notwithstanding diligent efforts were made to save it. A number of other houses were also burned by the spreading of the fire. The plaintiff brings this action to recover from the railroad company the value of this building thus destroyed. The Judge at the Circuit Court non-suited the plaintiff, and the General Term of the fifth district affirmed the judgment.

HUNT, J.—The question may be thus stated. A house in a populous city takes fire through the negligence of the owner or his servant, the flames extend to and destroy an adjacent building. Is the owner of the first building liable to the second owner for the damage sustained by such burning? It is a general principle that every person is liable for the consequences of his own acts. He is thus liable in damages for the proximate result of his own acts, but not for remote damages. It is not easy at all times to determine what are proximate and what are remote damages. In Thomas *vs.* Winchester, (2 Seld., 408,) Judge Ruggles defines the damages for which a party is liable as those which are the natural or necessary consequences of his acts. Thus the owner of a loaded gun, who puts it into the hands of a child, by whose indiscretion it is discharged, is liable for the injury sustained by a third person from such discharge, (5 Maule and Sel., 198.) The injury is the natural result of the folly of placing a loaded gun in the hands of one ignorant of the manner of using it, and incapable of appreciating its effects. The owner of a horse and cart who leaves them unattended in the street, is liable for an injury done to a person or his property by the running away of the horse. Lynch *vs.* Nurdin, 1 Adol. and Ellis, U. S., 29. Illidge *vs.* Goodin, 5 Car. and P., 190, for the same reason. The injury is the natural result of the negligence. If the party thus injured had, however, by the delay or confinement from his injury, been prevented from completing a valuable contract from which he expected to make large profits, he could not recover such profits from the negligent party in the cases supposed. Such damages would not be the necessary or natural consequences, nor the results ordinarily to be anticipated from the negligence committed, (6 Hill, 522, 18 Wend., 601; 3 E. D. Smith, 144.) So if an engineer upon a steamboat or locomotive in passing the house of A, so carelessly manages its machinery that the coals and sparks from its fires fall upon and consume the house of A, the railroad company or the steamboat proprietors are liable to pay the value of the property thus destroyed. (Field *vs.* New York Central Railroad Company, 32 N. Y., 339.) Thus far the law is settled and the principal is apparent. If, however, the fire communicates from the house of A to that of B, and that is destroyed, is the negligent party liable for his loss. And if it spreads thence to the house of C, and thence to the house of D, and thence consecutively through the other houses until it reaches the house of Z, is the party liable to pay the damages sustained by these twenty-four sufferers? The counsel for the plaintiff does not distinctly claim this, and I think it would not be seriously insisted that the sufferers could recover in such case. When there is the principal upon which A recovers and Z fails. It has been suggested that an important element exists between an intentional firing and a negligent firing merely, that when a party designedly fires his own house or his own fallow land, not intending, however, to do any injury to his neighbor, but a damage actually results, that he may be liable for more extended damages than where the fire originated in accident or negligence. It is true that the most of the cases where the liability was *held to exist* were cases of an intentional firing. The case, however, of Vaughan *vs.* Menlove, (32 Eng. c. e., 613,) was that of a spontaneous combustion of a hay-rick. The rick was burned, the owners buildings were destroyed, and thence the fire spread to the plaintiff's cottage which was also consumed. The defendant was held liable. Without deciding upon the importance of this distinction, I prefer to place my opinion upon the ground, that in the one case, to wit., the destruction of the building upon which the sparks were thrown by the negligent act of the party sought to be charged, the result was to have been anticipated the moment the fire was communicated to the building, that its destruction was the ordinary and natural result of its being fired. In the second, third or twenty-fourth case as supposed, the destruction of the building was not a natural and expected result of its first firing. That a building upon which sparks and cinders fall should be destroyed or seriously injured must be expected, but that the fire should spread and other buildings be consumed, is not a necessary or a usual result. That it is possible, and that it is not unfrequent cannot be denied. The result, however, depends not upon any necessity of a further communication of the fire, but upon a concurrence of accidental circumstances, such as the degree of the heat, the state of the atmosphere, the condition and materials of the adjoining structures and the direction of the wind. These are accidental and varying circumstances. The party has no control over them, and is not responsible for their effects. My opinion therefore, is that this action cannot be sustained, for the reason that the damages incurred are not the immediate but the remote result of the negligence of the defendants. The immediate result was the destruction of their own wood and sheds, beyond that it was remote. In Guille *vs.* Sawan (19 Johns, 381,) the defendants' balloon descended into the plaintiff's garden, and a crowd of people rushing in to relieve him, as well as from motives of curiosity, trod down the plaintiff's vegetables and flowers. For the injury done by himself, as well as by the crowd the defendant was held to be answerable. He was held to have substantially requested the presence of the crowd there, and therefore to have been re-

sponsible for the result of their action. Without determining its effect, it will be observed that the fact exists in each of these cases, that the first act or impulse was voluntary and intentional on the part of the defendant. Scott intentionally drew his squib, Vanderburgh intentionally drove the negro boy, and Swan intentionally descended into the plaintiff's garden, and invoked the aid of the multitude. In each case too, the result was deemed by the Court, to be the inevitable consequence of the original unlawful and improper act. There would seem to be no inconsistency in principle between either of these cases, and the conclusion already announced in the present case whether the principle has been always correctly applied, it is not necessary to determine. That the defendant is not liable in this action, may also be strongly argued, from the circumstance that no such action as the present has ever been sustained in any of the Courts of this country, although the occasion for it has been frequent and pressing. Particular instances are familiar to all, where such claims might have been made with propriety. The instance of the Harpers occurring a few years ago is a striking one, (23 N. Y., 441.) Their large printing establishment in the City of New York, was destroyed by the gross carelessness of a workman in throwing a lighted match into a vat of camphene, the fire extended to other buildings and much other property was destroyed. The Harpers Brothers were gentlemen, and able to respond in damages to the extent of their liability. Yet we have no report in the books, and no tradition of an action brought against them to recover such damages. The novelty of the claim, as was said by Judge Beardsley in Costigan *vs.* M. & H. R. R. Co., where the occasion for its being made had been so common, is a strong argument against its validity, (2 Denio, 609. In the People *vs.* Clark (10 Barb., 143,) Judge Cady says, the fact that the plaintiffs have never before this commenced an action to vacate a grant made by the King, because it was made upon false suggestions, furnishes strong evidence that the plaintiffs never had a right to bring such an action. It was Littleton's rule "what never was never ought to be," (1 Ver., 385.) To sustain such claims as the present, and to follow the same to its legitimate consequences, would subject to a liability against which no prudence could guard, and to meet which no private fortune would be adequate. Nearly all fires are caused by negligence in its extended sense. In a country where wood, coal, gas and oil are universally used, where men are crowded into cities and villages, where servants are employed, and where children find their home in all houses, it is impossible that the most vigilant prudence should guard against the occurrence of accidental or negligent fires. A man may insure his own house or his own furniture, but he cannot insure his neighbor's building or furniture, for the reason that he has no interest in them. To hold that the owner must not only meet his own loss by fire, but that he must guarantee the security of his neighbors on both sides, and to an unlimited extent, would be to create a liability which would be the destruction of all civilized society. No community could long exist under the operation of such a principle. In a commercial country each man, to some extent runs the hazard of his neighbor's conduct, and each by insurance against such hazard, is enabled to obtain a reasonable security against loss.

To neglect such precaution and to call upon his neighbor on whose premises the fire originated, to indemnify him instead, would be to award a punishment quite beyond the offence committed. It is to be considered also, that if the negligent party is liable to the owner of a remote building thus consumed, he would also be liable to the insurance companies, who should pay losses to such remote owners. The principle of subrogation would entitle the companies to the benefit of every claim held by the party to whom a loss should be paid. In deciding this case, I have examined the authorities cited from the year books, and have not overlooked the English statues on the subject, or the English decisions extending back for many years. It will not be useful further to refer to these authorities, and it will be impossible to reconcile some of them with the view I have taken. The remoteness of the damage in my judgment forms the true rule on which the question should be decided, and which prohibits a recovery by the plaintiff in this case.

Judgment should be affirmed.

Pennsylvania Railroad.

At a meeting of the directors of this company, held in Philadelphia on the 4th inst., the following preamble and resolution was adopted:

Whereas, numerous applications have been made to this company from the holders of the first and second mortgage coupon bonds to convert the same into the registered general mortgage bonds, dated July 1, 1867; therefore be it

Resolved, That the Treasurer be and he is hereby instructed to cause public notice to be given that this company is now prepared to exchange its registered bonds, secured by a general mortgage upon the line from Philadelphia to Pittsburg, of the estate, real and personal, and corporate franchises therein mentioned, dated July 1, 1867, for the first and second mortgage coupon bonds of said company, on the road between Harrisburg and Pittsburg.

☞ The New Haven *Register* says that the Air Line Railroad has been surveyed from New Haven to Middletown during the past few weeks, by General Terrell of New York. His route is twenty one miles long, and can be built for $600,000 (he says), not including the right of way and the portion already built. Responsible parties from New York went over the route last week with General Terrell, and they say that they can build the road and have it in running order in six months.

☞ The Grant County *Witness* says that work has commenced on the Dubuque, Platteville and Milwaukee Railroad at Calamine. The work will be pushed through vigorously in order to complete eight miles of road by the first of January.

TO IRON FOUNDERS.

BY USING THE WASTE HEAT FROM A CUpola Furnace, connected with a Harrison Boiler, a saving of the entire cost of fuel for the blast can be guaranteed.

As thus applied, it may be seen daily in operation from 2 to 5 o'clock, p. m., at the Harrison Boiler Works, Gray's Ferry Road, Philadelphia, Pa.

NOTICE TO CONTRACTORS.

LYNCHBURG AND DANVILLE RAILROAD,
CHIEF ENGINEER'S OFFICE,
LYNCHBURG, July 12, 1867.

At a meeting of the Board of Directors of the Lynchburg and Danville Railroad Company, held at the office of the Company on the 11th day of July, 1867, it was ordered that the Chief Engineer be directed to proceed at once to locate the road on the route adopted, near Pittsylvania Court House, and that he advertise FOR SEALED PROPOSALS for the construction of Twenty-five miles of the road, (from Lynchburg to Staunton River,) including Staunton River Bridge, near the Pocket Ford. Said proposals to be opened and examined on the FIRST DAY OF NOVEMBER, 1867. And that he prepare, as soon as practicable, before the FIRST OF NOVEMBER, plans, profiles and specifications of the work for the inspection and information of all persons concerned.

In obedience to the above order, on and after the 15th day of October next, plans, profiles and specifications of the Work will be open for inspection at this office.

Sealed proposals to be addressed to the undersigned,

WM. W. BLACKFORD,
6t38 Chief Engineer

FIRST MORTGAGE BONDS.

ST. LOUIS AND IRON MOUNTAIN

RAILROAD COMPANY.

Seven Per Cent. Interest, Payable February and August.

These Bonds cover a Road of 91 miles, finished from St. Louis to Pilot Knob, and in first-class order, and an extension of about the same length from Pilot Knob to Belmont, now rapidly constructing, for which the proceeds of these bonds are to be used, making a through route from Saint Louis to New Orleans by rail.

The earnings of the 91 miles are $600,000 a year; the net profits now are sufficient to pay the interest on the entire amount of bonds, were they all issued.

The basis of security is believed to be beyond that of any other bonds now offered.

Apply at the Office of the Company, No. 43 Wall st., to H. G. MARQUAND, Vice-President,
Or to CLARK, DODGE, & CO.,

ACROSS THE SIERRA NEVADAS.

THE

CENTRAL PACIFIC RAILROAD,

THE WESTERN HALF OF THE

GREAT NATIONAL TRUNK LINE

Across the Continent,

Being constructed WITH THE AID AND SUPERVISION OF THE UNITED STATES GOVERNMENT, is destined to be one of the most important lines of communication in the world; as it is the only link between the *Pacific Coast and the Great Interior Basin*, over which the immense Overland travel must pass, and the

Principal Portion of the Main Stem Line between the two Oceans.

Its line extends from Sacramento, on the tidal waters of the Pacific, eastward across the richest and most populous parts of California, Nevada and Utah, contiguous to all the great Mining Regions of the Far West, and will meet and connect with the roads now building east of the Rocky Mountains. About 300 miles are now built, equipped and in running operation to the summit of the Sierra Nevada. Within a few days 35 miles, now graded, will be added, and the track carried entirely across the mountains to a point in the Great Salt Lake Valley, whence further progress will be easy and rapid. Iron, materials and equipment are ready at hand for 390 miles of road, and **10,000** men are employed in the construction.

The local business upon the completed portion surpasses all previous estimates. The figures for the quarter ending August 31 are as follows in GOLD:

Gross Earnings,	Operating Expenses,	Net Earnings,
$487,579 64	$86,543 47	$401,031 17

or at the rate of two millions per annum, of which more than three-fourths are net profit on less than 100 miles worked. This is upon the actual, legitimate traffic of the road, with its terminus in the mountains, and with only the normal ratio of government transportation, and is exclusive of the materials carried for the further extension of the road.

The Company's interest liabilities during the same period were less than $35,000.

Add to this an ever-expanding through traffic and the proportions of the future business become immense.

The Company are authorized to continue their line eastward until it shall meet and connect with the roads now building east of the Rocky Mountain ranges. Assuming that they will build and control half the entire distance between San Francisco and the Missouri River, as now seems probable, the United States will have invested in the completion of **883** miles $28,582,000, or at the average rate of $35,000 per mile—not including an absolute grant of **10,000,000** acres of the Public lands. By becoming a joint investor in the magnificent enterprise, and by waiving its first lien in favor of the First Mortgage Bondholders, THE GENERAL GOVERNMENT, IN EFFECT, INVITES THE CO-OPERATION OF PRIVATE CAPITALISTS, and has carefully guarded their interests against all ordinary contingencies.

The Company offer for sale, through us, their

First Mortgage Thirty-Year Six Per Cent. Coupon Bonds,

Principal and Interest Payable in Gold Coin,

in New York City. They are in sums of $1,000 each, with semi-annual gold coupons attached, and are selling for the present at **95** per cent. and accrued interest from July 1st added, in currency, at which rate they yield nearly

Nine Per Cent. upon the Investment.

These Bonds, authorized by act of Congress, are issued only as the work progresses, and to the same amount only as the Bonds granted by the Government; and represent in all cases the first lien upon a completed, equipped and productive railroad, in which have been invested Government subsidies, Stock subscriptions, donations, surplus earnings, etc., and which is worth more than three times the amount of First Mortgage Bonds which can be issued upon it.

The Central Pacific First Mortgage Bonds have all the assurances, sanctions and guaranties of the Pacific Railroad Act of Congress, and have in addition several noticeable advantages over all other classes of railroad bonds.

First—They are the superior claim upon altogether the most vital and valuable portion of the through line.
Second—Beside the fullest benefit of the government subsidy, (which is a subordinate lien,) the road receives the benefit of large donations from California.
Third—Fully half the whole cost of grading 800 miles eastward of San Francisco is concentrated upon the 150 miles now about completed.
Fourth—A local business already yielding three-fold the annual interest liabilities, with advantageous rates payable in coin.
Fifth—The principal as well as the interest of its Bonds being payable in coin, upon a legally binding agreement.

Having carefully investigated the resources and prospects of the Road, and the management of the Company's affairs, we cordially recommend these Bonds to Trustees, Executors, Institutions and others as an eminently *sound, reliable and remunerative form of permanent investment.*

CONVERSIONS OF GOVERNMENT SECURITIES INTO

CENTRAL PACIFIC FIRST MORTGAGE BONDS,

now *realize for the holders from*

Twelve to Eighteen per Cent. Advantage,

WITH THE SAME RATE OF INTEREST.

IRON MANUFACTURE

OF GREAT BRITAIN.

Theoretically and Practically Considered, Including Descriptive Details of the Ores, Fuels, and Fluxes employed, the Preliminary Operation of Calcination, the Blast, Refining, the Puddling Furnaces, Engines, and Machinery, and the various Processes in Union, etc., etc. By W. TRURAN. Second Edition. Revised from the Manuscripts of the late Mr. Truran, by J. ARTHUR PHILLIPS, Author of "A Manual of Metallurgy," and WM. H. DORMAN, C. E. 1 vol., large 8vo. Illustrated with 84 Plates. Price, $10 00.

Mr. Truran's work is really the only one deserving the name of a treatise upon and text-book of the Iron Manufacture of the kingdom. It gives a most comprehensive and minute exposition of present practice, if the term may be applied to iron manufacture as distinguished from strictly professional subjects. The author does not go out of his way to theorize upon how iron should be or may be made, but he describes how it is made in all the iron districts of the kingdom.—*Engineer.* 4t37

THE UNION PACIFIC RAIL ROAD CO.

THEIR FIRST MORTGAGE BONDS

As an Investment.

THE rapid progress of the Union Pacific Railroad, now building west from Omaha, Nebraska, and forming, with its western connections, an unbroken line across the continent, attracts attention to the value of the First Mortgage Bonds which the Company now offer to the public. The first question asked by prudent investors is, "Are these bonds secure?" Next, "Are they a profitable investment?" To reply in brief:

1st. The early completion of the whole great line to the Pacific is as certain as any future business event can be. The Government grant of over twenty million acres of land and fifty million dollars in its own bonds practically guarantees it. One fourth of the work is already done, and the track continues to be laid at the rate of two miles a day.

2d. The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of railroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and being without competition, it can maintain remunerative rates.

3d. 425 miles of this road are finished, and fully equipped with depots, locomotives, cars, &c., and two trains are daily running each way. The materials for the remaining 93 miles to the eastern base of the Rocky Mountains are on hand, and it is under contract to be done in September.

4th. The net earnings of the sections already finished are *several times greater* than the gold interest upon the First Mortgage Bonds upon such sections, and if not another mile of the road were built, the part already completed would not only pay interest and expenses, but be profitable to the Company.

5th. The Union Pacific Railroad bonds can be issued only as the road progresses, and therefore can never be in the market unless they represent a *bona fide* property.

6th. Their amount is strictly limited by law to a sum equal to what is granted by the U. S. Government, and for which it takes a *second* lien as its security. This amount upon the first 517 miles west from Omaha is only $16,000 per mile.

7th. The fact that the U. S. Government considers a second lien upon the road a good investment, and that some of the shrewdest railroad builders of the country have already paid in five million dollars upon the stock (which is to them a third lien), may well inspire confidence in a first lien.

8th. Although it is not claimed that there can be any better securities than Governments, there are parties who consider a first mortgage upon such a property as this the very best security in the world, and who sell their Governments to re-invest in these bonds—thus securing a greater interest.

9th. As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accrued interest, they are the cheapest security in the market, being more than 15 per cent. less than U. S. Stocks.

10th. At the current rate of premium on gold, they pay

Over Nine per Cent. Interest.

The daily subscriptions are already large, and they will continue to be received in New York by the

CONTINENTAL NATIONAL BANK, No. 7 Nassau St.,
CLARK, DODGE & CO., BANKERS, No. 51 Wall St.,
JOHN J. CISCO & SON, BANKERS, No. 33 Wall St.,
HENRY CLEWS & CO., BANKERS, No. 32 Wall St.,
HEDDEN, WINCHESTER & CO., BANKERS, No. 69 B'y,

and by BANKS AND BANKERS generally throughout the United States, of whom maps and descriptive pamphlets may be obtained. They will also be sent by mail from the Company's Office, No. 20 Nassau Street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

JOHN J. CISCO, *Treasurer,*
NEW YORK.

THE ELNATHAN SAMPSON

NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.

Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

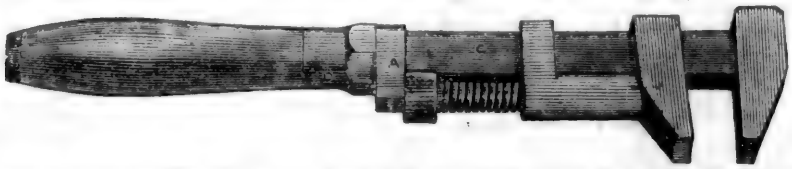
Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

MEAD RUBBER COMPANY,

12 Vesey Street, New York.

MANUFACTURERS OF



INDIA RUBBER CAR SPRINGS AND STEAM PACKING.

Our Works being now under the management of a competent Superintendent, we are prepared to offer Springs of various qualities and prices to suit. Our A No. 1 Spring made of fine Para Rubber, and the Compound used by the Patentee, the late Fowler M. Ray, will be found to be cheaper than others made, from inferior stock and offered at lower prices.

Sample setts forwarded on application. All Springs fully warranted.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

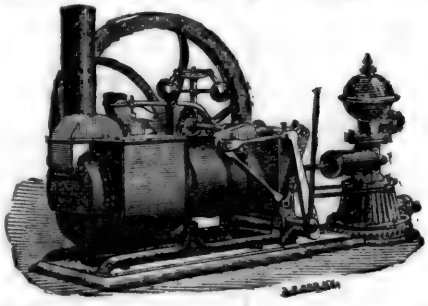
COLLINS & CO., 212 Water Street, New York.

EDWARD CLARKE,

STOCK BROKER.

Stocks, Bonds and Government Securities bought and sold on commission.

No. 26 Broad St., New York.



SHIP FELT, CARPET FELT, BOILER FELT.

THE very superior Felt, manufactured by the Lowell Felting Mills, can now be furnished in quantities to suit purchasers, from the new and extensive mills now completed. Also, pipe, truss, upholstery and all other Felts. Apply to the branch office of the Company.

EDW. F. DAVISON, 128 Pearl St.

ERICSSON

Caloric Pumping Engines.

FOR economy, durability, and efficiency unequalled. Have been in use on the Erie, Central, Hudson River, Harlem and other roads for eight years. Recommended by all Superintendents in the highest terms.

Machinist's Tools.

Mr. Lucius W. Pond is one of the pioneers in the manufacture of Machinist's Tools as a specialty, and he has for 20 years supplied, through dealers in this and other cities, tools of all sizes for machinist's uses, to parties who are not aware of the locality of the manufacturer. He has recently opened a warehouse at 85 Liberty street, and supplied himself with steam power where purchasers can see samples of his smaller tools in operation, while numerous specimens of larger ones can be seen in the city and immediate vicinity.

The Smith and Sayre Manufacturing Co., have recently fitted out their works in Jersey City with his tools, which were supplied through his former agents, Messrs. G. & C. Place, of this city; among them are, a planer capable of planing 12 feet long by 5 feet wide, and a 6½ feet swing driver lathe, with compound rest cross feed, geared in the most approved manner; and screw cutting apparatus, together with all recent devices that are desirable in such a machine; a 36 inch swing lathe, which is a very heavy and substantial tool, with compound and rest cross feed; and several smaller machines of his build.

In the Naval Constructor's Department of the Brooklyn Navy Yard, and in the new iron building of J. B. & W. W. Cornell, 139 Centre street, may also be seen his large planers in operation. In the latter works one with double head, each head being supplied with independent cross, down and angular feed. Messrs. Hicks & Hale of 85 Liberty st., manufacturers of Hicks' Engine, are now putting in one of these 5 feet wide planers of a more recent pattern, with improved double head.

Those in want of machinery of this class would do well to call and examine these specimens before selecting elsewhere, as they are produced at the works in Worcester, Mass., under the most favorable circumstances of thorough division of labor, by workmen long accustomed to working on these specialties, and they can thus be sold at the minimum prices of first class machinery.

Mr. Pond is also sole manufacturer of the Taft's Patent Rolling Lever Punches and Shears, now so extensively sold by all dealers in railroad supplies, and, used in almost all the railroad repair shops in the country, as well as by mechanics in all other branches of metal work.

He sells also Cushman's new Patent Turbine Water Wheel, which is unrivalled, (as an Hydraulic motor,) for power, simplicity and cheapness.

Boston and Albany Railroad.

The directors of the Western and Boston and Worcester Railroad corporations are unable to agree upon the terms of consolidation, but as both corporations have voted to unite under the act of the last Legislature, the union is virtually accomplished, and will date from the 1st of December. The Boston *Journal* says that the points at issue between the two boards relate to the value of the two roads, and as there is a wide difference upon this important subject, the provision of the act which authorizes the Supreme Court to appoint three Commissioners to make a final decision will be invoked, and the relative value of the two stocks will thus be held in abeyance for some months to come. It would seem that the two Boards, who are well posted regarding the real worth of the roads, ought to be able to figure out the actual condition of the roads and then reduce it to dollars and cents, but as they are a million dollars or more apart we presume that commissioners will be called upon to investigate and decide after long and frequent hearings. It will be no easy task to find the right men to make the decision, and as they must be entirely disinterested, gentlemen versed in railroad affairs who live in other States will probably be selected.

Chesapeake and Ohio Canal.

The new board of directors of this company met at Washington on the 25th and adjourned on the 28th ult. There were present Colonel Spates (President,) and Messrs. Esau Pickrell, of Georgetown; John B. Thomas, of Frederick, Md.; Joseph Murray, of Washington County, Md.; Wm. Viers Bouic, of Montgomery County, Md., and John H. Barnes, of Baltimore. Absent, Mr. A. K. Stake. The Washington *Star* says that the new Board harmonize well as to the various projects for the improvement of the canal, and find but little fault with the official management of the work. Among other business transacted, the office of general superintendent of the canal was created, and Alfred Spates, of Maryland, was appointed to that position. No changes in the offices or employees of the canal were made. The question of an increase of water in the canal was discussed, and the superintendent was directed immediately to raise dam No. 1, above Georgetown, so as to enlarge the volume of water in the Georgetown level, which is now insufficient to meet the demands for navigation, and the supply of the flour mills and factories, which get their motive power from this source.

Uniform for Railroad Employees.

The New York Central R. R. Co. has, in accordance with the law passed at the last session of the Legislature, instructed its train hands to procure their uniforms. The coat and pants will be of dark blue pilot, beaver or broadcloth, the coat trimmed with brass buttons. The cap will be of blue cloth, with two bands of gold lace, the lower band to be an inch and a half in width. The brakemen will probably wear a regulation cap only for the present. It has not yet been decided to uniform station men and other employees of the road.

Illinois Railroads.

A correspondent of the N. Y. *Times*, writing from Chicago under date of Sept. 27th, says:

A new railroad was opened in this State last week. It strikes off from the Chicago, Alton and St. Louis at Bloomington, and after making a westing of between twenty and thirty miles, runs nearly parallel with it for about one hundred and fifty miles, and there intersects it again at Monticello, near Alton, some twenty-eight miles from St. Louis. It traverses one of the richest and best cultivated sections of the State, and affords an outlet either to St. Louis or Chicago for a vast amount of grain and thousands of cattle and hogs. It will be principally a freight road, the travel being mostly local.

Another line of considerable importance is being pushed forward in the northwestern part of the State. It is to run from Rock Island in a northeast direction, to near the northern State line. An important article in its traffic will be the products of the coal fields in the regions roundabout Rock Island. And still another is creeping up the valley of the Fox River from the coal fields of the centre of the State. This is also designed as a coal and grain road. It passes through—or is to pass through—several important towns, Ottawa, Aurora, &c.

Contemplated Coal Railroad.

The President and Superintendent of the Cumberland Valley Railroad recently visited Williamsport, Md., with a view to ascertain its adaptability to the establishmont of a coal basin and depot in the event of the extension of the Cumberland Valley Railroad to the canal now in contemplation. The Hagerstown *Mail* says that the visit proved entirely satisfactory, adding that the immediate object of the proposed extension is the procurement of Cumberland coal for steam purposes and that the whole locomotive system of the Pennsylvania network of railroads will be fed from the mines of this region as soon as the little link of six miles between Hagerstown and Williamsport shall be completed. Ultimately it is designed to make it a great coal road, and by means of hoppers in the canal boats enable boats to be conveyed from Cumberland to New York without breaking bulk.

Cleveland and Pittsburgh Railroad.

The earnings of this road for the years ending November 30, 1865 and 1866, have been as follows:

	1865.	1866.
From freight	$1,569,584 06	$1,498,631 56
" passengers	1,029,065 60	788,922 77
" miscellaneous.	97,727 86	64,351 50
	$2,696,377 52	$2,351,905 83
Expenses, viz:		
Motive power & cars.	$758,368 98	$627,880 03
Maintenance of way & structures	551,416 19	494,567 48
Transportation exp	412,612 11	369,874 29
General expenses	237,186 28	204,857 67
	$1,959,583 56	$1,697,179 47
Earnings less exp.	$736,793 96	$654,726 36
Add surplus earnings P., Ft. W. & C. R.W.	148,113 43	256,065 73
Total	$884,907 39	$910,792 09
From which there has been paid:		
Mortgage interest	$257,681 50	
Interest on notes and accounts	5,790 54	
Lease of P., Ft. W. C. R.W.	85,000 00	
	348,472 04	
Leaving as balance of the year's business		$562,320 05

which sum has been mainly appropriated to the payment of the following items:

New equipment		$124,611 63
Union depot, Cleveland		44,770 82
Other new structures and improvements		49,171 10
Settlement of Allegheny county claim		50,137 38
Notes in favor of M. W. Baldwin & Co., for three pony engines		39,058 89
Notes in favor of J. B. Livingston and others for Penn street property		80,000 00
Other indebtedness liquidated		8,485 48
Dividend of June 10th, 1866, and Government tax on same	$227,003 15	
Less amount taken from assets of the Treasurer at close of last fiscal year	100,000 00	
		127,003 15
Total		$473,238 45

It may be proper after this showing, to explain to the stockholders, especially to those not familiar with the history of this company, the reasons why it has not seemed to the directors practicable to resume the payment of regular dividends at the present time. The principal reason is the great increase of the company's business, for the proper performance of which large outlays have been made necessary. Nine years ago the company failed, and after struggling with many embarrassments, was finally, in the year 1860, placed in the hands of a receiver, by the order of the United States Court. In this condition it struggled on, liquidating and compromising its liabilities, but without means to increase its facilities for business. Three and one half years ago the road was again put into the hands of the stockholders, with some old claims still hanging over the company, amounting in the aggregate to a large sum, and with a railway and equipment which had been strained to its utmost in the attempt to perform the business which was offering.

When it is considered that since June, 1863, the business of the company has nearly doubled, some idea may be formed of the outlay which this great increase of traffic has made necessary.

During this period there have been bought—

20 new engines	$414,600 66
7 passenger and 2 baggage cars	40,479 96
571 freight and coal cars	399,782 61
New iron rail has been purchased for extension of side tracks, and as a reserve for purposes of re-rolling	371,037 13

New structures have been erected and improvements made as follows:

Union depot, Cleveland	$128,779 59
Round house, machine shop and tenement houses at Wellsville	133,124 86
New buildings and improvements at Cleveland	19,085 64
Bedford Bridge	71,244 30
Allegheny Bridge extension	26,659 29
Machinery for repair shops	37,481 51

Over fifty acres of land have been purchased at Cleveland, indispensable for the vastly increasing traffic in coal and iron ore. Grounds in Pittsburgh have also been purchased and great improvements made, for the accommodation of the freight department at that point, at an aggregate expenditure of | $171,829 36
Old indebtedness has been paid amounting to | 334,014 44

In addition to all of which dividends as follows have been paid to the stockholders:

October, 1863	$155,044 00
April, 1864	159,253 00
October, 1864	161,355 00
February, 1865	212,729 25
January, 1866	215,653 00
Total	$904,034 25

The grand total of all of which items is $3,052,153 60, of which $800,000 was furnished by sale of capital stock. The balance, $2,252,153 60, being applied from the earnings of the company.

A detailed statement of the financial operations of the year just closed, in form of an account current is presented as follows:

RECEIPTS FROM ALL SOURCES.

Assets at close of 1865, as per last report		$354,144 73
Issues of capital stock and scrip		345 40
Gross earnings		2,351,905 83
Surplus earnings from Pittsburgh, Ft. Wayne and Chicago Railway.		256 065 73
Received from miscellaneous sources		3,869 21
Due on bills and pay rolls audited and warrants outstanding on November account		154,996 52
Total		$3,121,327 42

DISBURSEMENTS ON ALL ACCOUNTS.

Operating expenses		$1,697,179 47
Interest, dividends, &c.:		
Mortgage interest	$257,681 50	
Interest on notes and accounts	5,790 54	
Lease of P., Ft. W. & C. Railway track	85,000 00

Improvements at Cleveland	8,143 48	
Splices and bolts	13,299 54	
Road tenements, &c., River division—Final.	798 41	
		93,941 92
Sundry worthless accounts, charged to profit and loss		3,037 74
Assets to close:		
In hands of Treasurer	$205,579 53	
Lawrence R. R. and Tr. Co. stock	10,000 00	
Bills receivable	12,240 67	
Materials at shops	134,069 60	
Net balance due from personal accounts.	137,486 95	
		499,366 75
		$3,121,327 42

The operating expenses are 63.5 per cent. on gross earnings, and the total expenses 72 per cent.

The business of 1865 largely exceeded that of any preceding year, and the falling off in 1866, is as follows: decrease in freight, $70,952 50 in

passengers, $240,142 83; and in miscellaneous, $33,376 36—making the total decrease in receipts, $344,471 69, with a decrease in expenses of $262,-404 09, and in net earnings of $82,067 60, which would seem to be not unfavorable joined to the fact that the condition of the road bed, track and equipment was at the close of the year in really excellent condition.

The equipment of the road November 30, 1866, consisted of 68 locomotives, 31 first class and 5 second class passenger cars, 14 baggage, 9 express, and 1,245 freight, etc., cars. Miles run by passenger trains, 390,350; by freight trains, 728,-910; by wood and gravel trains, 297,801; by mixed trains on Tuscarawas Branch, 23,620—total, 1,440,681, an increase over the previous year of 10,940 miles.

The number of tons of coal transported in 1866, was 200,155; in 1865, 174,088—an increase of 26,067 tons. The tonnage of iron ore in 1866, was 89,893; in 1865, 69,431—increase, 20,462. The lumber shipments in 1866, were 24,458,789 feet; in 1865, 12,148,196 feet—increase, 12,310,-593 feet. The number of tons of useful load hauled one mile in 1866, was 70,918,104, an increase over the previous year of $9,227,804. The number of cars hauled one mile was 11,763,958, an increase of 1,938,688.

There has been no material change in the financial condition since the last Report. The present liabilities and resources of the company are as follows:

Dr.		
Construction		$8,947,354 05
Machinery and tools		69,929 94
Personal property		82,697 78

Superintendent.—J. H. DEVEREUX.

☞ The State of Virginia has sold its interest in the Alexandria, Londoun and Hampshire Railroad for $50,000.

Panama Railroad Company.

The following is a copy of the new contract recently entered into between this company and the United States of Colombia. The alterations and amendments alluded to in the decree promulgating the contract, which were made by Congress to the original document as drawn up by the Secretary of the Treasury and Col. Totten, are embodied in the translation as published below:

Contract reforming that of April 15, 1850, for the construction of a railroad from one ocean to the other across the Isthmus of Panama.
